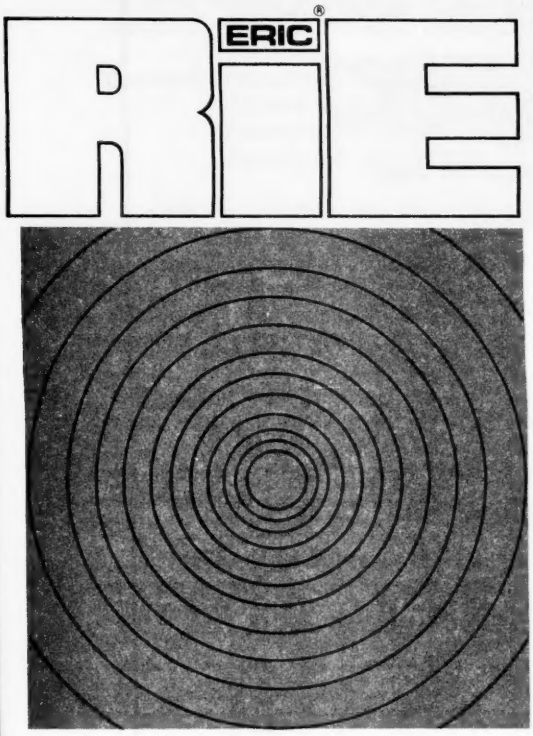
Special Announcements

PRICE CODES REPLACE SPECIFIC PRICES

Beginning with the August 1979 issue of RIE, price codes for microfiche and reproduced paper copies replace the specific dollar prices that have heretofore appeared in RIE citations. In order to determine the price for a given document, it will be necessary to go to a table or schedule that converts all price codes to dollar amounts.

The purpose behind this change is to avoid obsolete prices appearing in RIE and on the RIE magnetic tapes. In the future, when the ERIC Document Reproduction Service (EDRS) changes prices, the price codes on the file will remain the same and only the table that translates them will change.

The ERIC Price Code Schedule is noted in the Table of Contents and may be found in the "How to Order" section appearing at the back of each issue.



Material for this publication was processed for printing by ORI Incorporated under contract with the National Institute of Education. Use of funds for printing approved by the Office of Management and Budget, December 1978. Contents do not necessarily reflect official National Institute of Education policy.

Introduction

Resources in Education (RIE)——A monthly abstract journal announcing recent report literature related to the field of education, permitting the early identification and acquisition of reports of interest to the educational community.

Sponsor: Educational Resources Information Center (ERIC)
National Institute of Education (NIE)
Department of Health, Education, and Welfare
Washington, D.C. 20208

ERIC is a nationwide information network for acquiring, selecting, abstracting, indexing, storing, retrieving, and disseminating significant and timely education-related reports. It consists of a coordinating staff in Washington, D.C. and 16 Clearinghouses located at universities or with professional organizations across the country. These Clearinghouses, each responsible for a particular educational area, are an integral part of the ERIC system. The Clearinghouses are listed on the inside back cover.

Organization of Journal: *Resources in Education* is made up of resumes and indexes. The resumes provide descriptions of each document and abstracts of their content. Resumes appear in a "Document Section" and are numbered sequentially by an accession number beginning with the prefix ED (*E*RIC *D*ocument). The indexes appear in an "Index Section" and provide access to the Resumes by Subject, Personal Author, Institution, and Publication Type.

Availability of Documents: The documents cited in *Resources in Education,* except as noted, are available from the ERIC Document Reproduction Service (EDRS), in either microfiche (MF) or paper copy (PC). The price per document is based on the number of pages and is subject to change over time. An ERIC Price Code Schedule permits the user to convert all price codes to actual dollar amounts. Current price information for documents, microfiche, and subscriptions to microfiche collections, is to be found in the section entitled "How to Order ERIC Documents," in the most recent issue of RIE.

How To Submit Documents to ERIC: If you have documents which you would like to have considered for announcement in *Resources in Education (RIE),* you should send clear, legible copies (in duplicate, if possible) to the sponsor's address above.

Should the documents be copyrighted, it would be helpful if you could include a letter giving ERIC permission to reproduce in Paper Copy and Microfiche, or Microfiche only.

How To Order RIE: The U.S. Government Printing Office (GPO) prints *RIE* and functions as subscription agent. The basic domestic annual subscription price is $42.70 a year. Detailed subscription information appears on the inside front cover and on the page in the back of *RIE* entitled *"How to Subscribe to Resources in Education."*

Pub Type—Dissertations/Theses (040)

Descriptors—*Career Opportunities, Career Planning, Careers, *Demand Occupations, *Employment Opportunities, Females, Labor Force, Labor Market, *Manpower Needs, Occupational Aspiration, Occupational Guidance, Occupations, Vocational Counseling, *Working Women

Identifiers—Consortium of States, *National Occupational Competency Testing Institute, Illinois

Women's opportunities for employment will be directly related to their level of skill and experience but also to the labor market demands through the remainder of the decade. The number of workers needed for all major occupational categories is expected to increase by about one-fifth between 1970 and 1980, but the growth rate will vary by occupational group. Professional and technical workers are expected to have the highest predicted rate (39 percent), followed by service workers (35 percent), clerical workers (26 percent), sales workers (24 percent), craftsmen and foremen (20 percent), managers and administrators (15 percent), and operatives (11 percent). This publication contains a brief discussion and employment information concerning occupations for professional and technical workers, managers and administrators, skilled trades, sales workers, clerical workers, and service workers. In order for women to take advantage of increased labor market demands, employer attitudes toward working women need to change and women must: (1) receive better career planning and counseling, (2) change their career aspirations, and (3) fully utilize the sources of legal protection and assistance which are available to them. (SB)

Clearinghouse Accession Number.

Sponsoring Agency—agency responsible for initiating, funding, and managing the research project.

Report Number—assigned by originator.

Descriptive Note (pagination first).

Descriptors—subject terms which characterize substantive content. Only the major terms, preceded by an asterisk, are printed in the subject index.

Identifiers—additional identifying terms not found in the ***Thesaurus of ERIC Descriptors***. Only the major terms, preceded by an asterisk, are printed in the subject index.

Informative Abstract.

Abstractor's Initials.

Document Resumes

The document resumes in this section are arranged in numerical order by ED number, and also alphanumerically **by Clearinghouse prefix and Clearinghouse accession number.**

As explained in the Introduction, each Clearinghouse focuses on a specific aspect of education. The reader who is interested in one of these major aspects (e.g., Reading) may, however, find pertinent resumes among the entries of virtually any Clearinghouse, dependent on the orientation of the document. For this reason, it is important to consult the Subject Index if a comprehensive search is desired.

The following is a list of Clearinghouse prefixes and names used in this Section, together with the page on which each Clearinghouse's entries begin:

AA —ERIC Processing and Reference Facility	1	**JC** —Junior Colleges	135
CE —Adult, Career, and Vocational Education	1	**PS** —Elementary and Early Childhood Education	146
CG —Counseling and Personnel Services	28	**RC** —Rural Education and Small Schools	155

Identifiers—ERIC, *Resources in Education

Resources in Education (RIE) is a monthly abstract journal which announces (catalogs, indexes, abstracts) documents of interest to the educational community (including researchers, teachers, students, school board members, school administrators, counselors, etc.). Each issue announces approximately 1,500 documents and provides indexes by Subject, Personal Author, Institution, Publication Type, and ERIC Clearinghouse Number. This special Computer Output Microfiche (COM) edition is prepared directly from the ERIC magnetic tape data base prior to publication of the printed journal and therefore is lacking the cover and other regular introductory and advertising matter contained in the printed journal. The first accession in each issue of RIE is the issue itself. In this way, the monthly microfiche collection for each issue is immediately preceded by a microfiche index to that collection. This practice began with the RIE issue for MAY 1979. (LRS/WTB)

Descriptors—Career Development, *Career Education, Curriculum Development, *Educational Change, Elementary Secondary Education, Evaluation Methods, *Information Dissemination, *Models, Postsecondary Education, Program Administration, *Program Design, *Program Development, Surveys

Identifiers—Michigan

The Michigan Department of Education developed an operational model for career education which combined the elements of individual career development with career preparation accomplished through academic, vocational, and technical education programs. A third-party evaluation was conducted to determine to what extent the operational model has been designed, developed, and disseminated throughout the state and to what extent this model is viable. Survey instruments were administered to the following populations: (1) a randomly drawn sample of 60 of the 525 local school districts in the state; (2) a selected sample of 98 school districts now active in career education; (3) all 49 career education planning districts; and (4) a majority of the 8 colleges and universities in the career education consortium. The third-party evaluator found that the general conceptual model was comprehensive in scope and extremely ambitious in the degree of change it envisioned in educational programs throughout the state. A substantial set of products was developed to put the conceptual model in operational form. An administrative network was also developed to disseminate the model, but the data indicate that the dissemination process is still in its early stages. Finally, the viability of the model rests on the degree to which personnel in the educational system change their roles and work together to make the model operational. (BM)

Kennedy, Mary Ellen

Meeting the Educational Needs of the Older Adult: ELDERHOSTEL as a Program in Collegiate Education.

Pittsburgh Univ., Pa. Graduate School of Library and Information Sciences.

Pub Date—11 Apr 78

Note—29p.

Pub Type— Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Adult Characteristics, Adult Students, *College Programs, Continuous Learning, Economically Disadvantaged, Educational Finance, *Educational Opportunities, Interaction, Intergroup Education, Learning Experience, *Liberal Arts, Networks, *Noncredit Courses, *Older Adults, Residential Programs, Senior Citizens, Stereotypes

Identifiers—*ELDERHOSTEL, Higher Education Act 1965, *Intergenerational Programs

Educational programs geared for older adults are a recent development in colleges. While certain physical handicaps may occur older persons can learn, nonetheless. Older adults are interested in learning new things and are excited by interacting with younger people in intergenerational college courses. Many programs are being built on the 1965 Higher Education Act and other adult education legislation. The most recent of these, and perhaps most innovative, is ELDERHOSTEL. ELDERHOSTEL offers residential academic programs to persons over sixty within a network of over 100 college and university campuses in eighteen states for one-week periods. ELDERHOSTEL began in 1974, and in its first days offered fifteen weeks at five colleges to 220 persons. By 1977, 1,541 persons were being served. The national office, located in Newton, Massachusetts, directs program coordination, standardization, and evaluation. Generally, liberal arts programs have been stressed. Each school is required to provide three college-quality courses with seven to ten contact hours a week. Courses are noncredit and require no tests, grades, or homework. Most programs are initially funded under Title I of the 1965 Higher Education Act. ELDERHOSTEL attempts to integrate older adults into the larger society through intergenerational classes. (CSS)

Descriptors—Advisory Committees, Career Education, *Career Exploration, *Consultation Programs, *Educational Resources, Elementary Secondary Education, *Information Dissemination, Information Sources, Inservice Education, Interinstitutional Cooperation, Job Placement, *Mobile Educational Services, Objectives, *Occupational Information, Program Evaluation, Vocational Education

A project was conducted to implement seven objectives: (1) through provision of career information, consultations, and inservice training, offer a systematic, articulated, and comprehensive (K-12) career education program to schools requesting assistance; (2) increase utilization and availability of vocational/career education resources in the project service area; (3) through a public relations program and liaison coordinator of local project efforts, provide a broad vocational education information range for dissemination purposes; (4) foster interinstitutional cooperation through shared use of project personnel, equipment, and materials; (5) upon request make available to high schools (grades 9-12) an organized and systematic school-based comprehensive placement model; (6) continue to give community support and direction by maintaining an active vocational advisory counsel; and (7) account for objectives' implementation by using a state monitor and by having the careers resource project evaluate its own activities. All objectives were reached. The career education activities were instilled by using the following: inservicing of teachers, counselors, and administrators; materials library; mobil units; newsletters; and test instruments (Student Career Orientation Profile). These methods were made available to a school as a total service package. (The report contains project contact records and correspondence.) (CSS)

Documenting the processes and procedures, this report reviews phases of development, testing, and revision of 100 modules in a set of performance-based teacher education (PBTE) curricular materials. The first of two chapters discusses the need to develop a professional development program for vocational education teachers. A two-phase process is described: phase 1–identification of performance requirements of conventional program teachers; and phase 2–identification of performance requirements for cooperative program teacher coordinators. The findings are the origin of 384 performance elements and a set of related performance oriented general objectives. Chapter 2, divided into 7 sections, discusses curricular development, testing, and implementation. Section 1 describes the cooperation of institution/agency representatives in module development. Section 2 examines the preliminary module testing and results. Module revision procedures are outlined in section 3. Section 4 summarizes the advanced testing design and procedures. The fifth section provides model publication background. Module refinement, based on advanced testing feedback and publisher needs, is described in section 6. The final section reviews dissemination activities. Appendixes contain samples of the cooperative development stage module, data collection and synthesis forms, preliminary and advanced test versions, and revision procedures/quality control devices, and module titles and associated performance elements. (Volume 2 of the final report, which is a report of research, and a module development handbook are available as separate documents–see note.) (CSS)

This report presents the design, procedures, and findings of the advanced testing of 100 modules in a set of performance-based vocational teacher education curricular materials. (The modules are based on 384 secondary/postsecondary level performance elements, including program, instructional, and other elements.) In the first of five sections the study purpose of providing user feedback for refining materials and information for developing specified competencies is identified. Instrumentation (teacher performance assessment form, pre-treatment performance estimate, and teacher trainee and resource person feedback booklets) is described. Test site and module selection are discussed, and section 2 reviews site coordinator training procedures. The third section provides module-by-module and across-module analyses. Findings reported in section 4 include the following: (1) teacher trainee pre- and post-performance self-estimates increased for all modules; all modules were rated effective; (2) resource persons rated teacher trainees above "good" on tested modules; and (3) 75% of resource persons felt learning activities were helpful. Also examined are teacher trainee and resource person characteristics and feedback. The final section sets forth conclusions and recommendations. Appendixes contain instrumentation forms, evaluation, study, and results. (Volume 1, which documents the curricula development processes, and volume 3, the module development handbook, are available separately–see note.) (CSS)

Identifiers—Assessment of Career Development, DeSoto County FL, Florida, Minnesota Cognitive Questionnaire Career Education, Piers Harris Childrens Self Concept Scale, Public Law 93 380

An evaluation of the DeSoto County, Florida Career Education Project was conducted to determine the effectiveness of career education activities in grades K-12. Project goals emphasized at the elementary level were self-awareness, attitudes/appreciations, and career awareness. Career awareness and attitudes/appreciations were emphasized at the middle school level; and career awareness, economic awareness, dicision-making, and employability skills were emphasized at the secondary level. At each grade level a post-test only, experimental/control group analysis was made based on results from the following instruments: Minnesota Cognitive Questionnaire for Career Education (K-5); Piers-Harris Children's Self Concept Scale (K-5); and The Assessment of Career Development (6-12). The second grade experimental group scored significantly higher than their control group on the self-concept scale. The eighth grade experimental group scored significantly higher than their control group on career planning involvement, but significantly lower on career planning knowledge and occupational characteristics. No significant differences were found between group means (K-12) on a measure of cognitive achievement and on all other comparisons. Instructional and guidance staff participated in workshops on career education concepts, implementation methods, group-guidance techniques, career education skills, and occupational resources. Workshop evaluations ranged from average to excellent; however, at the end of the year implementation had barely begun. Elementary teachers appeared to have made the most progress. (BM)

Identifiers—*Syracuse University NY

This publication is a compilation of inventories of processed materials in the Archives and Manuscripts of Continuing Education at Syracuse University. Arranged alphabetically by the names of the individuals and organizations donating the materials, the shelf list describes the contents of each box individually. Preceding the shelf lists are background sketches of the donors, detailing their major contributions to the field of adult education, followed by descriptions of the organization and types of materials. For the most part, the printed documents consist of correspondence, organizational records, publication files, reports, speeches, and writings. Recorded tapes are also included in the collection. The oldest materials are dated 1924. As further materials are processed, the inventories will be updated. The twenty-four donors represented in this catalog are as follow: Adult Education Association, Adult Education Research Conference, American Foundation for Continuing Education, Association of University Evening Colleges, Center

for the Study of Liberal Education for Adults, Alexander N. Charters, Commission of the Professors of Adult Education, Fund for Adult Education, Galaxy Conference, Andrew Hendrickson, International Congress of University Adult Education, Joseph W. Jacques, Alexander Liveright, National Association of Public School Adult Educators, National University Extension Association, George A. Parkinson, Bernard W. Reed, Robert E. Sharer, Paul H. Identifiers—Career Education Readiness Test, Illinois

A continuing project titled "Measuring Career Readiness in Elementary Education" had as its fourth-year goal constructing learning activities to coordinate with six subtest areas of the Career Education Readiness Test (CERT). The secondary goal was to continue the refinement of the CERT through the analysis of data gathered during the current year and in previous years. Using data gathered from the Joliet (Illinois) Pilot Study, the following statistical procedures were conducted: a correlational analysis, an item analysis, and a reliability analysis. The results were encouraging and indicate that CERT has the potential to become a valuable tool for elementary teachers who are involved, or interested, in career education. (Specific results of the statistical procedures are included in this final report, along with descriptions of studies conducted in Breese, Illinois, and East Saint Louis, Illinois, and a workshop conducted in Belleville, Illinois. Also included is a section summarizing initial contacts with commercial publishers. The report concludes with a discussion of limitations and recommendations.) (BM)

A comparative study was conducted of women college graduates of cooperative and noncooperative programs to explore and evaluate the impact of cooperative education on the career development of college women. A total of 629 women from twenty-three institutions (twelve with cooperative education programs and eleven without) responded to the mailed questionnaire. The study examined the relationship of change of major to career choice, the relationship of choice of undergraduate major to career choice, the influence of volunteer work experience on career development, and the relationship between primary source of career information and subsequent career patterns. It was found that the majority of respondents who changed majors went from one traditional major to another; choice of undergraduate major was the most important factor in subsequent choice of traditional or nontraditional career paths; women who did volunteer work as undergraduates generally followed traditional career patterns; alumnae who had undergraduate job experiences related to their major perceived their career preparation more favorably than alumnae with unrelated work experiences; and women who said their co-op coordinator was their primary source of career information were most likely to report they received promotions and/or merit pay raises on their first job. It was concluded that cooperative education has a positive impact on the career development of women. (Statistical tables are included in the report, and a description of the sampling plan is appended.) (LMS)

Identifiers—*Montana

This labor market report contains data on the status of working women in Montana. It has eight sections with numerous graphs and statistical tables, most of which give state and national figures. Section 1 presents female labor force characteristics and compares the status of working women with that of men. Section 2 gives an overview of female employment by industrial and occupational attachment. Section 3, on Montana women and government employment, contains a reprint of the 1977 report of the state Equal Employment Opportunity Bureau and an analysis of the report. Section 4 discusses the earnings gap between men and women. Section 5 provides information on occupational attachment of unemployed females and job service activities involving female applicants. Section 6 discusses trends of female educational attainment. Section 7 gives a brief description of the laws affecting Montana women, guidelines to determine if a discriminatory problem exists, and information on where to go for help. Section 8 discusses the social changes which point to increased participation by women in the labor force and makes recommendations for how women can prepare for their future in the labor market. Identifiers—Maine

The Comprehensive Career Education Project was conducted to develop a comprehensive career education model for northern Maine. The objectives focused on infusion in grades K-12 of the Bangor Public School System and continued training of postsecondary instructional staff at the University of Maine at Orono and Husson College. This document reports the university-level activities. An eight-session seminar series for twenty university faculty was planned and conducted. Eight faculty members were selected to write twenty-six career education instructional units that could be utilized in a variety of college-level courses. (These units are included in the ERIC system as ED 143 814 and ED 166 365-366.) The project staff prepared a set of inservice training materials for use in postsecondary institutions. Finally, a business and industry advisory group was selected to participate as a panel in the seminar series and to assist the writing team. Plans were made to evaluate the seminar series, career education instructional units, and the training materials. (The majority of this document contains [1] selection and orientation materials; [2] a description of the seminar series, including topics, procedures, and incremental improvements; and [3] sample guidelines, format, contract, and review procedures used in writing the career education instructional units.) Identifiers—Education Amendments 1972 Title B, Illinois, Illinois Public Law 19 597

This manual was prepared for school administrators and staff in Illinois school districts. Following a statement of the rationale for preparing the manual, a section on discriminatory legislation discusses Title IX of the Education Amendments of 1972 and Public Law 19-597 of Illinois. The next section discusses sex role stereotyping in classroom activities and in textbook prose and illustrations. The next section gives examples of sexist and nonsexist use of language. "Balance vs. Imbalance" suggests how to examine instructional materials in math and science and in history and social science for portrayals of equality and inequality of the sexes. The following section presents five questions to ask in analyzing the content of an entire text. A summary gives guidelines for valid portrayal of the sexes. The conclusion suggests steps school administrators can take to help correct problems of sexist treatment and lists ways teachers can "neutralize" sexist materials in the classroom. A bibliography and list of resource organizations are included. (LMS)

tion, Parental Background, *Parent Influence, Rewards, Role Models, *Role Perception, Statistical Analysis, Statistical Studies
Identifiers—*Intergenerational Occupational Movement, *Occupational Role Transmission
Various studies have been conducted to inductively locate the aspects of occupation in one generation which are transmitted to the next generation as found in corresponding aspects of their labor force aspirations and entry levels. This study restricted attention to intergenerational covariation in components of roles rather than to the structural or interpersonal mechanisms which might explain transmission. Occupations were conceptualized and measured on the basis of indicators for role requirements, content, and rewards. (The author states that role transmission presumes covariation between the requisites, routines, and rewards of parental occupations and the corresponding components of offspring aspirations and eventual labor force occupations.) Data were collected from a national sample of male members of the civilian labor force and from a sample of Michigan high school males. Canonical correlation analysis was used as a multivariate strategy for partitioning the covariance between two sets of scores into orthogonal pairs of linear combinations (dimensions). Canonical correlation analyses for two role relationships, involving parent occupation, early career occupation and late adolescent occupational aspirations, show that (1) role transmission occurs for a multiplicity of occupational characteristics which span requirements, content, and rewards of roles; (2) that the two role relationships are not isomorphic in their structure; (3) that there is support for recent arguments that complexity of roles is a key organizing feature of role transmission processes; and (4) that there is mixed support for recent research on patterns of intergenerational occupational movement. Identifiers—New York
During the 1975-76 and 1976-77 academic years, a project was undertaken to design, implement, and evaluate an inservice course for home economics teachers in the state of New York. Eighty-two junior high and senior high teachers participated, representing both rural and urban areas. The objectives of the course dealt with improvement of specified planning and classroom teaching competencies, which were identified in a literature survey to determine inservice needs of teachers. Individualized learning packages, including instruction in the use of recently published New York State Home Economics curriculum guidelines, were sent to the participants. The teachers used audio and/or video tapes to record their classroom teaching and returned the tapes to the course instructors for feedback and evaluation. The effectiveness of the course was evaluated in terms of its (1) meeting identified needs of teachers, (2) being evaluated in a positive manner by them, and (3) resulting in actual changes in their classroom teaching. Participants evaluated the course by keeping logs and writing summative assessments. Overall, their comments indicated that the course satisfied the inservice needs which it was designed to meet. Recommendations for future improvements included an increase from two credits to three (in view of the amount of work and time required), better quality tapes, and more efficient and speedy feedback from course instructors. This document contains an overview of the Appalachia Educational Laboratory (AEL) model for Experience-Based Career Education (EBCE). (Descriptions of two other EBCE models are included in ERIC documents CE 018 447 and CE 018 449.) Divided into thirteen sections, this document highlights some of the important features of the model and includes excerpts of student-oriented activities. Section 1 describes the AEL model by explaining the following elements: systems approach; guidance and accountability; community involvement; staff roles; group experiences; and adaptations of the model. Section 2 presents the AEL/EBCE curriculum structure. Sections 3-9 contain excerpts from the Student Program Guide which describe the following activities: determining career interests; relating school subjects and occupations through Worker Trait Groups; completing the work activity checklist and the work situation checklist; assessing aptitudes; using the experience site selection form; and selecting available experience site placement opportunities. Section 10 illustrates how to develop student activity sheets, and section 11 explains how to select learning objectives. The Student Career Guide used in the AEL/EBCE model is described in section 12. Finally, section 13 provides excerpts from student activities which relate values to work. (BM)

This document contains an overview of the Far West Laboratory (FWL) model for Experience-Based Career Education (EBCE). (Descriptions of two other EBCE models are included in ERIC documents CE 018 446 and CE 018 449.) Divided into seven sections, this document highlights some of the important features of the model and includes excerpts of student-oriented activities. Section 1 describes the FWL model by explaining the following elements: basic approach; program components; learning plan development; career planning; community resources; certification of learning; group experiences; staff roles; program requirements; and adaptions of the model. Section 2 presents the core program goals organized into three broad categories: career development, basic skills, and life skills. Section 3 contains the "Student Program Walk-Through," which illustrates the type of education experiences provided for the individual student. Section 4 describes the "Career Orientation Guide," which helps the students become acquainted with resource persons and their organizations. Student projects, a primary outcome of the FWL/EBCE program, are explained in section 5. Guidelines for preparing the student project plan are presented in section 6 along with suggested project ideas. Finally, section 7 contains sample student forms which are used in entry assessment, program planning, progress monitoring, and credit assignment. (BM)

Career information concerning jobs in the electricity-electronics field is presented. Included is an overview of all positions of employment in the field, such as professional engineers, technicians, skilled craft workers, and semi-skilled workers. A description of their work, training requirements, and employment outlook is given. Information is also provided concerning the educational and training

opportunities in the electricity-electronics field available in Mississippi: secondary vocational, part-time cooperative vocational, postsecondary vocational and technical, and apprenticeship programs. Finally, career information is presented about the telephone industry, the electric power industry, and the electronics manufacturing industry–each as an employer of workers with training in all levels of electricity-electronics. (This publication has been developed to complement the manual entitled Electricity-Electronics for Industrial Arts, CE 018 615.) (JH)

Thirty-one lesson plans on electricity-electronics are presented in this guide designed for industrial arts instructors. Each lesson plan is organized into the following format: (1) lesson objective; (2) supplementary teaching items; (3) presentation; (4) demonstration; (5) laboratory or other activities; and (6) test items (oral, written, or performance). Lesson plans are organized into seven topics: safety; the language of electricity-electronics (e.g., wiring diagram symbols); electrical tools, materials, and processes; electrical principals (e.g., Ohm's law, magnetism); sources of electrical energy (e.g., static electricity, thermocouples); producing and storing electricity (capacitors, transformers); and career occupations in electricity-electronics. Thirty-two transparency masters conclude the document. (JH)

Identifiers—*Mississippi

An evaluation of curriculum materials (four publications) disseminated to Mississippi industrial arts teachers during the 1976-77 school year was conducted. Four questionnaires were prepared and mailed to all of the state's 242 industrial arts teachers. The objectives of the evaluation were to determine the following: (1) number of teachers using the materials in their programs; (2) amount of usage of the materials in terms of hours of instruction taught; (3) amount of usage of the materials in terms of number of students taught; (4) overall quality of the materials as rated on thirteen specific items; and (5) the extent that dissemination programs influence the use of Mississippi State University Research and Curriculum Unit materials. Based upon the findings, the following conclusions were drawn: (a) three out of four industrial arts teachers were using the materials in their programs; (b) the average number of hours taught per class with the materials was close to the suggested time for each publication; (c) a total of 9,708 students received instruction in industrial arts programs as a result of the materials; (d) in the opinion of the teachers, the overall quality of the material is high; and (e) the chances are greater that teachers who are presented the materials through dissemination programs will use the publication in their classes as compared to those who just receive the publications in the mail. (JH)

Identifiers—Home Repair, *Multifield Laboratory

Developed for the industrial arts multifield laboratory program (junior high level), this curriculum guide provides the industrial arts teacher with a plan of organization for a one-year program of instruction based on seven units of instructional activities: metals, woods, plastics, drafting, electricity, power, and home repairs. Each unit lists the student behavior objectives and a schedule for instruction. This instructional schedule includes the content for each unit, presented in the form of task descriptions (manipulative, informational, and attitudinal), suggested instructor and student activities, and suggested resource materials (books and films which may not be available in each local situation). The appendix contains four organization patterns (each including instructional area, sequence, and duration) for the multifield laboratory. (JH)

This handbook for the distributive education coordinator was designed to provide information on adult distributive education (D.E.) and to outline the necessary steps in establishing and conducting an adult program. It begins with an introduction which lists the intrinsic values of adult D.E. and the advantages that these programs offer to the student, school, businesses, and community. The remaining content discusses each of the following eight steps in setting up an adult D.C. program: (1) determining what to offer, (2) obtaining course outlines (includes a list of available outlines), (3) recruiting adult instructors (covers qualifications and certification), (4) preparing adult instructors, (5) promoting adult D.C. programs, (6) teaching adult D.E. programs, (7) filing state department forms (includes sample form), and (8) evaluating adult D.E. programs (includes sample evaluation form). The appendix contains a form for a statement of qualifications for vocational education teachers in Mississippi and Mississippi's policies and regulations for adult education. (EM)

Identifiers—*Project Open, West Virginia

Two ninth-grade curriculum development projects were carried out over a three-year period (1975-78) in West Virginia at Point Pleasant Junior High School and at Wahama Junior/Senior High School. Known as Project Open, these projects resulted in the development and classroom testing of two new technology-based courses called "Career Exploration in Technology" (CEIT). (The curriculum guides for these two courses are published separately: CE 018 782 is the guide for the Wahama course and CE 018 783 for the Point Pleasant course.) CEIT is designed to be an activity-oriented program that allows each child maximum flexibility in the development of individual potential related to the study of technology. The focus of the Wahama course is communication technology, while the Point Pleasant course deals with transportation. The curriculum guides were developed to reflect local needs and interests in both areas of study. Both projects reported high student enthusiasm and interest during the three years. Recommendations for future project efforts and the two existing courses include (1) an expansion of CEIT to other grades, (2) budget allocations to cover equipment costs, (3) the installation and acquisition of needed equipment and facilities, (4) evaluation of the curriculum's effectiveness in meeting its goals, and (5) transition from university personnel to regular teaching staff. The result of a curriculum development project known as Project Open, this curriculum guide offers a course on communication technology to ninth graders who are participating in the Career Exploration in Technology program and have completed the eighth grade course. Nineteen units form the subject matter of the guide: an introduction, visual communication technology, image recording, image projection, image design/layout, image carrier, image transfer, introduction to acoustic communication technology, acoustic communication, telegraph, telephone, magnetic reloading, phonograph, telecommunication technology, radio, television, videotape, computer, and satellite. Each unit gives an overview of its topic and objectives statement, followed by a detailed content outline, suggested time span, relevant resources, and a list of activities supportive to the content. The types of activities vary from class discussions, films, and demonstrations, to student design and construction of communication systems. Unit objectives are frequently divided into cognitive, affective, and psychomotor skills. References and resources include films, manuals, dictionaries, textbooks, and names and addresses of individuals and organizations who may be contacted for information. (For the final report of the project that developed this guide, see CE 018 781.) (ELG)

The result of a curriculum development project known as Project Open, this curriculum guide offers an elective course on transportation systems for ninth graders who are participating in the Career Exploration in Technology (CEIT) program and who have completed the eighth-grade course on manufacturing systems. The course, which spans two semesters, includes the following units: (1) an introduction, (2) history of land transportation, (3) energy, (4) transporting people, (5) freight transportation, (6) future trends in land transportation, (7) water transportation, (8) air transportation, (9) space transportation, and (10) transportation systems. Each unit gives an overview of its topic and an objectives statement, followed by a detailed content outline, suggested time span, relevant resources, and a list of activities supportive to the content. The types of activities vary from class discussions, films, and demonstrations, to student design and construction of vehicles and their components. Some units also contain pre- and posttests. Elective units are also included on the metric system and alternative sources of energy. A film list is provided at the end, as well as the names and addresses of supplier of free and inexpensive materials to be used in the course. (For the final report of the project that developed this guide, see CE 018 781.) (ELG)

Identifiers—*Project Open, West Virginia
As part of Project Open (see related documents listed below), unified arts and industrial arts curricula were developed and implemented at Ona Junior High School in West Virginia. The unified arts program combines the four subject areas of art, home economics, music, and industrial arts. It is a two-year required course for all seventh and eighth graders. Each student takes nine weeks of a subject area and then rotates to a new area. The industrial arts curriculum is offered in grade 9 and focuses on the technology areas of communications, transportation, and production. A semester course, communications technology includes visual, acoustic, and telecommunications units. Transportation technology explains how vehicles function and explores the supportive systems of transportation as well as its social and economic effects on humans and their environment. The unit on production technology familiarizes the students with what production is and how it affects their lives and environment, both socially and economically. (Topical outlines for the three areas are provided along with a list of teaching strategies.) While some problems were reported with scheduling, equipment, and facilities, the project did receive adequate funding and administrative support. (ELG)

Identifiers—Illinois
A project was initiated to disseminate staff development materials which provide a model for systematically planning comprehensive systems of guidance, counseling, placement, and follow-through and to help Illinois educational agencies in efficiently operating comprehensive guidance and counseling programs. In the first of a two-phase project, objectives accomplished or partially accomplished included (1) making needed revisions and reproducing 500 copies of a previously developed and tested planning model for comprehensive systems of guidance, counseling, placement, and follow-through–A Programmatic Approach to Guidance Excellence (PAGE 2); (2) disseminating PAGE 2 planning model copies to educational institutions/agencies for staff development; (3) training at least one facilitator in nineteen Illinois career guidance centers to instruct staff and personnel in school districts in their service region in the use of the model (twenty facilitators from eighteen centers received training); (4) beginning preparation of Illinois educational and community personnel in the use of guidance and counseling planning tools; and (5) providing a variety of personnel trained in guidance/counseling tools' use. Of sixty-two persons involved in three completed workshops, 89% elected to enroll in a University of Illinois staff development course offered in conjunction with the workshops. (Workshop materials, information, and evaluation are included in the report.) (CSS)

Identifiers—New Jersey
A project was conducted to design and implement an educational delivery system that incorporated both assessment and instructional services for adult basic education (ABE) exceptional learners in an urban adult learning center in New Jersey. Two areas were considered of priority in developing the project design: the development of an assessment and remediation model for learning disabilities in functionally illiterate adults and the development of innovative approaches for meeting the needs of adults with learning disabilities. The project consisted of four main components, each addressing specific goals, as follow: educational assessment, educational programming, staff development at the learning center, and project evaluation. Thirty-one students participated in the ABE program which was offered both during the day and evening. Initial assessment tests and posttests were administered to gauge process dysfunctions related to basic skills education. At the end of the project it was concluded that needs exist in the following areas: (1) developing valid and reliable instruments specifically designed to assess adult exceptionality; (2) increasing instructors' competencies in teaching strategies suited to exceptional adults; and (3) developing a national master plan and state plans to meet the educational needs of this population group. (A handbook [CE 018 885] providing assessment, educational planning, and instructional strategies was developed as part of this project.) (ELG)

Developed as part of a New Jersey project designed to provide assessment and instructional services for adult basic education exceptional learners (see CE 018 884 for the final report of this project), this handbook provides a model of a systematic educational system for adult exceptional learners. The introductory section defines adult exceptional learners as individuals who have had, and continue to have, severe difficulty in learning. The second section focuses on the assessment model developed during the project. An assessment-instructional model is shown, and its five components (assessment, educational planning, implementation, evaluation, and modification) are described. Three assessment techniques (observation, interviews, and testing) are discussed, and a sample checklist and questionnaire are included. The last section is devoted to instructional services and covers the development of individualized educational plans and the implementation of compatible instructional strategies and materials. Among the suggested strategies are the following: (1) secure the learner's cooperation; (2) offer instruction at the learner's level; (3) break tasks into small units; (4) reinforce success; (5) keep learning tasks and materials meaningful; and (6) facilitate remembering. The two appendixes provide a description of assessment instruments and an oral language checklist. A brief bibliography is also included. (ELG)

Identifiers—Texas (Crystal City)

The Crystal City Independent School District Bilingual Vocational Training Program was designed to provide business/printing education, auto mechanics, and industrial construction competencies to trainees exhibiting interest in these training areas. The participants were adults who were underemployed or unemployed in the community of Crystal City, Texas, the home base of an extremely high migrant Mexican American population. The program of instruction consisted of combined and coordinated related instruction with on-the-job training experience. During the period between September 1977 through May 1978, training was offered in two skill areas: (1) academic component, including computation and communications skills; and (2) vocational component, including skills in business and printing occupations. Concentration was placed on training individuals in secretarial/-clerical and printing office machine skills. An advisory council selected fifty participants from the 200 adults who applied for the program. Seventy-two percent of the trainees were placed on jobs and/or motivated to pursue a college education. Seventy-five percent achieved the program's overall objectives, including demonstration of communication skills in both Spanish and English. Each trainee received counseling and instructions in job applications. The program was termed a success by program administrators. (CT)

Identifiers—Missouri

Phase II of a two-part project, this study was conducted in Missouri to develop a quantitative competency matrix for each of the vocational and technical education service areas represented in Missouri. (A description of both phases of the project appears in CE 018 918.) After a literature search identified the affective work competencies desired by industry and education, an Affective Work Competency Inventory (AWCI) was developed to measure them. Since desired worker competencies vary among different occupations, it was necessary to design a quantitative competency matrix for the twenty-four distinct occupational clusters that exist in Missouri. (Each of these occupational clusters is a component in one of the six vocational service areas.) Nine thousand inventories were printed and administered to workers, supervisors, teachers, and students, representing the twenty-four clusters. Following an analysis of the Inventory's results, it was determined that AWCI scores did differentiate among the occupational clusters. Recommendations for effective use of this data include the following: (1) development of curriculum materials to instruct students in affective work competencies; (2) conduct of experimental programs to determine which teaching methods are effective and to what degree students retain the competencies they acquire; and (3) provision of teacher education programs and inservice workshops to acquaint vocational education teachers with effective methods for teaching the competencies to their students. (Attachments show the occupational matrix and the cluster-occupational index of competency magnitudes.) (ELG)

Descriptors—*Affective Objectives, Affective Tests, *Differences, Educational Objectives, Employee Attitudes, Employer Employee Relationship, Employment Qualifications, Evaluation Methods, Individual Characteristics, *Job Skills, Laborers, Literature Reviews, *Occupational Clusters, Occupational Information, Research Needs, Secondary Education, Secondary School Students, Secondary School Teachers, Student Attitudes, Student Characteristics, Supervisors, Teacher Education, Test Construction, Test Interpretation, Values, *Vocational Education
Identifiers—Missouri

A two-phase study was conducted to determine the habits, attitudes, and values that industry and education consider desirable and important for workers. In phase I a computer search revealed sixty-three such affective work competencies which were then categorized into fifteen clusters. To objectively quantify each of the clusters, an evaluation instrument named the Affective Work Competencies Inventory (AWCI) was developed, which measured the behavior or performances of students and workers for each cluster. In phase II (which is described in greater detail in CE 018 917) an occupational matrix was developed to properly use the Inventory in relation to different vocational and technical occupations. Nine thousand inventories were printed and administered to students, workers, teachers, and supervisors in Missouri. It was found that mean composite AWCI scores for (1) vocational students were greater than for academic students; (2) workers were greater than for vocational students; (3) occupational areas significantly differed; (4) female workers were significantly higher than for male workers; and (5) teachers, supervisors, and workers differed. Recommendations for effective use of this data include the development of curriculum materials to instruct students in affective work competencies, and the conduct of experimental programs to determine which teaching methods are effective and to what degree students retain the competencies they acquire. (The appendix contains a sample AWCI form.) (ELG)

Identifiers—*Air Traffic Controllers, Public Law 92 297, United States

Air traffic controllers no longer able to perform their highly specialized duties must be removed in the interest of aviation safety. Because few employment opportunities exist outside the government for controllers' skills, Congress established a second-career training program in 1972 for controllers so removed by the Federal Aviation Administration. Few air traffic controllers eligible for this training program have used it to train and enter second careers. Instead, they have used other federal programs providing long-term income and training benefits. These and other measures available to the Administration can effectively protect the economic livelihood of controllers. Congress should discontinue the Second-Career Program. (Author/CSS)

Descriptors—Armed Forces, *Cost Effectiveness, *Course Content, Educational Finance, *Job Skills, Job Training, Military Personnel, *Military Training, Money Management, Program Costs, *Program Length, Scheduling, Staff Utilization, *Teacher Qualifications
Identifiers—Department of Defense, Military Manpower Training Report

The U.S. General Accounting Office (GAO) reviewed the administration of military skill training programs. It found that the Department of Defense (DOD) spends about $3.4 billion a year to provide skill training to 1.2 million military personnel. The DOD could save millions of dollars by requiring (1) the services to provide a minimum of forty class hours a week for skill training and to eliminate non-skill training activities from course curriculums; (2) the army to adopt a more reasonable criteria, consistent with the other services, for determining staffing levels for skill training instructors; and (3) the services to substitute civilians for military personnel or contract for training support whenever feasible. The GAO also found that The Military Manpower

Training Report, which is issued annually to Congress to support the services' proposed training programs, is incomplete and inaccurate. It is recommended that the Secretary of Defense issue clarifying instructions requiring that complete and accurate staffing reports be used in support of training. (CSS)

Descriptors—Attitude Tests, Failure Factors, Females, Higher Education, *Home Economics, Literature Reviews, Personality Assessment, Personality Theories, Predictive Ability (Testing), Research Needs, *Student Teachers, Success Factors, *Teacher Attitudes, *Teacher Characteristics, *Teacher Education, *Teacher Evaluation, Teacher Selection

A pilot study was conducted to determine whether organization of personality variables can be used to predict the attitudes of student teachers toward teaching. This followed a literature search that showed little research has been done on the personality characteristics of teachers which influence attitudes toward students. Three self-administered tests (the Population Opinionnaire [a form of the Rokeach Dogmatism Scale], the Minnesota Teacher Attitude Inventory, and the California Psychological Test) were given to 135 female freshmen and transfer students in home economics education who would be participating in student teaching. Findings supported the study's hypothesis that prospective student teachers with an open conceptual system have a more favorable attitude toward students than those who have a closed or dogmatic system. The nonauthoritarian individual was found to possess the characteristics of tolerance, achievement via independence, intellectual efficiency, self acceptance, flexibility, responsibility, and a sense of well-being. Since this study was limited, however, to female students in home economics during one year, a larger investigation should be undertaken (1) using both male and female students from other areas of specialization, (2) using other measurement devices, and (3) instituting a longitudinal study. The results of this study may be applied as criteria for the hiring of prospective teachers as well as for the successful selection and retention of student teacher candidates for teacher education programs. (Included at the end of this report are a bibliography and tables analyzing the test scores of study participants.) (ELG)

This booklet explains the federal government's purpose and procedures for conducting a survey to determine civil service employees' skills, knowledges, and abilities so that they may be more fully utilized and/or developed. In section I the term "skills survey" is defined and its functions are viewed as part of an upward mobility program. Section II lists the personnel involved in planning and implementing the survey. Section III advises each government agency to assess its own information needs by either examining its existing job descriptions or by performing a job analysis. The scope of the project and use of a timetable are discussed. Then, the pros and cons of various procedures are debated for obtaining specific data on employees' skills. The approaches considered include (1) searching personnel files, (2) conducting personal interviews, (3) administering questionnaires to employees in groups, (4) mailing out questionnaires, and (5) using mail questionnaires with followup interviews. In section IV, government publications and Appendix 1 are suggested as resources for instructions on how to evaluate the data. Section V and Appendix 2 cover the methods of coding the data for storage and retrieval. The implementation and update of the survey are discussed in section VI. In the final two sections, the survey administrator is warned of various pitfalls and the need to comply with the Privacy Act. Appendixes 3 and 4 provide sample forms. (ELG)

Pub Type— Numerical/Quantitative Data (110)

Document Not Available from EDRS.

Descriptors—Industrial Personnel, Labor Unions, *Occupational Information, *Occupational Surveys, Productivity, *Tables (Data), *Wages

Identifiers—*Coal Mining Occupations, United Mine Workers

Production and related workers in the nation's bituminous coal mines averaged $6.94 an hour in January 1976, which represents an increase of 110% since the Bureau of Labor Statistics' 1967 survey in the industry. Over the same period, the Hourly Earnings Index rose by 84% for private nonagricultural workers. Earnings for most of the 128,390 workers covered by the 1976 survey (virtually all men) were highly concentrated around the industry average–the middle 50% earnings between $6.49 and $7.45 an hour. Reflecting primarily a series of single pay rates, each covering a large group of job classifications, the coal industry continued to have one of the lowest relative dispersion factors of worker earnings among the industries studied by the Bureau. (Additional information in this report includes data tables covering industry characteristics such as employment, production, unionization, and method of wage payments. Tables for both underground and surface mine workers illustrate earnings, establishment practices and supplementary wage provisions, and occupational earnings averages by mine size and by state. Appendixes describe the scope and method of survey and types of mining occupations.) (Author/CT)

Identifiers—Education Amendments 1974

Divided into two parts, this document describes the comprehensive career education model at LaGuardia Community College (New York). Introductory material in part 1 includes a general overview of the project, a description of the U.S. Office of Career Education contract which enabled LaGuardia to expand its career education efforts, and a description of the setting and project objectives. Project activities prior to the O.C.E. contract, the contract objectives, developments during the contract period, and a summary and recommendations are presented for the following activities: (1) implementing a career resource center; (2) using cooperative education as the reality test of career education concepts and skills; (3) involving the teaching faculty in career education infusion; (4) collaborating with the business, labor, industrial, and public sectors; and (5) facilitating the productive use of leisure time. Finally, the agenda for a national conference conducted to demonstrate the project results concludes part 1. Part 2 outlines the tasks, activities, and time frames corresponding to the attainment of the contract objectives. (CE 019 283 contains the project evaluation report.) (BM)

Identifiers—Educational Amendments 1974

LaGuardia Community College (New York), with support from a contract with the U.S. Office of Career Education, has developed and assessed a career education model for two-year colleges. From July 1, 1976, through September 30, 1977, LaGuardia designed, or refined, and pilot-tested career educational components that included a career resource center, work experiences, career education infusion into curricula, career simulation activities, and career advisement. Following are some of the findings based on the evaluation surveys: (1) student ratings of the career resource center, career advisement, and career simulation were consistently positive; (2) students enrolled in a redesigned Data Processing Introductory course and work experience sequence viewed the infusion attempt as a successful one, however time limitations imposed on the career education-infused Philosophy course made that experience less positive in the students' ratings; (3) the work internship program was positively judged by both interns and employers; and (4) the effective reality test in the workplace of the classroom-taught skills and concepts was seen as a prime outcome of LaGuardia's career education program. Twelve recommendations concerning implementation of career education were also presented, based on the pilot-test data. (A companion document, CE 019 282 contains a detailed description of the project objectives and activities.) (BM)

Identifiers—Education Amendments 1974, Wisconsin
To demonstrate career education methods and procedures, seven Wisconsin school districts were chosen to participate in an incremental improvement project. Project activities were conducted district-wide and by individual districts. District-wide dissemination activities involved promoting demonstration packets and assessment/evaluation (AE) instruments; sharing methods, materials, and expertise with consortium districts and others; and publishing a newsletter delivered to Wisconsin districts and others. Additional activities included working toward self-imposed incremental improvement criteria and a common set of desired learner outcomes. Evaluation activities entailed fostering acceptance of evaluation as a tool, disseminating the AE kit, further testing of kit instruments, and surveying packet and kit users. Leadership activities included state education agencies' facilitation of consortium products dissemination and consortium help in developing administrative leadership in their own and partner districts. Two of the many individual district activities involved funding in the Eau Claire district of sixteen mini-proposals to improve self-awareness, career awareness, and decision making skills, and the Watertown district's provision of a one-week workshop for thirty-four K-adult staff members. Third-party evaluation indicated that most consortium-wide and district objectives were achieved. (Appendixes contain a project profile, AE kit questionnaire results, and other project related materials.) (Author/CSS)

Third-party evaluation of the Wisconsin Career Education Consortium (WCEC) was conducted over two years, utilizing a time series evaluation design established in 1975. On-site interviews, surveys, and tests were used to collect data from students, teachers, counselors, parents, and administrators. The WCEC was effective in disseminating career education information, assistance, and products. Recipients of the newsletter, demonstration kits, and the assessment/evaluation (AE) kit gave them a positive evaluation. The seven consortium members had specific objectives which were primarily achieved. For instance, Eau Claire funded mini-projects that significantly impacted on the staff/students, and Kimberly extensively used resource centers and worked to improve community involvement in their program. Madison, Oregon, Shawano, Sheboygan, and Watertown also had effective program elements. Learner outcomes assessment revealed significantly higher attitudes toward work scores formed in the ninth grade and some significant increases in occupational knowledge. The third-party evaluators recommend that WCEC formalize a planned in-service program transportable to various school systems. (CSS)

Identifiers—Education Amendments 1974
The major objective of a project conducted by the Bedford County Public Schools in Virginia was to refine and further implement the model Career Education K-12 curriculum. Curriculum committees in five areas (art, language arts, mathematics, physical education, and social studies) were selected and given released time to receive in-service help and to write career education infused curriculum guides. Additional mini-courses were prepared for pupil and counselor/teacher use. Several of these courses were adapted, along with other materials, into a Career Education Handbook which was distributed to all instructional personnel. Teachers and guidance personnel received in-service to help them implement their part of the career education model. Key teachers from each elementary school and from secondary departments were selected to receive in-service on various topics. These teachers in turn shared the material with their colleagues. Guidance personnel received help on placement and career counseling and how to operate a career resource center. All activities were designed to assist students with self awareness and career awareness. Activities for secondary students were designed to aid in career preparation and decisionmaking skills. The project staff and guidance personnel developed and implemented a Plan for Job Placement, consisting of two components, career counseling and job placement. All activities were shared with special education students and gifted and talented students. Many activities were devoted to making school personnel aware of sex role stereotyping. (Author/BM)

Identifiers—Education Amendments 1974
An evaluation was conducted of the Bedford County (Virginia) career education project, K-12, for the 1975-76 school year. The results of the evaluation were organized around three major information domains: (1) student self-concept; (2) student awareness of the world of work; and (3) teacher in-service activities and use of career education resources and related practices. The Self Observation Scales (SOS) were administered to over 300 students to measure self concepts. Differences between the pretest scores and posttest scores showed a positive increase in pupils' scores at the primary and intermediate levels. The Career Maturity Inventory (CMI) was used to assess students' perceptions of the world of work and their relations with it. The results showed a marked gain from pre- to posttesting. There were six major in-service activities and numerous faculty meetings held over the course of the year. Teachers were requested to fill out the Teacher's Practices Survey (TPS) and the Bedford Career Education Survey. The TPS was designed to obtain feedback directly from teachers regarding their use of 15 specific techniques and activities related to career education. The Bedford Career Education Survey was administered on a pre/post test design for teachers and staff who participated in in-service activities. The results showed a positive increase in teacher attitudes on all three scales (acceptance, changes orientation, and commitment). Overall evaluation results indicated a successful implementation of the goals and objectives of the program. (Author/BM)

Identifiers—*Nontraditional Occupations, Nontraditional Roles

Designed to inform individual women and occupational counselors of blue collar jobs and training opportunities for women in construction and industry, this guide attempts to answer the questions: What is blue collar work? What is apprenticeship and are there entrance requirements? How do I go about finding a blue collar job or getting into an apprenticeship program? And finally, is blue collar work for me? The guide also includes sections on what to expect on the job, problems women crafts workers have encountered, history of women in the skilled trades, and profiles of blue collar women. A section on resource groups and organizations lists national and local sources of assistance. A bibliography indicates where to learn more about trades opportunities and about real life stories of women working in the skilled trades. Written in a conversational tone, many of the sections contain practical tips, for example, "Go to the job site looking like you are ready to go to work (work clothes, boots, etc.)." The guide includes tables, graphs, photographs, and a skills assessment check list. (LMS)

Identifiers—Nontraditional Occupations, Nontraditional Roles

A national survey of women in nontraditional, mixed, and traditional occupational training at area vocational technical schools was conducted to determine the factors which influence women to enter nontraditional training and how they differ from those of traditional women. It was found that women have difficulty selecting a nontraditional vocational program and that this problem is compounded by the pressure on women to choose academic preparation. Interest was the single most powerful force influencing women in their selection of vocational training. Ability in the occupational area was second, and earnings came third. Career education, career orientation, and job site visitation were considered more useful counseling techniques than individual counseling, vocational testing, or group counseling. Educational personnel did not have a great impact on the career decision making of students. Counselors and teachers had more influence on traditional women than on nontraditional women. Parents were the most influential group for nontraditional students. Employment of women in related occupations simultaneous to their vocational training was an extremely important factor in improving their education and training. The largest single problem identified by women was the problem of men adjusting to women in their classroom, particularly if there were very few women in the classroom. (LMS)

To obtain quantifiable employment information and identify training weaknesses of former vocational technical students, a comprehensive follow-up questionnaire was developed and validated. The new questionnaire, after review and revision, was field tested, using twenty-five randomly selected former students (placed in occupations related to their training) and twenty-two of their supervisors. Respondents were asked to identify ambiguous words, questions, etc; respond to each applicable question in terms of questions and scale values; offer program improvement comments; and rate ten question categories from most to least important. Several of the findings were (1) to avoid late returns it is advisable to collect responses at on-site visitation; (2) response rate, validity, reliability (.778), and comments indicate questionnaire is appropriate for the intended purpose; (3) the nine-point rating scale and "not applicable" option produced sufficient variance to provide useful data; (4) a questionnaire user's guide is needed; and (5) former students' supervisors should be the questionnaire respondents. It is recommended that, following revision, the questionnaire be put into immediate use for on-site follow-up; a user's guide be developed and disseminated; and twice yearly instructors should answer the questionnaire for self-evaluation. (Four other recommendations are offered. Appendixes contain the Appalachian Regional Commission evaluation form, on-site follow-up forms, and field validation form.) (CSS)

This guide is designed to assist users in collecting evaluation/follow-up data primarily from supervisors of former vocational-technical school students. The guidelines, presented in five parts, provide a step-by-step checklist for implementing the system and acquiring measurable/reliable data applicable to individual or overall school programs. Questionnaire data is expected to provide a basis or means for program evaluation, program comparison, instructor's self-evaluation, instructional improvement, and staff improvement. Following the introduction, part 2 reviews the participant selection process and includes guidelines for student exit interviews, sampling of students placed in related and unrelated fields, and selection of former students placed in the field. Part 3 discusses conducting on-site activities which involve making appointments with former students and their supervisors, developing travel plans, conducting on-site interviews, and following up mail-in responses. In part 4 instructions are provided for checking questionnaire responses, coding the questionnaire for keypunching, processing the data, and updating student records. The concluding part of the guide examines various administrative, supervisory, and instructor uses of the questionnaire. Appendixes contain (1) the validated evaluation/follow-up questionnaire (student, instructor, former student, and supervisor forms), and (2) a sample visual chart for presentation. (This guide is designed to be used in conjunction with the technical report, CE 019 570.) (CSS)

Identifiers—Comprehensive Employment Training Act

Intended to be used in conjunction with the 1977 edition, this 1978 supplement contains descriptions and college credit recommendations for approximately 320 courses offered on the postsecondary level by thirty-eight noncollegiate organizations. An introductory section provides (1) background on the Program on Noncollegiate Sponsored Instruction, and its 1976 follow-up study to assess its impact in New York state, (2) a description of the review process, (3) question-and-answer sections for students and college administrators and faculty, and (4) directions for using the supplement. Section I describes and evaluates courses which have been reviewed since the publication of the 1977 Guide. Introductory paragraphs are generally limited to organizations whose courses have not been previously included. Section II focuses on courses conducted by organizations under the Comprehensive Employment and Training Act (CETA). Section III contains modifications of previously evaluated courses which resulted from the Program's regular re-review process. All material about the modified course is printed here so that it is not necessary to consult the 1977 Guide. Each course description in the three sections consists of the following information: location, length, dates, objective, instruction, and credit recommendation. A course index is also included, arranged by organization name. (ELG)

A program was developed for parent involvement in career education of students at the elementary, junior high, and senior high levels. The goal of the program is to make parents aware of the important role they play in the career development processes of their children. Topics dealt with include the following: (1) improvement of communication skills between parent and child; (2) influence of parents on career choice and work values; (3) career resources in the school and community; (4) sex-role stereotyping and its effect; (5) improvement of self-concept of children; (6) the importance of career planning; and (7) the stages of career development. At each of the three academic levels, the parents attend five learning sessions, and in Project Apollo, the senior high component, the students are also present. Except for the individual meetings in Project Apollo to review the students' records, the sessions involve the use of handouts, discussion groups, audiovisual materials, reading materials, or role

playing. (Outlines are included for each session giving objectives, materials, procedure, preparation, guidelines, and alternate programs. Appendixes provide copies of handouts and questionnaires.) (ELG)

Identifiers—*Experience Based Career Education, J L Mann High School SC, South Carolina

The Experience-Based Career Education (EBCE) program at J. L. Mann High School (Greenville, South Carolina) was designed to provide enrolled students with community-based career experiences and to make the career resource room a focal point for career education for all students and teachers in the school. An individualized course of instruction was also offered to EBCE students along with their community experiences. The 1977-78 school year was the first full operational year of the program. Formal pre- and post-testing was conducted in achievement, career concepts, and attitudes for three of EBCE groups (N = 87). Comparison data was gathered from non-EBCE students in the same high school and from another high school. Survey and interview data were gathered at various times throughout the year from students, parents, and community resource persons. Also, periodic observations were made of EBCE activities. Some of the evaluation findings were as follow: (1) improvements were made for the second year by expanding staff and facilities and developing additional job sites; (2) program dissemination was ahead of expectation; (3) English and mathematics performance on standardized tests indicated that EBCE students were performing as well as comparison students; (4) EBCE students showed significant growth in writing skills as a result of a focussed effort on writing ability; (5) the Career Maturity Index showed total battery superiority of EBCE students to comparison students; (6) there was some evidence of appropriate attitude development; and (7) a review of the guidance component by an outside guidance specialist yielded high ratings for the entire guidance program. Identifiers—*Ownership

The world economic situation is beset by growing worker dissatisfaction, slowing economic growth, and rising energy and resource costs. A partial solution to these problems may be worker participation in management and ownership. As production has become more dehumanized and workers have become increasingly dissatisfied and alienated, the quality of their work has suffered. To offset this malaise, various experiments have been conducted to improve the quality of work life and to give workers a voice in management decisionmaking. While workers in the U.S. often use unions to express their views, in other nations they hold seats on boards of directors and have formed work councils for this purpose. Ownership by workers may be either indirect in the form of investment funds and employee stock ownership programs or direct in the form of co-ops. It is difficult to generalize about the economy-wide impact of worker participation because of the lack of controlled experiments and long-term data. However, it appears that participation certainly does not harm productivity and probably improves it. Presently, worker participation is at different stages in countries around the world due to variations in cultural backgrounds and histories. (ELG)

This bibliography, containing approximately 600 abstracts of career education materials, was developed for adult education administrators, planners, and practitioners, working in a variety of settings, such as adult basic education programs, high school equivalency programs, on-the-job training and retraining programs, and career counseling centers. These materials include teacher-support and student-use texts, workbooks, classroom kits, guidance and counseling aids, testing and appraisal materials, curriculum plans, and resource directories. The entries, alphabetized according to title, are presented in the following four sections (the first two of which contain most of the entries): (1) for the professional (includes project reports/program development guidelines, teacher training/curriculum guides, research/special reports/commentary, career education in corrections, career education for law enforcement personnel, bibliographies/program directories, counseling, and counseling women), (2) for the client (includes job and career opportunities; job finding and keeping skills; and job skills, such as office skills, management, auto mechanics, and professions and skilled trades), (3) pre-vocational skills (English and math), and (4) for ESL (English as a Second Language) clients. Each entry includes the following: identification number, title, author, source, publication date, pages, price, reading level, grade level, format, and abstract. (EM)

Descriptors—Adult Education, Assertiveness, *Career Development, *Change Strategies, Changing Attitudes, Communication Skills, Conflict Resolution, Continuous Learning, Decision Making, Educational Needs, Females, Job Skills, Males, *Management Education, Middle Management, Objectives, *Organizational Communication, Problems, *Professional Training, Program Content, Secretaries, Sex Differences, Sex Discrimination, Sex Stereotypes, Supervisors, *Working Women

The number of women occupying managerial positions in the U.S. is relatively small, but it rose 47% from 1,321,000 in 1970 to 1,942,000 in 1976. Circumstances contributing to this rise are enforcement of legal sanctions against discrimination and women's increased educational attainment. This report describes a continuing education workshop series that was developed through a literature review and interview survey to ascertain opinions, trends, and experiences related to the managerial woman's educational needs. Three themes emerged: (1) women at three management levels (executive secretaries/administrative assistants, supervisors, and middle management) have defined educational needs; (2) formal management education courses for women should be the same as those for men; and (3) special educational programs are needed to respond to personal concerns of women in management. Two workshop series dealing with innovative topics were developed. The first series, workshops for men and women managers, deals with the following topics: male stereotypes about and biases toward women managers, comparison of men and women managers' abilities and characteristics, a decision-making method, conflict management, and change strategies. The second series for women only addresses problems of women managers. Workshop topics include assertiveness training, men and women's career concept differences, power, collusion, intimacy-sexuality, support, career planning, professionalism, and communication skills. Although lifelong learning was a term created to mean cradle-to-grave learning, it has come to mean specifically adult learning and education. The adult learning force in the U.S. is huge and growing in size as well as interest. Since eighty-five percent of the active adult learners are high school graduates, they are eligible for postsecondary education. Many enroll in the formal programs offered by colleges and universities, but an even larger number spend time on self-directed, informal learning projects. Four social forces are contributing to this increase in adult education: (1) national pressure for expanded educational opportunities, which has resulted in learning no longer being tied to a physical location; (2) a combination of decreased emphasis on the credentials of the educational provider and increased emphasis on the credentials of the learner, permitting academic credit for experiential learning; (3) recognition of the necessity for, and pleasure derived from, lifelong learning; and (4) the societal shift from a linear life plan to a blended life plan, which has been produced, in part, by the job shortage. Educational providers for lifelong learning are a diverse group including libraries, museums, and television as well as schools. As they develop their unique educational strengths, they will continue to provide education with a diversity of options. (ELG)

Identifiers—*Nontraditional Occupations
A study explored the results of programs designed to move women into traditionally male jobs (both managerial and blue collar) in ten public utility companies. The focus of the study was on the experiences of 164 women in such jobs and on the attitudes of their supervisors, male peers, and subordinates toward the companies' attempts to overcome job discrimination based on sex. The study also explored the impact of the women's new job patterns on their relationships with peers, parents, husbands, male friends, and children. The findings indicated that the experiences of the ten companies were considerably more positive than negative. Most of the women were seen to be performing well in their new jobs, although those in blue collar positions encountered more difficulties in the form of inadequate prior training and harassment from male peers. There was also considerable evidence that negative attitudes and expectations on the part of male supervisors and peers were likely to change rapidly when the supervisors and peers had an opportunity to observe a woman performing effectively in a nontraditional job. Companies making the most progress in providing equal opportunities for women were those which planned the transition carefully, involved first-line supervisors in the planning, and provided central staff monitoring and guidance to managers attempting to meet Equal Employment Opportunity goals. (Interview outlines and data analysis procedures are appended and graphs, tables, and references are included.) (Author/LMS)

Descriptors—*Curriculum Development, Fused Curriculum, *Integrated Curriculum, *Job Skills, Mathematical Applications, Mathematical Concepts, Mathematics, *Mathematics Curriculum, *Mathematics Education, Secondary Education, *Vocational Education
Intended for use by counselors and mathematics teachers, this guide brings together mathematical and occupational skills to form an interrelated curriculum. Eight occupational clusters are included as follow: (1) business and office, (2) communications, (3) construction, (4) hospitality, (5) manufacturing, (6) marketing and distribution, (7) personal service, and (8) transportation. The scope of each cluster is defined, and the major job areas within it are identified in conjunction with suggested vocational courses. A chart then shows the relation of the occupational courses to the mathematical concepts and the mathematical courses in which they are taught. Besides giving the occupational applications of the concept, the chart refers to the appendixes which contain examples of the mathematical problems encountered in the specific occupations. The mathematical skills applied include the following: areas and volumes; computer science; conics; geometry; decimals; basic arithmetic; exponents, roots, and powers; formulas and equations; graphs and tables; logarithms; logic and proof; matrices; measurement systems; parallels and perpendiculars; percents; perspectives and transformations; polynomials; calculus; products and factors; ratio and proportion; statistics and probability; trigonometry; and vector applications. Identifiers—*Nontraditional Occupations
Designed to help organizations interested in expanding job options for women to plan and hold a community-based conference on nontraditional jobs, this guide outlines basic steps in planning, provides information about successful programs, and makes suggestions about how to deal with the mechanics of a conference. Following an introduction which presents the barriers to and advantages of nontraditional employment for women, a section on preliminary planning discusses the conference coordinator, community analysis, choosing a theme, the planning committee, and participants. The next section, "Program," deals with format, subject areas, speakers, panels, workshops, lunch, and audiovisuals and exhibits. The following section, "Conference Procedures," covers finances, timing and site, invitations, facilities and equipment, registration, briefing sessions, publicity, and the conference report. The section on follow-up includes evaluation, planning the committee meeting, and closing out. The appendixes include a resource list of publications, slides, and films; a checklist of things to do before and after the conference; samples of a press release, announcement of reception and briefing, registration form, program, and letter of invitation; and a list of Women's Bureau Regional Offices. Identifiers—*Nontraditional Occupations
Prepared for employers and staffs of job service and training programs, this guide presents information on how to conduct a workshop to expand employment opportunities for women in nontraditional occupations–in blue collar skilled work as well as white collar professional, technical, and managerial jobs. The guide includes sections on purpose of the workshop (to provide a forum in which employers are encouraged and assisted in hiring women for nontraditional jobs), agenda for a one-day workshop, workshop facilitator, program staff participation, locating and selecting employers, size of workshop, facilities, materials for kits, and workshop format–background and rationale. Appendixes include a selected list of publications, slides, and films on women in nontraditional employment; an invitation letter; a registration form; an agenda; and a workshop evaluation form. Identifiers—Massachusetts (Boston), *Nontraditional Occupations, Nontraditional Occupations Program for Women
Part of a project to expand and improve the occupational options of low-income women, this program model (one of thirty nationwide) describes classroom training and work experience in the building maintenance skilled trade areas (maintenance and repair of electrical machinery, construction carpentry, plastering, painting, and papering). Part I, an overview, discusses program components, eligibility, and benefits. Part II deals with budget and staff. Part III discusses recruitment, intake, and orientation. Part IV covers classroom training and occupational fitness. Part V deals with work experience. Part VI covers counseling and supportive services. Part VII consists of job development, placement, and post-placement. Part VIII deals with monitoring and evaluation. Appendixes include a screening interview form; a counseling orientation schedule; formative evaluation questionnaires; a weekly scheduling form; samples of a course outline, classroom assignments, and an evaluation form; suggested exercises for developing occupational fitness; a list of electrical tasks; a worksite agreement; a schedule for the counseling component of the program; a brochure on the Nontraditional Occupations for Women program; a list of procedures for identifying and posting jobs; a form letter to employers; and a final trainee reaction form. Descriptors—*Accreditation (Institutions), Advisory Committees, *Certification, *Educational Programs, Eligibility, Engineering Technology, *Federal Legislation, Fire Protection, *Fire Science Education, Professional Continuing Education, Program Evaluation
Identifiers—Federal Fire Prevention and Control Act 1974, *National Fire Academy
This report addresses the desirability of and mechanism for establishing accreditation procedures for fire-related training and education programs in the U.S. and the role of the National Fire Academy in such a process. It also considers the appropriateness of accreditation for the Academy itself. First, a list of the members of the Advisory Committee on Fire Training and Education is given. An executive summary follows, explaining the ac-

creditation process, the classifications of fire-related academic programs, a description of the scope of fire service training, and a summary of the efforts of the Academy. Chapter 1, an introduction, analyzes the federal legislation which resulted in the various fire service programs and their accreditation methods. Chapters 2-4 discuss accreditation of fire education, fire service training, and the National Fire Academy. The appendixes include a glossary, an accreditation evaluation review of engineering programs, accreditation questionnaire and results, text of the federal fire prevention legislation, criteria for a continuing education unit, and biographies of the developers of this report. Descriptors—*Behavioral Objectives, Definitions, Elementary Secondary Education, Instructional Materials, *Instructional Systems, *Layout (Publications), Learning Activities, *Learning Modules, *Organization, *Performance Based Education, Performance Specifications, Program Development, Skill Development, Teaching Methods

These specifications are intended to provide interested educators with a set of guidelines for the development of competency-based instructional modules. In the first of two chapters "essential" definitions and module components are presented. "Module, competency statement, and general, terminal, and enabling objectives" are defined. Seven major components of the competency-based instructional model are described; these components include the rationale/introduction, objectives, preassessment, instruction, self-evaluation, evaluation, and feedback. Chapter 2 examines the module organization, format, and layout. Module organization is discussed in terms of its requirements: (1) preliminary pages including title page, table of contents, and module overview sheet, (2) module body incorporating test and other pages, and (3) reference matter encompassing module resources and appendixes. In conclusion, the module format and layout are outlined, and guidelines are provided for paper selection, binding, type face, page numbering, margins, use of material other than typed copy, citations, copyrighted materials, and bias exclusion. The appendix contains sample module pages from a table of contents, overview sheet, module body, and resources page. (CSS)

Descriptors—*Adult Education Programs, Audiovisual Aids, *Audiovisual Communication, *Communication Skills, *Community Resources, Newspapers, *News Writing, *Publicize, Radio, Television

This monograph describes successful publicity practices in adult education that can be adapted to fit individual promotional plans for communication with the community. The introduction explains the importance of good public relations to an adult education program. In section 1, publicity and promotion, the various ways of publicizing information are discussed: word-of-mouth; speeches to clubs and organizations; brochures, pamphlets, and flyers (including the class schedule); newspapers; radio and television; personal letters and postcards; audiovisuals; slides; transparencies; and motion pictures. A list of do's and don't's for writing and distributing news releases is included in this section. In the second section the advantages and disadvantages of these types of publicity are presented. A section on the best use of each type follows. Section 4 presents examples of community resources used to publicize and promote adult education, such as the chamber of commerce, churches, and medical clinics. Finally, a list of innovative ideas used to publicize adult education are given as examples of unique publicity plans which can be adapted by others. (CT)

Descriptors—*Adult Education Programs, *Adult Students, Behavioral Objectives, Community Involvement, Community Programs, *Data Collection, Decision Making, Educational Needs, Group Status, Individual Needs, Institutional Role, Models, Need Gratification, *Needs Assessment, *Program Development, Program Improvement, Student Needs

This monograph focuses on adult education programs and (1) why needs assessment is necessary, (2) how to assess needs, (3) how to assess the needs of special groups, and (4) how to assess program needs. In the first of four sections the administrator's role is described, and the term "needs" is defined. Models are proposed for individual and institutional behavior. Section 2 reviews three assumptions as to why the assessment is being conducted; for example, the first assumption is that a needs assessment process leads to program support. This section advances an eight-step process for assessing needs: identify program goals, identify needed data, identify data available, identify data that must be gathered, gather data, identify discrepancies, rank order identified discrepancies, and begin the program development process. How to gather and manage data are also examined. Section 3 focuses on the needs of specific adults. It is suggested that criteria, such as age, ethnicity, socioeconomic status, handicaps, and educational status, can be used to identify program requirements for various subgroups. The involvement of community agencies in meeting special group needs is recommended. The report cautions against involvement with vested interests and notes particular problems in obtaining data from certain subgroups. The final section advises the use of the eight-step model to identify program needs. (CSS)

Identifiers—Entrepreneurship, *Small Business Management

A project was organized around a series of activities to prepare materials or disseminations for small business management education programs. Activities were as follow: (1) prepare needs assessment procedures for determining the number and types of businesses to be served by a small business management education program; prepare model legislation; (2) develop course curriculum for postsecondary or adult students planning to go into business; (3) update and expand curriculum materials developed under a previous grant: an addendum to Volume III, Small Business Management; (4) prepare an instructor's manual for interpreting small business analysis; (5) conduct conferences for state vocational education personnel to familiarize them with adult programs in small business management; (6) conduct a workshop for local school agency personnel who will be responsible for program organization and operation; and (7) participate in group meetings associated with entrepreneurship. As a result of the project, various products were developed: a needs assessment package, model legislation, state plan materials, a conference program, a course of study for training small business teachers, fifteen "going into business" modules, curriculum addendum to Volume III, Volume II (Business Analysis), and an instructor's manual for interpreting the small business analysis. Tables and significant figures found in a small business analysis report are explained to provide instructors with suggestions on how these items can be used by students to improve the management of small businesses. Contents of the manual are organized into two parts. Part I, The Analysis Report,

contains the following chapters: (A) Business Inventories (increase or decrease, workers required, returns); (B) Income and Expense Statement; (C) Income and Expense Statement (Business); (D) Gross Margins and Net Decreases; (E) Standard Balance Sheet (business only); (F) Net Work Analysis; (G) Household and Personal Expenses; (H) Measure of Efficiency and Organization; and (I) Departmental Income and Expense Statement. Part II, Presenting Analysis Interpretation Data, contains four chapters: (A) Use of Benchmark Comparisons in Illustrating Efficiency and Organization Factors (e.g., using graphs to illustrate historical patterns, strategies to use in classroom instructions); (B) The Business Visit (e.g., planning for the first visit after the business analysis summary meeting, techniques for instructors and students to search for strong and weak points in the business); (C) Business Analysis Summary Meeting (e.g., interpreting analysis data that has impact on all students, linking differences in business to operated practices); and (D) Classroom Use of Individual and Group Data. This set of materials was developed to assist with the dissemination of the Minnesota model for small business management education, five sections of information are presented. The first of five sections is on small business management needs assessment and describes a method of determining the number of small businesses that would constitute a population for an educational program. The second section presents two models for legislation: (1) a bill for an act (relating to adult vocational education and training, establishing education and training programs for small business and farm entrepreneurs, and appropriating money) and (2) an amendment to the Omnibus School Aids Bill (current block funding for adult small business and farm entrepreneurship management education). The third section provides a job description, qualifications, and suggested requirements for certification of small business management education instructors and coordinators. The fourth section describes a model conference for soliciting support for small business management education; included are conference objectives, agenda, and conference support material (why have a small business management program; a brief historical review of the development and growth of the management education program for farmers and ranchers; establishing minority small businesses [case studies]; and the development, design, and evaluation of the Minnesota model). The final section provides ten units of instruction to be used in a preservice workshop for small business management instructors. (JH)

A practice problem in year-end business analysis is presented to provide experience with a system of single-entry bookkeeping as part of a small business management adult education program. The problem simulates an entire business year and includes transactions involving general business revenues and expenses pertaining to most small retailing organizations. A standardized chart of accounts is included which is generally adaptable to computerization and can be applied to most double-entry accounting systems. Data forms are included to aid in compiling the necessary information for a complete business analysis. Complete, step-by-step instructions for filling in the data forms specify the exact input required for each line and column on the data forms. Documentation for the business analysis includes a line-by-line description of each item contained in the table of analysis. The data form number and specific line numbers are also included. Appendixes contain keys to the practice problem and data forms and an analysis and interpretation of the business analysis problem. (JH)

Identifiers—Washington

A study was done to determine the training needs of health occupations teachers in the state of Washington. Focus was on identifying the most important content for teacher training activities and the most acceptable formats for providing these activities. Data were collected via (1) telephone interviews of key health personnel from each state, (2) questionnaires mailed to health occupations teachers and their supervisors in Washington, and (3) telephone interviews of persons at Washington institutions of higher education. The mail survey results showed that health occupations teachers and their supervisors considered curriculum and instruction topics as the most appropriate content for teacher training activities. Activity formats rated as most acceptable were those that were minimally time consuming, such as workshops, or those that allowed a flexible use of time, such as independent study. (The appendix, comprising most of this report, includes the following: telephone interview and survey forms; teacher competencies rating instrument; sample letters; a summary of teacher training practices nationwide; a summary of the results from the Washington survey of teachers and their supervisors; and a report of the research data which includes suggested content and formats, suggestions for degree and in-service programs, information on institutions offering degree programs, and a profile of health occupations teachers in Washington.) Identifiers—Comprehensive Employment Training Amendments, Youth Employment and Demonstration Projects

This report reviews legislatively mandated linkages between prime sponsors and local education agencies (LEAs) in providing employment, education, and training for youth. The legislation discussed includes (1) the 1977 Youth Employment and Demonstration Projects Act (YEDPA), (2) the Young Adult Conservation Corps, (3) the Youth Incentive Entitlement Pilot Projects, (4) the Youth Community Conservation and Improvement Projects, and (5) the Youth Employment and Training Program. Senate and House bills for continuation and revision of the Comprehensive Employment and Training Amendments (CETA) of 1978, which incorporates YEDPA, are discussed. Highlights are presented from a series of Department of Health Education and Welfare/Department of Labor workshops for prime sponsors and representatives of LEAs to provide information and to encourage collaboration on projects authorized under YEDPA. Participants' view on implementing collaboration, career development, work experience, and academic credit are reported. Various examples are provided to demonstrate the Work-Education Consortium Council's involvement in assisting CETA/-LEA collaboration, involvement with LEAs and involvement with CETA prime sponsors. The appendix contains relevant sections of Title IV–Youth Programs of the Comprehensive Employment and Training Amendments of 1978. (CSS)

Information for employers concerning the Affirmative Action Program and the hiring of handicapped workers is presented in this resource guide. The guide is designed in the style of a listing of helpful hints and in question-and-answer form. Topics discussed include finding qualified handicapped workers, enlisting the aid of present employees, interviewing methods, accessibility of buildings to the handicapped, ways to utilize handicapped workers, worksite modifications, and transferring or firing a handicapped worker. The question-and-answer section is based on issues raised by corporate Equal Employment Opportunity officials. The appendexes include tax considerations in employment of the handicapped, tax credit for employers of handicapped workers, and addresses of vocational rehabilitation agencies. (CT)

As the basis for planning the University of Texas Liberal Arts Career Symposium, the Overall Coordination Committee assessed freshmen through seniors' self-reported post-graduate plans, career interests, and need for job-hunting/career planning services. A questionnaire was completed by 3,735 liberal arts and fine arts students. Major survey findings were that (1) two-thirds of the seniors reported considering graduate school, with percentages by college ranging from a low of 56% in natural sciences to a high of 81% in social and behavioral sciences; (2) 85% of seniors indicated they did not have a job lined up after graduation; this percentage varied from 78% in general and comparative studies to 89% in fine arts; (3) although career field interests differed by college, greatest interest areas for the total sample were education, health, and social services-related careers; (4) students in general and comparative studies appeared to be considering the broadest range of possible career fields; fine arts students seemed more narrowly focused; (5) 60% of the total sample wanted career/job information particularly in the employment outlook area; 28% requested help in choosing a career; (6) nearly half the seniors indicated a need for job-hunting assistance; and (7) post-graduation plans and indicated needs for career planning assistance varied by major. Identifiers—Navajo Division of Education
This report reviews network project strategies to provide Navajo high school students with the choice of any regionally offered vocational education course. The first of six sections documents Navajo vocational education needs and cites problems in meeting these needs; for example, inadequate funding and poor interagency coordination. Section 2 focuses on the network purpose and project plan. The plan is described as the basis for the Navajo Division of Education (NDOE) to evaluate existing vocational education programs, coordinate resources, identify program needs, coordinate the Navajo Regional Vocational Institute development, and determine transportation requirements. The third section discusses project methodology, including formation of a region-one school representatives committee and a survey of region-one high schools to obtain vocational program availability data. Section 4 proposes improvements for facilities, equipment, teacher training needs, and other areas. In section 4 barriers to network implementation are pinpointed: absence of a Vocational Education Navajo Branch and coordination system, and the Indian vocational education contracts program. The final section makes recommendations for the Bureau of Occupational and Adult Education and NDOE. Also provided are project development recommendations for the advisory committee, data collection/analysis, and other program elements. Appendixes contain the survey instrument and responses and other project related materials. (CSS)

Descriptors—*Data Analysis, *Educational Accountability, Evaluation Criteria, Job Placement, *Program Effectiveness, Program Evaluation, *Vocational Education
Identifiers—United States
The project summarized here focuses on the interpretability of vocational education outcome data. The booklet first covers the project problem and background, project objectives, general plan of operation, and the analysis of extant data bases in vocational education. It then discusses a case study of differences in job placement rates reported by states, including the case study questions, sample design, conclusions, differences in high and low placement states, suggested research hypotheses, and suggested guidelines for using placement data as reported by states. Finally, the booklet presents the titles of three papers commissioned for the project, the topics considered at a project-sponsored national conference on vocational education outcome measures, a description of a handbook on vocational education measures, and nine project conclusions. Identifiers—United States
A project regarding the interpretability of data on vocational education outcome data was done (1) to determine how different definitions of the vocational student and relatedness of training to employment might affect the interpretability of vocational education impact data; (2) to synthesize the current literature and approaches measuring job satisfaction and job performance; (3) to prepare a handbook on vocational education measures; (4) to prepare position papers on the sociopolitical issues underlying the interpretability issue; and (5) to hold a national conference to share the results of the aforementioned activities. The project conclusions include the following: vocational education program outcomes need to be closely linked to the values of individuals and groups concerned with vocational education; the originators of data concerning the outcomes of vocational education–the local education agencies–must be the users of the data in order for ultimate improvements in vocational education to result; in general, placement data are not collected systematically with an emphasis on precision and accuracy; and quality of instruction, relevance of program, impact of program, and individual transition and growth represent four categories of possible criteria for which vocational education might be held accountable. (This report includes a case study of differences in job placement rates reported by states, and the presentations and reactions at the national conference, including three commissioned project papers.) The special projects for improvement in nurse training listed here were funded by the Division of Nursing for the period June 1965 to June 1978. The list is arranged alphabetically by state, city, institution, and project. Each entry includes the following: grant code number, project period, institution name and address, project title, project category, and a brief project description. The project categories are as follow: career development, curriculum revision, expanded clinical role, faculty development, instructional technology, new programs, program evaluation, planning grants, remedial services, and special financing. This report provides short summaries of career education projects funded under the provisions of Section 406 of Public Law 93-380 during fiscal year 1978. Each project summary follows a similar format, which includes identifying information (title, grantee, project director), major objectives, project activities, evaluation, communications, and demographic information. The eighty-seven projects summarized are grouped into five categories: (1) incremental quality improvements in K-12 career education programs (twelve projects); (2) effective career education methods and techniques in senior high schools, community colleges, adult and community education agencies, and higher education (ten projects); (3) effective career education methods and techniques for special segments of the population (handicapped, gifted and talented, minority, and low income youth) and for the reduction of sex stereotyping in career choices (thirty projects); (4) effective methods and techniques for training and retraining persons conducting career education programs (twenty projects); and (5) communication of career education philosophy, methods, program activities, and evaluation results (fifteen projects). Profiles for fiscal year 1977 are detailed in ED 158 005, and for 1976 in CE 020 140. (CT)

Descriptors—*Career Education, Community Involvement, *Demonstration Projects, Educational Programs, Needs Assessment, Program Development, Secondary Education, Urban Areas, *Urban Schools
Identifiers—Detroit Public Schools MI, Education Amendments 1974
A two-year project was conducted to develop, implement, and evaluate a model demonstration career education program in a large urban setting (Detroit Public Schools). Major activities involved in the first year (phase I) included the following: (1) selecting fourteen target schools to be served; (2) determining the needs and specific career education training requirements for all students, teachers, administrators, counselors, and community members who would be involved in the infusion of career education in the schools; (3) developing a training program for those participants who must implement the school program in the second project year (phase II) (activities included workshops for teachers, administrators, counselors, and community members; a series of community/business training sessions; and a series of sessions for parents and students to be served in the target schools); (4) creating and selecting materials for immediate implementation in the schools during phase II; (5) creating active support on the part of the community, business, industry, labor, and other agencies; and (6) establishing a school-wide information system. The thrust of the second project year (phase II) was to implement all aspects of the program developed in phase I. (This final report is divided into two sections. Section I provides an overview and summary of the entire project, and section II contains eleven subsections, each detailing a project task outlined in section I.) (JH)

Identifiers—*Detroit Public Schools MI, Education Amendments 1974
This evaluator's report of a career education project for the Detroit Public Schools is divided into two sections. Section 1, process evaluation, provides a summary of the activities reported by the project personnel for the eight deliverables collected and analyzed by the evaluator staff: (1) curriculum infusion, (2) career counseling/placement/follow-up, (3) community involvement (business), (4) deprivation needs, (5) parent training and involvement, (6) staff training, (7) involvement of principles, and (8) reduction of race and sex stereotyping. The second section, product evaluation, describes the evaluation instruments used, the subjects of the data collection, and the testing plan. The major portion of the section includes the results of the data collection for fourteen student objectives and one educator objective. The objectives are as follow: recognizing similarities and differences; establishing goals; understanding individual and group behavior; interpersonal relationships; sources of education and training; occupational information; decision making factors; self assessment; career options; life roles; participating in career planning; gaining education or training (basic skills); resources to implement career goals; goal attainment influencing factors; goal change factors; and educator knowledge of career education. Completing the report are student comments related to the career education program, and general project conclusions. (JH)

Descriptors—Art Products, *Career Exploration, Course Content, Course Organization, *Industrial Arts, Instructional Aids, *Job Training, Lesson Plans, *Mass Production, *Metal Industry, *Metal Working Occupations, Occupational Guidance, Occupational Information, Secondary Education, Sheet Metal Work, Vocational Education
This curriculum bulletin is designed to present seventh and eighth graders with an overview of the metalworking industry from the acquisition of raw materials to the fabrication of the completed product. The manual is organized into five major instructional units: sheet metal, wrought metal, jewelry and art metal, bench and machine metal, and cast metal. Each unit is taught from the standpoint of its distinct tools, machines, operations, and processes with a consideration of the relationships that exist between each of the areas. The course provides a dual approach by considering unit and mass production methods of making a product. Each unit contains the following curriculum components: unit production, demonstration and related lesson plans, instruction sheet, related information sheet, mass production methods, occupational information, test questions, alternate product ideas, and selected related materials. In addition to the unit sections, there are comprehensive sections on the course organization, shop management, unit and mass production, course content, guidance, and teaching aids and materials. The manual is illustrated with photographs, charts, and drawings. (CSS)

Descriptors—*Agricultural Education, *College Graduates, Curriculum Evaluation, Curriculum Planning, Failure Factors, *Program Effectiveness, *Program Evaluation, Questionnaires, Success Factors
Identifiers—*Texas A & M University
A follow-up study of agricultural education graduates from Texas A & M University was conducted to determine the effectiveness of the curriculum in agricultural education at the University in the preparation of graduates for careers in agriculture and to determine the factors which might influence the choice of and success in either teaching or alternate careers. Data were obtained from 186 of the 280 questionnaires mailed to graduates for the years 1965 through 1971. Results of the study include the following: the factor that influenced graduates most to major in agricultural education was the desire to secure a broad knowledge of scientific agriculture; more course hours in horticulture were recommended; and the factor that had the greatest degree of influence on graduates to enter the teaching profession was the opportunity to work with youth

(the greatest dislikes were the salary level and lack of advancement opportunities). It was concluded that former students were satisfied with their curricular experiences at Texas A & M University. Finally, based on the findings, the following recommendations were made: more courses in horticulture should be added to the curriculum in agricultural education; efforts should be increased to encourage students to take advantage of career counseling on the campus; and students who do not plan to teach should be directed into courses in journalism and business. This compilation includes abstracts of 140 research and development studies in agricultural education completed during the period July 1, 1977 to June 30, 1978. Thirty-three of the completed studies represent staff research, fifty-six represent master's theses, and fifty-one represent doctoral dissertations. Studies are arranged alphabetically by state and alphabetically by author within states. Entries contain the purpose, method, and findings of the research and development activities. A comprehensive subject index, utilizing ERIC descriptors, is included; among the topics included are Adult Education, Agribusiness, Curriculum, Economics, Employment, Forestry, Leadership, Program Development, Work Attitudes, etc. Studies reported as being in progress during 1978-79 are also compiled. They are arranged alphabetically by state and by author within states. In progress were fifty-two staff studies, forty-seven master's theses, and twenty-seven doctoral dissertations. A listing (by ED numbers) of where to find previous summaries of studies in agricultural education is also included. (CSS)

Descriptors—Career Choice, *Change Strategies, Educational Needs, *Educational Opportunities, Equal Education, Equal Opportunities (Jobs), Females, Inservice Teacher Education, Instructional Materials, Interviews, *Justice, Males, Occupational Aspiration, *Occupational Choice, Secondary Education, Sex Discrimination, Sex Fairness, Sex Role, *Sex Stereotypes, *Student Attitudes, Student Opinion, Vocational Education, Womens Education

This report identifies the degree to which high school students consider choosing nontraditional occupations, if youths are aware of sex stereotypic influences, and what strategies they would offer to promote educational equity. Chapter 1 reviews the literature and defines the problem and objectives. Chapter 2, on procedures, describes the sample, interview techniques, and qualitative analysis. Chapter 3 reports the students' occupational choice, influences on occupational choice, rejection of nontraditional occupations, sex stereotyping influences, and strategies for counteracting sex stereotyping. Some findings are that 80% planned to enter occupations traditional to their sex, that five factors were primary career plan influences, and that students had suggestions for counteracting these influences and achieving occupational sex equity. Chapter 4 reports the study's conclusions that awareness is not reflected in most occupational choices; among students choosing nontraditional occupations there are more females than males; most choices require at least a four-year college degree; and class experience is the most influential factor in nontraditional occupational choice. The annotated bibliography for educators/counselors provides resources on sex bias in education/work; strategies to achieve sex equity; sex fair materials; inservice training to promote sex equity; assistance for returning women students; and resources for sex fair education. Descriptors—Adult Education, Change Strategies, Conceptual Schemes, *Continuous Learning, *Delivery Systems, Educational Alternatives, *Educational Needs, Educational Opportunities, Information Processing, *Older Adults, *Program Design, *Program Development, Senior Citizens, Systems Concepts, Theories

To clarify delivery system concepts, several topics will be addressed: educational needs of lower-income older people, formulation of a design concept, specification of the system's concrete aspects, and research/development implications. As the proportion of persons over age sixty-four grows and sensitivity to unmet lifelong learning needs rises, the need for conscious design of lifelong learning institutions increases. A service system should have linking mechanisms that attend to the individual's total life situation. The delivery system can be identified as an interactive, self-regulating, three-component system: (1) a sensor receiving environmental information, (2) a transducer utilizing information to generate and prioritize alternatives, and (3) an effector converting alternatives into operational programs. Linkages at the interface between sensor and effector contribute to the system's cybernetic potential. Persons participating in the delivery system along the interface are potentially significant reference persons for unreached persons in the environing society. System relationships can be conceptualized in seven phases: program anticipation and verification, data collection, academic programming, budget, administrative organization, implementation, and formal evaluation. It is proposed that theory-based method can serve dialectically to link conceptual design and the action of implementation. Disciplined inquiry into the development of design theory and delivery systems grounded in theory-based method is needed. (CSS)

Identifiers—Connecticut

The hypothesis that actual physical involvement (hands-on experience) with the work of a craft will influence the occupational goals of students was tested. The subjects were 2,921 ninth-grade students in Connecticut who were enrolled during 1974-1975 in sixteen area vocational-technical schools which offer Trade and Industrial occupational programs. For admission purposes, these students completed a form on which they indicated their first and second choices of careers. With few exceptions, all these students participated in a shop exploration program in which time is spent in each of the trades offered at the school. In the shop they perform some of the simpler tasks as well as participate in the theory lessons associated with the trade. After a cycle of rotating in each of the six to fifteen trades offered, a tentative shop assignment is made. The assignment is based on each student's choice, the shop teacher's evaluation, and the availability of shop stations. The findings indicated that 55.9% of 2,847 students changed their career choice after the cyclical portion of the program. Also, 85.4% of the students were assigned to the shop of their choice. The findings show some evidence that students will change their occupational goals and narrow their career choices as a result of these hands-on experiences. (EM)

Identifiers—*Alaska, Army

Serious problems were posed by North American pioneer efforts to force their traditions on Eskimos, Indians, and Aleuts. Fortunately, other pioneers, such as home economists and district agents with the University of Alaska Cooperative Extension Service, responded to villagers' home and community needs. The University of Alaska also pioneered in offering mining/prospecting non-credit courses. Other higher education institutions initiated programs; for example, Kuskokwin Community College (1974) offered one of the first adult education degree programs. The U.S. Army at Fort Richardson introduced in the 1950s adult basic education (ABE), which by 1957 included eighth grade and high school equivalency (GED) certificate programs. Finally, a GED program for non-commissioned native officers was begun. Two other basic education pioneering efforts included training of native Volunteers in Service to America (VISTA) teachers of ABE and the Anchorage Community College Adult Literacy Laboratory's development of culturally relevant educational materials. In determining the University of Alaska's adult education/training role, a study committee developed a continuing education plan. This was implemented in 1972. All provisions were realized, including continuing teacher education and satellite transmissions of GED tapes to many villages. In summary, there is a need to help adults obtain skills required by their vastly changed society; those finding new ways of helping adults learn will be called pioneers. (CSS)

Identifiers—*Nuclear Power, Reactor Operations

This document is the General Research Corporation (GRC) report on Task II, which called for the development of career fields for headquarters and regional positions of the U.S. Nuclear Regulatory Commission Office of Inspection and Enforcement (NRC/IE). GRC examined the data of Task I (development of qualifications requirements) for commonality of knowledge and performance, postulated career fields as a result of that examination, and tested and revised those career fields by more extensive examination. Proposed as a result of this are four career fields: construction-vendor, health physics, reactor operations, and safeguards; and two "career ladders": fuel facilities and investigation. (The term "career ladder" was chosen to describe the relatively narrow patterns of positions open to its members.) All career fields include subfields, which are described in full in the report. In addition to recommending acceptance of these career fields, this document proposes the combination of certain subfields, the retitling of some positions, and the adoption of a standard nomenclature for all NRC/IE positions. Descriptors—*Community Education, Community Programs, Conservation Education, *Energy Conservation, *Outreach Programs, Program Effectiveness, Public Opinion

Outreach programs were conducted in four communities over a period of nine months. Focus was on disseminating information to the public on how to use energy more efficiently in the home. The basic format for disseminating information involved the following activities: public meetings to provide general information on home energy consumption and available energy-conserving techniques, how-to clinics to demonstrate energy-efficient techniques, and clearinghouse services to offer follow-up to the meetings and clinics. An assessment of the programs indicated that the pilot projects were successful in developing and increasing citizen awareness of the importance of home energy conservation. Based on personal contact with community residents and participant surveys, several generalizations were made regarding public attitudes, including the following: (1) a majority of participants felt that an energy shortage exists in this country, (2) most people were convinced that there is a need for energy conservation, and (3) people felt that they could make an impact on reducing energy consumption as individuals but seemed willing only to undertake easy-to-do conservation methods. (This report includes summaries of the four pilot projects. Participant survey results and survey questionnaire forms are appended.) (EM)

Identifiers—Asia, Australia, Europe, New Zealand, North America, Organisation for Economic Cooperation Development, South America

This report, prepared by the Education Committee of the Organisation for Economic Co-operation and Development (OECD), analyzes current trends and issues in apprenticeship and in policies for apprenticeship in member countries. Apprenticeship is analyzed in countries where it is the most important activity of young people after leaving compulsory schooling (Austria, Germany, Switzerland) and in countries where apprenticeship is a secondary method of providing occupational skills to young people. Part 1, an introduction, describes OECD and its work. In part 2, examples illustrate the various approaches of OECD countries to apprenticeship in regard to (1) the legal framework and administrative structure; (2) the number and type of apprenticeable occupations; (3) admission to apprenticeship; (4) examination and certification; and (5) financing of training. In part 3, the most important recent developments and current issues and problems in apprenticeship are set forth. Part 4, issues and policy implications, deals especially with criticisms of apprenticeship programs and also with how such programs compare with regular vocational programs. Statistical information on trends and features of apprenticeship are contained in the Appendix. A list of English and foreign language references is also provided. (CT)

Guidelines for Developing Sex Bias Free Vocational Education Programs in Small Secondary Schools in Alaska.

Alaska State Dept. of Education, Juneau.

Spons Agency—Office of Education (DHEW), Washington, D.C.

Pub Date—Jun 78

Note—36p.

Pub Type— Guides - Non-Classroom (055) — Legal/Legislative/Regulatory Materials (090)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Community Resources, Educational Assessment, *Equal Education, Federal Legislation, Federal Regulation, Females, Grievance Procedures, Instructional Materials, Personnel Needs, Program Administration, Program Development, Rural Schools, Secondary Education, Sex Discrimination, *Sex Fairness, Student Recruitment, Teacher Qualifications, Teacher Selection, *Vocational Education

Identifiers—Alaska, Education Amendments 1972, Education Amendments 1976

These guidelines, developed by a nine-member task force, were designed to help district administrators, curriculum planners, building principals/head teachers, vocational education directors, and teachers in small rural secondary schools in Alaska to plan, implement, and administer vocational education programs that are free of sex bias. The content is presented in five sections. The first, an introduction, covers women workers in the national work force and in Alaska, vocational education for women in Alaska, sex discrimination legislation, and definitions of terms. Then follows a brief section on philosophy, which presents a philosophical statement of the task force and planning guidelines. The third section, on the law and the task, first covers guidelines for developing a small, rural secondary vocational education program (learning activities, processes, and content) and vocational education personnel (roles, responsibilities, and competencies appropriate to the community); it then presents a personnel needs assessment model, facilities guidelines, and funding criteria. Finally, guidelines for evaluating vocational education instructional materials are presented (includes an evaluation checklist). A summary section and one on grievance procedures conclude this booklet. (EM)

Contributions to a Discipline of Adult Education. A Review and Analysis of the Publications of Coolie Verner. Occasional Papers in Continuing Education. Number 18, February 1979.

British Columbia Univ., Vancouver. Center for Continuing Education.

Pub Date—Feb 79

Note—67p.

Available from—Centre for Continuing Education, The University of British Columbia, Vancouver, Canada V6T 1W5 ($2.00)

Pub Type— Reference Materials - Bibliographies (131)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Adoption (Ideas), *Adult Education, Adult Educators, Adult Learning, Definitions, Diffusion, Discipline, Educational History, Educational Innovation, Educationally Disadvantaged, Educational Philosophy, *Educational Research, *Educational Theories, Learning Processes, Participant Characteristics, *Professional Education, *Publications, *Systems Approach

Identifiers—*Verner (Coolie)

To examine Coolie Verner's contributions to the study of adult education as a systematic discipline, the author of this paper reviews and analyzes Verner's publications from 1950-1975. The first of five sections describes this as a period of rapid growth for the adult education field. Verner is depicted as a leader in developing a substantive body of knowledge for adult education and in diffusing that knowledge through graduate programs and publications. Section 2 identifies Verner publications by year, field of interest, format, and content. Content is categorized as transitory (personal beliefs/experiences, practice techniques, program descriptions, and book reviews) or substantive (empirical research, interpretative literature, reviews/bibliographies, theoretical formulations, and historical). Section 3 addresses qualitative aspects of Verner's work by examining the author's attempts to encourage consistency and precision in defining terms and classifying processes. Section 4 analyzes the impetus and implications of four major themes apparent in Verner's work: diffusion and adoption, history of the field, participation, and the undereducated adult. The final section reviews Verner's efforts to define and describe a discipline of adult education and to examine the process whereby it should develop. A concluding bibliography is grouped into four parts: Verner's publications 1944-75, theses/dissertations directed by Verner, review of Verner's publications, and general references. (CSS)

Trade Education Syllabus in Graphics Industries Occupations.

New York State Education Dept., Albany. Bureau of Occupational Education Curriculum Development.

Pub Date—78

Note—155p.

Pub Type— Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC07 Plus Postage.

Descriptors—*Behavioral Objectives, Course Content, *Graphic Arts, Layout (Publications), Learning Activities, Printing, Reprography, Secondary Education, State Curriculum Guides, *Teaching Methods, *Trade and Industrial Education

This syllabus provides occupational education teachers in secondary schools with a guide for developing a course in trade graphics which meets the minimal requirements that an acceptable two-year program in New York State must provide. The content is presented in six sections, and each one includes terminal objectives and suggestions for

correlated content, behavioral objectives, and teaching. The first, an introduction to graphics occupations, covers class organization, industrial organization, history of printing, printing materials, and printing methods. The next three sections cover the following graphics occupations respectively: (1) pre-press (includes letterpress, offset, darkroom operations, and camera operation), (2) presswork (includes letterpress and offset), and (3) bindery (includes paper cutter, folder, collator, paper drill, stitcher, plastic punch, plastic binder, perfect binder, padding press, and materials handling). The fifth section, on ancillary procedures, covers maintenance and business procedures. The last section focuses on preparation for employment, including applying for a job, evaluating job offers, and inservice education. Lists of resources, as well as suggested equipment, tools, and supplies, conclude this syllabus. (EM)

Descriptors—Delivery Systems, *Educational Needs, Foreign Countries, Government Role, Health Conditions, *Health Personnel, Health Services, *Manpower Development, *Manpower Needs, Needs Assessment, *Planning, Policy Formation, Program Coordination, Program Evaluation, Program Planning, Public Policy

Identifiers—Columbia, Ecuador, Honduras, Pan American Health Organization, United States

The health manpower planning experiences of four countries reported here were presented in a traveling seminar held for member countries of the Pan American Health Organization. Focus was on what should be carried out in any country to coordinate the training of health workers with the operation of health services. Following the introduction, the content is presented in six chapters. The first one, on the process and background of manpower planning, covers the role of governments, government-university relationships, government structure, and health planning. Chapter 2 discusses the phases in manpower planning, such as analyzing the manpower training and use situation, analyzing the health care system, determining the health and education needs of the population, identifying issues, formulating a health manpower policy and plan, executing the plan, and evaluating the results. The remaining four chapters describe the planning modalities in Columbia, Ecuador, Honduras, and the United States, with each chapter covering the following: the country and its population, health conditions, health services, human and physical health care resources, national health policy, health manpower policy, health manpower units and their programs, and the future. Conclusions and recommendations are presented at the end of this report. (EM)

Identifiers—New York

This report is designed to acquaint secondary school teachers and other interested individuals with a redesigned business education program for New York state. The program, reviewed in ten sections, focuses on competency identification, new modules, curriculum patterns, regent's examination modifications, etc. Initially, challenges facing business education, such as enrollment and employment trends, skills needed for entry level employment, and financial restraints are discussed. In sections 2 and 3 priorities of the business education curriculum and program are briefly outlined. Entry level competencies in bookkeeping, accounting, and office assistant positions are cited as program priorities. Section 4 reviews essential competencies in basic understandings, attitudes, and skills. The fifth section identifies ten core competencies, ten specialized office assistant modules, eleven specialized bookkeeping/accounting modules, and eight specialized personal business management modules. The following section depicts the role of an instructional support system for occupational education in the curriculum development process. Section 7 briefly previews a future guide for utilizing instructional strategies. State testing program modifications are described in section 8. A time line, from May 1977 to June 1985, for meetings, workshops, and reports, is scheduled in the tenth section. The final section categorizes core and specialized module examples for funding considerations. (CSS)

Descriptors—Accounting, Business Communication, *Business Education, *Business Skills, Career Awareness, *Course Organization, *Curriculum Development, Data Processing, Economics, *Educational Objectives, Individual Development, Information Systems, Job Skills, Marketing, Office Machines, Office Management, *Office Occupations Education, Office Practice, Program Development, Secondary Education, Skill Development, Stenography, Student Evaluation, Typewriting

A business education curriculum guide is presented for teachers of secondary school students who wish a general economic education or an introduction to vocational business training. Following a brief introduction, the second of fifteen sections focuses on the theme of career awareness and personal development. Section 3 explains terms such as goal, learning outcome, and area. The fourth section reviews eight business education goals; for example, the first goal is to help students develop a positive feeling of self-worth. Section 5 charts twenty-one courses by title, designation, grade, prerequisite, and intent. An example of a teacher created integrated course is provided in section 7. Section 8 contains a suggested course grid by enrollment size and partial or complete curriculum. The section following recommends course time allotments. Section 10 offers a continuous progress program example. Student evaluation examples are given in section 11, and resource utilization and examples are suggested in the next two sections. Learning outcomes, listed in section 14, are included for accounting, business communications, career skills, data processing, and other study areas. In the final section, intent, content, learning outcomes, prescribed/supplementary materials, and suggested equipment and facilities are given for seven courses by grade level. The appendix contains a program development model. (CSS)

Health Occupations Education: Dental Laboratory Technology. Program Development Guide.

New York State Education Dept., Albany. Bureau of Occupational Education Curriculum Development.

Pub Date—79

Note—65p.

Pub Type— Guides - Non-Classroom (055)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Admission Criteria, Advisory Committees, Behavioral Objectives, *Dental Technicians, Educational Resources, Personnel Needs, Postsecondary Education, *Program Development, *Program Planning, Secondary Education, State Curriculum Guides, Student Placement, Technical Education

Identifiers—New York

This program guide was designed to assist occupational education administrators and health occupations education personnel in planning, developing, and implementing programs to prepare youth and adults for work as dental laboratory technicians. The content is presented in five sections. The first, an introduction, discusses what dental laboratory technology is, its past history and present state, and a career in dental technology. The next section, on planning the dental laboratory program, covers establishing program need, the advisory committee, staffing the program, student qualifications and selection, and survey procedures. The third section focuses on the curriculum and includes general and specific behavioral course objectives, a topical two-year course outline, clinical experience, and instructional resources. Section 4 presents some general facilities guidelines with illustrations, a list of suggested instruments and portable equipment, and a list of suggested initial supplies. The last section discusses follow-up activities, such as student placement (includes a sample employability profile form) postsecondary opportunities, and certification of the dental technician. Harris, Lynn J.

Vocational Education R&D Products: Impact, Reliability, and Validity.

Ohio State Univ., Columbus. National Center for Research in Vocational Education.

Pub Date—79

Note—36p.

Pub Type— Reports - Research (143) — Numerical/Quantitative Data (110) ()

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Administrator Attitudes, Item Analysis, *Program Development, *Questionnaires, Reliability, *Research, *Research Methodology, Secondary Education, Student Opinion, Teacher Attitudes, *Test Construction, Validity, Vocational Directors, *Vocational Education, Vocational Education Teachers

A pilot study was initiated to achieve reliability and especially validity indexes for measuring research and development impact. Two opposing questionnaires were administered to each of three target groups: 164 high school vocational education students, 120 secondary school vocational education teachers, and 56 vocational education administrators. Half of each group received the original questionnaire measuring product impact; half received the alternative questionnaire measuring product nonimpact. Three impact questionnaires, developed primarily by vocational education administrators, were constructed through item analysis. Nonimpact questionnaires stated the impact questions negatively. The student questionnaire contained 16 items, the teacher questionnaire 36 items, and the administrator questionnaire 20 items. The following are original and alternative questionnaire discriminant validity correlations and reliability correlations for the three groups: students: -.049 validity, .83 reliability; teachers: -.18 validity, .78 reliability; and administrators: -.45 validity, .86 reliability. Better impact assessment was found in the administrator domain than in the student and teacher domains. Each adjusted questionnaire contains ten acceptably valid items. An example of sensitive/valid items from each domain is (1) students–gaining new knowledge from the product, (2) teachers–the completeness of details covered in the product, and (3) administrators–the absence of many better alternative products in the subject area. Descriptors—*Career Development, Career Education, *Guidance Programs, Job Placement, *Models, Objectives, *Occupational Guidance, Occupational Information, *Program Development, *Program Planning, Resources, Systems Approach

This catalog contains information about planning, career guidance programs, and five selected planning models. General information about planning and educational change is discussed in the section on planning, along with specific guidelines for planners of career guidance programs. Two worksheets, "Planning Considerations" and "Selection Guide," explain how to use the models or components for planning career guidance programs. The Career Guidance Programs section briefly describes current career guidance practices and foresees what the future holds for guidance programs. It describes components of career guidance necessary for comprehensive programs that meet the current and future needs of students. The model objectives, target users and settings, developer, sponsor, publication date and ordering information are included. Also included for each model is a description of the model's content, an abstract, history of development, field test and research data, bibliography, and necessary additional information. A section on integrating models is included, with a comparison of the models along a number of dimensions. Resources and references are also contained in this document. (CT)

Descriptors—*Career Planning, Decision Making Skills, Financial Needs, *Guidance, *Guidance Counseling, *Guidance Programs, Job Placement, *Models, Occupational Information, Participant Characteristics, *Program Development, Research, Secondary Education, Self Evaluation

This book focuses on career guidance functions at the secondary school level. In chapter 1, some basic assumptions about career guidance as one aspect of guidance counseling are presented. Chapter 2 discusses the components of a student guidance system: assessment of the student's personal characteristics and the status of the student's career planning, selection of relevant courses, student review of courses, occupational sampling, self-monitoring of progress, guidance procedures, access to information, development of decision-making skills, financial planning, job placement, and post-high school follow-up. A conceptual model of the student development process during high school is described in chapter 3. The importance of the school and its staff in career guidance, in both a traditional and a proposed school system, is the focus of chapter 4. Some impressions, problems, and ideas for implementation are presented in chapter 5. Chapter 6 discusses national priorities for research and development involving the required research studies, component development, and some recommendations about research and product priorities. Finally, chapter 7 contains the summary and conclusion followed by a bibliography and index. (CT)

Job Interviewing Skills Training: An Empirical Investigation of Two Methods.
Wisconsin Univ., Milwaukee.
Pub Date—[79]
Note—15p.
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Audiovisual Instruction, *Effective Teaching, *Employment Interviews, Experimental Groups, Experiments, *Handicapped, Job Application, *Role Playing, Skill Development, Small Group Instruction, Training Techniques

Two methods for enhancing the job interviewing skills of rehabilitation clients were studied: the MDC Quest Series (a slide-tape program produced by the Materials Development Center at the University of Wisconsin-Stout) and group role playing. Forty clients were assigned in a 2 x 2 (presence or absence of role play by presence or absence of Quest) experimental design to determine the individual and joint contributions of the two methods. Main effect findings revealed that both role play and Quest methods may show promise in raising clients' interview competency. (Author/EM)

A handbook containing information and suggestions is presented to assist persons in fulfilling their vocational education advisory committee role. The introduction welcomes members and stresses the opportunity, responsibility, challenge, awareness, and service inherent in acceptance of the committee role. Various questions about the position are asked and answered in the handbook. The questions focus on the following topics: (1) the advisory committee definition, (2) various types of vocational education advisory committees (for example, general, program, or special), (3) the helping role, (4) the state of Indiana mandates or responsibilities, (5) typical committee organization and function, (6) a suggested year program outline, (7) responsibilities of the vocational education representative to the committee, and (8) ways the state advisory council on vocational education can provide assistance. In addition, the handbook includes a self-check sheet for advisory committee members. The appendixes contain relevant definitions and a five-part (purposes and name, membership, meetings, offices and duties, and amendments) suggested advisory committee constitution. (CSS)

A guide to resources in adult education is presented in two sections: a "pathfinder" and an annotated bibliography. In section 1 a scope note defines adult education and provides a brief history of adult education in the U.S. Subsequently, a number of "pathfinder" references are listed: introductory adult education materials (3); card catalog subject headings for the Walter Library (4) and the Library of Congress (17); frequently mentioned texts (11); adult education material call numbers (10); guides, encyclopedias, and dictionaries (5); bibliographies (5); data bases and related materials (5); "Current Index to Journals in Education" subject headings (16), "Education Index" subject headings (29), and "Reader's Guide to Periodical Literature" subject headings (12); other field-related indexes (2); journals often containing adult education articles (9); newsletters (13); adult education associations (9); and audiovisual materials (4). Section 2 contains an annotated bibliography for the following sources: books–general works (5); bibliographies (6); and data bases (6). Also reviewed are works of different foci: historical (3); philosophical (4); psychological (6); developmental (13); program development (34); and futures (9). Finally, periodical indexes (6); journals (10), and audiovisual materials (24) are annotated. (CSS)

Descriptors—*Business Administration, *City Problems, Community Problems, Educational Alternatives, *Educational Development, *Educational Responsibility, Employment Problems, *Job Development, Part Time Jobs, Urban Renewal, *Vocational Education

Job creation properly researched and developed can help vitalize vocational education for educators, their students, and the community. The migration of employers from the inner cities to outlying areas over the past few years has created a wasteland within our cities. To help rectify this situation, vocational education needs to start preparing people to become employers, not only employees. After researchers identify community needs and resources, development teams can work with vocational education agencies to develop entrepreneurship programs for the area. As we move into a technological society, the impact of preparing people to work for themselves is one of the richest resources of futurism. Another pressing national problem is that resources and people are not in appropriate proximity, such as the mismatch between the supply of job seekers and the existence of jobs. To date, vocational education has concentrated on creating job seekers but not recognized job creation as its legitimate concern. Vocational educators have the responsibility to examine and pursue some alternatives for interfacing with the problem of job creation. These alternatives include new urban renewal, decentralized urban renewal, and part-time job creation. (The authors' answers to questions

from the audience of research and development staff are attached.) (EM)

Identifiers—United States
A study was done to provide baseline data on the continuing education opportunities that colleges, universities, and professional societies offer engineers and scientists and to determine how programs and courses are developed. Although degree credit courses were included, the focus was on noncredit education designed to increase or update professional knowledge and skills. Activities reported were intensive short courses; after-hours, noncredit courses; institutes, seminars, clinics and workshops; correspondence courses; and self-study. Approximately half the questionnaires were sent to universities and half were sent to professional and technical associations; 50.3% responded from universities and 37.6% responded from associations. In noncredit activities, there was an average of thirty-eight activities per university and twenty-four activities per association. Land-grant universities held many more activities than non-land-grant universities. In summary, it was found that more continuing education takes place through self-study than through all other activities combined. In the course development and operations segment of the survey the most often cited ideas source was "personal communications with or from industry." Of eighty-three respondents, 76% stated they did conduct needs analyses; 12% did not; 12% did, sometimes. And, regarding course evaluations, a subjective questionnaire was used very often by 57% of respondents; only 22% felt subjective questionnaires were extremely important. (CSS)

This document is one in a series of monographs aimed at providing a narrative summary of ideas and thoughts gathered from particular community segments represented in a series of mini-conferences held to discuss the concept of collaboration in career education. In this monograph, the career education activities of the Girl Scouts of the United States of America (GSUSA) and the Exploring Division of the Boy Scouts of America are discussed. First, the generic contributions of both organizations are discussed. Next, the specific contributions made by each organization are described. The specific efforts made by the GSUSA include a career awareness/career exploration program, "From Dreams to Reality," and career education-related activities of selected girl scout councils. The specific efforts made by the Exploring Program include a "Student Career Interest Survey," Explorer Post operations, and the Career Exploring Seminar Program. Suggestions for further collaborative efforts of these two organizations in career education are presented, based upon ideas expressed by participants in the mini-conferences. Appended are lists of mini-conference participants and of related issues and questions generated in the mini-conference. (The proceedings of each mini-conference are reported in detail in ERIC documents CE 020 110-111). (BM)

This document is one in a series of monographs aimed at providing a narrative summary of ideas and thoughts gathered from particular community segments represented in a series of mini-conferences held to discuss the concept of collaboration in career education. In this monograph, the career education activities of the Future Farmers of America (FFA) are discussed. First, the FFA organization is described including its relationship to vocational agriculture instructional programs and to 4-H operations. Next the career education leadership efforts of the National FFA Center are reviewed. The career education responsibilities of vocational agriculture teachers are listed and several programs which help prepare vocational agriculture teachers to participate in career education are described. Finally, ways of re-establishing effective vocational education/career education relationships are suggested, based upon ideas expressed by participants in the mini-conferences. Appended are lists of mini-conference participants and of related issues and questions generated in the mini-conference. (The proceedings of each mini-conference are reported in detail in ERIC documents CE 020 110-111). (BM)

This monograph represents a collaborative attempt to contribute to the definition and understanding of career education. The monograph begins with a conceptual view of career education as a collaborative community effort. The concepts themselves have been derived from interactions with over 200 persons selected as (1) philosophical leaders in the career education movement and (2) individuals representing a variety of community organizations holding potential for contributing to the career education efforts in selected communities across the nation. The second portion of this document is devoted primarily to the thoughts of twenty-four individuals, each from a particular kind of community organization coupled with selected community career education coordinators. These thoughts are summarized under the following categories: (1) Determining What Needs to Be Done in Career Education Collaborative Efforts; (2) Who Is Responsible for Initiating Collaborative Efforts in Career Education?; (3) Career Education and Economic Education: Should They Join Together?; (4) What Should Be the Composition of a Community Collaborative Council?; (5) What Kinds of Issues Should Be Considered by Community Collaborative Councils?; (6) Should There Be a Separate Council for Vocational Education and Another for Career Education?; (7) How Can a Community Collaborative Career Education Effort be Sustained?; and (8) How Can an Effective Public Relations Effort for Career Education Be Conducted? (The thoughts and ideas included in this monograph were gathered from a series of mini-conferences reported in ERIC documents CE 020 110-111.) (BM)

This book, one of a series designed for rural career guidance programs, provides guidelines for creating cooperative agreements between career guidance personnel and business, industry, labor personnel, and others in the community to benefit students in rural/small school environments. Chapter 1 explains the term "cooperative agreements," defines other terms used in the guide, presents author assumptions, and defines the nature of the guide. Chapter 2 presents the reader with some background information about rural communities, cooperative relationships, and the research leading to the development of this guide. Chapter 3, leadership and community support, describes the roles of those planning and implementing cooperative agreements and suggests some ways for gaining support for these activities in the school and community. Chapter 4 outlines in detail the steps to be taken in planning and implementing a cooperative agreement. Chapters 5-9 give specific examples of existing cooperative agreements, ranging from plans for grades K-6 through postsecondary, adults, and teachers. Appended materials include a glossary of terms, responsibilities and qualifications of a program coordinator, resource catalog and survey sheets, related legislation, a sample of agencies that can help such programs, a bibliography, and an index of agreement applications. Charts illustrate the material throughout the guide. (CT)

Descriptors—Course Objectives, *Driver Education, Educational Objectives, *Educational Programs, Emergency Programs, *Emergency Squad Personnel, Learning Activities, Program Administration, Program Planning

Guidelines for organizing and administering the three-part Emergency Vehicle Operation (EVO) Course are provided. The first section of the guide describes the course structure and lists the unit objectives (by unit module) for each of the courses's three parts. Part I contains seven units, organized into twenty-one modules, to be taken by all trainees in a classroom setting. Topics include introduction, legal aspects of EV, selecting routes and reporting emergency operations, preparing to drive an EV, important physical forces and EV control, and handling unusual driving situations. Part II contains three units (six modules), one of which is to be taken by each trainee in a classroom setting: operation of law enforcement, operation of ambulances, and operation of fire apparatus. Part III provides in-vehicle practice exercises for the type of vehicle the trainee will drive. The second section of the guide discusses five areas of concern in planning and administering the course: instructor and trainee qualifications, class size, classroom training resources, and scheduling. The third section describes the special requirements for the range/practical exercises, including range characteristics, number and types of vehicles, necessary and desirable equipment, and administrative considerations. The final section provides guidelines for monitoring and evaluating the course. Titles and descriptions of audiovisual aids are provided in the appendix. (Available separately are instruction lesson plans, CE 020 286, and a trainee study guide, CE 020 287.) (JH)

Unit lesson plans for the three parts of the Emergency Vehicle (EV) Operator training program are provided. The units in parts 1 and 2 are designed for use in a classroom setting and contain the following components: description of the unit; trainees' knowledge objectives; instructor preparation activities; instructional content/presentation guidelines, and review exercises. Part 1 contains seven units, organized into twenty-one subunits or modules, and includes the following topics: course introduction, the legal aspects of EV operation, selecting routes and reporting emergency operations, preparing to drive an EV, important physical forces and EV control, operating an EV, and handling unusual driving situations. Part 2 contains three units (six modules), one of which is to be taken by each trainee: operation of law enforcement vehicles, operation of ambulances, and operation of fire apparatus. Part 3 provides in-vehicle practice exercises for the type of vehicle the trainee will drive. Contained in this unit are the following components: description of the unit; trainee performance objectives; instructor preparation activities; small area exercises (Dutton's Weave, stall parking, turnabouts), range exercises (evasive maneuver, serpentine course, Baird's Judgment, lane change, controlled braking, decreasing-width track), and skid-pad exercise. Each exercise contains a description of the exercise, procedures, possible performance problems, and criteria for excellent rating. (A bibliography and masters for transparencies are provided in the appendixes). (JH)

A two-part trainee study guide for use in the classroom phase of the Emergency Vehicle Operation (EVO) training program is provided. Part 1, to be taken by all trainees, contains seven units organized into various subunits and includes the following: (1) introduction to the course; (2) some legal aspects of emergency vehicle operation (state statutes on EVO, interpreting the law); (3) selecting routes and reporting emergency vehicle operations; (4) before you drive (vehicle inspection, maintenance, preparing to drive); (5) important physical forces and EVO (major physical forces, weight transfer); (6) operation (use of lights and sirens, basic control tasks, urban driving, negotiating intersections, turning around to reverse direction, following another vehicle, expressway operation, and driving at high speed); and (7) handling unusual situations (driving in adverse conditions, handling contingency situations, pulling off the road). Part 2 contains three units, one of which is to be taken by each trainee, and includes the following: (1) operation of ambulances (route planning, inspection and maintenance, and operation); (2) operation of law enforcement vehicles (communications, pursuit driving, making

a traffic stop, and emergency escort of another vehicle); and (3) operation of fire apparatus (selecting routes, inspection and maintenance, operating systems, and basic control tasks.) Each unit in the two parts of the guide contain student behavioral objectives, a basic content outline, questions to be answered about the content, and unit review exercises. (JH)

Identifiers—*New York

This guide contains descriptions and credit recommendations for almost 800 credit courses in a wide variety of subject areas conducted by some 70 organizations in New York State. The organizations include business and industry, labor unions, professional and voluntary associations, government agencies, and other organizations whose primary function is not education. The guide is intended for use in the academic counseling of students. Information provided includes the history of the program; questions and answers for students, administrators, and faculty; and directions for using the guide. Following this, the listing of organizations is given, along with course descriptions. Each course description provides the following information: title, course number, location, length, dates, objective, instruction, and credit recommendation. Appendixes include courses evaluated by other program offices, a list of evaluators, program policies and procedures, and a course index. (CT)

Identifiers—Massachusetts (Boston), Massachusetts (Springfield)

This booklet describes some things learned by education directors from fifteen museums and performing arts organizations in Boston and Springfield, Massachusetts, as they participated in a training project to help them design pilot career education programs, in conjunction with a partner school, for K-12 students, using the resources of their institutions. The content first covers the people profiles done at each participating institution to identify the jobs and careers that exist within or related to the institution. The remaining content focuses on designing the pilot career education programs and includes information on planning and coordinating the programs; also provided are some recommendations drawn from the experiences of the project participants. Identifiers—Adult Performance Level

This curriculum guide is aimed at Adult Basic Education (ABE) directors, teachers, paraprofessionals, and volunteers who are working in the local programs. Developed around adult performance level (APL) objectives, it provides teaching/learning activities and resources for helping adult learners develop basic skills and knowledge necessary to everyday life. It aims at learners with reading abilities from grades 0-8. The five knowledge areas covered are consumer economics, occupational knowledge, health, community resources, and law. The skill areas developed are communication skills (reading, writing, speaking, listening, and viewing); computation; problem solving; and interpersonal relations. Part 1 contains an explanation of how to use the guide, what the focuses of adult education include, understanding the adult learner, defining the learner's needs, scouting the community for learning materials, adapting the guide to ESL, and taking a closer look at the ABE program. Part 2 focuses on the five knowledge areas through performance objectives, suggested teaching/learning activities, suggested materials and resources, and vocabulary lists. Overall performance objectives, a professional bibliography, publishers' addresses, and a subject index are appended. (CT)

Identifiers—Student Placement and Counseling Effort

This manual represents an attempt to develop a model and procedures for implementing career planning and placement assistance services in Minnesota high schools. The procedures described were developed for and tested in four participating high schools of different sizes, administrative structures, and geographic locations. Divided into seven chapters, this manual is designed to provide assistance in developing placement services for individuals entering any post high school activity, including both educational and employment activities. Chapter 1 explains implementation of the procedures and describes the career planning and placement model. Chapter 2 describes the organizational structure, covering the operational stages, groups of individuals, and operational matrix. Chapters 3 through 6 describe the orientation, preparation, implementation, and evaluation procedures for faculty, students, and external groups. Finally, chapter 7 explains three staffing alternatives: (1) complete placement staff; (2) partial placement staff; and (3) reassignment of existing personnel. The majority of this document contains appended materials, such as related records, forms, and questionnaires. (A related document contains an instructional guide for teaching job-seeking skills.) Descriptors—*Career Planning, Employment Opportunities, Employment Qualifications, *Job Application, *Job Search Methods, *Learning Activities, *Lesson Plans, Secondary Education, *Test Items

Identifiers—Project SPACE, Student Placement and Counseling Effort

This instructional guide presents a comprehensive job-seeking model which uses an open-ended approach to teaching job-seeking skills. Instructors are encouraged to adapt the suggested lessons, worksheets, and other teaching/learning activities to fit their unique situations. The guide is primarily intended for those students who will be seeking immediate, full time employment following high school; however, the instruction may also be beneficial to students going directly to postsecondary education or training. The guide is divided into three primary sections. The first section contains the content for job-seeking skills instruction and consists of five reading modules which deal with the following job-seeking stages: (1) deciding on the job to seek; (2) preparing and using a personal data sheet; (3) searching for job opportunities; (4) applying for jobs; and (5) deciding on a job offer. (Written at the twelfth-grade reading level, these modules are interrelated in that each module builds upon preceding modules.) The second section contains twenty-one lesson guides, which parallel the reading modules and serve as the instructional outline. These lesson guides provide the following: lesson objective, content source, teaching time estimate, teaching ideas, critical learning activities, and a list of other materials needed. The third section consists of 110 sample test items. These items are intended to assist in the planning and/or evaluation of job-seeking skills instruction. (A related guide on placement assistance services is available as CE 020 333.) (BM)

Identifiers—Appalachia, Education Amendments 1974

The purpose of this project was to communicate career education philosophy, methods, program activities, and evaluation results to rural Appalachian career education practitioners and the general public. The project accomplished six major objectives: (1) refined and published 500 copies of the ten best

career education units, grades 1-9, developed during the first three program years; (2) involved the family in career education through a work program designed by students, families, and teachers; (3) developed and published 1500 copies of six "how to" documents; (4) developed and published 1500 copies of five regionalized monographs; (5) provided a visitation schedule for those interested in observing career education in the Kentucky Valley Educational Cooperative Area; and (6) published six bi-monthly editions of a newsletter, "The Communicator." The project directly involved 33,399 students K-12. There were 1,382 teachers, 35 counselors, 142 administrators, 324 business/labor-/industry persons directly involved and 31,548 parents directly/indirectly involved. A third-party survey of 240 individuals (mostly school personnel) familiar with the project's objectives and data analysis of the 114 usable returns revealed that all dissemination activities were considered effective by respondents. (Appendixes include a career education unit, grade level 1; booklets on involving the family in career education, correlating career education with character education, and the role of the superintendent; and a copy of "The Communicator," and the evaluation report.) Identifiers—Connecticut (Bridgeport), Connecticut (Stamford), Education Amendments 1974

A project was planned to establish two model community career education centers (CCEC) aimed at providing career development programs and counseling to adults not presently having access to such services; developing instruction programming tailored to local needs and conditions; increasing the effectiveness of such programs which already exist; and demonstrating the feasibility of expanding the CCEC concept. Learner outcome objectives are being developed so that adult learners will acquire knowledge, skills, and attitudes to make effective career decisions through systematic career development, counseling, and experience. Problems with content and delivery systems caused restructuring of learner objectives into self-contained life skills modules. Future program development will center on curriculum redesign in the areas of self-assessment and development; career awareness; career decision making; employment seeking; work effectiveness; and personal economics. A modification of the Career Skills Assessment Program–Experimental Edition, along with the curriculum redesign will make up the basis of the second year operations. (The report includes major activity descriptions; how the CCEP was established in various Connecticut communities, the incorporation of modifications, and dissemination activities. A little more than half of the document is an evaluation report of the project, outlining the learner outcome objectives, performance criteria, and group evaluations; the report concludes with a summary and recommendations.) Identifiers—Education Amendments 1974, *Model Accountability System

The career education project conducted by the Mesa (Arizona) Unified School District was designed to develop a written objectives-based Model Accountability System (MAS) that identifies terminal career education behaviors according to several themes, specifies assessment items for each objective, and provides a monitoring system and mastery profiles for the individual student, class, school, grade, and district (K-12). The project was also designed to document and critique the development phases of the MAS and to demonstrate that MAS users have a positive attitude toward its further implementation. The activities consisted of developing, for each grade, the following: (1) a conceptual and sequential framework; (2) a comprehensive matrix of viable goals and objectives; (3) representative and validated assessment items; (4) formats for the display of test data; (5) instrumentation and procedures for the pilot testing of the model and system; and (6) a measure for assessing the attitude of participants. Data supporting each stage of development was collected, arranged for display in charts and tables, and incorporated in further revisions. (This document contains the final performance report, covering project activities, objectives, participants, evaluation, results, anticipated changes, dissemination, and special activities. A major portion of this document contains related forms and survey instruments and data. A companion document, CE 020 347, contains the assessment materials.) (Author/BM)

Descriptors—Economic Factors, *Foreign Countries, *Instructional Materials, *Labor Conditions, *Labor Legislation, *Labor Unions, Safety, Secondary Education, Social Factors, Student Attitudes, Wages

Identifiers—British Columbia, *Canada

Introductory teaching units for secondary students on the history of the Canadian labor movement and labor law are presented in this report. Five units are outlined, addressing the following questions: (1) How do students perceive organized labor, its position in today's society, and its historical development?; (2) What knowledge do students have of unions and their historical roots?; (3) What social and economic conditions affected the development of the labor movement?; (4) What are some of the major events in Canadian and British Columbia labor history?; and (5) What are the issues that face labor today, and how do these concerns fit into a broader view of society? At the end of each unit is a short list of recommended books with a brief critique. Appendixes include a glossary of terms commonly used in the labor movement, a question-and-answer section concerning the term "right to work," short descriptions of "anti-union" Canadian legislation, and descriptions of Canadian legislation concerning hours and wages and health and safety. Identifiers—*British Columbia

Existing programs and needs for adult basic education (ABE) in British Columbia were assessed. A research committee examined adults' educational opportunities up to and beyond literacy levels. ABE was found, in general, to be an area of neglect and low priority. Adult needs remain high; for instance, census data reveals that nearly half a million adults have not gone beyond grade 8. Many family and psychological problems are associated with illiteracy. Nevertheless, present educational practices, such as inequitable tuition policies, inhibit adults' efforts to return to learning. Social and economic costs incurred through the educationally disadvantaged individuals' unemployment and welfare status are high. The Ministry of Education plays a minimal role in ABE services provision. The federal Department of Manpower has influenced educational practices throughout the provinces, but provisions have tended to be spasmodic. Each year ABE involves approximately 500 courses, 6,000 students, and 500 instructors throughout the province. The main prerequisite for closing the gap between needs and ABE provisions is an integrated and systematic approach. Although many goals and recommendations have been formulated, the principal recommendation is to regard ABE as an integrated system to aid in the amelioration of provincial problems in such areas as unemployment and social welfare. Identifiers—*British Columbia, Womens Access Programs
Women's educational needs and the viability of postsecondary institutions are inextricably bound. Women are in transition. Increasingly entering the labor force, women see postsecondary institutions as a means of accomplishing new occupational goals. Now a postsecondary student majority, they are, because of their age, part-time status, and large numbers, considered nontraditional. While some exemplary programs for women exist at British Columbia's postsecondary institutions, most nontraditional learning opportunities are ad hoc, peripheral, fragmented and demonstrate a lack of institutional commitment. An institutionally based Women's Access Program should be adopted. Planning and implementation guidelines for such a program have been developed and are included in this report. Program goals are to assist women in obtaining access to postsecondary institutions and community services and resources, and to assist institutions in modifying practices which present barriers to women. Recommendations to the Ministry of Education and a plan to assist institutions achieve these goals have been formulated. Hopefully, institutions will adopt policies which accommodate the needs of women learners. (Author/CSS)

Descriptors—*Access to Education, Adult Students, Changing Attitudes, *Counseling, Educational Needs, *Educational Opportunities, Employment Qualifications, Equal Education, Females, *Information Needs, Job Training, Nontraditional Students, Peer Counseling, Postsecondary Education, Program Budgeting, Program Development, *Resource Centers, Rural Population, Self Actualization, Volunteer Training, *Womens Education, Working Women
Identifiers—British Columbia, Educational Brokering, Womens Access Centres
Women's access programs and services are needed to overcome the effects of women's isolation and lack of information about educational opportunities. The favored mechanism for the delivery of women's access programs and services is the Women's Resources Centre model. The center extends women's access programs and services. These programs and services function as educational brokers and assist women in planning their lives. Although women are the new client group for education, postsecondary institutions are not planned for the mature women, and they are fairly inflexible. Women require services to assist them in updating their expectations and working out ways to combine family responsibilities with study and labor force participation. Women are having fewer children and are becoming a higher proportion of the labor force. Women's access programs and services operate by providing information and counseling in community-based settings staffed by volunteers working with professionals. Budgets for an adequately equipped, and alternatively a minimally supported, resources center have been prepared. (Appendixes contain information on a volunteer employment program, rural women's skill development, and life planning methods.) (Author/CSS)

Identifiers—Comprehensive Employment Training Act
To assess the feasibility of large-scale, countercyclical public job creation, a study was initiated. Job creation program activities were examined in terms of how many activities could be undertaken; what would be their costs; and what would be their characteristics (labor-intensity, skill-mix, and political acceptability) that might contribute to cost benefit analysis. Onsite and offsite job-creation was considered. The potential inflationary pressure that could be generated was also considered. Finally, administrative and organizational issues that might pose significant implementation barriers were reviewed. Information was gathered through field visits and correspondence with national organization representatives in Washington and representatives from twenty-four local communities. Some major findings and conclusions are (1) the study identified 233 potential job-creation activities in twenty-one program areas. The largest number of activities were in public works, environmental quality, education, social services, and criminal justice; (2) inferences about average costs and targeting effectiveness should not be drawn from onsite job-creation and cost data alone; (3) worker selection targeting restrictions and eligibility criteria ought to be flexible; and (4) selected priorities areas include housing, health, and criminal justice. Inadequate planning time and training resources were singled out, among seven potential barriers, as amenable to policy actions to minimize the difficulties they produce. (CSS)

Identifiers—Piaget (Jean)
Because adult basic education (ABE) students often have difficulty with problem solving and comprehension, a study was initiated to determine (1) at what levels of cognitive development ABE students are operating and (2) how teaching materials and methods relate to these cognitive levels. Thirty-two ABE students were given a written test of cognitive development ('How's Your Logic?"), based on Piagetian tasks. Scores were compared with students' scores on the California Test of Adult Basic Education. Materials and methods in use in ABE classes were reviewed with respect to their suitability to the cognitive levels of students. Results indicated a wide range of cognitive developmental levels among the ABE students studied; a disparity between standardized achievement test scores and cognitive levels; and lack of suitability of most materials for students operating at lower levels of cognitive development. Implications are that more research is needed on adult cognitive levels and on whether cognitive development continues into adulthood. More concrete teaching materials and methods are needed for adults at lower levels of development. (Author/CSS)

Identifiers—School to Work Transition
This handbook presents major content information that can be useful in the planning of comprehensive professional development programs and individual skill building. It presents curricular modules and professional development units being developed which represent the basic tools for the contemporary practice of both career education and human services. The introduction discusses professional development issues and draws some conclusions about them. Part 1, Career Education and Human Services: Bridging the Gap, presents several abstracts of literature in the areas of school-to-work transition and human services, along with a list of references. Part 2 presents a series of major and representative content areas which could provide the knowledge base for professional development of career education and human services professionals. Such topic areas as community mental health, public affairs, and crisis intervention are analyzed. All content areas are followed by reference lists. A concluding statement and a bibliography on career education are included. (CT)

Identifiers—ERIC, *Research Clearinghouse, South Australia
This booklet serves as an introduction to the Research Clearinghouse of South Australia. The first section explains how to find a particular project in the booklet and how to obtain copies of project materials from the Clearinghouse. In the introduction, the Clearinghouse's objectives are spelled out,

and its relation to the ERIC (Educational Resources Information Center) system defined; also provided is an explanation of how one can contribute to the Clearinghouse. Most of the booklet contains project descriptions (121) that are available for retrieval. Each project is indexed by college, topic, and author/contact person. A topic index and a list of descriptive words are supplied towards the back of the booklet. An example of a project is shown, together with a key which gives an indication of how the various sub-headings and codes fit the overall plan. Finally, a summary of services provided by the Clearinghouse and a feedback sheet are included. (CT)

Identifiers—*Entrepreneurship, *Self Employment, Small Businesses

In the past the task of vocational educators has been to prepare people, especially youth, for known employment opportunities, but today we must be concerned about the adequacy of employment opportunities. The vocational system has paid too little attention to self-employed persons who discover and create their own jobs. These entrepreneurs are essential to economic vitality. There is a parallel need to create more entrepreneurial work opportunities inside existing organizations. The time has come to focus national attention on education for self-employment. We should (1) re-examine public policy to see how government may be discouraging small business formation, (2) enlarge our manpower policy conceptions to include self-employment incentives, (3) encourage business to redefine employment in entrepreneurial terms, and (4) learn how to modify educational programs to prepare people for entrepreneurially defined work. Theories of Career Development and Occupational Choice: Self and Teaching/Counseling Implications.

Pub Date—11 Apr 79

Note—16p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April 11, 1979); Not available in hard copy due to thin type in the original document

Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—*Career Choice, *Career Development, Career Education, Education Majors, *Evaluation, Graduate Students, Program Planning, Rating Scales, Self Actualization, Student Attitudes, *Theories, Vocational Counseling

A study was conducted to determine which of nine theories of career development and occupational choice were (1) ranked as most important in regard to the role each played in the subject's own career development and (2) were ranked as most important in regard to the usefulness of the theory in teaching and/or counseling students. Each of seventy-one students enrolled in a course (three separate classes) in career education were asked to rank nine prominent theories of career development/occupational choice in regard to the role each played in her/his own career development and in regard to the usefulness in teaching and/or counseling his/her students. Holland's Personality Theory of Vocational Choice was judged most important in the development of the participants' careers. Close behind was Super's Developmental Self-Concept Theory and Blau's Conceptual Framework of Occupational Choice. O'Hara's Learning Theory, Super's Developmental Self-Concept Theory, and Hoppock's Composit Theory had a mean rank of first through third respectively in regard to the usefulness of the theories for teaching and/or counseling students. In addition, a rank-order correlation was computed to determine the degree of relationship between the rankings of the theories in regard to self-development and usefulness in teaching and/or counseling. Correlations ranged from .79 to .98. The order that emerged is subject to further study. Other populations may rank the theories differently, depending on background and experience. (BM)

Veres, Helen C.

The Adult Learner: Perceptions of Information and Counseling Needs.

Pub Date—Apr 79

Note—23p.; Paper presented at the American Educational Research Association Conference (San Francisco, California, April 1979); Appendix A may not reproduce well due to small print

Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Adult Characteristics, Adult Education, *Adult Learning, *Adults, Basic Skills, Continuous Learning, *Counseling, Economically Disadvantaged, *Educational Interest, Educationally Disadvantaged, Employment Qualifications, *Information Needs, *Needs Assessment, Program Development, Program Planning, Questionnaires, Staff Improvement, State Surveys, Young Adults

Identifiers—*New York

A study was conducted to (1) identify continuing education needs and barriers to adult participation in New York State (excluding New York City); (2) collect information about adult education services and staff development priorities in programs sponsored by public schools, Boards of Cooperative Educational Services, and two-year state colleges; and (3) utilize obtained information in regional and state planning for program and staff development. A multiple choice questionnaire was developed to obtain information in six major areas: adult background, past participation, obstacles, and preferred participation conditions in continuing education activities, expressed learning interests, and potential for counseling services utilization. The interview sample included 20,486 adults, sixteen years or older and not full-time students. In general, findings indicated that those who saw themselves as needing information and likely to use counseling services included: persons viewing continuing education as a means of obtaining or advancing in the job, the young, the economically disadvantaged, and those who wished to acquire basic educational skills. Adults with lowest incomes and educational attainment were most likely to perceive lack of information as interfering with participation. The highly ranked barrier, tuition costs, indicates attention should be given to problems of financing continuing education. Also, additional efforts might be directed to further identify and discriminate among strategies to reach special adult target groups. (CSS)

Descriptors—Business Education, *Career Planning, College Attendance, *Decision Making, *Discriminant Analysis, *Educational Planning, Employment, *High School Students, Objectives, Postsecondary Education, Predictive Measurement, Program Content, Research, Secondary Education, *Seniors, Trade and Industrial Education, Values, Vocational Education

Identifiers—New Jersey

The study focused on individual high school seniors and their high school programs; school, work, and life values; educational and occupational goals; and decision-making criteria for postsecondary plans. The project, based on the 1972 National Longitudinal Study, had three components: field testing, the base year survey, and follow-up survey. Following field tests, the base year survey of 60,000 New Jersey high school seniors revealed that a slight majority were planning college careers; working full-time was the next most popular plan; attending business, trade, or vocational school was the third most popular plan. A student profile focussed on personal characteristics and planning techniques used in decision making during the year after high school. A year after the first survey, follow-up on 15% of the base year group found that although college attendance remained most popular, more respondents were working than had been projected with a commensurate decrease in full-time business, trade, or vocational school enrollment. Discriminant analysis successfully classified 78% of full-time workers and 95% of college attendees. The procedure was unable to classify those in business, trade, or vocational schools. No significant differences were found between response patterns of working groups and business, trade, or vocational school groups. (CSS)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Adult Education, Adult Educators, Employment Qualifications, Energy, Federal Government, *Industrial Education, *Job Training, *Labor Force, Professional Education, Program Evaluation, *Solar Radiation, State Government, *Technical Education

The solar energy labor force is analyzed by identifying the importance of education and training in the commercialization and diffusion of solar technologies, discussing issues for planning and analysis of solar education and training efforts, and illustrating the range of programs and courses presently available. Four general perspectives are reviewed concerning the diffusion of such a new technology as solar energy systems, with special attention to the education and training issues. Planning and analysis issues discussed include the following: whether there is a need for more education and training programs, and of what kinds; the possible roles of the federal and state governments; the availability of trained workers for the manufacture of solar systems; the tradeoffs between expanding the capabilities of persons already within the field or training unemployed and underemployed persons as solar workers; and the allocation of effort between training workers and training trainers. Examples of programs and courses are given for the four identified categories: general education, professional solar energy education and training, technician training, and solar industries infrastructure training. The general conclusion is that a large number and variety of education and training programs and courses are presently offered, but that little or no evaluation of individual programs or the overall effort has yet been done. A Woman's Guide to Apprenticeship.

Women's Bureau (DOL), Washington, D.C.

Pub Date—78

Note—28p.

Pub Type— Guides - General (050) — Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Age, *Apprenticeships, Federal Legislation, Federal Regulation, *Females, *Job Application, Job Skills, Job Training, Occupational Information, *Sex Discrimination, *Skilled Workers, State Agencies, *Working Women

This guide informs women about the apprenticeship system and how it operates, provides some background on the problems that women sometimes encounter in seeking apprenticeships, and outlines the apprenticeship application process. Statistics are given concerning the growth in the number of women participating in the apprenticeship system. In the section, Women as Skilled Craft Workers, the current status of these workers as well as their abil-

ity, interest, and availability are discussed. The system itself is analyzed in terms of the role of federal and state apprenticeship agencies and committees, training, standards, and types of apprenticeable occupations. Barriers to women in apprenticeship, such as sex discrimination, inadequate preparation, and age, are examined in the third section. A section on how to become an apprentice includes choosing a trade, sources of occupational and program information, and the application process (containing data on tests, interviews, and probation). Another section summarizes federal laws and regulations affecting apprenticeship. Addresses for the Women's Bureau Regional Offices and for the Bureau of Apprenticeship and Training Regional Offices are appended. (CT)

Descriptors—Administrator Responsibility, *Administrator Role, *Educational Programs, *Federal Regulation, *Policy, Policy Formation, Program Administration, Program Improvement, Student Attitudes, Teacher Morale, *Teaching Methods, *Vocational Education Teachers
Identifiers—*Job Corps
This guide is directed to education program administrators and basic education teachers in Job Corps Centers to help them understand how their functions relate to those of the center and to federal regulations and policies, and also to pass on some of the program experience accumulated by Job Corps teachers and administrators during the last dozen years. The first two chapters outline the program, the policies, and policy sources which define the education administrator's authority and responsibility, whether such policies are specifically directed to the administrator or to the operating agency or corporation and delegated through the center director. They include what the administrator and teachers need to know to meet statutory and administrative requirements for a basic education program in the Job Corps. The last two chapters are directed to both administrators and teachers. They deal with basic teaching strategies and include recommendations, discussions, and suggestions for program improvement and enrichment. The section considers matters of general interest and concern, such as ways of introducing controlled variety into Job Corps education programs and improving the morale and motivation of both teachers and students. Descriptors—*Classroom Materials, Course Content, Course Objectives, Emergency Squad Personnel, Family Problems, *Medical Services, Parent Reaction, Police, Program Descriptions, *Rescue, Technical Education
Identifiers—*Sudden Infant Death Syndrome
This manual was developed to help instructors train police and emergency medical technicians, who often are the first persons to arrive at the scene of a death (first responders), to serve families who lose a child to Sudden Infant Death Syndrome (SIDS). The manual begins with an introduction that discusses the purpose of the training and overviews the course. Next, lesson plans for a care course and two subunits are presented and each plan, in a three-column format, includes the following: the suggested time allotment for each part of the course, descriptions of instructional events and course content, and questions or problems for student discussion. The one-and-one-half-hour core course, focusing on basic content (e.g., possible parental reactions and responsibilities of the first responder), includes a handout, a film, and case studies. The two one-hour subunits, on, respectively, the participation of SIDS parent and SIDS versus child abuse and neglect, include some or all of the following: guest speakers suggestions, a handout, lecture, class discussion, and case study. A discussion on administering the course concludes this instructor's manual. The appendix, comprising two-thirds of this document, includes the following: handouts, case studies, film content, a list of 1978 SIDS information and counseling projects, and a bibliography. (EM)

Trainability of Abilities: Training and Transfer of Abilities Related to Electronic Fault-Finding Technical Report, 1 Jan 1978-15 Mar 1979.
Advanced Research Resources Organization, Bethesda, Md.
Spons Agency—Office of Naval Research, Arlington, Va. Personnel and Training Research Programs Office.
Report No.—ARRO-3010-TR2
Pub Date—Mar 79
Contract—N00014-77-C-0268
Note—59p.; For a related document see CE 014 917
Pub Type— Reports - Evaluative (142) — Reports - Research (143)
EDRS Price - MF01/PC03 Plus Postage.
Descriptors—*Ability Identification, *Electronics, Job Skills, *Job Training, Military Training, Spatial Relationship, Task Performance, *Testing, Test Results, *Transfer of Training
Identifiers—Closure, *Electronic Troubleshooting, Navy, United States
The feasibility of training selected abilities so as to facilitate transfer among tasks requiring these abilities and therefore reduce training time and increase personnel flexibility was investigated by the Office of Naval Research. Sixty undergraduate college students participated in a study of from one to five days duration. Experimental subjects received extensive practice with feedback provided on a set of tasks known to require the abilities of flexibility of closure and spatial scanning. Control subjects received no practice. All subjects were tested on an electronic fault-finding task which was dissimilar to the training tasks but which had earlier been demonstrated to require for successful task performance the abilities being trained. Results indicated that training significantly enhanced spatial scanning but not flexibility of closure as measured by standard ability tests administered before and after training. On the other hand, there was no evidence that performance on the troubleshooting task was affected significantly as a result of training (i.e., there was no transfer of training). The findings were discussed in relation to training regimens and the complexity of the criterion task. (The study also contains a list of references, examples of training tasks, and addresses of people on the distribution list.) (Author/CT)

Mallory, Alva E., Jr. Holder, Todd
A Comprehensive Career Development Employability, Vocational, and Coping Skills Training Program for YETP/SPEDY Youth in the Genesee Intermediate School District. Executive Summary. [Final Report].
Carkhuff Associates, Inc., Amherst, Mass.; Genesee Intermediate School District, Flint, Mich. Vocational Education and Career Development Services.
Spons Agency—GLSF CETA Consortium, Flint, Mich.
Pub Date—[78]
Note—111p.; Best copy available
Pub Type— Reports - Descriptive (141) — Reports - Research (143) — Numerical/Quantitative Data (110) ()
EDRS Price - MF01/PC05 Plus Postage.
Descriptors—*Career Development, Career Exploration, *Career Planning, Computer Assisted Instruction, Coping, Decision Making Skills, Educational Research, Federal Programs, High School Students, Individualized Programs, Job Application, Job Skills, *Job Training, Learning Modules, Management Systems, Remedial Reading, *Self Concept, *Work Experience Programs, *Youth Employment
Identifiers—Summer Program Economically Disadvantaged Youth, Youth Employment Training Program
A CETA youth project was designed to provide training in vocational awareness, self-awareness, coping skills, job skills, employability skills, career planning, and remedial reading. Over 500 youth between 14-21 were involved and many received computer interactional career training in coordination with an individualized career class. Significant gains were reported in career exploration, decision making, and career planning. Self-report data of the youth confirmed that they were definitely helped in deciding what they wanted to do in their futures. A 75% increase in the level of coping skills for school and work settings was found as a result of a systematic delivery of twelve one-hour modules. A similar gain was found in the ability of youth to identify job openings, develop resumes, and take interviews. Two hundred of the 500 received 90 hours of vocational training in one of eight different programs. Instructors' ratings of their learnings indicated a marked improvement. An increase in reading levels resulted from the application of remedial training conducted on an individual basis and at a work setting as opposed to an academic setting. Work experiences provided youth with income to help keep them in school and job experiences, which will help prepare them for future employment. (The complex management system of the project is described, along with recommendations for improvements. Data tables are appended.) (Author/CT)

Stress and Simulation in Pilot Training. Final Report, May 1977 Through December 1977.
Arizona State Univ., Tempe. Human Performance Lab.
Spons Agency—Air Force Human Resources Lab., Brooks AFB, Texas.
Report No.—AFHRL-TR-78-95
Pub Date—Feb 79
Contract—F41609-75-C-0028
Note—27p.
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Adult Education, Experimental Groups, *Flight Training, *Military Personnel, Military Training, Simulated Environment, *Simulation, Simulators, *Stress Variables
Identifiers—Air Force, Catecholamine Secretion, United States
Research was conducted on pilot stress during simulated emergency flight conditions. Catecholamine (adrenaline and non-adrenaline) secretion for twenty United States Air Force student pilots and thirteen instructor pilots was determined during daily activities, during simulated flights performed in high realism simulators, and during actual flight. High realism simulation resulted in a measurable stress response in both students and instructors; the response was not related to previous flight experience. One group of students experienced power-on stalls and spin recoveries in the simulator prior to their introduction in the aircraft. A second group of students experienced power-on stalls and spin recoveries in the aircraft prior to their introduction in the simulator. Catecholamine secretion during simulation was not different for the two groups, thus aircraft exposure to the spin series did not alter the stress response of the students attempting a similar maneuver in a high realism simulator. Task-specific high realism simulation introduced prior to exposure to related, stressful in-flight tasks results in similar total stress response, but somewhat lower arousal and greater mental activity. A comparison of superior and inferior students within each group suggested that the simulator pretraining had the greatest effect on the inferior students. There was a significant negative relationship between student performance and instructor stress during the initial aircraft power-on stall and spin-recovery sortie. (Author/CT)

Descriptors—Adult Education, Adult Education Programs, Adult Learning, *Cognitive Processes, Cognitive Style, Communication (Thought Transfer), Complexity Level, *Computer Assisted Instruction, Educational Research, Equipment Maintenance, Information Dissemination, Job Analysis, Job Skills, Memory, Methods Research, *Military Personnel, *On the Job Training, Program Evaluation, Reading Improvement, *Reading Skills, Selection, Task Performance
Identifiers—Navy, *Self Directed Learning, *Text Type

Over a two-year period, research was conducted primarily in two areas of cognitive strategies for on-the-job training (OJT). The first area was the development and testing of a computer-based training system to improve selectivity in text processing in order to improve performance during OJT. The second area was the exploration of text-type effects on learning from text. Preliminary results from this research suggest that learning from text may be measurably improved through the application of text processing techniques appropriate to the type of text being read. In addition to producing computer programs for training in selective text processing, the research staff also produced four technical reports, two chapters in books, and three papers for professional meetings. Identifiers—United States

The history of international exchange and training programs conducted by a score of federal agencies over the past thirty years compels the conclusion that, while there remain meaningful opportunities to develop closer coordination, there are also important inherent limitations. This report seeks to clarify both. What is needed to perfect meaningful coordination in this field appears to be more modest and manageable than some of the efforts and proposals of recent years: not a new layer of bureaucracy, but a series of specific arrangements to identify real interagency problems as they emerge and a predisposition on the part of the agencies concerned to deal with them case by case. In this report the General Accounting Office offers some suggestions as to how the new International Communication Agency might fulfill its presidential mandate as the coordinator of government exchange programs and a governmental focal point for programs in the private sector. (The appendixes include the questionnaire to selected agency heads and a proposal for closer coordination and information-sharing among U.S. international exchange and training programs, a selected listing of international exchange and training directories, and descriptions of U.S. government international exchange and training programs.) Students' Attitudes to Work and Unemployment. Part II: The Attitude Questionnaire. Research Service, #152.
Toronto Board of Education (Ontario). Research Dept.
Pub Date—Mar 79
Note—105p.; Not available in hard copy due to thin type in the original document; For a related document see ED 162 132
Pub Type— Reports - Research (143) — Tests/Questionnaires 160)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors—*Employment Opportunities, Females, Males, *School Responsibility, Secondary School Students, *Student Attitudes, *Unemployment Insurance, *Work Attitudes, *Work Experience, Youth Employment
Identifiers—Ontario (Toronto)

The purposes of the second part of a three-phase study were to examine the attitudes of Toronto secondary school students to work and unemployment and to examine the differences in the attitudes held by males, females, and students with varying degrees of work or job search experience. A total of 1,815 were asked to respond to an attitude questionnaire. The overall response rate was 54% or 975. The 100-item questionnaire was statistically refined so that the version used in the analyses contained 12 subscales made up of 59 items. The students' responses were analyzed for each of the following subscales: (1) Should schools prepare students for the work world?; (2) Jobs available for young people are undesirable; (3) Doing other things is more interesting than holding down a good job from age 16 to 24; (4) Taking an inconvenient or undesirable job is preferable to being on unemployment insurance; (5) It is important to hold down a high quality job from age 16 to 24; (6) Jobs available for young people are high quality; (7) Those in authority are doing things to reduce unemployment; (8) Youth unemployment exists because of the attitudes of the young; (9) Being on unemployment insurance is preferable to taking an undesirable job; (10) The rate of youth unemployment inspires the young to try harder; (11) The rate of youth unemployment results in feelings of depression among the young; (12) Youth unemployment exists because foreign countries benefit from Canadian resources. (The data are summarized in this report for each subscale and conclusions are made; results of the first survey on desires and experiences concerning work are found in ERIC document ED 162 132.) This record of the testimony presented to the Subcommittee to Investigate Juvenile Delinquency of the Committee on the Judiciary concerns the problem of the juvenile status offender in Iowa. Running away, truancy, defiance of and refusal to submit to parental authority and promiscuity are defined and treated as status offenses. This problem is viewed from the different perspectives of (1) the Civil Liberties Union, (2) a U.S. senator, (3) a judge, (4) a law professor, (5) a probation officer, (6) family services, (7) the crime commission, and (8) program specialists. Descriptors—*Employment Qualifications, Individual Characteristics, Industrial Personnel, *Job Placement, *Job Skills, *Labor Conditions, Laborers, *Skill Analysis, *Task Performance
Estimation techniques of physical capacities have been used by the United States Employment Service for a period of 40 years. In one technique, benchmarks are used to define 27 different capacities and 27 working conditions, which are ultimately consolidated into six groups of the former and seven groups of the latter. The benchmarks are actual statements of work behaviors involving the characteristics. Several behaviors from a variety of jobs are used to indicate the presence of an ordinary amount as well as a critical amount of the characteristic. Although this technique was originally undertaken to facilitate the selective placement of the handicapped, the technique could be used across the board and would be equally useful for all placements. Descriptors—*Action Programs (Community), Adolescents, *Drug Abuse, *Drug Education, *Interpersonal Relationship, *Minority Groups, Peer Counseling, *Prevention, Problem Solving, Program Effectiveness, Social Problems
The question of drug abuse prevention is examined in this booklet. Addressing itself to a variety of disciplines and professions, the book reveals the effectiveness of prevention programs implemented in classroom, school and community settings. It draws on the experiences of several dozen drug abuse prevention programs that were either visited or assessed as part of an intensive research and review process. Strategies and educational techniques for prevention programs are emphasized, and organizational models for schools, communities and minority groups are presented. The emphasis is on how individual people can reach across age and social barriers to work with youth and help them live without drugs. (Author/PK)

Descriptors—*Career Education, Counselors, *Counselor Training, Decision Making, Evaluation Methods, Needs Assessment, *Occupational Guidance, *Performance Based Education, *Program Design, Workshops
Identifiers—Information Analysis Products
A two-day training program is described that may be used by individuals or in preservice or inservice experiences to teach participants the knowledge and skills required to design, develop, and evaluate competency-based career guidance programs in whatever their work setting may be. It is appropriate for all career guidance personnel, including counselors, counselor educators, career education specialists, vocational guidance personnel, and specialists in pupil personnel services. The workshop provides a step-by-step approach to developing competency-based career guidance programs from the beginning stage of determination of needs to the final stages of implementation and evaluation. The program is presented as a single, integrated training package that can be used by career guidance personnel through self-instruction, or as a pre-or inservice workshop of approximately two days in length. Instructions for the facilitator (either the team chairperson or the workshop coordinator) are provided in the facilitator's guide at the end of the participant materials. (Author)

Identifiers—*Learning Style Checklist
The adequacy of Rosenberg's classification scheme, in which he divides children's learning characteristics into four styles, was investigated. Middle school students (N=377) were used as a sample, and their behavior was assessed by 30 teachers using the Learning Style Checklist. After intercorrelations of the 40 Checklist items were obtained, the resulting matrix was factor analyzed, and four factors emerged which corresponded to Rosenberg's four learning styles: Rigid-Inhibited, Undisciplined, Acceptance-Anxious, and Creative. Results indicated that teachers' perceptions of their students appear to group themselves in the manner suggested by Rosenberg's system. (Author/HLM)

Signs of Love: Toward a Sociology of Deep Interpersonal Relationships.
Pub Date—[73]
Note—41p.; Paper presented at the Annual Meeting of the American Sociological Association (New Orleans, Louisiana, August 30, 1972); Not available in hard copy due to marginal legibility
Pub Type— Speeches/Meeting Papers (150) — Information Analysis (070)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors—*Affective Behavior, Emotional Response, *Empathy, *Friendship, *Interpersonal Relationship, Marriage Counseling, Moral Issues, *Self Actualization, Sex Role, *Social Behavior, Social Characteristics
Identifiers—*Love
A theoretical outline for an ideal or constructed type for the concept of "love" is presented. According to the definition presented, there are five basic elements or indicators which are sufficient conditions for the existence of love in its broadest sense: empathy, desire for the presence of the other, sharing, sacrifice and joy. Under sharing, which is the central element in two-way love, there are three stages of development, namely, sharing of social traits, sharing of complementary vital interests, and sharing in terms of the meshing of social personality needs. It is stated that these basic ideas should help individuals to study the phenomenon, to begin to operationalize the cluster of five elements, to notice the indications, and thus to recognize the existence of and even to cultivate genuine love in themselves, in others, and in the members of the community and society. Love, Power, and Conflict: A Systems Model of Interparty Negotiation.
Pub Date—21 Feb 77
Note—52p.
Pub Type— Information Analysis (070)
EDRS Price - MF01/PC03 Plus Postage.
Descriptors—*Conflict, *Individual Power, *Interpersonal Relationship, Self Actualization, Sex Role, *Social Behavior, *Social Characteristics, Systems Analysis
Identifiers—*Love
Some basic hypotheses and corresponding definitions of concepts are presented in an effort to succinctly state the relationship between three of the most basic concepts of social science, namely love, power and conflict. This novel theory is an example of limited reduction. However, it is cast so as to be applicable to both micro and macro levels of analysis, that is, to relations between two persons or two nations. A flow diagram helps to summarize the theory as a whole. In addition, an accounting scheme and a procedure are presented for content analyzing a wide variety of materials in terms of this model. Finally, a partial application illustrates the procedure and some of the most basic hypotheses by using them to analyze a theatre play about interpersonal conflict. (Author)

Mapping Joint Action.
Pub Date—[78]
Note—10p.
Pub Type— Reports - General (140)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Behavior Change, *Conflict Resolution, Culture Conflict, *Personal Values, Sex Role, *Social Action, Socialization, *Social Systems, *Sociometric Techniques, *Systems Analysis
The flow diagrams in this document provide cognitive maps to aid in synthesizing diverse areas of knowledge in a special brand of field theory. A model is presented which highlights the domains of structural functionalism (with concepts of cultural, personal and societal systems) and symbolic interactionism (with the concepts of self, sentiments and role-taking). The paper offers an accounting scheme or extended check list for analyzing problems which can be viewed in terms of some combination of these variables. The basic diagram starts with conflict between two parties, thus emphasizing relationship over individual psychology. It deals with a classic problem of social science–how to handle conflict as a manageable problem, or use it as a stimulus to achieve orderly social change. (Author)

This manual, prepared by the Michigan Office of Services to the Aging, is intended to aid agencies concerned with aging in planning volunteer programs. This second of three volumes helps the volunteer coordinator design and implement a successful training program for the volunteer network. The training process described here begins with the identification of volunteer needs and problems. The manual shows how the trainer can set learning objectives which are discussed and agreed to by the volunteer. Other training exercises presented include using a variety of techniques to meet these objectives. The final step in the training process, evaluation, is presented as an ongoing concern of both the volunteer and the trainer. (BN)

Descriptors—*Anxiety, *Cognitive Development, *Cognitive Processes, *Conflict, *Moral Development, Motivation, *Perspective Taking, Research Projects
Identifiers—*Defining Issues Test
A group of 45 undergraduates discussed a moral issue with a confederate who had the same opinion (no-controversy) or opposite opinion (controversy). Subjects in the controversy conditions were induced to have a high level of defensiveness by a disconfirmation of personal competence or a low level of defensiveness by a confirmation. Subjects in no-controversy indicated more conceptual conflict (uncertainty) and were more accurate in taking the cognitive perspective of the confederate than were subjects in the confirm no-controversy condition. These results support Piaget's and Kohlberg's views of the role of controversy in perspective-taking and cognitive development and Berlyne's theory of conceptual conflict and epistemic curiosity. Subjects in the disconfirm controversy condition experienced more uncertainty and were more accurate in cognitive perspective-taking than were subjects in the confirm controversy condition. Subjects in the disconfirm controversy condition also experienced more internal distress, derogated the confederate and the confederate's position and arguments to a greater extent, and indicated greater closed-mindedness in responding to the confederate and the confederate's arguments than did subjects in the confirm controversy condition. Do Female Delinquents Drift?
Pub Date—[74]
Note—17p.
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Attitudes, *Behavior Patterns, *Delinquency Causes, *Delinquent Behavior, Females, Institutionalized Persons, Prisoners, Social Problems, *Social Values, *Subculture
Youths who approved of adventurous, youth-oriented activities were likely to be more involved in delinquent behavior than those who did not, but no relationship was found between approval of more serious offenses and extent of delinquent involvement. Based on questionnaire responses from institutionalized girls in two juvenile reformatories, findings indicate that attitudes of those engaging in serious delinquent activity were similar to the attitudes of those who did not. This argues against the common assumption that delinquents have values different from nondelinquents. Instead, support emerged for the argument that delinquents drift into and out of delinquent behavior. It appears that individuals engage in delinquent behavior because they are periodically released from moral constraint. (BN)

Report on the Survey of County Women.
Montgomery County Commission for Women, Rockville, Md.
Pub Date—1 Jul 78
Note—47p.
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—*Agency Role, Attitudes, *Community Surveys, Equal Opportunities (Jobs), *Females, Human Services, *Needs Assessment, Rape, Social Agencies, *Womens Education
The most crucial findings resulting from this survey of 1,256 women are those reflecting the respondents' needs and concerns, as well as their views of what should be priorities for program planning. The problem areas which these women generally agreed should be of importance were employment, wife abuse, rape and other sexual offenses, child care, and education. Additional areas which were emphasized were job re-entry counseling and wills/probate. An example of the survey's implications for agency action is the current emphasis on employment, both in terms of conferences and seminars and in terms of direct services being offered to women. The Repressive Content of the Formal Constituents of Classroom Practice.
Pub Date—[78]
Note—42p.
Pub Type— Information Analysis (070)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—*Educational Philosophy, Grading, *Higher Education, *Socialization, *Sociocultural Patterns, *Student Alienation, *Teaching Methods, Testing
Both the forms and the content of current classroom practice fit into a generally repressive socialization pattern for students. The formal constituents of typical classroom practice in American higher education include grades, tests, grade distribution, syllabi and schedules, all of which contribute to a generally repressive socialization pattern which is nonetheless necessary to maintain the present society. Grades represent an extrinsic motivation to conform to the educational system, and result in the distortion or denial of students' intrinsic desire to learn and grow. The current American educational process is part of a socialization process which denies human needs because of the nature of the society to which students are being asked to conform. Any attempt to change the classroom must change both form and content, and must begin with the recognition that professional educators do not know all the answers. (Author/BP)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors—*Behavior Standards, Females, *Moral Issues, *Perception, *Rape, *Sexuality, *Social Attitudes, Womens Studies
Questionnaires containing one of nine stories about a sexual act between a man and woman, as well as bipolar judgment scales about the behavior and characteristics of the actors in the story, were given to 90 undergraduate college students. Low, moderate, and high levels of struggle on the part of the woman and of psychological coercion on the part of the man were varied in the stories. In addition to the judgment scales, questions were included asking each subject whether a rape had occurred and whether the man would be found guilty of rape in a court of law. Analysis of variance of the levels of struggle and coercion and of subject sex indicated very little effect of coercion, but consistent significance of the levels of struggle on all ratings. There was a high degree of relationship between ratings of the actors in the stories and judgments of rape. (Author)

Who Will Succeed? College Graduates as Business Executives. Special Topic Series No. 3.
College Placement Council, Bethlehem, Pa.
Pub Date—78
Note—16p.; Some parts may be marginally legible due to print quality
Pub Type— Numerical/Quantitative Data (110) — Reports - General (140)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors—Academic Achievement, *Administrative Personnel, *Business, *Career Choice, *College Graduates, Course Content, Family Background, Job Satisfaction, *Leadership Qualities, Salaries, Self Esteem, *Success Factors
There are several social and personal characteristics that may differentiate those college graduates who will achieve high-salaried positions as business executives from those who will not. Some conclusions about patterns that seem to be associated with becoming a high-salaried business executive can be drawn from the findings of the Utilization of Education Survey, conducted in 1974-75 for the CPC Foundation and the National Institute of Education. The data in this survey, based on the responses of college graduates who participated for over a decade in a survey panel, illuminates the family

background, scholastic achievement, college education and self-assessment of a number of business executives. Findings show that the highest salaried business executives are more likely than others to have college-educated fathers, high grades in high school and college, and to have attended a very selective college. They report a positive self-assessment, indicating a high degree of drive to achieve and intellectual and social self-confidence. No relationship was found between majoring in business and attaining a high-salaried position as a business executive. The findings suggest that a certain amount of brilliance in intellect, performance and style is more important than what one studies in college in order to become a business executive. (Author/PK)

The Genogram: A Multigenerational/Family Portrait.

Pub Date—29 Aug 78

Note—11p.; Paper presented at the Annual Convention of the American Psychological Association (Toronto, Ontario, Canada, August, 1978); Not available in hard copy due to marginal legibility

Pub Type— Speeches/Meeting Papers (150) — Reports - Descriptive (141)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Extended Family, *Family Counseling, *Family Problems, *Family Structure, *Group Therapy, Nuclear Family, Parent Child Relationship, *Psychological Patterns

Identifiers—*Family Tree, *Genogram

The genogram can be used in an initial interview, as an organizing conceptual approach to the study of a family system. As a family tree, the genogram is a portrait of a family system over time and space. It's a structural diagram of a family's three-generational relationship system–an overview of emotional problems within the context of the family system. Multigenerational family survey highlights the important issues and relationship patterns as they emerge and repeat over the generations, and defines the problem within the larger context of the emotional system. Major concepts of Bowen's family systems theory and psychotherapy serve to clarify how the genogram can contribute to the organization of facts and characteristics of a family, while dissecting the emotional process in a way that focuses on the problem areas in a family and, thus, can define from the onset where to place the treatment strategies. The Role of the Psychologist–Assessment and Treatment of Child Abuse.

Pub Date—78

Note—15p.; Paper presented at the Annual Convention of the American Psychological Association (Toronto, Ontario, Canada, August, 1978)

Pub Type— Speeches/Meeting Papers (150) — Information Analysis (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Child Abuse, *Counselor Role, *Crisis Therapy, Family Counseling, *Family Problems, Group Counseling, *Parent Child Relationship, Parent Counseling, *Psychologists

In the field of child abuse, the psychologist's role is twofold: assessment of the dynamics involved in the particular case, and treatment. The psychologist's assessment could provide relevant information concerning whether to remove a child from the home, whether there is a danger to siblings, or whether the case would be amenable to treatment. Furthermore, an assessment of the dynamics of child abuse necessitates a professional understanding of a complicated interaction of social and personal factors. Family group interviews, which may include members of the extended family, may be utilized in treating a case of child abuse, a psychologist may also use a range of therapeutic techniques, such as group therapy, crisis therapy, couples therapy and family therapy. A case where such techniques were employed is provided in the presentation. (Author/PK)

Children's Distortion of Incongruous Interpersonal Behavior: Primacy Effect or Stereotypes?

Pub Date—Aug 78

Note—11p.; Paper presented at the Annual Convention of the American Psychological Association (Toronto, Ontario, Canada, August, 1978); Best copy available

Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Anti Social Behavior, *Child Psychology, Children, *Cognitive Development, *Interpersonal Relationship, Perception Tests, Role Perception, *Social Behavior, Social Psychology, *Stereotypes, *Stimuli

Pre-existing cognitions may influence a child's social perceptions, and the extent of this influence is measured in groups of children from grades 1-6. The children were shown slide shows of congruous (e.g. doctor befriending bullied child) and incongruous (e.g. minister shoplifting) interpersonal behavior. Half of the children saw stories in which the character's identity was established prior to his prosocial or antisocial behavior, the order being reversed for the other half. When tested for immediate recall, virtually all children accurately described the congruous episodes. However, 51 of 96 children distorted behaviors portrayed in the incongruous episodes. This distortion, which was equivalent across presentation order, was significantly related to grade level. Results are discussed in terms of the need for socialization research to include analysis of developmental differences in children's interpretation of social stimuli. (Author/PK)

The Next Twenty Years: A Futuristic Examination of Student Affairs.

Pub Date—77

Note—17p.; Paper presented at the Annual Meeting of the National Association of Student Personnel Administrators (Atlanta, Georgia, April 3-6, 1977)

Pub Type— Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Administrator Responsibility, *College Students, Community Support, *Enrollment Projections, *Futures (of Society), Higher Education, *Program Planning, School Holding Power, Social Change, *Student Needs, *Student Personnel Services

Future changes in the characteristics of student populations, and the institutions of higher education which they attend, is becoming a concern of student affairs administrators. Among the areas in which future development could have an impact on student affairs programs are: (1) changes in the national birthrate and subsequent fall in college enrollment; (2) events in the community outside higher education institutions that may change both the political and financial support that colleges and universities have previously received; and (3) events within institutions of higher education. Examples of such events are the growth of nontraditional educational mechanisms, the marked increase in the proportion of females in undergraduate enrollment and the increased need and importance of retention programs. If student affairs programs are to remain relevant, administrators must anticipate and plan for these developments and the changes in student needs and concerns in the next 20 years. (PK)

Red Capes, Red Herrings, and Red Flags.

Spons Agency—National Inst. of Mental Health (DHEW), Rockville, Md.

Pub Date—29 Aug 78

Note—10p.

Pub Type— Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Assertiveness, Attribution Theory, Behavioral Science Research, *Behavior Development, *Cognitive Development, *Concept Formation, Individual Psychology, Interaction, *Personality, *Psychological Characteristics

The argument that the personality structures obtained from retrospective ratings reflect semantic similarity structures has been as provocative as a red cape in the bull ring. High congruence between those two kinds of structures seems well established. What is less clear is how and why those structures differ from that for immediate judgments of the same behaviors. The time interval between perceiving the pertinent behavior and making a judgment about it is involved in such differences. Another is the level of abstraction involved in the variables usually used. More fundamental than this ongoing controversy, however, is the fact that there is no one personality structure: personality structures change with the variables studied and even with the instruments used to measure any one set of variables. To get dependable, replicable findings, the observer's idiosyncratic contributions must be separated from his judgments. This can be done by concentrating on simple, short actions. Alternatively, how people make attributive judgments can be studied as well as the evaluative judgments that people must make about others, in carrying out the activities of everyday living. Domestic Violence: Issues in Designing and Implementing Programs for Male Batterers.

Pub Date—29 Aug 78

Note—17p.; Paper presented at the Annual Convention of the American Psychological Association (Toronto, Ontario, Canada, August, 1978)

Pub Type— Speeches/Meeting Papers (150) — Reports - General (140)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Family Problems, Interpersonal Relationship, *Males, Marriage, *Program Design, *Psychological Patterns, *Therapy

Identifiers—*Battered Women, *Domestic Violence

Research directed toward combatting the problem of domestic violence involves consideration of certain variables related to implementing treatment regimens for battering males. The various characteristics of this population are discernable; the relationship of these factors has important implications for therapeutic intervention. The design and implementation of treatment programs for male batterers can be enhanced by recognizing and dealing appropriately with the psychological patterns of these men. Legal, agency, and staff resources can be educated to effective methods of treating male batterers. A program outline for therapy is provided, as well as contact information for those interested in the field. (PK)

Group Versus Individual Cognitive Therapy: A Pilot Study.

Pub Date—[78]

Note—26p.

Pub Type— Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Cognitive Processes, Comparative Analysis, *Counseling Effectiveness, *Depression (Psychology), *Drug Therapy, *Group Therapy, Helping Relationship, *Individual Counseling, Medical Treatment, Patients (Persons), Pilot Projects

Group therapy and individual cognitive therapy were investigated with non-bipolar moderate-to-severely-depressed outpatients (N=44) assigned to group cognitive therapy, individual cognitive therapy only, or to individual cognitive therapy in combination with anti-depressant medication. Treatment efficacy was measured by self-report and a clinical rating scale. Each of the three treatments was associated with a statistically significant improvement compared to pretreatment symptom levels. However, group therapy resulted in a less complete symptomatic remission than did individual therapy, with or without the addition of anti-depressant medication. Almost half of those who completed group treatment did not obtain a symptomatic remission. Results also indicated that anti-depressant medication did not add to either the rapidity or the overall degree of symptom reduction obtained with cognitive therapy alone conducted in an individual format. Descriptors—*Attitudes, *Counselor Role, Higher Education, Office Practice, Perception, *Professional Occupations, *Professional Personnel, *Psychologists, *Role Conflict
Identifiers—*Industrial Organizational Psychology
A number of factors act to unify the profession of psychology, while others press toward its dissolution. Factors which unify the psychology profession include intellectual exchange resulting in the transfer of knowledge, and the limited number of cosponsored sessions during the national professional association meetings. Those which push psychology toward dissolution include the wide variety of circumstances and settings of practice, highly differentiated training programs, changes in perception of what psychology is, and a seeking of identity from insurance companies in order to gain access to third-party payments. Organizational Politics and the Entry: Process of the New Professional Psychologist.
Pub Date—Aug 78
Note—10p.; Not available in hard copy due to marginal legibility; Paper presented at the Annual Convention of the American Psychological Association (Toronto, Ontario, Canada, August, 1978)
Pub Type— Speeches/Meeting Papers (150) — Opinion Papers (120)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors—*Consultants, Employer Employee Relationship, *Entry Workers, Leadership Styles, Organizational Climate, *Organizational Communication, *Power Structure, *Professional Personnel, *Psychologists, Role Models
Applying a consultative model to the process of entering a profession, understanding organizational politics, and experiencing the need to prove oneself are all important to the new psychologist. Organizational entry for the new professional is analogous in many respects to the entry of a consultant into an organization. Using this assumption, it is then possible to apply a consultative model for making that entry a smooth and productive one. Organizational structure, power, norms, leadership style, sanctions, and rewards are concepts which can be used to enhance the new psychologist's effectiveness. Also important are organizational politics, focusing on the importance of learning the organization's informal and formal history, discovering alliances, and developing strategies for working within the informal communication network. The Effect of Training/Supervision of Nonprofessional Interventions with Delinquents.
Pub Date—Aug 78
Note—38p.; Paper presented at the Annual Convention of the American Psychological Association (Toronto, Ontario, Canada, August, 1978)
Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—*Change Agents, College Students, Comparative Analysis, *Counseling Effectiveness, Delinquent Rehabilitation, *Delinquents, *Intervention, *Nonprofessional Personnel, Performance Factors, Program Design, Task Performance, *Training Techniques
The use of undergraduates (N=57) working on a one-to-one basis with delinquent youths as the change agents in a nonprofessional program which systematically varied training/supervision/intervention components was investigated. Students and delinquents (N=73) were randomly assigned to one of four experimental training/supervision conditions or to a control group. Process interviews were conducted to determine what transpired in the 18-week intervention. The impact of the training-/supervision segment on the actual intervention and the relationship between the intervention activities and successful youth outcome, based on official recidivism and school performance data, were determined. Results indicated that understanding how training/supervision is applied to the intervention situation by the nonprofessional, and how separate components differentially affect outcome, is important in determining the overall effect of any intervention. Identifiers—Information Analysis Products
Assisting committed counselors to improve the learning environments in their schools by reducing disruption is the aim of this monograph. After school disruption is defined as "anything that seriously disrupts the education of the students," four general types of programs are described: (1) security systems; (2) counseling services; (3) curriculum/instructional programs; and (4) organizational modifications. Specific examples of five programs used in a variety of settings, suggestions from counselors "on the firing line," an illustration of an action plan, and a list of references including professional associations and agencies, books, journals, and ERIC documents are also provided. The Use of Nicotine Fading and Self-Monitoring to Reduce Cigarette Smoking: A Non-Aversive Procedure.
Pub Date—[76]
Note—5p.
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Adolescents, Adults, *Behavioral Counseling, *Behavior Change, Comparative Analysis, *Counseling Effectiveness, Drug Addiction, Drug Therapy, Health Programs, *Self Control, *Self Help Programs, *Smoking, Special Health Problems
Several treatment approaches to cigarette smoking were investigated, including a nicotine fading procedure in which subjects changed their cigarette brand each week to one containing progressively less nicotine and tar; a self-monitoring procedure in which subjects plotted their daily intake of nicotine and tar; a combined nicotine fading/self-monitoring procedure; and a slightly modified American Cancer Society Stop Smoking Program. Smokers (N=40) were assigned to one of the treatment programs. Results at the six-month follow-up showed that the nicotine fading/self-monitoring treatment was the superior procedure on all dependent measures: abstinence rate (50%), daily nicotine intake (69% reduction from baseline), daily tar intake (71% reducation from baseline). While the combined treatment program produced success rates in the range of those obtained by the aversive rapid smoking procedure (the most successful procedure to date), the nonaversive combined program did not share some of the inherent limitations of the aversive procedure. Results suggest that the nicotine fading/self-monitoring approach may be a more reasonable treatment for persons with heart disease, emphysema and asthma, and may hold promise for the more general cigarette smoking population as well. Descriptors—*Board of Education Policy, *Change Strategies, *Curriculum Development, *Educational Improvement, Educational Legislation, Elementary Secondary Education, Enrollment, Inservice Education, Needs Assessment, Secondary School Students, *Sex Discrimination

Identifiers—*Title IX

The disproportionate enrollment numbers of males and females in various classes in the Hayward, California Unified School District were investigated. A needs assessment was conducted to identify the subject, teacher, total enrollment, and sexual composition of the classes. Results indicated that 39 classes were disproportionate in their sexual composition and therefore not in compliance with Title IX guidelines. These data led to the establishment of the objective of reducing the number of courses exhibiting sexually disproportionate enrollments by 50%. This objective was achieved by implementing inservice sessions for counselors, making curriculum revisions, and notifying parents, students, and the community of the district's Title IX practices and policies. Results of these efforts indicated that: (1) counselors increased their knowledge and skills in developing change objectives for their schools; (2) the number of classes exhibiting sexually disproportionate enrollments was reduced by over 50%; (3) sex designations were eliminated from the curriculum; and (4) students and staff felt a significant reduction in sex bias occurred. Evaluation instruments and descriptions of change strategies are contained in the appendices. (Author/HLM)

Descriptors—Anxiety, Aspiration, College Students, *Fear of Success, *Goal Orientation, Motivation, *Performance Factors, *Reactive Behavior, *Sex Differences, *Status Need, Task Performance

The effects of assigned status were investigated in same-sex competition with male (N=40) and female (N=80) college subjects. Those randomly assigned to high status improved in reaction time performance, while subjects randomly assigned to low status suffered a decrement. Contrary to expectations, in mixed-sex competition (fear of success arousal condition) subjects in both high and low status improved in performance. Feedback on performance did not account for these effects. Criterion performance and personal aspirations were significantly correlated and group goals were significantly higher than personal goals. Males had significantly faster reaction times and set higher goals than females. Status did not significantly affect achievement motivation, anxiety, or fear of success. (Author)

Tough, Allen

The Largest Intentional Change During the Past Two Years.

Pub Date—78

Note—19p.; Paper presented at the Annual Convention of the American Psychological Association (86th, Toronto, Ontario, Canada, August, 1978)

Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Adults, *Behavior Change, *Change Strategies, Decision Making, Foreign Countries, *Individual Development, *Life Style, Personal Growth, *Self Actualization, *Self Determination

Identifiers—*Canada

Intentional changes over the past two years in the lives of 45 women and men in Toronto were examined through interviews involving extensive probing and dialogue. The intentional changes turned out to be mostly through self-help. It was largely the person herself or himself who chose, planned, and implemented the change. The person often obtained significant help from friends and other peers, but only rarely from professionals or books. On four measures of magnitude and success, the changes were generally rated quite high regardless of whether or not they involved professional help. Results indicated that changes clustered into seven areas of life, involving: (1) job, training, or education; (2) human relationships, emotions, and self-perception; (3) enjoyable activities; (4) residential location; (5) body and physical health; (6) basic knowledge or skill in diverse situations; and (7) personal finances and home maintenance. Relationship of Job Scope to Enlisted Performance and Satisfaction Criteria.

Pub Date—[77]

Note—14p.; Tables are marginally legible due to small print

Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Behavior Patterns, Comparative Analysis, *Individual Characteristics, *Job Development, *Job Satisfaction, Military Personnel, *Perception, Reactive Behavior, *Task Performance, *Work Experience

Identifiers—*Job Diagnostic Survey

As part of a longitudinal study of first-term enlisted naval personnel, perceptions of job scope (the complexity and challenge of a job), were investigated to predict criteria of satisfaction, enlisted performance ratings, and turnover. Correlations between job scope (Job Diagnostic Survey scores) and behavior as moderated by a variety of individual difference characteristics were also examined, including internal-external locus of control, growth need strength, and needs for achievement. The overall results of the study were consistent with previous research on job design in that the interaction between the individual and the job has been found to be an important determinant of employee work outcomes of satisfaction and turnover. Relationships between job characteristics and performance were not significant. In general, results indicated that individuals who have high needs for achievement, for example, react less favorably to jobs low on variety, autonomy, task identity, feedback, and task significance, and are more likely to separate from the Navy than individuals who do not have high achievement needs. Using PEERRATE: A Computerized System of Student Term Paper Grading.

Pub Date—30 Aug 78

Note—22p.; Paper presented at the Annual Convention of the American Psychological Association (86th, Toronto, Ontario, Canada, August, 1978); Best copy available

Pub Type— Speeches/Meeting Papers (150) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—College Students, *Computer Oriented Programs, *Evaluation Criteria, *Evaluation Methods, *Grade Equivalent Scores, Higher Education, *Peer Evaluation, *Performance Criteria, Rating Scales, Scoring Formulas, Writing

Identifiers—*PEERRATE

The use of a computerized system is described in which students rate each other's term papers via the computer program PEERRATE, which creates a matrix of intervals between ratings received and calculates final ratings incorporating a mean and standard deviation selected by the instructor for the class. As described, the program includes: (1) compensation for the tendency of students to give high or low grades to everyone; (2) computation of a norm-adjusted score for performance by each student on each assignment; and (3) analysis of both the quality of the ratings by raters for that assignment and the consistency of each student as a rater. Self-Blame in Rape Victims: A Control-Maintenance Strategy.

Pub Date—78

Note—16p.; Paper presented at the Annual Convention of the American Psychological Association (86th, Toronto, Ontario, Canada, August, 1978) ; Parts marginally legible due to print quality

Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Attribution Theory, *Behavior Patterns, Crime, Females, Individual Characteristics, *Locus of Control, *Rape, *Reactive Behavior, *Self Control, *Self Evaluation

Two types of self-blame were investigated: characterological self-blame, corresponding to the popular negative view of self-blame; and behavioral self-blame, representing a positive attempt to reestablish a belief in control. Results of a questionnaire completed by rape crisis centers located across the country attest to the pervasiveness of self-blame among rape victims, yet indicate that victims of rape are far more likely to engage in behavioral self-blame than characterological self-blame. Descriptors—*Achievement Rating, *Behavior Patterns, Behavior Rating Scales, Comparative Analysis, *Employment Qualifications, Equivalency Tests, *Evaluation Methods, Government Employees, *Job Skills, *Personnel Evaluation, Task Performance
Identifiers—*United States Civil Service Commission
The relationship between the behavioral consistency procedure and two other procedures (application form analysis and rating scales) were investigated through a comparison of initial employment and hiring practices used by the U.S. Civil Service Commission. The position of Budget Analyst was initially assessed in terms of five achievement areas and a panel of expert raters established the dimensions for rating potential applicants on their suitability for the position. Experienced personnel staffing specialists then rated the applications of 50 individuals who were already in the position of Budget Analyst using several combinations of rating procedures to determine the applicants' suitability for the job. Results indicated that the behavioral consistency approach is: (1) more costly and time-consuming; (2) more reliable; and (3) applicable for developing hiring procedures for mid-level occupations at the point of entry into federal service. Descriptors—Adjustment (to Environment), *Behavior Patterns, College Students, *Drinking, Drug Abuse, Higher Education, Individual Differences, *Life Style, *Peer Influence, Perception, *Student Behavior, *Student Characteristics
The extent of drinking among college students (N=800) was investigated, to compare the consumption of various groups in terms of such variables as: age, sex, religious preference, class standing, type of living accommodation and type of college (i.e., religious vs. secular and co-ed vs. all female). Various life styles and their relationship to drinking behavior were examined, including: (1) the students' perceptions of how much other groups drink; (2) the extent of peer or adult influence on their own drinking behvaior; and (3) the thoughts that students have about their own drinking behavior. Results indicated that life styles, the aspect of sociability, and peer influence accentuate already learned behavior as well as encourage new behavior to be acquired within the college environment. Descriptors—Adults, Behavior Patterns, *Court Litigation, Criminal Law, *Justice, *Perception, *Public Opinion, *Rape, *Sexuality, Social Action
A simulated jury deliberation with experienced and inexperienced jurors sampled from the jury population of Hennepin County, Minnesota, was investigated. The purpose was to assess the impact of recent reforms in evidentiary rules pertaining to the admissibility of prior sexual history evidence in rape trials. Specific questions included: (1) whether the current types of legal reform eliminate or reduce the prejudice which reportedly inheres in the common law rules of evidence; (2) the extent to which empanelled adult jurors utilize such evidence without prejudice in a deliberated judgment context; and (3) the extent to which the different types of reform interact with varying degrees of victim consent. Preliminary findings suggest that the introduction of prior sexual history is prejuducial. (Author)

Effects of Gestalt and Sensitivity Groups on Temporal Orientation and Psychological Effectiveness.
Pub Date—[75]
Note—9p.
Pub Type— Reports - Evaluative (142)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—College Students, *Counseling Effectiveness, *Group Counseling, Individual Differences, Intervention, *Psychological Patterns, Self Concept, *Self Esteem, *T Groups, *Time Perspective
Identifiers—*Personal Orientation Inventory
The effects of two types of group intervention, Gestalt and sensitivity training, on time orientation or time competence and psychological effectiveness were investigated with 45 college students as subjects. Results indicate that students participating in the groups did not show significant gains in psychological effectiveness as measured by the Personality Orientation Inventory. Intercorrelations of dependent measures indicated that orientations toward time as fluid and as full of possibilities, as compared to orientations toward time as static and event-bound, are more psychologically effective. The Psychosocial Problems of Cancer Patients: A Prospective Study.
Spons Agency—National Cancer Inst. (NIH), Bethesda, Md.
Pub Date—28 Aug 78
Contract—NO1-CN-55188
Note—11p.; Paper presented at the Annual Convention of the American Psychological Association (86th, Toronto, Ontario, Canada, August, 1978)
Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Behavior Patterns, *Coping, Diseases, Evaluation Methods, Individual Differences, Intervention, *Patients (Persons), *Personal Adjustment, *Psychological Characteristics, Psychotherapy, *Rehabilitation Counseling, Rehabilitation Programs
The course of psychosocial adjustment to cancer was examined in 105 adults with cancer of the lung, breast and skin. Half of the patients received a program of systematic psychosocial rehabilitation plus evaluation, and the other half received only an evaluation, consisting of a series of psychometric instruments and a problem-oriented structured clinical interview. Patients in the intervention group received a comprehensive program of psychosocial services based on individual need. One rehabilitation worker was assigned to each patient, and this worker followed a patient from day of hospital admission through six months after hospital discharge. Results indicate that: (1) different cancer patients experience "peak vulnerability" at different points during the course of their disease; (2) initial psychometric scores can predict the total number of psychosocial problems reported at the end of six months; (3) intervention and control groups differed in that intervention patients were less likely to exhibit "denial" concerning their illness; and (4) intervention patients engaged in more social and recreational activities at the end of the six-month program. Identifiers—*Industrial Organizational Psychology
The Revised Standards for Providers of Psychological Services, developed by a committee of the American Psychological Association, have an important impact on industrial/organizational psychologists. Currently, four types of controls exist as assurances to the public that appropriate psychological services are being provided. They are: graduate education programs, supervised experiences and practica, certification and credentialing, and peer review by professional association committees and/or licensing boards. Industrial/organizational psychologists must stay on top of the licensing controversies to insure that they will be able to maintain their practices in the future. (Author/HLM)

Arizona: In Search of the Displaced Homemaker.
Arizona Univ., Tucson.
Spons Agency—Arizona State Dept. of Education, Phoenix. Div. of Career and Vocational Education.
Pub Date—78
Grant—78-913-03-01
Note—111p.
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC05 Plus Postage.
Descriptors—*Career Development, Divorce, Family Management, *Females, Heads of Households, *Human Services, Marital Instability, *One Parent Family, *Social Problems, *Working Women
Identifiers—*Displaced Homemakers
The model described offers information about displaced homemakers that, while specific to Arizona, can provide a guide to persons in any state responsible for program planning. The report presents results of an Arizona Department of Education study which was conducted to: (1) identify the "displaced homemaker;" (2) define the need for services; (3) examine the divorce rate in the state and its impact on families; and (4) make recommendations for program planning. These recommendations are addressed to specific areas of need such as direct services to the displaced homemaker, statewide training of human services personnel, different approaches to meet the needs of different populations, and public and professional information. Also included is a reprint of the amendment to the Comprehensive Employment and Training Act which specifically deals with displaced homemakers. (BN)

Causal Attributions, Expectations and Task Performance.
Pub Date—[76]
Note—16p.
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Attribution Theory, *Expectation, *Failure Factors, *Feedback, Higher Education, Males, *Self Esteem, *Success Factors, Task Performance
A group of 253 male students in a freshman chemistry class participated in this research, which investigated the relationship between performance attributions and expectations and performance on a subsequent task. College students attributed their success or failure on two chemistry tests to ability, effort, luck, or task difficulty, and indicated how well they expected to perform on a subsequent test. Among students who succeeded on the tests, expected and actual performance on the next test were positively related to ability attributions and negatively related to luck attributions. Among students who experienced failure, expected performance was negatively related to ability attributions and positively related to effort attributions. This suggests that failure can be a learning experience only when one feels that the behavior can be changed. Implications for job performance suggested that feedback may help the employee. (Author)

Self-Awareness, Self-Concern and Prosocial Behavior.
Pub Date—30 Aug 78
Note—13p.; Paper presented at the Annual Convention of the American Psychological Association (86th, Toronto, Ontario, Canada, August, 1978)
Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Empathy, Helping Relationship, *Inhibition, *Interpersonal Competence, *Prosocial Behavior, *Self Concept, *Social Responsibility
Contrary to expectations, self-awareness inhibited reactions to a salient norm of social responsibility in two experiments which tested the hypothesis that directing attention to the self would lead to an increase in helping behavior. The reason, apparently, was that self-awareness interfered with the empathy process. Concerned about themselves and their own problems, the subjects were less willing to help a dependent other. A third experiment examined reactions to a salient norm of reciprocity under conditions that did not promote self-concern. The results of this experiment indicated that self-awareness does promote behavior that is consistent with an internalized standard of equity or reciprocity (that is, helping after receiving some form of help) when subjects are not involved with their own problems. In situations where a person has no basis for self-concern, for instance, a success experience of some kind, self-focused attention does enhance prosocial behavior. Otherwise, self-awareness promotes a state very similar to self-concern in which the person is unwilling to empathize and unlikely to help. (Author/BN)

Sex Roles as an Androcentric Vision.
Pub Date—Sep 78
Note—21p.; Paper presented at the American Sociological Meetings (September, 1978)
Pub Type— Speeches/Meeting Papers (150) — Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Androgyny, Cultural Factors, *Family Attitudes, Interpersonal Relationship, Psychological Characteristics, *Sex Role, Sex Stereotypes, *Socialization, Social Values, *Sociocultural Patterns, *Womens Studies
The notion that women internalize personality characteristics that render them psychologically, socially and intellectually crippled is a denial of experience. The study of sex roles cuts across several disciplines, as well as being the major focus of women's liberation, thus creating the possibility for reappraisal of the field and its assumptions. Two positions have been taken about the bases of sex roles. One view, taken by the school of sociobiology, asserts that males are superior as social animals. The second, taken by environmentalists, states that sex differences are the result of societal intervention. Further studies implicitly accept the polarized model of male/female development. Analysis of the research shows that the basic assumptions of the field actually create rather than explain reality. The literature on sex roles assumes that women really do have stereotypical personality traits which result in inferiority. Acceptance of the assumptions constitutes a denial of the real and constant forces which make it difficult if not impossible for women and most men to achieve, to be independent, to be socially mobile, and to develop intellectually regardless of their psychological states. (BN)

Poor Performance After Unsolvable Problems: Learned Helplessness or Self-Esteem Protection?
Pub Date—Mar 78
Note—16p.; Paper presented at the Annual Meeting of the Eastern Psychological Association (49th, Washington, D.C., March 29-April 1, 1978)
Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Attribution Theory, Cognitive Style, Individual Psychology, Information Seeking, *Motivation, *Performance Factors, Persistence, *Psychological Characteristics, *Self Esteem, *Task Performance, Testing Problems
People often perform poorly on tasks following experience with unsolvable problems. Two competing explanations for this performance deficit (learned helplessness and egotism) were tested. Subjects were given either solvable or unsolvable discrimination problems and then a series of anagrams which were alleged to be either highly or moderately difficult. Subjects previously given unsolvable problems did better on the anagrams when led to believe the anagrams were highly difficult. This result is contrary to a learned helplessness theory interpretation which attributes performance deficits following unsolvable problems to the belief that outcomes are independent of responses. Instead, this result supports an egotism explanation which maintains that people are not likely to try hard on a task following experience with unsolvable problems. That is, following failure, people are not likely to try hard on a task, unless a poor performance would not pose a further threat to their self-esteem. (Author)

Identifiers—*Michigan
The purpose of this monograph, the second in a series, is to explore the current problems, needs and concerns in rehabilitation program evaluation in Michigan. The analysis of the program and financial plans submitted by each state rehabilitation agency focuses the discussion on the following topics: (1) articulation of agency goals and objectives through a continuous needs assessment; (2) development of linkages between state agencies and the Rehabilitation Services Administration to increase information dissemination and utilization; (3) presentation of evaluation information to decision-makers without undue delay; (4) recognition of the political context within which evaluation occurs; and (5) development of a comprehensive, competency-based client-outcome evaluation strategy. The contributions of each area provide a different perspective for the identification of state agency goals and objectives. (BN)

Law Enforcement Education in the Middle Grades: Police Student Relations.
National Association of School Counselors, Washington, D.C.; National Education Association, Washington, D.C.
Pub Date—78
Note—91p.; Some pages may be marginally legible due to small print
Pub Type— Reports - Descriptive (141) — Guides - Classroom - Teacher (052)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors—*Community Problems, Decision Making, *Delinquency Prevention, Junior High School Students, *Law Enforcement, Police, *Police School Relationship, Secondary Education
This booklet describes the Police/Student Relations (PSR) project, which is a new approach to delinquency prevention. The method which is outlined used parts of familiar program plans, but takes advantage of natural abilities and characteristics which allow children to continue functioning in a healthy way, changing their attitudes before they become involved in the juvenile justice system. After describing the program, the booklet devotes a whole chapter to explaining why this project is effective where so many others have failed. Research results of the PSR are reported, and instructions are given for ways to start such a program in a new neighborhood. Finally, a list of problems the teacher might do well to anticipate is presented. Samples and excerpts from the PSR instructional materials are included in the appendix. (Author/BP)

This learning activities package is designed to allow students to do self-concept activities on their own without any outside pressures. Each activity is a separate exercise which may be used as follow-up to a major group activity or a complete activity on its own. A wide range of exercise types is supplied, including self-evaluation questionnaires, activities to help students recognize and deal with fears, and feelings delineation questionnaires. The activities are designed for grades three through six but can be modified for lower grades. Additional information and advice on conducting and evaluating these activities is provided for teachers. (Author/PK)

Identifiers—National Diffusion Network Programs
The assumption that self-concept can be taught and is, therefore, a legitimate educational objective underlies this package of teacher activities. The package offers elementary school teachers multiple self-concept exercises, and the techniques and procedures for their implementation in the classroom. The specific purpose of each exercise is stated. Positive classroom communications and stronger individual and group self-awareness are emphasized in the activities. While the goals of the activities vary, their overall purpose is to enhance peer expression of self-concept–of how a student feels about himself and those around him. The teacher's awareness of his or her own important role in the child's life is also an essential goal of these exercises. A bibliography is included. (Author/PK)

ED 167 905 CG 013 309

Identifiers—National Diffusion Network Programs
Designed for teachers who want to involve their students with value clarification and decision making in the classroom, this activity packet contains materials to help get students thinking about their values. The teacher's role and responsibility in the valuing process is emphasized. For successful values clarification activities, teachers are encouraged to promote a class atmosphere of trust, respect and acceptance, and to choose value-rich areas that are appropriate for the grade level of the students. Some "do's" and "dont's" for using the educational approach are highlighted. The use of a personal or values journal for each student to record his or her feelings and thoughts is strongly encouraged. The activities include values continuums and forced-choice grids and ladders. (Author/PK)

Identifiers—National Diffusion Network Programs
This teacher activity package deals with the process of decision making in children. It assumes that fundamental to decision making is an awareness of one's own opportunity to make decisions as well as an understanding of the process itself. It also assumes that children can be helped, by teachers and other influential persons, to see and accept the probable consequences of their choices. The objectives of the decision making activities included in this package are to stimulate students' awareness of their decision making opportunities, to provide students some decision making opportunities, and to facilitate students' understanding of the process of decision making. The purpose and procedure of each exercise is provided for the teacher's use. The activities include role playing situations, decision making stories, and questionnaires. Some activities deal with questions concerning the use of drugs and alcohol. (Author/PK)

Descriptors—*Decision Making Skills, *Drug Abuse, *Drug Education, Elementary Education, Elementary School Students, *Student Attitudes
Identifiers—National Diffusion Network Programs
This drug information package contains factual materials for the teacher to use with primary and intermediate students. But the total program emphasizes using the factual materials in conjunction with having students learn more about themselves, their values, and how to make decisions. The activities are geared toward several essential areas of drug prevention education: making the child understand what constitutes a drug and how drug abuse is defined; classifying household medicines; and understanding the different effects of major drugs. Charts on different drugs, their uses and effects, are provided for the teacher. Several activities are designed to help the student understand the influence that advertising and the media have on public drug consumption. The overall design of the activities, however, is to promote the proper use of drugs by the students, and to help them consider for themselves the propriety of using or abusing drugs. (PK)

Women: Marriage, Career, and Job Satisfaction.
Spons Agency—College Placement Council, Bethlehem, Pa.
Pub Date—78
Note—19p.
Pub Type— Reports - Research (143)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors—*Career Choice, Child Care, *Employment Patterns, Family Relationship, *Females, Higher Education, *Job Satisfaction, Marital Status, *Marriage, *Occupational Choice
Marriage, childbearing, and employment patterns of women initially surveyed during their entrance to college in 1961 and subsequently surveyed in 1965, 1971, and 1974-5 were investigated. Subjects were questioned on marital status, number and timing of children in the family, employment patterns and shifts, job search patterns, preferred housework and employment activities, and, where applicable, reasons for not working. Results indicate that: (1) being married was associated with relatively high job satisfaction; (2) less than 33% of the married women and over 80% of the single women were employed full-time; (3) employed married women were more career-and achievement-oriented and reported higher levels of intellectual and social self-confidence than unemployed married women; and (4) only a small minority of married women indicated that marriage was an obstacle to their current employment. This annotated bibliography contains 11 documents that describe, analyze and recommend procedures for investigating and prosecuting rape cases. The documents are grouped according to intended audience; there are four volumes for police, three for prosecutors, and one for victims. Also listed are a book analyzing legal issues; a literature review and annotated bibliography of 152 readily available documents; and a final project report. These documents resulted from a research project involving data collected from police and prosecutors, rape programs, rape victims, offenders, and criminal justice professionals. Information is included for borrowing or purchasing the documents (in paper copies or microfiche) from the Government Printing Office. (Author/BP)

Descriptors—*Academic Achievement, Adjustment (to Environment), *Educational Experience, *Environmental Influences, Followup Studies, Higher Education, Secondary Education, Secondary School Students, *Self Concept, *Socioeconomic Influences, *Student Development
The socioeconomic consequences of qualitative variations in educational experiences are evaluated for a sample of young adult males (N=525) who were first surveyed in 1955 as high school sophomores and followed up in 1970. Models of institutional influence and of within-school processes are developed for both secondary and post-secondary education to integrate and refine the literature on school effects and returns to schooling.

Rather large occupational status and earnings differentials are associated with gross school-to-school differences and with qualitative differences in educational experiences within institutions. Secondary school characteristics and experiences weigh particularly upon the market outcomes of youth who terminated formal schooling at high school graduation. The use of traditional quantitative indices of schooling (such as years of school completed or certification levels) in assessing the market consequences of investments in education needs to be supplemented by information on qualitative variations in educational experiences. Additionally, the likelihood that school experiences may have quite different implications for selected target populations deserves further consideration. The simplistic assumption implicit in much of the school effects literature that institutional effects are homogeneous may actually mask quite important consequences for certain students. (Author)

Experimental Research on Social Perceptions of Rape Victims: A Review and Critique.
Pub Date—78
Note—6p.; Paper presented at the Annual Convention of the American Psychological Association (86th, Toronto, Ontario, Canada, August, 1978)
Pub Type— Speeches/Meeting Papers (150) — Information Analysis (070)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Attribution Theory, *Crime, *Evaluation Methods, Females, *Perception, *Rape, *Research Methodology, Sex Differences, Social Attitudes
Experimental research on social perceptions of rape victims has been conducted within the framework of two different models. The first, a naive observer model, is oriented toward how the average person perceives a rape victim and how her character and aspects of her behavior affect these perceptions. The second, a jury process model, is directed toward how these same factors affect decisions reached by a jury in a rape trial. Results suggest that the attempt to follow both of these models in a single experiment, often a common practice, yields ambiguous results. (Author)

Recognition Memory for Male and Female Faces.
Spons Agency—National Research Council of Canada, Ottawa (Ontario).
Pub Date—78
Note—14p.; Paper presented at the Annual Convention of the American Psychological Association (86th, Toronto, Ontario, Canada, August, 1978)
Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Adults, Attribution Theory, *Cognitive Processes, *Information Processing, *Memory, Motivation, *Recognition, *Self Concept, *Sex Differences
Sex differences in memory for human faces is reviewed. It is found that research evidence to date is not conclusive, but where differences exist they favor female superiority over males in facial memory. In particular, evidence is cited to suggest that females are reliably superior to males in their recognition memory for other females. This is explained in terms of attribution theory and motivational differences between the sexes. The argument is made that theoretical explanations of memory for faces are insufficient if they rely solely on traditional information-processing models without including and accounting for differences in self-awareness. The paper concludes with a description of a recent study on recognition memory of photographs of subjects' own faces in which females prove superior to males in recognizing projections of their real self, their most sociable self, their most intelligent self, and their most trustworthy self. The Motherhood Inventory: A Questionnaire for Studying Attitudes Toward Motherhood.
Pub Date—Aug 78
Note—19p.; Paper presented at the Annual Convention of the American Psychological Association (86th, Toronto, Ontario, Canada, August, 1978)
Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—College Students, Educational Experience, *Mothers, Rating Scales, *Religious Factors, Role Conflict, *Sex Differences, *Social Attitudes
Identifiers—*Attitudes Toward Women Scale, *Motherhood Inventory
The Motherhood Inventory (MI) is a 40-item questionnaire developed to study attitudes toward motherhood and the motherhood myth. It includes items related to the control of reproduction, abortion, adoption, single motherhood, male-female relationships, and idealized and punitive attitudes toward mothers. The MI was investigated using 301 subjects drawn largely from undergraduate and graduate students at an Eastern Catholic University and their parents. Comparisons with scores on the Spence-Helmreich Attitudes toward Women Scale (AWS) revealed that the sample was more liberal than the original AWS sample. Men held significantly more traditional attitudes toward motherhood than women. Younger subjects also agreed more with the myth of motherhood. Catholics more than non-Catholics rejected abortion and supported the primacy of the woman's role as mother. Education produced the most pronounced effect on attitudes toward motherhood, with college graduates holding more liberal attitudes. (HLM)

Implications of a Need-Press-Competence Model for Institutionalized Elderly.
Spons Agency—Administration on Aging (DHEW), Washington, D.C.
Pub Date—Aug 78
Grant—HEW-90-A-520/01
Note—11p.; Paper presented at the Annual Convention of the American Psychological Association (86th, Toronto, Ontario, Canada, August, 1978)
Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Environmental Influences, *Individual Needs, *Institutionalized Persons, *Interpersonal Competence, Intervention, Nursing Homes, *Older Adults, *Participant Satisfaction
The predictive utility of a proposed need-press competence (NPC) model of satisfaction was compared with that of the traditional need-press fit model. Structured interviews with 30 residents from two nursing homes provided measures of needs, press, competence, and satisfaction. The NPC model was a better predictor of expressed satisfaction than the need-press model, and the potential for need satisfaction was a more important correlate of expressed satisfaction than person-environment fit. Results also indicated that continued efforts to increase the press and competence levels in nursing homes would be helpful, particularly along those dimensions where need press competence analyses suggest that need satisfaction will be most problematic. Verbal Behavior Patterns of Teachers in Integrated Classrooms.
Pub Date—Aug 78
Note—28p.; Paper presented at the Annual Convention of the American Psychological Association (86th, Toronto, Ontario, Canada, August, 1978)
Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—*Behavior Patterns, Classroom Research, Elementary Secondary Education, Inservice Education, Interaction Process Analysis, *Racial Differences, School Integration, Sex Differences, *Student Teacher Relationship, Systems Approach, *Teacher Behavior, Teachers, *Verbal Communication
Identifiers—*Brophy Good Dyadic Interaction System
As part of the desegregation plan in the City of Detroit, teachers in recently desegregated schools participated in an inservice program to provide for equal instructional opportunity in the involved classrooms. Teacher-student interaction data were collected in each teacher's classroom using the Brophy-Good System. These data were transformed to produce a rate of interaction per 10 minutes per 25 students. The results of this study indicated that: (1) Black students and males received a greater rate of

the classroom interactions than did white students or females; (2) white teachers had a higher rate of interaction than Black teachers; (3) female teachers had a higher rate of instructional activity than male teachers; (4) both male and female teachers acted in very similar ways with male and female students; and (5) there exists the possibility of a "cross race" effect such that Black students of white teachers and white students of Black teachers receive more of the classroom interactions. Note—77p.; Appendices C,D,E,H,I not filmed due to copyright

Pub Type— Reports - Research (143)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Accreditation (Institutions), *Counselor Certification, *Counselor Qualifications, Counselor Role, *Credentials, Graduate Students, Higher Education, *Professional Services, State Licensing Boards, *Student Attitudes

A movement in many states proposes licensing those that wish to identify themselves as professional counselors. In attempting to pass licensing legislation, however, the question of support becomes a critical one. In order to survey the attitudes of a group of Human Development Counseling (HDC) graduate students, licensure, program accreditation and professional identity were put to a sample group. Results indicate strong support for credentialed counselor and licensure. HDC students also indicated the need for stronger role definition for counselors and the need for a philosophical base from which to work. The survey questionnaire, reports from the APGA and an annotated bibliography of ERIC search results are included in the appendices. (PK)

Descriptors—Genetics, Intelligence, *Intelligence Quotient, *Private Schools, *Public School Teachers, *Teacher Attitudes, Teacher Background, Teachers

Research was conducted to assess teacher attitudes towards genetic I.Q. and to ascertain the extent of the teachers' knowledge of their students' I.Q. scores. Teacher attitudes were assessed via a 20-item questionnaire administered to 225 private and public school teachers in the southeast and northeast. Findings revealed that private shcool teachers were more likely to profess a belief in genetic I.Q. than public school teachers, and older teachers professed a stronger belief in genetic I.Q. than younger teachers. Self-Awareness, Self-Consciousness, and Reactance.

Pub Date—78

Note—4p.; Paper presented at the Annual Convention of the American Psychological Association (Toronto, Ontario, Canada, August 1978)

Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Affective Tests, *Attention Control, *Changing Attitudes, Communication (Thought Transfer), *Psychological Patterns, *Reactive Behavior, Self Evaluation

Research was undertaken to test the hypothesis that reactance-based responses are facilitated by self-focused attention. (Psychological reactance has been defined as a motivational state that occurs when a person perceives that his or her freedom has been threatened in some way.) In addition, these studies served as further tests of the predictive similarity of manipulated self-assurance and dispositional self-consciousness. The research utilized the following reactance paradigm: Subjects' initial attitudes toward a favorably portrayed candidate were measured; subjects then received a pervasive communication in support of the candidate that either was or was not coercive in its wording; finally, subjects' attitudes toward the candidate were reassessed. Reactance was defined in this situation as resistence to the persuasion attempt. Three sequential studies were carried out. Results were consistent with previous data indicating that self-attention increases awareness of transient affective states. Findings also further broaden the data base indicating that manipulated self-awareness and dispositional self-consciousness are quite comparable psychological states. (Author)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—*Counselor Role, *Foreign Culture, *Guidance Services, International Programs, Overseas Employment, *Student Exchange Programs, *Study Abroad, *Youth Problems

Designed as a guide for administrators who must perform or organize guidance tasks in an overseas school without a counselor, this book is also useful for the professional counselor who seeks to function in an expanded role in an overseas setting. Its purpose is to provide sources of information and ideas for solving guidance-related problems in overseas schools, and to help provide answers to the unique questions asked of counselors abroad. Much of the resource information contained in this guide refers to Europe. This is because many U.S. students choose to study in Europe, and many American schools are located there. Other information, concerning entrance requirements to foreign universities, school directions, health and legal matters and professional sources of support for teachers, counselors and students, is also provided. A lengthy appendix includes several articles on studying abroad, sample school profiles, and further recommended readings. (Author/PK)

Descriptors—*Clinics, *Counseling Effectiveness, *Drug Abuse, *Drug Therapy, *Evaluation Methods, Followup Studies, Patients (Persons), Program Evaluation, *Therapeutic Environment

Identifiers—*Methadone Maintenance Treatment

A series of followup investigations exploring the impact of methadone maintenance treatment, methadone detoxification treatment, therapeutic communities, and outpatient drug-free treatment for the drug abuser was conducted. Limitations of these modalities were revealed in the followup studies. Implications for treatment and policy include: (1) methadone detoxofication as a short-term program is a relatively ineffective treatment technique, but the longer a client remains in treatment, the more likely it is there will be a positive outcome; (2) procedures of intake should make the alternatives available to clients clear to them at time of entry; and (3) aggressive client followup which makes continuing care available to the client at time of exit from the program helps to ensure the client's successful integration into the community. Descriptors—Correctional Rehabilitation, *Counseling Effectiveness, Counselor Characteristics, Criminals, *Crisis Therapy, Inner City, *Intervention, *Prisoners, Probationary Period, *Recidivism, *Rehabilitation Counseling

Identifiers—*Crisis Intervention, *Reentry

The ex-con's return home can be viewed as a potential crisis, wherein attempts to assist him in a successful transition can be helpful. From a group of first felonists about to be released on parole, 18 matched pairs were identified. One member of each pair was randomly selected and offered intensive outreach crisis counseling; the second member of each pair became a control subject. Although small, consistent negative findings were observed, data analysis suggests that positive outcomes were associated with counseling of poorer quality. It appears likely, however, that much of the counseling was of too poor a quality to be an important factor in the client's adjustment. Reasons for this low level of service include overestimation of the ex-con's "re-entry crisis," the unique difficulties inherent in outreach counseling, counselor inexperience and inadequate program funding. Intensive crisis counseling, with certain modifications in method, could be an effective means of reducing recidivism among recently released convicts. A new theoretical conception of crisis suggests that the person in crisis must also be in a state of "searching" for crisis intervention to have its special impact. (Author)

Identifiers—Information Analysis Products

A procedure for determining the effectiveness of counseling programs is suggested in this monograph. Since the procedure is systematic and two-pronged–process and outcome evaluation–it provides information as to the degree of program

effectiveness and/or ineffectiveness. A self-correcting system, the procedure's progressive steps illuminate possible errors or ambiguities in previous steps, making it possible to modify the procedures while the evaluation is in process and thus avoid costly problems. The paper also describes evaluation problems and suggests what to do when they arise, and presents a section of recommendations for counselors, supervisors, counselor educators, program developers, and educational researchers. This monograph examines the content and quality of counselor education programs and activities in both preservice and inservice training. It describes selected preservice programs and discussed the components that make them effective. It then presents various theoretical training models, with recommendations for innovative techniques that counselor educators might wish to include in their own programs. Inservice training approaches are similarly investigated, including specific discussion of the use of on-staff personnel, outside consultants, and outside experiences. A final section offers suggestions to service deliverers for ways to coordinate their professional efforts so as to improve the quality of their services. (Author)

This workshop booklet explains to parents a program on human sexuality for high school students selected as peer counselors. Preliminary student and faculty surveys, a school board presentation explaining the need for the program, and parent materials preface the actual program contents. The course materials included cover values clarification, advisor role-playing, and a joint parent-child sexual mythology quiz. The book closes with a seminar evaluation questionnaire and a list of local resources. Data for preliminary surveys and evaluation are not included. The introduction emphasizes that throughout the program's two years of operation, the importance of parental understanding and support was stressed. (LJS)

Identifiers—*Project ADAPT
This program description and evaluation outlines the first year of operating ADAPT (Alternative Direction for Adjustment and Personal Training), an interdisciplinary four-hour daily approach to "total education" for behaviorally/emotionally handicapped high school students. It describes the program's curriculum, which provides a values orientation to the individually tailored academic, vocational, interpersonal, and field education courses. After describing the program's background, philosophy and purpose, the paper discusses: student identification and placement; staff characteristics; classroom management; parent participation; curriculum and class credits; counseling services for students, teachers, and families; and administrative considerations. The report favorably evaluates the program both subjectively and objectively. Subjectively, it surveys faculty, administrators, parents, and students; objectively, it compares data for attendance, suspensions, and disruptive incidents. (LJS)

This two-volume resource guide to the major employers of Indiana County, Pennsylvania, serves as a model for similar guides that could be replicated. The guidance staff of the local school district visited the firms and surveyed them on five points: (1) a description of the firm and the nature of its work; (2) training, other qualifications, and advancement; (3) employment outlook; (4) earnings and working conditions; and (5) other information of interest to the local school district students. Additional information in the appendices supplies a sample Pennsylvania state employment application and civil service performance evaluation report, and a community audit by the electric company provides a detailed regional labor market analysis with additional facts and civic data. Community-Oriented Mental Health Education.
Pub Date—[78]
Note—8p.
Pub Type— Guides - General (050)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Community Development, Educational Therapy, *Mental Health Programs, *Outreach Programs, Prevention, *Psychological Services, Rehabilitation, *Rural Clinics, Rural Population
Community-Oriented Mental Health Education is viewed as an economical and effective approach to the delivery of mental health services in rural areas. This review explores the issues in design and implementation of mental health education programs, with particular reference to the program developed in Madison County, New York. A descriptive summary of the variety of psychological education efforts (format, content, and target groups) in this county is provided. The community development aspects are examined, and the impact of psychological education on the existing system of mental health service delivery (particularly direct services) is considered. Suggestions are made for anticipating systematic changes. (Author)

Shoestring Adventures in Program Evaluation: A Model, Methods, Data, and Applications.
Pub Date—78
Note—25p.; Paper presented at the Annual Convention of the American Psychological Association (86th, Toronto, Ontario, Canada, August, 1978)
Pub Type— Speeches/Meeting Papers (150) — Guides - General (050)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Action Research, Clinical Psychology, Consultants, *Evaluation Methods, Human Services, *Mental Health Programs, Methods Research, Professional Training, *Program Evaluation
A model for program evaluation with pertinent data from a variety of methods applied in six settings is described. The settings include two university clinical psychology programs at Alabama and Kansas; the Memphis Internship Consortium; the University of Arkansas Student Development Center component of the Counseling Unit; and two county social service agencies, Benton and Washington counties in Arkansas. The evaluations of the clinical psychology training programs are described in some detail herein to augment (and antedate in methodology) the separate presentations of programs in the other four settings. The model format includes entree to setting, shared planning, participation in data collection by setting personnel, informal oral feedback with all setting participants, formal feedback between researcher and program, and a continuing relationship between researcher and program. The model encourages a continuity of relationship between researcher and program to stimulate shared involvement over time, increasing the likelihood that findings will have an effect upon future program practices. Methods include interviews with participants, group meetings with participants, stream of behavior accounts and occupancy counts of behavior settings, needs assessment data, time logs of activities and concurrent feelings of program participants, and questionnaire data. These methods separate persons and settings so that feedback of findings may be individualized, and personally relevant data as well as program relevant data may be provided to participants. This resource guide supplements catalog information on graduate programs in Family Studies. It also aids students in formulating their own program evaluation criteria. The guide summarizes the prospects for university Family Studies departments. Program descriptions cover four points: size and resources; admissions and requirements; theoretical and professional orientation; and faculty names and professional interests. Student survey results for each of the 51 American and Canadian programs are tabulated. This guide indicates how to obtain further information directly from each school. (LJS)

Descriptors—Administrative Personnel, *Employment Qualifications, Equal Opportunities (Jobs), *Evaluation Methods, Job Skills, Merit Rating Programs, Personnel Data, Personnel Directors, *Sex Discrimination, *Task Performance, *Working Women
Research examined in this review shows that when women and men perform the same acts or produce similar products, evaluations often differ, frequently in ways which are not consistent. In general, evaluation favors men over women when a competent performance is being assessed, while women are favored over men when an incompetent outcome is being evaluated. These findings are explained in terms of sex-role congruency. In addition, research on causal attributions of performance is reviewed. It is found that successful male performance tends to be seen as repeatable; attributions are made to stable and internal causes such as skill

and ability. It is further shown that repeated successful female performance cannot be depended upon, since attributions are made to luck, an external factor, or to effort, an unstable factor. Also, lack of ability is used to explain female lack of success more than male lack of success. Finally, the process of evaluating women's performance is summarized in three major steps: initial perception of performance, comparison of such perceptions to norms, and prediction of future performance. Some generalizations drawn from the literature on futurism are set forth in this monograph. Possible social and behavioral consequences of these as they relate to the work of the counselor are projected. The document then suggests some ways counselors can help clients to create rewarding personal futures, and describes a futures studies program for counselors, outlining what its emphases and outcomes should be. The conclusion raises three questions which the authors state must be answered clearly by all counselors if the profession is to survive in the future: (1) What is the primary mission of counselors?; (2) What is excellence?; and (3) How can counselors insure self-renewal? A short bibliography is included. (Author)

A specific rationale to support counselors as change agents and a model counselors can use to develop change agent strategies are presented in this program guide. It is based on the idea that counselors are in an excellent position for influencing change and, at the same time, improving their own situation. This package may be used by anyone interested in directing the process of change in virtually any setting. It includes detailed instructions for workshop facilitators that accompany the text and participant materials. Designed to be presented over a three-day period, the workshop demonstrates, through the participants' experiences, a seven-step, systematic, sequential process that has been widely tested with many audiences for a number of years. These steps are: (1) establish the need; (2) build interactive relationships; (3) assess the situation; (4) generate options; (5) decide upon a goal; (6) facilitate adoption and implementation; and (7) refine and renew. Exploration of Cognitive Structures Common to Both Language and Sensorimotor Modes of Behavior. Final Report.
Pub Date—Jan 78
Note—28p.; Report prepared at the University of California, Los Angeles; Not available in hard copy due to marginal legibility of original document; Best available copy
Pub Type— Reports - Research (143)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors—*Cognitive Processes, Communication (Thought Transfer), Elementary Education, *Language Development, *Language Learning Levels, *Language Research, Linguistics, Nonverbal Communication, Parent Child Relationship, *Perceptual Motor Learning, *Preschool Children, Preschool Education, Semantics
The three projects described in this paper were based on the intrinsic connection between language and the structure of perception and action. The first project explored the role of nonverbal frameworks in the development of communication between mother and child, beginning with the first word. It emphasized the role of the mother in the creation of the nonverbal context–action, objects, locations–that make early communication possible. The other projects investigated the relationship between the perception of information and semantic choice. One tested the role of information in semantic choice at the one-word stage (between one and two years of age), while the other explored the role of information at later stages of language development. Visual Processing Deficiencies in Poor Readers: A Critique of Traditional Conceptualizations of the Etiology of Dyslexia.
Pub Date—Aug 78
Note—56p.; Paper presented at the Annual Meeting of the International Reading Association World Congress on Reading (7th, Hamburg, West Germany, August 1-3, 1978)
Pub Type— Reports - Evaluative (142) — Speeches/Meeting Papers (150)
EDRS Price - MF01/PC03 Plus Postage.
Descriptors—*Dyslexia, Elementary Education, *Linguistic Difficulty (Inherent), *Reading Difficulty, *Reading Research
This discussion of dyslexia addresses the popular view that reading disability in children with dyslexia is caused by dysfunction in visual processing. Several visual deficit theories are presented and challenged. In addition, evidence for and against specific hypotheses is reviewed and evidence is presented that supports the likelihood that reading disability is caused either by deficiencies in one or more aspects of linguistic functioning or by a specific disorder in visual/verbal integration. Descriptors—*Decoding (Reading), *Linguistics, *Models, *Paralinguistics, Reading Ability, Reading Achievement, Reading Comprehension, *Reading Research, Research Problems, *Word Recognition
Noting the limitations of recent word recognition research, this paper suggests ways that these limitations might be overcome and then extends these suggestions into a framework for distinguishing between good and poor readers' ability to comprehend words. The paper begins by reviewing the major models of word recognition and discussing their limitations. It then proposes a new model that considers the social context of the reading act, its motivational context, the schema brought to the task by the reader, and the reader's range of strategies for operating within the framework of the linguistic context of a word, phrase, sentence, paragraph, or story. It concludes be defining good and poor readers in light of the new model. (FL)

Cognitive Development and Reading Processes. Developmental Program Report Number 76.
Michigan Univ., Ann Arbor. Dept. of Psychology.
Pub Date—[75]
Note—95p.
Pub Type— Opinion Papers (120) — Information Analysis (070)
EDRS Price - MF01/PC04 Plus Postage.
Descriptors—*Cognitive Development, *Cognitive Processes, *Memory, *Pattern Recognition, *Reading Processes, *Word Recognition
In discussing the relationship between cognitive development (perception, pattern recognition, and memory) and reading processes, this paper especially emphasizes developmental factors. After an overview of some issues that bear on how written language is processed, the paper presents a discussion of pattern recognition, including general pattern recognition models, perception of letter strings, and word recognition. This is followed by a discussion of memory, including functions of information storage, a rationale for discreteness of storage mechanisms, and levels of information storage. A section on sensory information storage discusses iconic memory, development and iconic memory, information scanning in iconic memory, and data- and resource-limited processing. A section on precategorical storage includes methodological problems; echoic memory; precategorical acoustic storage; and development, precategorical storage, and reading. The section on short-term memory discusses the general nature of short-term memory, language processing, and development and short-term memory. (TJ)

Descriptors—Association (Psychological), Associative Learning, *Cognitive Processes, *Comprehension, *Figurative Language, *Metaphors, Reading Comprehension, Reading Research, *Semantics

Defining metaphor as "seeing a concept from one class in terms of a concept from another class," a study was devised that analyzed the degree to which two concepts occupy dissimilar positions with respect to their category or domain (within-domain distance), and the degree to which categories themselves are dissimilar (between-domain distance). Preliminary to the study, nine groups of subjects rated the distances among stimuli from eight domains as a basis for two experiments. In the first experiment, one group of subjects rated the aptness of 64 metaphors while another group rated the comprehensibility of the same metaphors. Aptness related positively to between-domain distance and negatively to within-domain distance, but showed no relationship to overall distance. Comprehensibility related strongly to aptness. In the second experiment, subjects ranked a set of alternatives as possible completions of metaphors. In one group, all of the possible completions were from a single domain; in the other group, all were from different domains. In both groups the rank order of the within-domain distances of a set of alternatives correlated with the relative popularity of the alternatives. The overall results of the study consistently supported a domains-interaction view of metaphor. (Tables are appended.) (Author/MAI)

Schofield, Hilary L. Start, K. B.
Attitudes towards Reading and the Teaching of Reading in Final Year Student Teachers.
Pub Date—77
Note—26p.; Paper presented at the Annual Meeting of the Australian Reading Conference (3rd, Melbourne, Australia, August 28-31, 1977)
Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Elementary Education, *Measurement Techniques, *Reading Achievement, *Reading Research, Self Concept, *Student Teachers, *Teacher Attitudes, Teacher Characteristics, *Test Construction
Identifiers—*Reading Attitudes

An instrument for measuring teacher attitudes toward reading and the teaching of reading and for relating reading attitudes and achievement within teachers was constructed with 15 concepts measured on ten scales. In 1974, the instrument and a reading achievement test were administered to 317 final-year elementary school student teachers in five teachers' colleges. In 1976, the same instruments were administered again, this time to 289 final-year elementary school student teachers in two colleges. In general, the 1976 study confirmed the 1974 findings. Specifically, the results showed the following: the relationship between reading attitude and achievement within teachers did not appear to be strong; positive attitudes toward teaching reading appeared to be unrelated to reading achievement; attitudes associated with positive valuations of reading, the teaching of reading, and literature were linked together; female teachers showed both higher achievement and more favorable reading attitudes than did males; self-concept appeared to be unrelated to reading achievement, but teachers with higher self-concepts appeared to have more favorable attitudes toward their own reading, the teaching of reading, and the pupil than did teachers with lower self-esteem; and personal adjustment appeared positively related to positive valuations of reading and the teaching of reading in both sexes. (FL)

Identifiers—*Schemata, *Schema Theory

Recent studies on schema theory and other concepts related to reading comprehension are discussed in this paper. Noting that the psycholinguistic model of reading views reading as a process of predicting meaning based on the reader's prior knowledge of language, the paper describes recent research that has led to a definition of reading comprehension that considers linguistic competencies, syntactic and semantic knowledge, and factors related to the printed page and to the reading environment. It then examines the characteristics of schemata, which represent generic concepts that are stored in memory, and explains how schema theory provides the concepts for explaining how readers interact with texts to interpret and comprehend. It provides examples to show how readers call upon schemata in reading and points out that in schema theory bottom up and top down processing of input occur simultaneously. Finally, the paper shows how schema theory points up the importance of such instructional methods as assisting students to relate new concepts to those already known, assisting them in setting up the dominant structure for comprehending a text, developing vocabulary concepts, and developing effective question/answer relationships. Reading for the "Non-Titled" Underachiever: A Holistic Approach.
Pub Date—Nov 78
Note—18p.; Paper presented at the Annual Meeting of the California Reading Association (12th, San Francisco, California, November 9-11, 1978)
Pub Type— Guides - Classroom - Teacher (052) — Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Communication Skills, Content Reading, *Directed Reading Activity, *Language Arts, Literature Appreciation, *Reading Instruction, Secondary Education, *Teaching Techniques, *Underachievers
Identifiers—*Holistic Approach

A holistic approach to teaching reading can assist the underachieving student. The holistic approach includes each of the communication arts in teaching strategies: listening, writing, reading, and oral language (speaking), each of which interacts with the content area. By using the student's own natural abilities to predict, confirm, comprehend, and self-correct in developing teaching strategies within the communication arts in the content area, the teacher can provide a holistic learning experience. (Two demonstration lessons are provided indicating specific steps for the teacher to take and what communication arts and natural abilities are to be utilized. One begins with graphics; the other includes a directed reading activity.) (TJ)

EDRS Price - MF01/PC10 Plus Postage.
Descriptors—*Case Studies, *Clinical Diagnosis, Elementary Secondary Education, *Reading Diagnosis, *Reading Difficulty, *Reading Research

The objectives of the Clinical Information Processes in Reading Project (CLIPIR) were to create simulated cases of reading difficulty, observe experienced reading diagnosticians as they interacted with those cases, and analyze the protocols of their proceedings. Cases were designed to represent commonly encountered reading difficulties. By observing clinicians diagnosing the cases, it was possible to identify how they gathered and interpreted the available information. After the protocols were analyzed, it was concluded that most clinicians base their diagnoses on a relatively small number of cues; that they entertain their first hypotheses very early in the session; and that despite variability in number of cues requested and amount of total elapsed time, clinicians ultimately identify correctly subjects' major difficulties. (Verbatim transcripts of observational and debriefing sessions are included.) (Author/TJ)

Perceived Problems of Teachers of Reading: Fact and Paradox.
Pub Date—[75]
Note—66p.; Study prepared at Ohio State University
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC03 Plus Postage.
Descriptors—Curriculum Evaluation, *Educational Problems, Elementary Secondary Education, *Needs Assessment, *Reading Instruction, Reading Processes, *Reading Research, Research Methodology, *Teacher Attitudes, Teacher Morale, Teaching Conditions

Responses from 528 reading teachers to two scales, one indicating the extent to which they perceived a problem as occurring frequently in their classrooms and the other indicating the extent to which they perceived a problem as bothersome, were factor analyzed. Eleven "frequency" and ten "bothersome" factors emerged from the analysis. Among the problems seen by educators to be either difficult to resolve or occurring with noticeable frequency were invigorating student interest in reading, achieving a sense of professional worth, and building skills in reading comprehension. The factors emerging from the analysis also revealed interesting assumptions and convictions about teaching, the reading process, learning, and curriculum. Several factors revealed a deep sense of frustration and a desire to improve and grow professionally, while others reflected an unusually narrow conception of curriculum. (Six tables of data are included.) (Author/FL)

Descriptors—Elementary Education, *Enrichment Programs, *Industrial Arts, Interdisciplinary Approach, Learning Laboratories, *Printing, *Program Evaluation, *Reading Achievement, *Reading Research, Writing Skills
Identifiers—*Book Production
To determine whether attendance at and time spent in industrial arts publishing activity centers effect gains in reading achievement, a study covering three years and involving more than 1,500 students in six elementary schools in New York City was undertaken. Data collected for each student included reading achievement test scores, number of minutes spent and times in attendance at the centers each year, ethnic group, sex, grade level, and mobility. Analysis of the data showed that publishing activity center programs had no statistically significant effect on reading achievement during their first year of operation, but that exposure to the centers had a positive effect on reading achievement scores across grade levels and schools during the second year of program operation and thereafter. Individual student test score gains were directly proportional to the hours spent in the centers. (Six appendixes contain descriptions of data collected, tables showing means and standard deviations of reading achievement scores, tables of the number of times and minutes of attendance at the centers, a description and the results of the multiple linear regression analysis procedure used, copies of the data collection instruments, and the interview schedule used by the paraprofessionals who directed the programs.) Speed Listening and Reading.
Pub Date—Oct 78
Note—34p.; Paper presented at the Annual Meeting of the Great Lakes Regional Conference of the International Reading Association (3rd, Cincinnati, Ohio, October 12-14, 1978)
Pub Type— Speeches/Meeting Papers (150) — Opinion Papers (120) — Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Audiotape Recordings, Content Reading, Elementary Education, Intelligence, Listening, *Listening Comprehension, *Reading Comprehension, *Reading Instruction, Reading Processes, *Reading Research, *Speech Compression, Speed Reading, *Teaching Methods
Compressed speech (speed listening), in which audiotapes are speeded up, is examined in this paper along with its relationship to the reading process. Among the topics discussed first are the close relationship between reading and listening, the rationale behind compressed speech, and the use of compressed speech in business communication, special education, and reading instruction. Results of recent relevant research are then reported; the research includes the development of a test to evaluate the listening comprehension of pupils in grades four through eight; an examination of the relationship between listening comprehension, reading comprehension, and intelligence; the administration of listening tests at each of six different speeds; and the experimental use of the compressed speech technique in grades four through eight in the areas of social studies, science, and English literature. The results, reported in narrative and tabular form, suggest that children generally learn as well by listening as by reading, that there is a significant relationship between speed of reading and of listening, that teachers are enthusiastic about the compressed speech technique after using it, and that the use of the auditory mode along with the visual mode shows promise for helping students with learning problems. Ethnographic Research in the Reading Class.
Pub Date—78
Note—15p.; Paper presented at the Annual Meeting of the National Reading Conference (28th, St. Petersburg Beach, Florida, November 30-December 2, 1978) ; Best copy available
Pub Type— Speeches/Meeting Papers (150) — Guides - General (050) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Classroom Observation Techniques, *Classroom Research, *Data Collection, *Ethnography, *Reading Instruction, Reading Research, *Research Problems, Student Behavior, Student Teacher Relationship, Tape Recordings
Ethnographic research in reading examines process more than outcomes of instruction, considers environmental factors, and studies the behavior of individual learners. There are few descriptive studies in reading to guide researchers in ethnographic research. Some aspects of planning such a study include gaining permission from school administrators and teachers to enter the classroom over a period of time, seeking the teacher's agreement on the frequency and duration of visits, assessing whether two or more children can be observed, adopting a system of recording, developing a consistent system of transcribing data so that verbal and nonverbal aspects of communication are recorded, and evolving a theoretical framework to analyze the data. Some problem areas in this type of research may include difficulties in recording interactions, having the principal researcher in the classroom during much of the recording, and expense. Some of the benefits of this type of research are that it ends the separation of the researcher from the classroom, it serves as a bridge between the theory and practice of reading, and it may add new interest and skill to the teacher's work. (Charts with suggestions for recording data are included.) (TJ)

Thirty-six fourth grade pupils were grouped according to reading ability in a study conducted to examine comprehension within the framework of event perception. The children were presented a sequential activity described in picture or text form and then were asked to indicate on scoring sheets which of eight test items logically fit with the event sequences presented. Four of the test items were from the original event sequence, two were "new" but a part of the original sequence, and two were "new" but inconsistent with the event sequences. After testing, informal interviews were conducted with the students to determine their rationale for decision making. Analysis of the results indicated that good readers were more accurate in identifying old test items as logically belonging with the event sequences than were poor readers, but that no ability effect was present for responses to new items. In addition, students appeared to be less accurate in identifying inconsistent pictures than inconsistent sentences. A follow-up investigation with good readers indicated that pictures seemed more subject to ambiguous interpretation than text, but more so when they appeared as recognition test stimuli than as presentation stimuli. Fixations, Memory, and Implications for Classroom Reading Instruction.
Pub Date—Sep 78
Note—15p.; Paper presented at the Annual Meeting of the Reading Association of Ireland (3rd, Dublin, Ireland, September 1978)
Pub Type— Information Analysis (070) — Speeches/Meeting Papers (150) — Guides - General (050)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Cognitive Processes, *Eye Fixations, *Eye Movements, Eye Voice Span, *Memory, Oral Reading, *Reading Instruction, *Reading Research, Reading Skills, Semantics, Visual Perception
Designed to assist educators in making a more knowledgeable selection of reading methods and techniques, this paper integrates the findings of eye processing research with classroom reading practices. Following a review of eye movement and visual processing research, the paper presents a discussion of research on the process by which a reader acquires information during a fixation pause. Next, research on the influence of grammatical structure upon eye movement, eye/voice span, and sentence-level memory processing is discussed. The paper concludes with a discussion of the implications this research holds for instruction at the graphophonemic, syntactic, and semantic levels. (FL)

Reading/Language Arts Support Personnel Handbook.
Compton City Schools, Calif.
Pub Date—[78]
Note—280p.; Not available in hard copy due to marginal legibility of original document
Pub Type— Guides - Classroom - Teacher (052) — Tests/Questionnaires 160)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors—Behavioral Objectives, Elementary Secondary Education, Inservice Teacher Education, *Language Arts, *Program Development, Program Evaluation, Readability, Reading Centers, Reading Consultants, Reading Diagnosis, *Reading Instruction, *Reading Programs, Reading Tests, Self Evaluation, Sequential Approach, Skill Development, Student Evaluation, Teacher Role
This handbook was designed to assist reading/language arts support personnel in developing a sequential, developmental program suited to each child's needs. The first of the book's five major sections outlines the procedures for establishing a successful program and discusses such factors as how to create the working environment, schedule time, choose materials, and make a master calendar and timeline. The second section defines the roles of the reading consultant, principal, classroom teacher, content area teacher, and instructional aide. The next section describes the utilization of diagnostic techniques in reading, offers examples of reading skills measures, and explains how to measure readability. The fourth section describes the behavioral goals of the prescriptive reading skills center and explains how to establish one. It also offers instructions for planning inservice programs. The final section offers criteria and a checklist for evaluating the reading program, presents a guide to standardized reading tests, discusses the misuse of reading diagnosis tests, and offers illustrations of various reading skills instruments. Five appendixes contain materials and forms for use in a reading program. (FL)

The Constraints of Orthography on Reading Miscues.
Spons Agency—Initial Teaching Alphabet Foundation, Hempstead, N.Y.; Kean Coll. of New Jersey, Union.
Pub Date—Oct 78
Note—17p.; Paper presented at the Annual Meeting of the College Reading Association (22nd, Washington, D.C., October 10-21, 1978; Best copy available
Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Cognitive Processes, Elementary Education, *Initial Teaching Alphabet, *Miscue Analysis, *Orthographic Symbols, *Reading Research
A study of the constraints on word recognition errors (miscues) readers make when reading a passage printed conventionally and one printed in a regularized orthography such as the initial teaching alphabet (i.t.a.) was undertaken with 50 second-grade students divided equally between children taught according to the orthographies being studied. The passage was deliberately created to set up wrong predictions and to cause readers to consciously confirm these predictions before they con-

tinued reading. The students read the selection aloud, and miscues were recorded including pauses, insertions, omissions, substitutions, repetitions, self-corrections, and mispronunciations. The students were asked questions related to comprehension after they finished reading. It was found that the i.t.a. sample had significantly fewer miscues thought to be produced by content and syntax than the conventional alphabet sample. Comprehension was also significantly higher among i.t.a. students. (TJ)

The Effect of a Language-Based Reading Approach upon the Reading Strategies of First Grade Children.
Pub Date—78
Note—304p.; Ph.D. Dissertation, Pacific States University; Several Appendixes and Figure 7 were removed due to copyright restrictions or poor reproducibility; Best copy available
Pub Type— Dissertations/Thesis (040) — Reports - Research (143)
EDRS Price - MF01/PC13 Plus Postage.
Descriptors—Beginning Reading, Grade 1, Language Development, *Language Experience Approach, Miscue Analysis, Primary Education, *Reading Achievement, Reading Comprehension, *Reading Instruction, *Reading Research, Student Attitudes, *Teaching Methods
Identifiers—*Reading Strategies
The effects of a language-based reading approach on the reading strategies of first grade children were examined in a study involving a total of 40 children. Half of the students were placed in an experimental group that was exposed to the language-based reading approach, and half were placed in a control group that was taught to read by a conventional method. At the end of the first-grade year, reading tests were administered to the children. Scores from the tests were used to evaluate their word recognition, comprehension, and accuracy. Their oral reading was audiotaped so that miscues could be analyzed, and the effect the beginning reading approach had upon attitude to and concept of reading was also measured. The results revealed that the experimental group achieved at a higher level on word recognition than did the control group; however, there was no difference between the groups in attitude to and concept of reading. Both groups produced miscues that indicated that sound/graphic relationships were high, while the experimental group produced a higher percentage of miscues with identical grammatical function and strength of grammatical relationship and with "no loss" in comprehension and retelling than did the control group. Finally, the experimental group showed a significantly more effective use of reading strategies than did the control group. (FL)

The Development of Reading Skills in Hearing-Impaired Children.
Pub Date—78
Note—18p.; Paper presented at the Annual Meeting of the National Reading Conference (28th, St. Petersburg Beach, Florida, November 30-December 2, 1978)
Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Aurally Handicapped, Elementary Education, *Language Development, Phonics, *Reading Difficulty, *Reading Instruction, *Reading Research, *Reading Skills, Speech Skills, Total Communication
Six primary and six intermediate grade students were involved in a study designed to describe the learning strengths and weaknesses of hearing-impaired children and the reading skills developed by them in the course of basal reading instruction. Because of the special communication problems involved in gathering data, an interdisciplinary team approach was used. The team included a reading consultant, an educational consultant specializing in the hearing impaired, a speech and langauge clinician, an audiologist, two classroom teachers trained to work with the hearing impaired, and a graduate assistant. Each child was assessed for auditory acuity and speech discrimination, vocabulary development, speech articulation, intellectual functioning, and reading skills. The results revealed that hearing-impaired children score significantly below norms for hearing children on language and reading measures, that audiometric measures indicate that phonic instruction is probably of little value, and that ratings of the children's performance by teachers are inconsistent with test results. Estes, Thomas H.
The Paradox of Text: Will the Real Meaning Please Identify Itself?
Pub Date—Oct 78
Note—24p.; Paper presented at the Annual Meeting of the Southwest Regional Conference of the International Reading Association (7th, Little Rock, Arkansas, October 5-7, 1978)
Pub Type— Speeches/Meeting Papers (150) — Opinion Papers (120) — Guides - Classroom - Teacher (052)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Advance Organizers, Comprehension Development, Language, Literary Analysis, Literature Appreciation, Motivation Techniques, *Questioning Techniques, *Reading Comprehension, *Reading Instruction, *Reading Processes, *Semantics, Teaching Methods
The central feature of language is symbolic meaning, and the act of reading is a part of the symbolic process that characterizes human life. Meaning occurs as a result of interpretation in a context, not as a result of response or reaction. Signs have a literal meaning in a specific context, while symbols have a figurative meaning in an implicit context of metaphor. A question of principle–how does what we read mean?–and a question of practice–how can reading be made meaningful?–may be posed. Perhaps the teaching of reading comes down to making reading more interesting and less tough. Two half-truths about meaning should be dispelled: that text has a single meaning and, at the opposite extreme, that a text means anything any reader wants to claim. In fact, meaning is not "in" anything because it is not a thing but a happening or process. To make reading meaningful, teachers can involve readers in decisions about text, after facilitating the connections on which meaning is built by asking questions. Their questions should be designed to elicit divergent and creative thinking and to build the curiosity and interest that might make reading more interesting and less tough. (Illustrative discussion questions are posed about a familiar nursery rhyme.) (GT)

This chart prepared by the Maryland State Department of Education describes reading goals for children in each school grade. It prescribes general goals for each grade level and includes specific activities at which students are expected to be competent. The general goals for each grade are: the ability to utilize a variety of reading materials, to use a word recognition system, to comprehend various reading materials, to meet the reading demands for functioning in society, and to select reading as a personal activity. Descriptors—Auditory Discrimination, *Beginning Reading, Concept Formation, *Disadvantaged Youth, Grade 1, Kindergarten Children, Perceptual Motor Coordination, Program Content, *Reading Instruction, *Reading Readiness, *Reading Research, Reading Skills, Socioeconomic Background, Visual Discrimination
In an effort to improve the reading readiness skills of children entering the first grade, a special class was established in a lower socioeconomic area of a large city. Testing procedures were instituted to select appropriate pupils, and pretest and posttest results were used to evaluate the program. The 19 pupils selected for the class were given readiness training in the areas of auditory discrimination, visual discrimination, language development, concept development, both fine and grossmotor coordination, directionality, and color identification. As a result of this training, eight of the pupils were promoted to the first grade ready to begin reading activities, and eleven were promoted to the second grade as they had not only learned the readiness skills but had also learned the basic first-grade work. None of the pupils were promoted to the first grade during the term for fear that the change would have emotionally affected them and retarded their development. (Author/FL)

Identifiers—*Right to Read, *Virginia
Prepared as part of a comprehensive study of reading in Virginia, this booklet contains standards identified by educators that must be exhibited by reading programs in order for them to be classified as "excellent." The ten standards are organized around four components: the learner and learning environment, organizing and managing a reading program, staffing a reading program, and school and community commitment. The standards are also related to one of four principles concerning reading programs. Each standard is accompanied by a list of criteria for evaluation and a five-point rating scale. (FL)

Descriptors—Academic Achievement, Comparative Analysis, *Economics, Educational Accountability, *Learning, *Productivity, Reading Achievement, *Reading Instruction, *Reading Research, School Role, *Time Factors (Learning)

Elements of economic production theory are applied to the relation between time and student learning. The analysis takes into account that individual students matter, that students are often taught in classes, and that jointness in production is the rule rather than the exception. The values teachers place on the different possible educational outcomes are shown to be indispensible to understanding production. Some basic conclusions about the nature of accountability are derived. (Author)

The auditory/verbal short-term memory of 64 college students was examined across a wide range of retention intervals (5 seconds to 60 seconds). High attention during interpolated processing was ensured by monitoring rehearsal with a combination of methods, and errors were analyzed for evidence of proactive and intra-unit interference. Recall of three- and five-digit items was excellent under the conditions of modality isolation of interpolated processing. In fact, only 4% of all three-digit items and 10% of all five-digit items were forgotten for reasons other than proactive intrusion of intra-unit interference. The results support an interdependent model of attention and modality effects in short-term forgetting. (Author/FL)

Unleashing Creative Thinking: The Creative Reading Way.

Pub Date—Nov 78

Note—9p.; Paper presented at the Annual Meeting of the California Reading Association (12th, San Francisco, California, November 9-11, 1978)

Pub Type— Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Creative Reading, *Creative Thinking, Elementary Education, Reading Instruction, Reading Materials, *Student Attitudes, *Teacher Attitudes

Creative reading can develop creative thinking as it inspires readers to change their behavior to produce a new or different product or process. Some characteristics of a creative reading program are that it develops creative thought, develops creative behavior, avoids rigid conformity, provides satisfying reading experiences, gives the child opportunities to practice creative powers, and encourages constructive criticism and tolerance. The success of a creative reading program depends on how thoroughly a teacher rewards creative thinking and encourages children to value their own thoughts and ideas. Four areas that need consideration for developing creative reading are: types of reading material, ways of structuring questions and discussion, tasks that open doors, and response environments that encourage creative behavior. Materials should have interesting language patterns, unfinished imaginative stories, biographies, interesting characters and situations, and should give practice in drawing analogies. (TJ)

Identifiers—Barrett (T C)

One method of delineating reading comprehension is T. C. Barrett's taxonomy, which contains the categories of literal comprehension, reorganization, inferential comprehension, and evaluation. In a study devised to test whether the categories of this taxonomy are hierarchical, a reading comprehension test developed by the International Association for the Evaluation of Educational Achievement (IEA) was administered to approximately 9,000 14-year-old students in England, New Zealand, and the United States. The items of this test were classified by raters into one of the taxonomy categories and then analyzed by factor analysis, cluster analysis, and scalogram analysis. These methodologies were used to determine how each analysis explained the test items for each country and to observe the consistency across the methodologies. The findings revealed that none of the analyses strongly supported the proposed hierarchical structure of Barrett's taxonomy as measured by the IEA test items. (Tables of data are appended.) Prose Memory of High and Low Comprehending Readers: Effects of Repeated Exposures.

Pub Date—Dec 78

Note—13p.; Paper presented at the Annual Meeting of the National Reading Conference (28th, St. Petersburg Beach, Florida, November 30-December 2, 1978)

Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Cognitive Processes, Grade 1, *Memory, Primary Education, Reading Achievement, *Reading Comprehension, *Reading Research, *Recall (Psychological), *Sex Differences

Forty-eight first grade students participated in a three-fold study to (1) examine the effect of repeated exposure to text on memory for prose as determined through retelling, (2) determine how low and high comprehending students performed on this task, and (3) determine if males would perform as well as females on the task. The subjects were divided into four categories–high and low comprehending male readers and high and low comprehending female readers. They then listened to and retold a story three consecutive times in one sitting. The findings revealed no significant difference between high and low comprehending readers in reproducing responses. Females, whether high or low comprehending readers, scored significantly better than males in almost all areas of the study. (FL)

Constructing and Using Take Home Stories in the Basic Reading Program.

Pub Date—Nov 78

Note—13p.; Paper presented at the Annual Meeting of the California Reading Association (12th, San Francisco, California, November 9-11, 1978); Some figures may not reproduce due to small type

Pub Type— Speeches/Meeting Papers (150) — Guides - Classroom - Teacher (052)

Descriptors—*Basic Reading, *Beginning Reading, Elementary Education, *Home Study, *Instructional Materials, *Reading Instruction, *Supplementary Reading Materials, Teaching Techniques

Using Take Home Stories is one method of providing success-oriented independent reading materials to reinforce basic vocabulary from any reading program. Most easy-to-read trade books have too many words that are not in the beginning reader's reading vocabulary. Take Home Stories can be written to be used after completion of an entire basal reader, after a unit within a reader, or after specific stories or lessons. Two criteria need to be employed when writing Take Home Stories: only the vocabulary that students have been taught may be used and all of the new vocabulary for a particular lesson should be included. Because they are inexpensive, consumable, and contain the exact reading vocabulary learned in the basal program, the stories are an ideal tool for parents to use in helping children at home. A variety of activities can be used with the stories including word recognition and meaning, word analysis, recalling details, locating answers, visual memory, sequence of events, drawing conclusions, finding the main idea, and using context clues. Descriptors—Adult Basic Education, Community Involvement, Elementary Secondary Education, *Needs Assessment, Program Evaluation, *Reading Instruction, *Reading Programs, *Reading Research, *Teacher Attitudes, Teaching Conditions, Teaching Quality, Teaching Skills
Identifiers—*Right to Read, *Virginia
Prepared as part of a comprehensive study of reading in Virginia, this report contains data gathered in a survey of elementary and secondary reading teachers and specialists and adult basic education teachers to determine teacher needs in that state. The report provides an analysis of the responses to the 72-item questionnaire used in the survey and a summary of the conclusions. Among the conclusions reported are that Virginia teachers believed that they were providing sound reading instruction, but that they were concerned about the lack of adequate planning time and assistance. (A copy of the questionnaire is included.) (FL)

Identifiers—*Right to Read, *Virginia
Prepared as part of a comprehensive study of reading in Virginia, this report contains the findings of 18 research studies. After a discussion of the findings, several recommendations are presented. Among these recommendations are: students in English as a second language programs should be placed with peer groups rather than according to English reading achievement level, curricula should be expanded to include psychomotor objectives, class sizes should be reduced, and the number of secondary schools offering reading instruction should be increased. The report concludes that reading continues to be an area of major concern in Virginia schools. (Abstracts of the 18 research studies and a table of data are appended.) (FL)

Mainstreaming Across Nations.
Pub Date—Jan 79
Note—13p.; Paper presented at the Annual Meeting of the Claremont Reading Conference (46th, Claremont, California, January 19-20, 1979)
Pub Type— Information Analysis (070) — Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Comparative Education, *Foreign Countries, Handicapped Children, *Mainstreaming, Normalization (Handicapped)
An overview of mainstreaming in various nations is presented in this paper. Following a discussion of the background of mainstreaming, the paper offers brief analyses of mainstreaming trends in the United States; the Nordic countries; the nine Common Market nations; and the socialist countries, specifically the Soviet Union. The paper concludes that mainstreaming is a world-wide phenomenon, that no nation has devised the ultimate plan for mainstreaming, that the key to successful mainstreaming is the regular classroom teacher, and that it is time for educators in the United States to implement the provisions of Public Law 94-142, written to integrate exceptional individuals. Implementation of a Peer Tutoring Program.
Pub Date—78
Note—44p.; Introductory Practicum, Nova University
Pub Type— Reports - Descriptive (141)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—*Behavior Change, *Behavior Problems, *Cross Age Teaching, Discipline Problems, Elementary Secondary Education, Inservice Programs, Program Development, *Reading Comprehension, *Reading Programs, Student Problems, *Tutoring
A peer tutoring program was implemented in a nongraded innercity school in an effort to decrease discipline problems–specifically fighting–and to increase the reading comprehension of both tutors and tutees. The target group consisted of 25 intermediate and junior high school students who tutored 25 intermediate and primary school students. The students were selected from the discipline referral files for the previous year and were paired according to age cycles, reading levels, and compatibility. Six reading resource teachers supervised the tutoring sessions, tutored the tutors, and used the results of the pretest data to develop lesson plans and to provide instructional materials. They also cooperated with classroom teachers in scheduling classes and in revising lesson plans according to the needs of the students. Critical activities and procedures used to develop project goals included individual instruction, diagnostic and remedial techniques, team-selected material, staff inservice, and conferences. The findings indicated that the program had positive results; the number of discipline referrals for fighting decreased in the school and reading comprehension increased. (Project-developed forms used to evaluate the program are appended.) (Author/FL)

Reading Comprehension Test Performance and Hierarchical Classification.
Pub Date—Mar 79
Note—16p.; Paper presented at the Annual Meeting of the National Conference on Language Arts in the Elementary School (11th, Hartford, Connecticut, March 23-25, 1979)
Pub Type— Reports - Research (143) — Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Classification, *Cognitive Development, Elementary Education, Performance Factors, Predictive Ability (Testing), Reading Ability, *Reading Comprehension, *Reading Research, *Reading Tests, Syntax, *Test Items
Items from a widely used standardized reading achievement test were rated by trained judges according to the degree to which they required an understanding of hierarchical classification. Two subtests were constructed from subsets of items that were identified by their extreme ratings. Subtest A was judged to require classification operations from respondents; subtest B was judged not to require them. Twenty-two third grade students were assessed on five Piagetian classification tasks and designated as classifiers, transitional, or nonclassifiers on the basis of this assessment. The subjects were then administered subtest A and subtest B. Analysis of covariance of the subtest A scores (effects of subtest B controlled) revealed a significant effect for group placement. The results were interpreted to mean that reading test performance is partially influenced by the student's mastery of hierarchical classification because some test items require this ability. Such items discriminate among children on the basis of developmental maturity rather than on instruction-related knowledge. (Author)

The Effect of Individual Reading Instruction on Locus of Control and Locus of Evaluation.
Pub Date—Feb 79
Note—47p.; Paper presented at the Annual Meeting of the Eastern Educational Research Association (Kiawah Island, South Carolina, February 1979)
Pub Type— Reports - Research (143) — Speeches/Meeting Papers (150)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Elementary Secondary Education, Evaluative Thinking, *Individualized Programs, *Locus of Control, Reading Achievement, Reading Comprehension, *Reading Difficulty, *Reading Research, Self Concept, *Self Evaluation, *Tutorial Programs
Nineteen students, ranging in age from 8 to 18, served as subjects in an investigation of the effect of an individualized reading tutorial program on the locus of control (LOC) and locus of evaluation (LOE) of children with reading disabilities. Over a 12-week period, the subjects received from 24 to 60 50-minute sessions of individualized reading tutoring. An IQ test, a standardized reading test, a locus of evaluation/control scale, and a locus of control scale were used for pretesting and posttesting. The results suggested that the disabled readers varied in levels of LOC and LOE, that they increased in reading accuracy as they became more internally controlled, and that their reading comprehension was related to LOC. Neither LOE nor LOC increased significantly over the period of individualized instruction. (FL)

Descriptors—Black Youth, Child Language, Compensatory Education Programs, *Disadvantaged Youth, Early Childhood Education, *Educational Theories, Elementary Education, Foreign Countries, Intelligence, *Language Ability, *Language Attitudes, Language Handicaps, *Language Research, *Nonstandard Dialects, Teacher Attitudes
Identifiers—Language Deficit Theory
The views of proponents and opponents of the language deficit theory–the theory that nonstandard dialect is a deficient form of language–are presented in this paper. Following a description of the work of Basil Bernstein, a British educator who is considered the key figure among proponents of the theory, the paper presents an overview of the work of four other British proponents–Frieda Goldman-Eisler, Lorna Bell, and D. M. and G. A. Gahagan–and of four prominent United States proponents–Benjamin Bloom, Carl Bereiter, Siegfried Engelmann, and Martin Deutsch–all of whom advocate compensatory education for children labeled as culturally deprived. It also mentions the related work of Hilda Taba and Deborah Elkins and the controversial work of Arthur Jensen, whose conclusions pointed to the existence of language deficiencies among minority children. The paper then presents the views of scholars who reject the entire notion of language deficiency. Those in this group whose work is summarized are William Labov, the foremost opponent of the theory; Walter Wolfram; Susan Houston; and Joan and Stephen Baratz. Finally, the paper cites research that points to the damaging effects of teachers' negative attitudes toward disadvantaged students, and it discusses Herbert Ginsburg's work, which counters results that point to deficiences among disadvantaged children. Twenty-two related studies are listed and annotated. (GT)

Descriptors—Civil Liberties, *Court Doctrine, Court Litigation, Due Process, *Freedom of Speech, *Journalism, Media Research, *News Media
Identifiers—*Judicial Review
The issue of whether judicial orders restricting access to court proceedings should be subject to a procedural hearing, the standing of the media in such hearings, and the role of the media in the entire process are analyzed in this paper. The various sections of the paper deal with the following topics: the procedural plan, proposed to the American Bar Association (ABA) by the Reporters Committee for Freedom of the Press, that would provide the media with the opportunity to be heard prior to the issuance of a restrictive order; the guidelines under consideration by the United States Senate that would limit the issuance of restrictive orders by federal courts; a procedural plan approved by the ABA that would provide due process before standing guidelines or special orders were issued by a court; the media response to the ABA recommendations; the trial judge's perspective on the issue; judicial interpretations of prior restraint orders; proposed changes to the 1968 ABA Standards; the possible decline in the issuance of restrictive orders; and the implications of the "Sheppard v. Maxwell" ruling dealing with pretrial publicity and trial fairness. (FL)

Descriptors—*Cognitive Development, Cognitive Processes, Communication Skills, *Concept Formation, Early Childhood Education, Kindergarten Children, *Language Development, Language Patterns, Language Research, Language Skills, Linguistics, Preschool Children
Forty-eight nursery school and kindergarten children participated in a study of concept learning. The study focused on children's use of intensional and extensional information in the acquisition of basic and superordinate categories. The intension of a concept is its definition or set of defining attributes; its extension is the set of all exemplars. The children completed a concept training task using natural categories assigned into basic and superordinate levels. Each child was trained on two categories at the same level, one through extensional information alone and one through combined extensional and intensional information. After training on both categories, each child participated in two successive tests for each category: a discrimination test that measured learning in terms of the child's ability to identify old training exemplars as positive, to generalize to new exemplars, and to discriminate between exemplars and distractors; and a sorting exercise that required the children to sort a series of pictures used in the training task into groups of positive exemplars and nonexemplars. The results indicated that the children acquired basic level categories more easily than superordinate categories, that intensional information benefited the acquisition of categories only at the superordinate level, and that children's ability to take advantage of the intensional information for their acquisition of superordinate categories developed with age. EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Composition (Literary), *Discourse Analysis, *English Instruction, *Linguistics, *Structural Analysis, *Writing Skills
Identifiers—*Composition Process
Text analysis is the study and description of units of verbal behavior larger than the sentence and is concerned with elements of sentences and with the internal relations of larger passages as well as with how a text relates to the communicative situation in which it occurs. It is of current interest because literary critics have moved toward linguistics and linguists have moved toward texts and the two groups have met on common ground. Also, interest in text analysis is related to the rise of knowledge about hermeneutics–the rules, methods, and theory governing exegesis. There are several approaches to text analysis including cotext, pretext, intention, and context, each of which is related to the types of knowledge one needs to read a text. Text analysis can help composition teachers because it affords the possibility of giving conscious control of the text to students by providing them with descriptions of texts that are more complete and more accurate than those presently available. It also can help heighten students' awareness of the differences between a spoken text and a written one. The greatest contribution of text analysis may be political–it may unite people from different disciplines around an interest in texts and what text-building is in different disciplines. (TJ)

Descriptors—*American English, Comparative Analysis, Dialects, *Dictionaries, Evaluation Criteria, *Language Usage, *Lexicography, Semantics, *Standard Spoken Usage
To provide an authority on usage, this book presents an analysis of the treatment of American English as it appears in a number of dictionaries and usage guides. The first chapter presents brief sketches of the usage guides and studies that provided the basis for this compilation and discusses the organization of the book. After a resume of the background and claims of authoritativeness and completeness of the "American Heritage Dictionary" (AHD), the second chapter describes the procedures used in arriving at judgments on usage, discusses the selection of items submitted to a usage panel, analyzes the choice of panel members, and suggests the value of using panel opinions as a guide to usage. Chapter three analyzes the treatment of the same items that were described above as they appear in nine other dictionaries. Each dictionary is described individually and judgments are compared with those expressed in the AHD. The same process is applied to ten usage guides and studies in chapter four. The concluding chapter considers the treatment of all of the locutions as a whole and draws final conclusions as to objectivity, reliability, and authority in the treatment of usage. Seven appendixes and 33 tables are included. (MAI)

Identifiers—*Science Writing
Science journalism in the United States can be traced back to at least 1690 when a newspaper called "Publick Occurrences" included two paragraphs of medical writing in one issue. In 1752, the "Pennsylvania Gazette" carried an account by Benjamin Franklin of his "electric kite" experiment. Since then, inventions and scientific activities have received regular news coverage. There have been times, however, when science writing developed a bad reputation because it was used in sensational and not always honest ways to increase the circulation of newspapers. In spite of this, surveys have shown that public attitudes about the positive effects of science on the world have existed for at least a full generation. The social implications and the politics of science are becoming increasingly important as science journalism plays an essential role in providing background for vital public decisions. Approximately 5% of newspaper space is consistently allocated to items about science; however, except for some "spectaculars," commercial television has contributed little to the continuing discourse between scientist and citizen. Descriptors—*Cloze Procedure, Educational Programs, *English Instruction, Junior High Schools, *Language Arts, Literacy, Reading Instruction, *Social Studies, *Unified Studies Programs, Writing Skills
To enable junior high school students to relate the processes of reading, writing, and thinking through deliberate instruction and extensive classroom practice, a skills extension project was devised to develop original materials linked to the content areas of English and social studies. Another phase of the project provided for inservice training sessions for the teachers of those students involved in the project. Among the lesson materials used in the project were the district essay model which provided students with a set of preestablished criteria on which their writing would be evaluated, the cloze/maze model where students were required to fill in miss-

ing words in a selected textbook passage, and the paragraph building model where students were asked to write paragraphs about specific topics. (Appendixes include a copy of the district essay project and examples of cloze/maze reading passages.) (MAI)

A content analysis was performed on 3,134 questions from 62 examinations given in the mass communications and society courses in colleges throughout the United States. The questions were analyzed and categorized on the basis of three general groups: geographical reference, media reference, and topic reference. The findings revealed the following: questions on examinations do not seem to reflect any tendency to emphasize a geographical area; with respect to mentioning a specific medium, the majority of questions fell into the subcategories of no media mentioned, newspapers, television, and "broadcast media"; the class of "broadcast media" was emphasized more than the class of "print media" in examination questions; the relative rank of media specifically mentioned in the questions was the same as the rank of media specifically mentioned on course syllabi; with respect to mentioning a specific topic, the majority of examination questions fell into the subcategories of other topics, history of the press, communication models, press law, advertising, and press operations; the topics instructors put on course syllabi and rated as priority topics were not necessarily the same topics emphasized on examinations; and instructors seemed to feel more comfortable with the more traditional topics as course content and on examinations. Descriptors—*Composition (Literary), *Educational Research, Feedback, Higher Education, *Questionnaires, *Teacher Attitudes, *Teacher Behavior

Two instruments were used to discover current faculty practices and attitudes about student writing at a college that was about to begin a college-wide writing program. The attitude survey included a number of items about writing as a college-wide enterprise, relating instruction in writing to the goals of a liberal arts education, and concerning writing as a complex process that takes a lifetime to learn. The behavior survey asked teachers to tell what they did in their classes. Also, teachers were asked to grade a sample student essay as they would any paper in their courses. It was found that most faculty members saw composition instruction as the task of the entire college; English faculty members required more papers than others, although a majority of courses included writing assignments; and most faculty members commented on the content of student writing as well as on the form. (Both questionnaires are included.) (TJ)

Descriptors—*English Instruction, Higher Education, *Language Instruction, *Nonstandard Dialects, *Standard Spoken Usage, *Teaching Techniques

Students have a right to use the dialect and language of their own cultural heritage. Language and dialect rights have many advantages for the user, including prestige, self-confidence, group identity, opportunity to project personality and style, appreciation and respect of cultural heritage, and self-awareness. All dialects are equal and are suited to the habits and needs of the users. However, schools need to give students the opportunity to learn Standard American English (SAE) as well by using exemplary teaching materials and techniques, sympathetic teachers, and motivational techniques. Some positive language strategies and attitudes that allow teaching SAE without having to eradicate dialects include comparing or contrasting grammatical features of SAE with dialects; using written assignments to eliminate dialect interference; emphasizing aspects of writing other than syntax, spelling, and punctuation at the beginning of the writing process; using role-playing; reinforcing the correct usage of SAE through grading without tearing down nonstandard usage; and regularly scheduling student/teacher conferences. In 1976, Jamaican government officals claimed that their island had received an especially negative press in the United States during 1975 and 1976 with serious consequences for the economy and tourist trade. This accusation was not made about Canadian coverage, with one major exception, and Canadian tourism to Jamaica increased during those years while U.S. tourism fell off considerably. A study was conducted with the hypothesis that coverage of Jamaica by the Canadian press was more positive than that of the U.S. press and that coverage of social change was less often presented in a cold war context in the Canadian press. An analysis of six daily newspapers in the U.S. and three in Canada showed that negative coverage in the two countries was about the same but that U.S. coverage did tend to emphasize the cold war context more than the Canadian coverage did. In addition, interviews with travel agents in both countries revealed that Canadian travel agents discounted negative news much more than their U.S. counterparts. It is suggested that media coverage had less effect on tourism than did the mediated influence of travel agents. (TJ)

Descriptors—Behavior Development, *Behavior Patterns, Blacks, *Childhood Attitudes, *Commercial Television, Communication (Thought Transfer), *Information Needs, Literature Reviews, *Minority Group Children, Modeling (Psychological), Parent Role, Programing (Broadcast), Research Needs, Socialization, *Television Research, Television Viewing, Values
Identifiers—*Media Effects

The children of ethnic minorities appear to have a distinctive pattern in regard to television. The pattern is exemplified by a different orientation toward the medium, by differences in tastes and preferences, by atypical behavioral effects, and by different information needs. Minority children, however, may be presumed to share much about television with other children, including the common pattern of parental concern, limited parental control over viewing, and considerable potential for the exertion of parental influence over impact on attitudes and behavior. Prior findings lead to a research agenda emphasizing television's influence relative to that of other socializing agents, the feasibility and techniques for intervention by parents and schools in the communication flowing from television to the child, the bases of minority taste and preference, and the factors responsible for atypical behavioral effects. One hypothesis suggested by prior research is that television, by its portrayals, establishes the status hierarchy ascribed to characters portrayed on television independently of real world experience. Descriptors—Communication (Thought Transfer), *Communication Skills, *Conflict Resolution, Interaction, *Interpersonal Problems, *Interpersonal Relationship

Conflict almost necessarily results from change on the part of one or both participants in a relationship. Four levels at which interaction may lead to conflict are disagreement, misunderstanding, feeling misunderstood, and failure of realization of understanding. Conflict may take place when the issue is directly salient to one partner but only indirectly salient to the other, when both parties are directly involved but the situation is external to the relationship, and when the relationship itself is at issue. Two modes of expression properly used can help conflict be negotiated: the expressor mode, expressing what one is feeling or thinking about an issue, and the empathic mode, allowing the other person to do the same. In the expressor mode, people should own their own perceptions, identify their feelings, state positive aspects of the situation, describe the situation in behavioral terms, and describe desired behavior. Skills needed in the empathic mode include not asking questions, not presenting a person's own perceptions, not interpreting, not making suggestions, and not making judgments. A person may be a facilitator by teaching the skills of the two modes to others after being trained. (TJ)

EDRS Price - MF01/PC02 Plus Postage.
Descriptors—*Composition (Literary), *Educational Trends, Elementary Secondary Education, *English Instruction, Higher Education, Models, *Teaching Methods, Theories

The pendular shifts in attitudes toward teaching writing reflect varying concerns that educators have had about the proper instructional emphasis–whether it should be student centered or discipline centered. The historical dates that act as signposts to these shifting attitudes toward methods of writing instruction include the following: the founding by the National Council of Teachers of English (NCTE) of the Conference on College Composition and Communication in 1949; NCTE's 1956 publication of "The English Language Arts in the Secondary School," a position statement stressing the needs of the whole child; the 1957 launching of the

Sputnik satellite, initiating a scrabble for educational discipline and academic reform; the 1966 Dartmouth Conference, which developed reactions to the academic reforms; and the "back to basics," movement, typifying the retrenchment of 1977-1979. Within this historical context, several writing theories, models, and activities can be discussed: the works of John Dixon and Ken Macrorie, urging student self-discovery through language experience; Robert Zoellner's "talk-write" model; Peter Elbow's "developmental" model; Francis Christensen's "Generative Rhetoric of the Sentence"; James Moffett's theory of discourse; John Mellon's tranformational generative grammar; Frank O'Hare's sentence combining; and the heuristics of Frank D'Angelo, Richard Young, and Kenneth Burke. Descriptors—Adolescence, *Adult Characteristics, *Human Development, Human Living, *Individual Development, Individual Psychology, Life Style, Older Adults, *Self Actualization, Young Adults

Identifiers—Erikson (Erik H), Sheehy (Gail)

Most of the frameworks that have been constructed to mark off the changes in the cycle of adulthood are characterized by a particular focus such as developmental ages, the role of age and timing, or ego development. The theory of Erik Erikson, based upon his clinical observations, represents these crucial turning points in human development: ages 15-22, identity and role confusion; ages 18-28, intimacy versus isolation; ages 25-45, generativity versus stagnation; and ages 45 and over, ego integrity versus despair (maturity). Among the recent theorists with different developmental frameworks of adult life cycles, Gail Sheehy labels the periods of change as pulling up roots (18-22), the trying twenties, catch 30 (28-32), rooting (32-39), deadline decade (35-45), renewal or resignation (midforties). Sheehy and others who parallel her structure contend that each of these stages must be encountered sequentially. When various frameworks are overlapped, the following six stages are revealed: leaving the family (16-22), reaching out (23-28), questions, questions (29-34), midlife explosion (35-43), settling down (44-50), and the mellowing (50 plus). Consideration of the life cycle reveals general characteristics of adult life; points to the inevitability of change; discounts cultural, sex, social class, and historical differences; and facilitates coping in times of stress. Descriptors—*Academic Freedom, *Censorship, Court Litigation, *Freedom of Speech, *Journalism, Press Opinion, *School Newspapers, Secondary Education, Student Responsibility, *Student Rights, Student School Relationship

Since 1939, legal recognition of the public forum concept has been gradually extended to include the public schools. This expansion of the free speech right has been accompanied by a movement of similar intensity aimed at narrowing the scope of regulatory action that might inhibit First Amendment freedoms. Ultimately, recognition of the public school as a public forum was coupled with the narrowed scope of allowable regulatory action. The result has been a philosophical revolution in which the student press, once conceived as an educational tool fully controlled by school authorities, is now seen as enjoying the same freedom from regulation afforded any other speech activity in a public forum. While this philosophy has not been universally accepted as yet, it has been recognized by all levels of federal courts and several state courts. The implication of these developments is that students who edit, produce, or distribute literature on school grounds are subject to regulatory action that is consistent with First Amendment public forum policy as defined by time, place, and manner of distribution restrictions. Additionally, material shown to have caused substantial interference with educational processes is not protected. Censorship based on content alone, however, is no longer seen as being compatible with the functions of the student press. (Author/FL)

Descriptors—Comparative Analysis, *Cross Cultural Studies, *Developing Nations, Foreign Countries, *Journalism, *Mass Media, *Media Research, Newspapers, Non Western Civilization, Research Methodology, Research Needs, Standards

Identifiers—*Professionalism

Contending that narrowly focused empirical research on comparative professionalism cannot produce a complete understanding of journalists in developing nations, this paper calls for the development of research methodologies and approaches that will examine journalistic professionalism in the context of the interdependence of mass media and society. Citing the shortcomings of the present empirical approaches, the paper presents a holistic and macroscopic approach for the study of comparative professionalism that draws upon the present situation of the press in developing nations. It then suggests that the journalist's history and sociocultural, political, and economic environment be explored, and concludes that such an approach is necessary to produce a workable conceptual framework with which to study and understand professionalism among journalists in developing nations. Descriptors—*Behavior Patterns, *Communication (Thought Transfer), Economically Disadvantaged, Information Theory, Language Research, *Linguistic Patterns, *Mass Media, Research Needs, Social Class, *Social Differences, *Social Stratification, Television Viewing

"Language and Poverty," a volume published in 1970 that dealt with various topics concerning langauge and social class differences, argued that in educational programs for the children of the poor it is important not to confuse differences with deficits. It indicated that poor children had adequate language structures and skills for their environments and that comparing their language to standard American English and calling the difference a deficit had no basis in linguistic or communication theory. Since then, language programs have moved to more pluralistic strategies of instruction. Differences in situations demand different language behavior of people, which suggests the concept of "communication repertoire"–the combination of the communication needs of an individual and the ability to meet those needs. Media usage by lower class people for entertainment and escape and by middle class people for hard information is perhaps an example of socially stratified communication behavior. Theoretical attention should be paid to the proposition that an individual's range of spoken behaviors fits with the range of media behaviors, together forming a communication repertoire that correlates with social stratification. Competency Based Tests: Their Implications for Goals of Composition Courses.

Pub Date—78

Note—16p.; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (29th, Denver, Colorado, March 30-April 1, 1978)

Pub Type— Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Composition (Literary), *Educational Objectives, *English Instruction, *Evaluation Criteria, Higher Education, *Minimum Competency Testing, Secondary Education, Student Evaluation, *Writing Skills

Competency testing in composition fixes goals that convey to students, teachers, parents, and the general public inaccurate notions about the nature of composition and what competency in writing comprises. The trend toward competency testing comes from the public's realization that many high school and college graduates are functionally illiterate. Concomitant with that trend has been the demand for a return to the basics. Unfortunately, this concept of competence fails to promote the role of thought in writing and denies the writer the privilege of making conceptual decisions. Even competency tests that include writing short essays do not allow the imperfect groping that is part of the composing process, cannot measure all aspects of a student's experience in English, and confuse goals with norms, thus reducing both testing and teaching to the lowest acceptable level. The word "competency" implies behavioral objectives without overtones of the acquisition of knowledge for the sake of knowledge, growth in appreciation, or the development of taste. (TJ)

Descriptors—*Age Differences, *Age Groups, Bias, Consumer Economics, Evaluation Criteria, Information Sources, Journalism, *News Media, *Newspapers, News Writing

Identifiers—Advertising, *Audience Response

To determine whether differing attitudes toward, and the utilization of, the daily newspaper are related to the variable of age, 481 persons responded to a questionnaire designed to measure their attitudes and opinions about mass media in general and their evaluations of newspaper content in particular. The findings revealed the following patterns: those respondents in the 19- to 24-year-old group found television news and entertainment less biased and more interesting than that of the newspaper, but used the newspaper as an advertising source; those in the 25- to 34-year-old group tended to follow the evaluations of the younger group with the exception that they turned to the newspaper as a source of consumer education and daily living information; the 35- to 44-year-old group placed greater value on the advertising content of the newspaper than did the younger groups and was less critical of its news coverage; and the three older groups (45 to 54, 55 to 64, 65 and older) appeared to be increasingly less critical than the younger groups of newspaper coverage, and showed less interest in consumer information than in local and national stories and church news. (Fifteen tables are appended.) (MAI)

Psychological Constraints on the Utilization of a Mastery Approach to the Language Arts.

Pub Date—Nov 78

Note—11p.; Paper presented at the Annual Meeting of the National Council of Teachers of English (68th, Kansas City, Missouri, November 23-25, 1978)

Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Anxiety, *Composition (Literary), *English Instruction, Higher Education, *Mastery Learning, *Student Attitudes

To explore attitudes having a direct relationship to written composition and mastery learning, 80 undergraduate college students were asked to respond to questions that centered on the issues of criteria for determining when a composition is complete, feelings associated with having to repeat a task, and the idea that one's best effort should be satisfactory performance. Responses indicated that quantity of thought was the major criterion in determining when a composition is complete. However, a mastery approach would require a composition to be expressed in such a way that communication is as important as number of ideas. Undergraduates indicated that they were willing to repeat a task provided they receive constructive feedback prior to the repetitive activity. Students who are expected to rewrite until a level of mastery is achieved must therefore be provided with a support system. Finally, students were divided on whether or not one's best effort should be satisfactory performance, some arguing that no one ever does his or her best. The attitude statements indicate that the initial encounter with mastery learning should be preceded by compensatory arrangements that would reduce stressful conditions. (TJ)

Identifiers—*Lesbian Literature
This paper describes an elective course in twentieth century lesbian novels, designed for women, that explored the cultural dimensions of lesbianism. It traces the development of the course from the time of its proposal to the departmental curriculum committee to its conclusion at the end of the spring sememster, discusses the publicity and controversy connected with the course, and evaluates its shortcomings and success. The paper also includes copies of the original course proposal, the reading list for the course, a six-page bibliography of lesbian literature and books on related issues, and the evaluation of the course that was submitted to the departmental curriculum committee. Political Socialization and Mass Media Use: A Reverse Causality Model.
Pub Date—Aug 78
Note—26p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (61st, Seattle, Washington, August 13-16, 1978)
Pub Type— Information Analysis (070) — Reports - Research (143) — Speeches/Meeting Papers (150)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Citizen Participation, *Information Seeking, *Journalism, *Mass Media, *Media Research, Models, Newspapers, *Political Attitudes, *Political Socialization, Research Design, Research Methodology, Social Change, Television
A reverse causality model treating mass media use for public affairs information as a result rather than as a cause of political behavior was tested utilizing surveys of 190 Mexican-American, 176 black, and 225 white adults. The criterion variable used in each sample was frequency of television and newspaper use for public affairs information. The major predictor variables measured were diffuse support (general allegiance to the United States), political participation, and sense of political efficacy (the feeling that individuals can play a part in bringing about political and social change). Analysis of the findings revealed that political participation significantly predicted mass media use for public affairs information among all three groups. Respondents who were politically active were more likely to use newspapers and television for public affairs information than those who were not. The evidence for the other two political socialization variables was less conclusive. It was concluded that reverse causality models in political socialization and mass media research have some validity, especially for white populations. (FL)

Descriptors—*Composition (Literary), Elementary Secondary Education, *English Instruction, Language Arts, Language Development, *Language Experience Approach, Language Fluency, *Sentence Combining, *Teacher Behavior, *Writing Skills
Maintaining that sentence-combining language experience is the single most beneficial tool currently available to improve student writing, this paper speculates about the value and effects of the adoption of the language experience approach across the English curriculum. It presents six tasks that need to be undertaken by teachers, researchers, and publishers: developing many different kinds of language experiences to meet the needs of many different kinds of students; working toward widespread adoption of language experience materials and exercises; placing special emphasis on developing language experiences that immerse writers in prewriting, writing, and rewriting stages of the composing process; engaging in full-scale overexposure of students to language experience materials; developing syntactic maturity materials through materials and methods used in English as a second language programs; and understanding student thought processes as they are affected by language experiences. Descriptors—College Programs, *Composition (Literary), *Handicapped, Higher Education, *Identification, Learning Difficulties, *Learning Disabilities, *Remedial Instruction, Teaching Methods, *Writing Skills
There are students who have "invisible handicaps" specific learning disabilities who need to be identified and given assistance. One such student was discovered in a freshman composition class because of the disparity between his in-class writing and his take-home writing. It was ascertained that he had a learning disability that made it difficult for him to manipulate symbols spatially. After completing an alternative course through a writing laboratory using "Process One, a College Writing Program," he was able to improve his skills to the point of earning a "C" grade. In working with students who have learning disabilities, some suggestions are: establish and publicize some system of referral and diagnosis, urge those who teach writing to support such a system, establish uniform standards throughout all departments offering waivers for specific learning disabilities, use the system often, provide a required program of special help, include audiovisual components in the supplementary writing program and use written exercises and objective tests to check mastery of principles, and give such students career guidance and personal counseling throughout their college years. Descriptors—Communication (Thought Transfer), Educational Research, Higher Education, *Individual Characteristics, Occupational Aspiration, *Personality Assessment, Program Design, Program Effectiveness, *Self Concept, Self Evaluation, *Student Characteristics, *Vocational Interests
Identifiers—*Advertising
To enable advertising majors to better understand themselves in relation to their career aspirations, a two-part testing and evaluation program was developed. Data for the 39 college students who participated in the program were gathered using a computer analyzed interest inventory and a self-projective instrument. The self-projective instrument revealed that both men and women subjects perceived themselves as enterprising, artistic, and social; however, the interest inventory showed an opposite result, revealing a possible difference between self-perception and actuality. The work values that seemed important for the subjects were creativity, economic return, way of life, and achievement, with little variation between men and women. The least important values were esthetics and altruism. A series of pretests and posttests showed that the program had positive effects on self-perception and vocational choice. (Author/FL)

Descriptors—*Basic Skills, *Composition (Literary), *Error Analysis (Language), Grammar, Higher Education, Language Skills, Learning Activities, Nonstandard Dialects, *Nontraditional Students, *Teaching Techniques, *Writing Skills
Many students, especially nontraditional ones, are not ready for conventional instruction in composition because their problems with the medium overwhelm the content of their writing. There are two different needs for composition students: composing (content) and editing (correctness), which need to be taught in a two-step process. Composing can be taught in a traditional classroom setting, while editing can be developed in a self-teaching laboratory. Three assumptions underlie one program that uses this process: error is not trivial, error can be explained, and what can be explained can be taught. Some reasons error occurs include interference between nonstandard speech and the grammar of standard written English, ignorance of scribal conventions, and difficulties in mastering complex written syntax uncommon to spoken English and inflectional endings not reflected in some students' speech patterns. Error correction can best occur through practice in using standard grammatical forms. This can increase students' fluency and rhetorical development and improve their attitudes toward writing. (TJ)

Pub Type— Books (010) — Guides - Classroom - Teacher (052)
Document Not Available from EDRS.
Descriptors—Acting, Communication (Thought Transfer), *Creative Dramatics, *Dramatics, Language Arts, Language Instruction, *Language Skills, Learning Experience, Postsecondary Education, Role Playing, Secondary Education, *Second Language Learning, *Teaching Techniques
The drama activities in this teaching guide are designed to develop second language learning skills by constructing situations that require the student to concentrate on the meaning and emotional content of language rather than on its structure. In an attempt to involve the whole personality of the learner in the acquisition of language, the handbook stresses the importance of setting or physical environment, the role that the learner is to assume, and consideration of the mood, attitude, feelings, and unspoken assumptions that are part of real conversation. Each of the outlined activities concentrates on developing natural language in one of a variety of situations that include the following: interpreting listening and breathing exercises; sensory experiences; identifying real objects; descriptions of objects, clothing, or unusual objects; playing with letters, verbs, or split sentences; picture sets; conversations in sound; mime sketches; persuasion; describing other conversations; and composing alibis. Descriptors—*Composition (Literary), *Diagrams, *Discourse Analysis, *Linguistics, *Structural Analysis, *Structural Grammar
In looking at the hierarchical structure of a composition, it is practical to diagram the natural text in T-units in a three-dimensional matrix based on the three hierarchical relationships between T-units: coordinate, subordinate, and superordinate. In this matrix, a coordinate relationship, which results from conjoining, elaborating, and contradicting, is represented by juxtaposing a sphere in front of the preceding sphere; a subordinate relationship, which results from giving reasons, explaining, and defining, is represented by juxtaposing a sphere below the preceding sphere; and a superordinate relationship, which results from making conclusions or changing subjects, is represented by juxtaposing a sphere beside the previous sphere and on the same level and plane as the T-unit most parallel to it in function. Matrix diagraming is more useful than other macrostructure representations because it aids in the study of processing and production of texts and provides a graphic representation of the structure, making it possible to assess where reading difficulty is likely to occur. (A sample paragraph is used to illustrate the matrix process.) (TJ)

Composition: K-12.
Chelmsford Public Schools, Mass.
Pub Date—78
Note—115p.
Pub Type— Guides - Classroom - Teacher (052)
EDRS Price - MF01/PC05 Plus Postage.
Descriptors—*Behavioral Objectives, *Composition (Literary), Elementary Secondary Education, *English Instruction, *Expository Writing, Learning Activities, Sequential Programs, *Writing Skills
The purpose of this guide is to provide educators with a unified, consistent approach to the teaching of expository writing skills. The guide emphasizes the sequential development of writing skills from kindergarten through grade 12 and provides objectives for each grade level. Each objective is accompanied by an explanation that further defines various aspects of word, sentence, and paragraph development at specific levels. When appropriate, the guide also offers activities related to the objectives. (FL)

Death, Children, and Books.
Pub Date—[77]
Note—25p.; Bibliography prepared at Illinois State University
Pub Type— Reference Materials - Bibliographies (131)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Adolescent Literature, *Childhood Attitudes, *Childrens Books, Childrens Literature, *Death, Elementary Secondary Education, Fiction, Grief, Nonfiction, Reading Materials, Realism
The books listed in this annotated bibliography are intended to help children understand the reality of death and deal with the mystery and emotions that accompany it. Each entry indicates the genre and reading level of the book and provides a brief description of the attitude toward death that it conveys. The selections include fables, fantasy, poetry, humor, realistic fiction, historical fiction, mystery, and picture books; grade levels range from kindergarten through grade 12. A list of factual articles, essays, and books on children's reactions to death and dying is appended. (MAI)

Descriptors—Black Dialects, Cognitive Development, Early Childhood Education, Economically Disadvantaged, Elementary Education, Emotional Development, Informal Assessment, *Language Development, Learning Processes, Motor Development, *Nonstandard Dialects, *Reading Readiness, *Teaching Techniques, *Thought Processes
Identifiers—Information Analysis Product, *Oral Language
The purpose of this publication is to explain how a child learns and how language development is related to motor, emotional, and cognitive development. Following a brief introductory chapter, it presents a chapter on how a child learns, divided into the following categories: motor development; emotional development; language development; the rhythmic and motoric basis of learning; and oral language development, reading readiness, and black or poverty English. The third chapter, which outlines teaching techniques designed to develop oral language in preparation for reading, is divided into sections on specific assessment techniques and suggestions for developmental instruction. From Pandora's Box: Hopelessness and Defeat in Children's Literature.
Pub Date—[78]
Note—10p.; Study prepared at Illinois State University
Pub Type— Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Childrens Books, *Childrens Literature, Elementary Education, Evaluation Criteria, Fiction, *Negative Attitudes, *Realism, Standards, Twentieth Century Literature
The "new realism" that distinguishes some recent childrens' books such as "The Mimosa Tree," "The Bear's House," and "My Daddy Is a Policeman" portrays the important issues of human life from a one dimensional perspective. These books focus on the tragedies and problems of life without answering the child's philosophical questions regarding existence or the meaning inherent in the events of life; they do not clarify the relationship between hope and hopelessness, or victory and defeat. While these books use hopelessness and defeat as single-edged themes, other recent books such as "Slake's Limbo," "The Dark Is Rising," and "The Missing Person's League," deal with the realistic themes of darkness, despair, and hopelessness at the same time that they stress the importance of the search for goodness and victory in life. It is this search and the human need for hope that gives literature its substance. (MAI)

Descriptors—Arbitration, *Collective Bargaining, *Labor Demands, Labor Problems, Labor Unions, *News Media, *Newspapers, Printing, *Publishing Industry, *Strikes
The New York newspaper strike of 1978 was the direct result of a series of events that started in 1923 when the pressmen's union established a system that provided a minimum fixed number of pressmen per press unit and legitimized a loose labor pool. From that time, the number of pressmen increased through family-dominated union management that loaded the presses with relatives and through union contracts that prevented publishers from changing labor practices and from establishing cost-efficient automated printing processes. Under the sponsorship of the Publishers Association, the three major New York papers, after instituting cutbacks in the pressroom labor force, went into a strike as a united front during the summer of 1978. In October, Rupert Murdock, owner of the "New York Post," who had used the strike for his own financial advancement, pulled his paper out of the strike and put together a separate settlement with the pressmen. With Murdock out of the negotiations, bargaining began in earnest. The November settlement assured that all pressmen would retain their jobs for the six-year life of the contract; however, the pressroom rolls will be reduced through the normal process of attrition and by substantial retirement initiatives provided by the publishers. "Learning to Write, or Writing to Learn?": A Critical Analysis and Evaluation of the Schools Council Project of Written Language of 11- to 18-year-olds and its development project, "Writing Across the Curriculum."
Pub Date—78
Note—64p.; Published by the NFER Publishing Company Ltd., England
Available from—Humanities Press, Inc., Atlantic Highlands, New Jersey 07716 ($5.25 paper)
Pub Type— Books (010) — Opinion Papers (120) — Reports - Evaluative (142)
Document Not Available from EDRS.
Descriptors—Action Research, *Composition (Literary), *Curriculum Development, *Curriculum Evaluation, *Curriculum Research, *Educational Theories, Elementary Secondary Education, English Instruction, Evaluation Methods, *Language Usage
Identifiers—*Writing Across The Curriculum Project (England)
The theory and research resulting from the Writing Research Unit of the Schools Council Project in England has received widespread attention. In response to that attention, and with the opinion that the ideas "Writing across the Curriculum" and "Language across the Curriculum" developed in the Project are fuzzy slogans not always fully understood, a critical analysis of the whole Writing across the Curriculum Project was undertaken. This analysis traces the Project's evolution, examines its design and development, compares its theories of language to other language theories, and considers the role of theory in curriculum research. In view of this analysis, the usefulness of the Project seems to lie outside its chosen field of operation–the strictly defined bounds of theory and research. The Project's essential value appears to be that its position on language provides a powerful heuristic that teachers, especially English teachers, might use in the classroom and for purposes of action research. Descriptors—Creativity, *Educational Attitudes, Educational Development, Educational Objectives, *Educational Philosophy, Elementary Secondary Education, *English Instruction, *Language Arts, *Standards
So far as excellence exists, it exists relative to something else such as the historical age, the chronological age of the creator, the societal conditions under which creation takes place, and the limitations of the physical world. While excellence is sought and revered, it is often made to serve ulterior ends such as higher pay, higher scores on tests, or higher grades-an intrusion shifts the focus from excellence to something else. In education, excellence has come to be judged on an industrial model of efficiency and products that has distorted the educational process. The subject of English has been reduced from the deep, mysterious, and panoramic miracles of speech and literature to drill exercises on spelling, punctuation, and grammar. These latter tasks could be taught as well by computers as by human teachers, and using such aids might allow teachers to stop the suffocating lock-step at which students presently go through the educational system. Through excellent teaching of English, teachers may help students come to intellectual and ethical excellence along with developing knowledge, skills, and values to help them achieve the best of which they are capable. The "How" of Film and Composition.
Pub Date—78
Note—13p.; Paper presented at the Annual Meeting of the Conference on College Composition and Communication (29th, Denver, Colorado, March 30-April 1, 1978)
Pub Type— Guides - Classroom - Teacher (052) — Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Composition (Literary), *English Instruction, *Film Study, Higher Education, Secondary Education, Teaching Methods, Teaching Techniques, *Visual Learning, Visual Literacy, *Writing Skills
Film and writing each resolve quite differently the problem of how to communicate. Still, film can demonstrate some underlying principles that are helpful to writers, especially those writers lacking understanding or skill in certain writing principles. There are at least five principles that both film and composition portray: the importance of context and focus, organizational principles, effective emphasis both by repetition and by the amount of time/space given to a particular idea or quality, juxtaposition for contrast and comment, and the effectiveness of concreteness versus generalities. These concerns suggest only some of the possibilities for using film study to visually emphasize and illustrate composition principles with film equivalents. (RL)

Identifiers—*Book Production, *Photoliterature
On the assumption that client-centered participatory education is pedagogically superior to other methods designed for adults of low reading ability, this manual outlines classroom-tested techniques for developing "fotonovelas"–printed media in which photos are arranged in the sequence of a dramatic story and the plot is conveyed through dialogue bubbles. After considering various rationales for learner-produced materials, the manual discusses the participatory process, focuses on the relationship between the facilitator and participants, and answers technical questions regarding the production of photo-literature. The final section provides norms for evaluating materials and suggests some options for varying the process. (MAI)

Why Our Efforts with Remedial Writers Fail.
Pub Date—Sep 78
Note—17p.; Paper presented at the Annual Meeting of the Pennsylvania State College and University System Conference on Basic Writing (Indiana, Pennsylvania, September 1978)
Pub Type— Speeches/Meeting Papers (150) — Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Basic Skills, *Composition (Literary), Failure Factors, Higher Education, *Remedial Instruction, *Remedial Programs, *Writing Skills
Remedial writers tend to be students who have never written very much, who come from families or neighborhoods in which more than one language may be spoken, and who have sensed their problems but have been unable or unwilling to do much to alleviate the difficulties. Unfortunately, the environment and attitudes of many college remedial programs often represent only one more cage for many of these students. Because little stature is given to individuals who work in remedial programs, many tend to be staffed by unqualified personnel. This situation can lead to serious attitude problems that inhibit students' progress. Structure is another major cause of the failure of remedial writing programs: they lack flexibility, clearly defined goals, and materials that are matched with the learners. Another concern is what happens to remedial writers when they leave a basic writing program. The supportive atmosphere of such a program may lull them into thinking they will receive special treatment everywhere. They also tend to have poor reading skills, and the process of catching up is slow and painful for them. Some suggestions for improving basic writing courses include developing better teacher training, educating the public about the need for staff and materials, working with publishers to get better materials, and continuing to investigate better ways to teach remedial writing students. Descriptors—Adults, *City Demography, *Community Characteristics, Housing Patterns, Income, *Media Research, *Newspapers, Population Distribution, Predictor Variables, *Reading Habits, Reading Interests
Identifiers—*Newspaper Circulation, *Readership Analysis
A review of research about newspaper readership and circulation suggests that the key to understanding circulation patterns is to test in unison the solid predictors of readership (home ownership, population, income, media competition, and shared circulation) along with some of the more subtle correlates (such as social activity). Although these variables have not yet been tested in unison, enough evidence exists in the literature to support their combination. (Author/RL)

Identifiers—*Precision Journalism, *Readership

Analysis

The first of two articles in this report offers a survey of how community ties lead to various psychological needs that are the motivation for newspaper reading. It identifies three distinct audience segments: the traditional audience, with permanent bonds to the community, whose need for information, guidance, and community surveillance leads to the reading of hard news, editorials, and background features; the more mobile readers, less tied to the community, who use the newspaper for entertainment and as a guide to leisure opportunities; and the peripheral readers, with few contacts to the community, who use the newspaper to maintain vicarious links with the community and to fill time that is not taken up by demands of family, job, and community activities. The second article reviews the origins of precision journalism (the use of social science research methods by editors and reporters), offers examples of past and future applications in the newsroom, and outlines ways that any newspaper can begin using these reporting techniques. Descriptors—Adults, Age Groups, *Media Research, *News Media, *Newspapers, *Reading Habits, *Television Viewing

In a series of national polls conducted in 1975-1976 that had people record their activities over a 24-hour time period, researchers found that on a typical day more people read a newspaper than watched television news programs. Older adults were more likely to use both news media, while young adults were more likely to use no news medium. Over the last ten years, there has been no decline in newspaper use among persons aged 18 to 24, but there has been a decline, ranging from 2% to 13%, among older age groups. These results suggest that newspapers' current strategy of catering more to their youngest readers fails to address the greatest source of attrition–the older reader. (Author/RL)

Descriptors—Broadcast Industry, Communication (Thought Transfer), Information Dissemination, Journalism, *Media Research, Need Gratification, *News Media, *Newspapers, *Reading Habits, *Television Viewing

Identifiers—*Audience Response, Small Towns

To identify some of the factors underlying varying readership patterns among small town residents, 706 residents from four small towns were interviewed regarding their media preferences. Participants were questioned about their preferences for and access to newspapers, magazines, radio, and television. Additional questions focused on the importance of newspaper content providing information about different types of local news events. The study revealed the following: small town residents rely on the local newspaper for both local and nonlocal news; the local newspaper is not in direct competition with any other news media as a source of public information; the newspaper is rated as superior to television in thoroughness, usefulness, and importance of content, but television is preferred for enjoyment; newspaper readership is strongly related to both locally oriented and politically oriented news; while education and income influence readership, these factors are less significant than the residents' orientation to the media; and the perceived enjoyment and utility of a newspaper are critical factors in determining regular readership and in increasing newspaper circulation. (MAI)

Syntactic Complexity in Two Modes of Discourse at Grades 6, 10 and 12.

Pub Date—[78]

Note—18p.; Study prepared at Brandon University

Pub Type— Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Age Differences, Complexity Level, *Composition (Literary), Discourse Analysis, Educational Research, Elementary Secondary Education, Grade 6, Grade 10, Grade 12, *Language Development, Language Usage, *Narration, *Persuasive Discourse, *Sentence Structure, Student Development, *Syntax

Compositions in the narrative and argumentative modes of discourse were collected from 240 students (40 boys and 40 girls each from grades 6, 10, and 12) and analyzed for mean T-unit length to determine any differences in syntactic complexity across modes of discourse or grade levels. At each grade level, T-unit length was significantly greater in the argumentative mode than in narration. The differences between argument and narration at each grade level were greater than the difference between grades 6 and 12 for either mode of discourse. Significant increases in argumentative mode T-unit length appeared between grades 6 and 10 and between grades 10 and 12; but a significant increase in the narrative mode T-unit length appeared only between grades 6 and 10. These data provide further evidence that syntactic complexity in written composition is affected by task variables and that, while syntactic complexity increases with age, it levels off earlier in narrative writing than in other kinds of writing. (Author/RL)

A Cognitive-Developmental Approach to the Teaching of Composition.

Pub Date—Feb 79

Note—12p.; Paper presented at the Annual Meeting of the Midwest Regional Conference on English in the Two-Year College (14th, Des Moines, Iowa, February 15-17, 1979)

Pub Type— Guides - Classroom - Teacher (052) — Speeches/Meeting Papers (150) — Information Analysis (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Cognitive Development, *Composition (Literary), *Educational Principles, English Instruction, Higher Education, Learning Theories, Secondary Education, *Student Development, *Teaching Methods

The cognitive/developmental theories of Jean Piaget and John Dewey assert that people learn by doing and that they grow intellectually by tackling demanding problems. It is this active, problem-solving orientation that is central to a cognitive/-developmental approach to composition teaching. Six core principles can serve as guides for composition teachers who want to apply the approach to their classrooms. The key is to provide holistic writing tasks with genuine aims and audiences in mind. The second principle is to emphasize writing as a process without making the process sound too easy or simplistic. Third, composition classes should facilitate social interaction, reflecting the real purpose of writing–correspondence, collaboration, and communication. The fourth principle for teachers to follow is to recognize the importance of student attitudes; and the goals of this principle are to eliminate apprehension about writing and to get students to willingly invest their energies in composing. Fifth, teachers should extend student language facility, using such teaching techniques as free writing and sentence combining. Finally, teachers need to deal forthrightly with student writing errors, helping students learn from their mistakes. (RL)

Descriptors—*Censorship, Educational Problems, Elementary Secondary Education, *English Instruction, Legal Problems, Moral Issues, Moral Values, Parent Attitudes, *Parent Reaction, *Parent School Relationship, *Textbook Evaluation, Textbook Selection

In response to a need voiced by a number of English teachers for new materials that discuss the censorship problems of the 1970s, this book presents articles that analyze the current climate regarding censorship, define the issues and pressures that surround the subject, and suggest ways to handle censorship when the problem arises within the school context. The articles discuss censorship from a variety of perspectives that include: reasons why censorship is on the rise at this time; the historical, social, educational, and human dimensions of censorship; the risks and chance element involved in taking censorship issues to court; and the characteristic rhetoric of censorship and anticensorship groups. The articles that present ways to deal with censorship suggest such approaches as preparing a model policy and rules for selecting instructional materials and preventing censorship crises by preparing detailed written policies and rationales and by communicating with parents. The book also includes a bibliography of books, journals, and pamphlets on censorship and on procedures for establishing policies for material selection. (MAI)

Descriptors—American Literature, Course Content, Course Objectives, *Critical Reading, *English Instruction, *Literary Analysis, *Literature Appreciation, Secondary Education, Student Writing Models, *Teaching Techniques, *Writing Skills

Identifiers—*Hemingway (Ernest)

Intended for use every day for a semester, this secondary seminar handbook provides a schedule, lesson plans, materials for classroom distribution, and a bibliography for a course designed to teach critical reading and basic writing skills through an in-depth study of Ernest Hemingway. Because the course requires that students write seven position papers that combine biographical information about Hemingway with analyses of individual examples of his writing, the handbook outlines the procedures involved in writing each paper and offers models that can be used as examples for the students in writing their own papers. The handbook also describes the process for "Defense Day," an activity that is integral to the seminar, and suggests ways that the teaching methods might be adapted to other authors and their works. Among the items included in the appendixes are an outline of the life and times of Ernest Hemingway and seven anecdotes from Hemingway biographies. (MAI)

Learning about Work–A Study of Contemporary Fiction for Children.

Pub Date—[77]

Note—18p.; Study prepared at Stephen F. Austin State University

Pub Type— Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Career Awareness, Characterization, Childrens Books, *Childrens Literature, *Fiction, Literary Criticism, Primary Education, Work Attitudes

An analysis of 255 books written since 1970 for children in the primary grades reveals that two of every three books do not mention career concepts or provide information on work values. Those books that do refer to work do so in a way that subordinates the concept to the plot and character development, often showing the child that work is done by someone other than children. If the child character

is under eight years old and has assigned tasks to perform, he/she is usually responsible for taking care of other family members or animals at home. These tasks take on added significance if the family survival is at stake. Care of larger or wild animals present special challenges and brings self-esteem for the worker and recognition of the worker's competence by others. Books for seven-and eight-year-old children show characters working beyond the family in projects that earn money or that benefit the community. Stories with adult protagonists usually deal with the larger concerns of community and country and present positive role models for the reader. Generally, books that show respect for hard work also criticize laziness, leaving jobs unfinished, and exploiting other people. (A six-page bibliography of children's books with work themes is appended.) (MAI)

Descriptors—Affective Objectives, Assignments, Course Organization, Creative Writing, *Emotional Response, *English Instruction, Higher Education, *Individual Development, *Poetry, Teacher Role, *Teaching Techniques, Therapeutic Environment

Identifiers—*Poetry Therapy

A personal account of an English instructor's experiences with poetry therapy–the use of poetry to help people get in touch with, and begin dealing with, their problems and feelings–is provided in this paper. Among the topics dealt with are the following: the scope of poetry therapy, the instructor's early dissatisfactions with traditional English teaching methods, his first introduction to poetry therapy, some of his initial problems in teaching a poetry therapy course, the course organization that he eventually developed, incidents that show the value of the course to individual students, teaching techniques and assignments that have proved successful, goals of a poetry therapy course, and the teacher's role in poetry therapy. The paper includes excerpts from students' course evaluations as well as excerpts from students' writings that show how the course helped them reveal their feelings through poetry. (GT)

On the Margins of Discourse: The Relation of Literature to Language.

Pub Date—6 Feb 79

Note—215p.

Available from—The University of Chicago Press, 5801 South Ellis Avenue, Chicago, Illinois 60637 ($12.50 cloth)

Pub Type— Books (010) — Collected Works - General (020) — Opinion Papers (120)

Document Not Available from EDRS.

Descriptors—Communication Skills, *Discourse Analysis, Fiction, Language Role, *Language Usage, Linguistics, Literary Analysis, *Literature, Poetry, Verbal Communication

This centrally focused collection of articles and lectures examines literary interpretation and the relation of literature to language. The first of the book's three parts introduces the distinction between natural discourse and fictive discourse (verbal structures that function as representatives of natural utterances). It also deals with the relation of utterances to inscriptions and of literary "mimesis" to representation in other art forms. The second part examines the characteristic functions of literature in relation to the social economics of verbal transactions and describes the conditions under which verbal structures acquire value by serving esthetic functions. The final part presents a critique of the claims, methods, and theoretical assumptions of contemporary stylistics and literary structuralism. (FL)

Identifiers—*Wright (Richard)

Richard Wright's literary work emphasizes a contrast between black women and white women. Although both are "givers" to black boys, the nature of what they give is different. The black woman gives physical life, feeds it, and protects it at the expense of spiritual or creative vitality. Her goal is to survive bodily, to breathe, to have enough strength to endure the physical deprivations of being black. The black woman mothers a people dead of spirit but alive with physical capability; she does this through counsel, religion, example, and, if these fail, physical torture. Young black girls learn this pattern from older black girls and the conditioning becomes a "mothering" of humans lacking in personal initiative and creative drive. In contrast to the black women in Wright's works, the white women are unconcerned with the physical survival of black boys. Instead, white women coax black boys out of the mothering syndrome and into the "mommism" syndrome, enticing Wright's black boy characters toward a life of the spirit at the expense of physical death. With this contrast between the physical and the spiritual, Wright points out the evils of racist, classist societies that fragment the self and force black men into unfair, unnecessary choices between physical life and spiritual meaning. A Dualistic Presumption: The Journalist as Conduit "and" Pluralist.

Pub Date—Aug 77

Note—45p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (60th, Madison, Wisconsin, August 21-24, 1977)

Pub Type— Information Analysis (070) — Opinion Papers (120) — Speeches/Meeting Papers (150)

Descriptors—Decision Making, Futures (of Society), Information Dissemination, *Journalism, *News Media, *News Reporting, Perspective Taking, Persuasive Discourse, Press Opinion, *Social Responsibility

The task of the journalistic pluralist is one of presenting alternatives so that audiences may exercise personal freedom in choosing among them. It has been held generally that the more publications there are–the more sources of information–the more the idea of pluralism will be served. However, with the consolidation of media ownership and the emergence of more specialized audiences, this assumption has become obsolete. In redefining the concept of pluralism, a model has been proposed that places the individual journalist in the position of conduit. As a conduit, the journalist has a responsibility to offer a forum to the "special pleader"; however, the more difficult responsiblity is that of generating and presenting messages that tend to counter those of the organized special pleading groups. Such generation of alternative messages allows individual audience members to consider options in their decision making processes. Thus, the pluralistic journalist becomes an essential element in the production of decisions by society. (FL)

Children's Literature-Some Reflections.

Pub Date—Nov 78

Note—23p.; Paper presented at the Annual Meeting of the National Council of Teachers of English (68th, Kansas City, Missouri, November 23-25, 1978)

Pub Type— Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Basic Reading, *Childrens Literature, Economic Change, Editing, *Educational Needs, Effective Teaching, Elementary Education, Films, Financial Problems, Literature Appreciation, *Publishing Industry, Teacher Influence, Television, *Trend Analysis

Ten reflections may be made regarding children's literature and its teaching. The reflections are as follows: (1) Teachers can make a profound difference in the ..ves of students and should attempt to do so. (2) Teachers of children's literature are a badly fragmented lot and need a common meeting ground where they can share their thinking. (3) The quality of children's literature has improved in recent years. (4) What was once the cottage industry of trade book publication is no more. Now that the publishing houses are owned by conglomerates whose chief concern is profitmaking, editors are prevented from taking risks in publishing books by unknown, promising authors. (5) Great publishing houses used to be known and respected for the quality of their backlists–but today backlists are becoming relics of the past. (6) The children's book publication, movie, and television industries are becoming more and more interconnected. (7) Increasing costs of publishing and increasing profit margins may affect the publication of children's books. (8) Television and film have dramatically influenced the form of children's books. (9) Basal systems that use literature as the basis of reading exercises per-

vert the essential purpose of literature–to entertain. (10) It appears that teachers may have failed to show students the importance of literature to the well-being of our culture. (GT)

Criticism of News Media in City Magazines.

Pub Date—Aug 78

Note—20p.; Paper presented at the Annual Meeting of the Association for Education in Journalism (61st, Seattle, Washington, August 13-16, 1978); Best copy available

Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Content Analysis, *Journalism, *Mass Media, *Media Research, *Periodicals

Identifiers—*City Magazines, *Press Criticism

A survey of 80 city and regional magazines was undertaken to examine articles of media criticism. Of those, 78.5% responded. A total of 420 articles were received and were divided according to subject and geographical distribution. A critical analysis of representative articles determined that they represented significant criticism as defined in Theodore Peterson's "The Social Responsibility Theory of the Press." It was found that city magazines have adopted media criticism as a standard editorial practice, that most articles were published by the magazines in the largest cities, that most were about the print media, that most concerned local media performance and power, and that magazines in the Northeast and Far West were the most diligent media watchdogs. Common criticisms were that newspapers are inaccurate, sensational, and without substance; that they boost and protect "sacred cows" rather than criticize; that they ignore problems and issues out of self-interest; and that they allow advertising and class pressures to influence the news. Descriptors—*Attitudes, Cross Cultural Studies, Developing Nations, Foreign Countries, *Journalism, *Periodicals, *Reading Habits, Use Studies

Identifiers—*Reader Response

Data from four separate studies in three developing nations that received magazines published by the International Communication Agency (formerly the United States Information Agency) were used to discover how important image is as a determinant of readership and to identify the relative importance of each image attribute. Respondents in each of the samples were administered the same set of 11 bipolar adjective scales. Evaluations of the first magazine, "Horizons," were gathered in Venezuela and in the Philippines, which allowed for the assessment of cross-cultural patterns in the evaluations. Evaluations of the second and third magazines, "Topic" and "Interlink," were obtained from two matched samples in Nigeria, allowing cross-magazine comparisons within a single country. A discriminant analysis using the 11 evaluation scales as the discriminating variables was carried out for each of the four data sets to identify the linear combination of the evaluation scales that would maximally discriminate between regular and occasional readers. A large number of attributes did not discriminate between regular and occasional readers in any of the studies. Only three attributes–impartiality, accuracy, and visual attractiveness–were present in at least three of the four derived functions. Although statistically significant, these functions were able to improve prediction of readership only 14% to 17% above chance in a classification analysis. (Author/FL)

Identifiers—*Advertising, Video Telephone

As communication tools change, the field of advertising will be affected. The videotelephone will be available to consumers and corporations and may be used along with fast-scan facsimile devices or with electronic video recording (EVR). While it offers privacy and security and holds wide implications for sales promotional and public relations activities, it will probably have only a small potential for advertising. Two-way cable television (CATV) offers the possibility of shopping at home, playing interactive computer games, and receiving newspapers and magazines. This medium may have a massive impact on advertising, and if symbiotic facsimile devices and EVRs are accepted commercially, then this could be the prime conduit for advertising messages. Computers are an integral part of both the videotelephone system and the two-way CATV, and on-line retrieval may have a large impact on the advertising industry. In conjunction with the systems mentioned, home and office keyboards will provide access to a centralized computer, and information retrieved may arrive along with an advertising message. A rating system and audience measurement for users of home keyboards will need to be developed also. (TJ)

Writing in the Learning of Humanities: An Institute.

Pub Date—[78]

Note—30p.; Report prepared at Rutgers, The State University ; Best copy available

Pub Type— Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Composition (Literary), Higher Education, Humanistic Education, Humanities, *Humanities Instruction, *Inservice Teacher Education, Institutes (Training Programs), Interaction, Interdisciplinary Approach, *Learning Processes, *Summer Institutes

A three-week institute at Rutgers University during the summer of 1977 attracted 49 college-level teachers representing a wide range of academic subjects. Organizers of the institute sought to involve these people in an intensive study of the numerous inherent possibilities for learning that writing activities offer to any subject area. The activities at the institute included comparing evaluations of student writing samples, listening to invited speakers, brainstorming about the synergistic reaction between writing activities and content area subject matter, and discussing techniques that combine writing with content learning. Following the institute, most participants moved to implement the ideas they encountered at these sessions; and 35 of them provided descriptions of "follow-up" work directly attributable to participation in the institute. These reports reflect changes in their approach to writing instruction, changes in their own writing habits, and their efforts to involve others in the writing behaviors and writing attitudes that the institute promoted. Pub Type— Books (010) — Information Analysis (070)

EDRS Price - MF01/PC07 Plus Postage.

Descriptors—English Education, *English Instruction, *Grammar, Language Research, *Language Usage, Punctuation, Reading Skills, *Sentence Structure, *Structural Grammar, Teacher Education, *Transformation Generative Grammar, Writing Skills

Intended for preservice and inservice teachers at all educational levels, but especially for those in English education classes, this book examines the foundations of grammar instruction and supplies some definitions and examples of grammar usage. Part one of the book explores relevant language research, reasons for teaching grammar, the psycholinguistic nature of language processes, and ways to assess and assist students in their reading and writing of the English language. The second part of the book is essentially a grammar handbook, discussing the principles of grammar in three contexts: as product, according to the traditional and structuralist viewpoints; as process, reflecting the attitudes of transformationalists; and as a guidebook, helping writers to learn certain conventions of mechanics (in this particular case, the punctuation of clauses and their reductions). The Effect of Individualized Instruction on the Acquisition and Transfer of Grammar Skills of Academically Deficient Students.

Pub Date—Apr 79

Note—14p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April 1979)

Pub Type— Reports - Research (143) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Academically Handicapped, Educational Research, English Instruction, Higher Education, *Individualized Instruction, Low Achievers, *Mastery Learning, Teaching Methods, *Traditional Grammar, *Writing Skills

A total of 51 students participated in a study to determine the effect of a behaviorally oriented individualized instruction program on the objective grammar proficiency of academically deficient college freshmen. From a group of special students, 15 were randomly selected for the individualized instruction while 17 were assigned to sections of freshman English not using individualized instruction. A third group of students from regular English classes was used for comparison purposes. Students in all three groups were given a grammar test and wrote 250-word themes at the beginning of the 15-week semester. At the end of the semester, the students in all three groups took the standard department final examination, which included a grammar test and the writing of a 250-word theme. The findings suggested that the grammar skills of academically deficient students could be substantially improved; however, they did not support the notion that formal grammar ability transfers to theme writing. Snavely, William B.

A Contextual Theory of Social Style in Primary Relationships: Exploratory Research.

Pub Date—Apr 78

Note—30p.; Paper presented at the Annual Meeting of the International Communication Association (Chicago, Illinois, April 25-29, 1978)

Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Behavior Patterns, *Communication (Thought Transfer), *Individual Characteristics, Interaction, *Interpersonal Relationship, *Personality Assessment, Research, *Social Relations

Identifiers—*Communication Research

A theory proposed in explanation and prediction of a concept of social style–an individual's distinctive pattern of communication behavior as perceived by others–was tested in an exploratory study. The two dimensions of social style (assertiveness and responsiveness) served as criterion variables for the study. The major goal of the research was to determine the theoretical impact of the context of a relationship upon the perception of social style. Thirteen dimensions of person perception were hypothesized to be predictive of social style in such a manner that the predictive models would be unique for each of three contexts of primary relationships: acquaintances, friends, and coworkers. These variables, along with the criterion variables of assertiveness and responsiveness, were operationalized and included in a questionnaire packet which 164 "target" individuals were asked to distribute to three others: an acquaintance, a friend, and a coworker. A total of 109 acquaintances, 105 friends, and 106 coworkers comprised the usable subject population. Data collected from these subjects were supportive of a contextual view of social style in primary relationships. Four laws of interaction and 21 propositions (which are presented in the paper) were developed in support of the theory. (Author/GT)

An Empathy Model of Compliance Gaining Message Strategy Selection.

Pub Date—Nov 78

Note—42p.; Paper presented at the Annual Meeting of the Speech Communication Association (64th, Minneapolis, Minnesota, November 2-5, 1978)

Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Behavior Patterns, Behavior Theories, Cognitive Processes, *Communication (Thought Transfer), Emotional Response, *Empathy, Ethical Values, *Interaction Process Analysis, *Mathematical Models, Models, *Persuasive Discourse, Research Problems, Speech Communication

Identifiers—Communication Research

The purpose of this paper is to introduce a model of the psychological processes that take place when a persuader decides to use or not to use a given persuasive message. The assumption is made that if the perceived emotional impact of a message is more positive than an ethical threshold (which varies from person to person), the persuader will use that message, and that if the perceived impact is less positive than the ethical threshold, the persuader will reject the message. This model is mathematized, and the resulting mathematical model is tested against data gathered by G. Marwell and D.R. Schmitt (1967) and by G. Miller, F. Boster, M. Roloff, and D. Siebold (1977). It is shown that these tests strongly support the empathy model. Tables are provided that present information about the compliance-gaining strategies defined in the prior two studies. (Author/GT)

"Kuleshov on Film": A Spectator-Centered Film Theory.

Pub Date—[74]

Note—13p.

Pub Type— Historical Materials (060)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Audiences, Auteurism, *Film Industry, *Film Production, *Film Production Specialists, Foreign Countries, Theories

Identifiers—*Kuleshov (Lev)

This paper describes some of the theories of cinematography of Soviet film theorist and filmmaker Lev Kuleshov. It points out that for him, film was communication portraying people's activities emanating from the environment. It explains that he was especially interested in audience response, particularly that of the proletariat, and that he felt that the effect of montage on the audience is extraordinary. The paper then compares Kuleshov with other filmmakers such as Pudovkin, Eisenstein, Metz, Munsterberg, Bazin, Bergman, and Fellini. It also conjectures what he would think about color, 3-D, and wide-screen films. (TJ)

Descriptors—*Anthropology, Cognitive Processes, *Communication (Thought Transfer), *Cross Cultural Studies, *Cultural Differences, Cultural Factors, Foreign Countries, *Multicultural Education, *Nonverbal Communication

Identifiers—Australia, *Intercultural Communication

Communication may be complicated in the kind of complex polyethnic interaction setting that is part of the Australian educational scene. In a polyethnic school, breakdowns in communication can occur from interference not recognized by either the teacher or the student. Interference may occur because the cultural grammar of the child may not mesh with the grammar of the person transmitting the message due to subconscious differences in body language or an unfamiliar mode of communication (e.g., different understandings of nodding the head). At a deeper level, the iconic nature of communication (transmitting incomplete information that the receiver is expected to be able to fill in) and field dependency/independency (cognitive styles more or less dependent on cues from the surrounding field such as peers or parents) also affect transmission of information. On a further level of abstraction, learned styles of processing information and dealing with learning contexts may cause interference in communication. Yet another source of interference may be related to different forms of communicative grammar related to the difference between religion and the domain of secular, academic tradition. (TJ)

Shifting Conceptions of Rhetoric in the Eighteenth Century.

Pub Date—Nov 78

Note—19p.; Paper presented at the Annual Meeting of the Speech Communication Association (64th, Minneapolis, Minnesota, November 2-5, 1978)

Pub Type— Historical Materials (060) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Composition (Literary), *Eighteenth Century Literature, Fine Arts, *Intellectual Disciplines, Liberal Arts, Literary Conventions, *Literary History, Persuasive Discourse, *Rhetoric, Self Expression, Taxonomy, *Theories

The nature and scope of eighteenth century rhetoric were defined by three dominant taxonomies of knowledge. In the oldest taxonomy, which clung to the liberal arts tradition, rhetoric was seen as a means of achieving social dominance, and its distinctive characteristic was the exercise of control through persuasion. Treatises representing this point of view comprehensively reviewed the accumulated lore of rhetorical devices in search of persuasive devices. The second ordering of knowledge followed a Baconian structure and reflected the division of mental faculties employed in generating, recording, and transmitting knowledge. Within this structure, rhetoric was seen as the art of adornment within the broader organ of transmission. The works of many theorists show how this conception led to an emphasis on vivid description and imagery and to an expansion of the scope of rhetoric to include nonpersuasive discourse. In the final pattern, eloquence was defined as a fine art and rhetoric was associated with a number of plastic arts. Theorists from this school agreed that the essential characteristic of the fine arts, and of rhetoric, was the expression of ideas. In practical treatises on rhetoric, the emphasis on expression was associated with a declining interest in the instrumentality of rhetorical discourse and in a growth of interest in delivery and the "elocutionary movement." Viewers' Perception of TV Images: Empirical Research and Television Aesthetics.

Pub Date—Apr 78

Note—23p.; Paper presented at the Annual Meeting of the Broadcast Education Association (Las Vegas, Nevada, April 7-9, 1978); Some figures may not reproduce well due to light small type

Pub Type— Speeches/Meeting Papers (150) — Information Analysis (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Cerebral Dominance, Communication (Thought Transfer), Concept Formation, Neurological Organization, Physical Characteristics, *Research Methodology, *Response Mode, Television, *Television Viewing, Theories, *Visual Perception, *Visual Stimuli

To relate scientific evidence with subjective interpretations relevant to the construction and appreciation of visual images, this paper reviews the literature pertinent to the processes involving the perception of visual images, the distinct functions of the left and right hemispheres of the human brain in recording and interpreting visual data, the physiological properties of television images, and the compositional factors that determine the effective structure of television images. The paper concludes that the construction of significant theories on television aesthetics, insofar as viewers' perception,

interpretation, and response are concerned, should be based on empirical research that relates scientific findings (studies on visual perception, neurology, and physiology) with subjective interpretations (studies on visual communication and art composition). Such research, it contends, will bridge the gap between factual information and intuitive choices and will enhance the field of visual communication. (Author)

A Developmental Perspective for Functional Communication: Implications for Lifelong Learning.

Pub Date—Nov 78

Note—18p.; Paper presented at the Annual Meeting of the Speech Communication Association (64th, Minneapolis, Minnesota, November 2-5, 1978)

Pub Type— Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Adult Learning, Child Development, Communication (Thought Transfer), *Communication Skills, *Continuous Learning, *Developmental Stages, Elementary Secondary Education, Environmental Influences, *Interpersonal Competence, Language Development, Parent Education, Postsecondary Education, *Speech Communication

The Speech Communication Association's National Project on Speech Communication Competencies yielded a developmental perspective of functional communication, from which implications for lifelong learning can be derived. The project resulted in the following contributions: a definition of communication competence; a description of the child as a unique kind of communicator; an understanding of the central thread of communication development and of the complexity of that development; the recognition of variables, other than age, that are related to development; and a focus on the classroom as a communication context. The goal of lifelong learning programs is to enhance and expand learning opportunities for all social groups and ages, especially workers, urban youth, women, and older adults. With regard to lifelong learning, the developmental perspective for functional communication implies a need to examine how communication competence changes beyond adolescence, a need to examine the communication dimensions of multiple educational contexts, a need to examine the communicative demands of different roles that interact with the student role, and a need to prepare parenting programs that will enhance children's development of communication competence. Descriptors—Art, *Communication (Thought Transfer), Communications, *Declining Enrollment, *Educational Change, *Enrollment Projections, Health Education, Higher Education, *Speech Communication

Professors of rhetoric are viewing with concern the prospect of 15 years of declining enrollment in higher education. It has been speculated that the decline in enrollment will be less severe in large, well-established, urban institutions with low tuition, a clear mission or well-defined public image, well-planned modest growth, established programs in the health professions, moderate graduate enrollment and specialization, good financial conditions, and management that is willing to face financial facts and be responsive to those providing support. Research suggests that by 1986 fine arts enrollment will be little changed, letters enrollment will be considerably down, and health profession and communications enrollments will be significantly up. Some ways to turn adversity to advantage are tied to demands of employers who want employees who can write well. Teachers of speech communication might emphasize writing speeches and might develop closer alliances with journalism, advertising, and public relations. In addition, increased emphasis on speech pathology, audiology, and training of the speech or hearing handicapped and their teachers could help forestall the enrollment decline that seems in store for the field of letters, including speech communication. Identifiers—*Communication Research

To identify the communication concerns of preservice (prospective and student teachers) and inservice teachers and to determine the differences in those concerns with regard to a three-phase conceptualization–concern with self, with task, and with impact–a study was conducted involving a total of 227 prospective, student, and inservice elementary school teachers. An adaptation of the "Teacher Concerns Statement" developed by Frances Fuller and Carol Case was used to obtain the communication concerns of the subjects. The results revealed that while prospective teachers seemed primarily concerned with self, student teachers with the task of communicating, and inservice teachers with the impact of communication, their concerns were not limited exclusively to any one category. "Who Will Control the Minds of the Students" in Warsaw, Indiana? Occasional Paper Number 16.

Indiana Council of Teachers of English, Terre Haute.

Pub Date—Nov 78

Note—22p.

Pub Type— Historical Materials (060)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Academic Freedom, *Board of Education Role, *Censorship, Civil Liberties, Conflict, Educational Problems, Elementary Secondary Education, Freedom of Speech, Moral Values, Student Rights, *Teacher Administrator Relationship, *Teacher Dismissal, *Textbook Evaluation

Identifiers—*Indiana (Warsaw)

A chronology of the events in a 1977-1978 series of teacher/school board/administrator conflicts in Warsaw, Indiana, is presented in this paper. Newspaper stories, editorials, letters, memoranda, interview statements, legal documents, and minutes of various meetings are cited in accounts of numerous individual events. The events reported involve conflicts regarding the school board's removal of an individually guided elementary education program; the banning and burning of a values clarification book used in the high school; the banning of three books used by a high school teacher, and the teacher's subsequent dismissal; the dismissals of other teachers for nonacademic reasons; the school board-initiated search for "objectionable material" used in classrooms; the discontinuation of a phase-elective program at the high school; alleged administrator intimidation of a student who wrote an editorial supporting two dismissed teachers; and the complaint brought before the Indiana Education Employment Relations Board alleging the commission of an unfair labor practice by the school board. The paper concludes with a list of questions addressing basic issues raised by the conflicts in Warsaw. (GT)

Identifiers—*Editors

There are a number of opportunities for communication experts to move into fulltime general management. The particular role that they can fill to advantage to themselves and to the company is as generalists with the abilities to analyze, balance points of view, be objective, present issues effectively, and retain a sense of values. Some skills need to be retained and broadened or sharpened including being a good communicator, retaining a broad approach to life, knowing when to listen, and remaining healthily skeptical. Some skills will need to be developed from scratch by most communicators. These include developing financial know-how, especially knowing the language and having an acquaintance with statistical yardsticks; continuing to broaden perspective; not losing touch with people in communications; and learning to consider not only "how" but "what," "why," and "whether." Some observations about how to move into management include: keep positioning yourself to learn new skills, and seize every opportunity that comes along to do something out of the ordinary. (TJ)

Identifiers—*Advertising, *Defamation

The right of privacy as it relates to advertising and the use of a person's name or likeness is discussed in this paper. After an introduction that traces some of the history of invasion of privacy in court decisions, the paper examines cases involving issues such as public figures and newsworthy items, right of privacy waived, right of privacy precluded by consent, limits of consent, termination of employment, revocation, malice, sufficiency of identification, incidental use of name, and who may bring action against whom. A second section of the paper discusses usage of name or likeness as an invasion of privacy as it relates to endorsement of products or services, usage of name on a product, and recovery allowed and denied. A section is included on use of pictures for display purposes, in newspapers or other printed publications, in television or motion pictures, and mistaken use of pictures. A final section discusses usage of name or likeness in false light including misrepresenting of authorship or statements and alteration of pictures. Each section includes numerous references to court decisions. (TJ)

Based on the findings of a nine-month-long investigation, this report represents the efforts of the Carnegie Commission to design a new structure for public telecommunications that can accommodate the divergent needs of public broadcasting in the United States in the coming decade. Following a summary of the findings and recommendations, the report is organized into ten chapters that deal with the following topics: changing goals in a changing world, the rise of public broadcasting, funding, television programs and services, public radio, public broadcasting in the new telecommunications environment, telecommunications and learning,

public accountability, and the social dividend of the electronic media. Eight appendixes contain acknowledgements of people who helped compile the report, a chronology of public broadcasting, a statistical overview, cost estimates for implementing the Commission's recommendations, a discussion of the Educational Broadcasting Facilities Program, a memorandum of law, and a list of public television and radio stations. This "Report and Order" from the Federal Communications Commission (FCC) represents the examination of thousands of comments and an expert determination of the future needs of the nongovernmental users of the radio spectrum in the United States. The proposals it contains will be part of the United States' proposals at the 1979 World Administrative Radio Conference of the International Telecommunication Union. It includes a background of the report; terminology and rules for the use of frequencies; table of frequency allocations; technical proposals; regulatory proposals; and administrative, operational, and miscellaneous proposals, along with associated appendixes. It is preceded by a statement by FCC chairman Charles D. Ferris and by a joint statement by Commissioners Abbott Washburn and James H. Quello. (TJ)

The Effects of Social Style on Perceived Conflict and Success in Debate.
Pub Date—Nov 78
Note—20p.; Paper presented at the Annual Meeting of the Speech Communication Association (64th, Minneapolis, Minnesota, November 2-5, 1978)
Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Assertiveness, Competition, *Conflict, *Debate, Higher Education, *Individual Characteristics, *Interpersonal Competence, Predictor Variables, Social Relations, *Success Factors, Verbal Communication
Identifiers—*Social Style
A study was designed to examine debater characteristics in terms of perceived social style (assertiveness and responsiveness) and to explore the effects of debater social style in terms of perceived substantive and interpersonal conflict and debate success. Measures of perceived assertiveness, responsiveness, social style, and conflict were obtained for 96 college debaters participating in 158 cross-examination type debates. The findings revealed the following: it is possible to classify debaters by social style based on data provided by other debaters, not all debaters have the same social style, individuals who are more assertive receive higher speaker points than those who are less assertive, social style has limited ability to predict the degree of substantive conflict, and highly responsive individuals engage in less interpersonal conflict than do less responsive persons. An Episode-Dependent Deontic Logic of Conversation.
Pub Date—Nov 78
Note—32p.; Paper presented at the Annual Meeting of the Speech Communication Association (64th, Minneapolis, Minnesota, November 2-5, 1978)
Pub Type— Reports - Descriptive (141) — Speeches/Meeting Papers (150)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—*Communication (Thought Transfer), Discourse Analysis, *Interaction Process Analysis, Language Patterns, Persuasive Discourse, *Semantics, Social Relations, *Speech Communication, *Theories
Identifiers—*Conversation
The theory of the coordinated management of meaning (CMM) describes the structural relationship between a conversation as it appears in a verbatim transcript and as it appears in the meaning-system of the participants. The five essential features of CMM theory are: a set of four propositions about the nature of communication and human behavior, a hierarchical model of actors' meanings, structural models of constitutive and regulative rules that respectively integrate the hierarchy and organize meanings into guides for action, differentia for comparing actors' rules, and an account of a logic of conversation produced by the conjoining of actors' rules. The utility of this theory is dual: as a diagnostic tool it facilitates the analysis of conversation, and as a heuristic device it generates empirically testable hypotheses regarding the relationship between rule structure variables and the patterns of conversation that people produce. Descriptors—*Communication (Thought Transfer), *Ethics, *Moral Development
Identifiers—*Dewey (John)
John Dewey's philosophy clarifies the relationship between communication and the emergence of character. His moral theory recommends a conception of "moral selfhood" emphasizing three attributes: freedom, social sensitivity, and the growth of mind. Communication is the principle instrument through which these characteristics can be extended. The primary obligation, therefore, attending every communicative act, whatever its immediate purpose, is to discover and employ modes of expression that will facilitate the moral evolution of the participants. Descriptors—Communications, *Federal Legislation, Information Networks, Telecommunication, *Telephone Communications Industry, *Telephone Communication Systems, *Utilities
Identifiers—*Federal Communications Commission
Prepared by a consultant for the American Telephone and Telegraph Company (ATT), this memorandum contends that recent decisions by the Federal Communications Commission (FCC) have violated the provisions of the Communications Act of 1934 that assured the maintenance and improvement of the integrated switch telephone network managed by ATT and its affiliates in partnership with the independent telephone companies. Following a brief introduction to the subject, the first major section of the memorandum discusses the development of the telephone industry before 1968. Specific areas covered in this section include the telephone industry's "end-to-end" responsibility for service, the goal of universal service and its implications for rates, and the relation of Western Electric to the telephone network. The second section deals with the FCC's departure from the statutory rule of network unity and provides information on the first cases leading to this situation, restrictions on the competitive response of the general-service telephone companies, customer-owned equipment, and the economic consequences of the recent FCC decisions. The final section presents a summary of the key issues in the continuing debate concerning communications policy. (FL)

Descriptors—Communication Problems, *Communication Skills, Community Colleges, *Curriculum Development, *Developmental Programs, Educationally Disadvantaged, Educational Needs, Higher Education, *Program Design, *Remedial Programs, School Holding Power, Skill Development, *Speech Communication, Student Needs
The benefits and the role of speech communication courses in developmental education programs are examined in this paper. The first section outlines the need for a package of developmental classes that includes a course in speech communication to prepare students for college-level courses. It describes a successful developmental program for academically disadvantaged students at Jefferson Community College, which includes a speech communication course; cites studies showing the need for training in communication skills and reports results of a survey of instructors of freshman level courses that emphasizes the need for students to learn speech communication skills. The second section of the paper suggests 11 criteria for developmental programs, related to such areas as institutional priorities, educational objectives and philosophy, teacher characteristics, and accountability. The final section provides suggestions for designing a developmental speech course. Appendixes describe the Jefferson Community College courses that deal with speech communication skills and present tables of data about the program, its students, and the student retention rate. The Neo-Populist Vision of America: A Fantasy Theme Analysis of George McGovern's Presidential Campaign.
Pub Date—Nov 78
Note—27p.; Paper presented at the Annual Meeting of the Speech Communication Association (64th, Minneapolis, Minnesota, November 2-5, 1978)
Pub Type— Historical Materials (060) — Speeches/Meeting Papers (150) — Opinion Papers (120)

EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Higher Education, *Persuasive Discourse, Political Influences, *Political Issues, *Politics, Public Speaking, *Rhetoric, Speech Communication
Identifiers—*McGovern (George S), *Political Campaigns
The purpose of this paper is to demonstrate how the 1972 presidential campaign of George McGovern embodied a rich Neo-Populist rhetorical vision that served as a framework for the candidate's campaign rhetoric. The thesis of the paper is that the Neo-Populist vision of McGovern included three particular fantasies, each of which dressed the McGovern persona as a Populist hero, included a plot line involving Populist motives, and visualized villains in the Populist vein. The paper examines the "Man of Principle" fantasy as an example of McGovern's Neo-Populist identity; the "New Politics" fantasy, which reveals the positions used by McGovern to project a Neo-Populist plot line; and the "Grass Roots" fantasy, which shows how the Neo-Populist rhetoric was used on the political stage. Communication Education and the Teaching of English as a Second Language.
Pub Date—[78]
Note—16p.; Study prepared at Louisiana State University
Pub Type— Information Analysis (070)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Bilingual Education, Black Dialects, *Communicative Competence (Languages), Educational History, Educational Resources, Educational Trends, Elementary Secondary Education, *English (Second Language), Immigrants, *Language Instruction, *Language Programs, *Minority Groups, *Speech Communication
Changes in the field of teaching English as a second language (TESL), especially in the last two decades, have included increased recognition of the language needs of learners in numerous circumstances and have resulted in greater attention to the problems of language minority groups in the United States. TESL today is strong and growing, has achieved professional status, and has expanded in teaching, teacher training, and research. Three current areas of TESL of potential interest to teachers of speech are programs for bilingual children, for children in immigrant groups, and for minority children who speak a nonstandard dialect such as Black English. Basic resources for TESL teachers include a wide array of professional groups, professional publications, commercial texts and materials, and other aids. The recent stress on communicative competence has led to increased collaboration between ESL and speech or language arts teachers and has had an impact on TESL curriculum design, practical exercises, and testing programs. Descriptors—*Broadcast Industry, Certification, Federal Government, *Federal Regulation, Legal Problems, *Mass Media, Newspapers, *Policy Formation
Identifiers—Department of Justice, Federal Communications Commission, Federal Trade Commission, *Ownership
This paper explores some of the implications of cross-ownership of newspapers and other media in a single market and the role of the Federal Communications Commission (FCC), the Department of Justice, and the Federal Trade Commission (FTC) in enforcing national policy favoring a deconcentration of local mass media. It describes the history of FCC regulation of local media concentrations, looks at the potential harms and benefits of newspaper-broadcast media cross-ownerships, and proposes that the FCC distinguish between behavioral problems and structural problems. It further suggests that the Department of Justice should bring antitrust action for behavioral monopolistic activities of concentrated owners and that the FTC should look at local media concentrations under Section Five of the Federal Trade Commission Act. Tolerance for Disagreement: Interpersonal Conflict Reconceptualized.
Pub Date—Feb 79
Note—22p.; Paper presented at the Annual Meeting of the Western Speech Communication Association (Los Angeles, California, February 18-21, 1979)
Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors—Affective Behavior, *Communication (Thought Transfer), *Conflict, Educational Research, Interpersonal Competence, *Interpersonal Relationship, Models, Research Methodology, Research Needs, Teachers
Identifiers—*Communication Research
Based on the idea that tolerance for disagreement is not other-directed but rather reflects a personality trait maintained by individuals across time and situation, a study was undertaken to develop a measure of tolerance for disagreement that would help further the conflict conceptualization by being able to predict negative affective interactions with procedural or substantive disagreement. To assess individual tolerance levels for disagreement, a Likert-type scale was developed and administered to 384 educators. Initially, 35 statements were used, representing both approach and avoidance of argumentative situations specific to interpersonal and group discussion contexts. Items were worded both positively and negatively. The subjects were asked to indicate the extent of their agreement with each item as it applied to them in their own communication contexts. Analysis of the data resulted in a 20-item scale that reflected face validity as well as sufficiently high reliability consistent with the conceptualization of the unidimensional nature of the tolerance for disagreement construct. The findings suggest that, while individual tolerance levels of disagreement varied, the impact of such levels on conflict situations requires empirical investigation. (FL)

Descriptors—Audiovisual Communication, *Court Litigation, Courts, Due Process, Evaluation Criteria, *Justice, Legal Problems, *Media Research, *Production Techniques, *Videotape Recordings
An overview of four years of research that evaluated the effects of videotaped testimony on juror information and decision making activities in jury trials, this report contains the executive summary and an empirical report for the second two years of research. The executive summary discusses live versus videotaped trials, live versus color and monochromatic videotaped trials, videotaped segments in an otherwise live trial, deletion of inadmissible material in videotaped trials, editing techniques for deleting inadmissible material, detecting witness deception in videotaped presentations, videotape production techniques, and some general conclusions. The empirical report discusses some of these same topics as they pertain specifically to the final two years of research. Tables, figures, and ten pages of references are included. (MAI)

Metaphoring and Perceiving: An Investigation of a Developmental Relationship.
Pub Date—Feb 79
Note—17p.; Paper presented at the Annual Meeting of the Western Speech Communication Association (Los Angeles, California, February 18-21, 1979)
Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Higher Education, *Imagery, *Language Development, *Language Processing, Language Research, *Metaphors, *Perception, Secondary Education, *Symbols (Literary)
It is proposed in this paper that a developmental continuum functions between metaphors and the perception of metaphoric referents in both ordinary and aesthetic language use, and three levels of the metaphoring act are isolated: perceptual, analogical, and evaluative. These levels appear justified in terms of their functional association with Piagetian theories of language acquisition. An experimental study, in which 192 high school and college students ranked metaphors from the three levels by their adaptive features (similarity, analogy, and dissimilarity), affirmed the theoretical propositions and suggested new grounds for explaining the intrinsic nature of metaphoric meaning. Identifiers—*Communication Research
The techniques, procedures, and principal findings of 15 different experiments in a research program on interactive communication are summarized in this paper. Among the principal findings reported are that: problems are solved faster in communication modes that have a voice channel than in those that do not have a voice channel, modes of communication that have a voice channel are much wordier than those that do not have a voice channel, the wordiness of voice modes of communication appears to be due to the fact that it is so easy to talk rather than to the lack of a hard copy to which one can refer at will, and for none of the many problems tested is there any significant advantage of face-to-face communication over communication by voice alone. Other findings reported in the paper relate to communication by persons of diverse abilities, the effect of interrupt capability on communication, the unruliness of natural communication, and the use of restricted vocabularies for communication purposes. Indian Wisdom Stories.
Pub Date—Apr 75
Note—16p.; Paper presented at the Annual Conference on Minority Studies (3rd, LaCrosse, Wisconsin, April 1975)
Pub Type— Speeches/Meeting Papers (150) — Historical Materials (060)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*American Indian Culture, *American Indians, *Communication (Thought Transfer), *Folk Culture, Legends, Minority Groups, *Story Telling, Teaching Techniques
Rather than simply recreating a real or imagined event or experience for entertainment purposes, the wisdom stories of the American Indians were sophisticated teaching devices that kept alive the history and traditions of the tribe at the same time that they instructed the young tribe members in the areas of history, geography, nature study, and ethics. Centuries old, these stories were passed by word of mouth from generation to generation and their telling was entrusted to persons who were highly respected within the tribe. Each story was constructed so as to stimulate inductive and deductive thinking by providing alternate viewpoints and by challenging the listener to formulate individual conclusions. Some of the concepts and principles that are found consistently in Indian wisdom literature include the following: an Indian is a human being capable of good and bad behavior, who lives according to the traditions of the fathers; the word "different" does not involve a value judgment; decision making is a human function and the only wrong decisions are choices never made; everything is alive and has a spirit, even rocks and trees; and power is the capacity to overcome human weakness without physical dominance, rather than the ability to rule others. Descriptors—*Communication (Thought Transfer), *Research Needs, *Research Problems, *Speech Communication
Identifiers—*Communication Research
In examining the field of speech communication and its research, it is clear that most research has focused on linking (linking the individual with the human environment) and regulatory (the regulation of human behavior) behavior. However, the primary goal of human communication is mentation (the development of higher mental processes), and this has been mostly ignored by researchers. Research has been characterized by commitment not to particular substantive ideas but to a particular style. Research to show how the parts of communicational processes fit together would raise the power of speech communication's research questions and put it on the road toward gaining academic distinctiveness. Research directed to the nature of human symbolic behavior (how information is processed) would contribute to distinctiveness and viability. (TJ)

Descriptors—Behavior Patterns, *Cognitive Style, Higher Education, Individual Differences, Interaction Process Analysis, Interpersonal Attraction, *Interpersonal Relationship, Language Styles, *Nonverbal Communication, Research, *Speech Communication, *Verbal Communication
Identifiers—*Communication Research, *Communicator Style
An analysis of interpersonal communication research supports the existence of the notion "communicative style," the method or manner by which an individual interacts with others. Scholars concerned with interpersonal behavior acknowledge that individuals develop habitual styles of interactive behavior that tend to produce optimal relations for them. Although communicative style was linked historically to elocution, an art form divorced from message content, the recent interest of communication scholars in the nonverbal aspects of human communication behaviors has refocused their attention on communicator style. This style is seen to develop as a result of continuous and successive communicative acts during which people learn to be more effective and interpersonally attractive. (RL)

Wiseman, Richard L. Davison, Mark L.
The Semantic Meanings and Functions of Conversational Closings.
Pub Date—Feb 79
Note—25p.; Paper presented at the Annual Meeting of the Western Speech Communication Association (Los Angeles, California, February 18-21, 1979)
Pub Type— Reports - Research (143) — Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Content Analysis, Educational Research, Higher Education, *Interaction Process Analysis, *Interpersonal Relationship, *Semantics, Social Relations, *Speech Communication, *Verbal Communication
Identifiers—*Communication Research, *Conversation
A total of 79 college students participated in an investigation designed to clarify the function of conversational closings. Multidimensional scaling was used to derive a three-dimensional representation of the semantic meaning conveyed by 20 frequently used conversational closings. Regression analyses of the scaling solution suggested that the dimensions could be interpreted as reflecting the degree of inaccessibility, the degree of social distance between partners, and the degree of the support for the relationship signalled by the terminals. The results indicated that the semantic meaning of closing terminals would allow them to serve two functions: signalling inaccessibility and signalling support for the relationship. The obliqueness of the dimensions suggests that a terminal might simultaneously fulfill more than one function and that the functions are not independent. (Author/FL)

An Examination of the Ideal Political Candidate as a Function of Selected Voter Characteristics.
Pub Date—Mar 79
Note—30p.; Paper presented at the Western Political Science Association Conference (Portland, Oregon, March 1979)
Pub Type— Reports - Research (143) — Speeches/Meeting Papers (150)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—College Students, *Communication (Thought Transfer), *Credibility, Elections, *Political Attitudes, *Public Opinion, *Role Perception, *Social Science Research
Identifiers—*Homophily
A study utilizing source credibility and homophily as a basis for analysis was designed to examine the conceptualization of the ideal political candidate. In addition, this conceptualization was examined across selected voter characteristics to determine if it varied on that basis. Questionnaires were administered to 390 college students to measure the perceived credibility, homophily, and dogmatism of the ideal male political candidate. Demographic information was also elicited for each student. An analysis of the results revealed that the ideal political candidate was perceived to be extremely competent, extremely high in character, quite composed and sociable, slightly extroverted, slightly similar to the voters in attitudes and beliefs, and neutral in similarity in terms of background and personality. Furthermore, the findings indicated that this conceptualization did not vary as a function of voter sex, political party affiliation, liberal/conservative tendencies, or dogmatism. (Author/FL)

Audience Methods and Gratifications.
Pub Date—Feb 79
Note—14p.; Paper presented at the Annual Meeting of the Western Speech Communication Association (Los Angeles, California, February 18-21, 1979)
Pub Type— Speeches/Meeting Papers (150) — Opinion Papers (120) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Behavior Theories, *Cognitive Processes, Mass Media, *Models, *Motivation, *Need Gratification, Needs, *Television Viewing
A model of need gratification inspired by the work of K.E. Rosengren suggests a theoretical framework making it possible to identify, measure, and assess the components of the need gratification process with respect to the mass media. Methods having cognitive and behavioral components are designed by individuals to achieve need gratification. Deep gratification occurs when the behavioral act meets the intrinsic requirements of the method and when the method gratifies the need. Thus, if a mother perceives that being a "good mother" includes regulating a child's television viewing experience, she may gain satisfaction from regulation when the act meets the requirements of the method and the method reduces the disequilibrium (the need to feel like a good mother) that energized the drive. Differences between the Rosengren model and this one are: this model includes "drive" as the physical force; this model sees "society" and "individual characteristics" as influences too prohibitive to come within the limited scope of the model; and in this model, the organism is understood to assess the utility of each method, and judgments about the success or nonsuccess of method employment precede the experience of felt gratification or nongratification. A Communicative Analysis of Chekhovian Drama as Portrayed in "The Sea Gull."
Pub Date—Feb 79
Note—13p.; Paper presented at the Annual Meeting of the Western Speech Communication Association (Los Angeles, California, February 18-21, 1979)
Pub Type— Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Characterization, Communication (Thought Transfer), Dialogue, *Drama, *Imagery, Language Styles, *Language Usage, *Literary Conventions, Russian Literature, Theater Arts
Identifiers—*Chekhov (Anton Pavlovich)
The precision and poetic logic of the language used by Anton Chekhov in his plays, particularly "The Sea Gull," can be explored through an analysis of his use of dialogue, characterization, and imagery. Measuring the nature of a relationship, rather than providing a direct literal interchange, the dialogue is both social, when individual expression is subordinated to the various voices of the group, and private, when one of two individuals has an opportunity for lengthy self-expression. Through the language expressed in the play, the characterization develops the interaction between the character's self-presentation and his or her situational context, demonstrates the dissonance that occurs between what a person says and what is known about him or her, demonstrates complementary tendencies within a particular character, and establishes characteristic modes of communication for each individual. Existing within the dimension of time, the imagery possesses communicative immediacy, reveals the spiritual life of a character, and functions as a communicative device when it provides shared meaning with other characters. Family Communication: Insideness and Outsideness.
Pub Date—Nov 78
Note—12p.; Paper presented at the Annual Meeting of the Speech Communication Association (64th, Minneapolis, Minnesota, November 2-5, 1978)
Pub Type— Speeches/Meeting Papers (150) — Reports - Descriptive (141)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Assignments, *Communication (Thought Transfer), Communication Skills, Community Colleges, *Course Content, *Course Objectives, *Family Relationship, Higher Education, Interaction, *Interaction Process Analysis, Skill Development, Speech Communication, Student Development
The family communication course at Arapahoe Community College attempts to acquaint students with the central role of communication in the maintenance and enhancement of family relationships and to equip them with knowledge that can produce a greater flexibility in their communication within their own family units. The course is built around two basic human processes: the process of discovering meaning or identity and the process of establishing relatedness or connectedness with others. Two texts are used, along with instructor-prepared handouts. The major course assignment requires students to write a description of an interaction within their own families; the papers, with identifying information removed, are then given to other students, who write analyses of the interactions described. Finally, students write analyses of their own family interactions. The course has helped the instructor as well as the students to improve family communication skills. (A course syllabus is included.) (GT)

The Role of the University Faculty Parliamentarian.
Pub Date—Nov 78
Note—12p.; Paper presented at the Annual Meeting of the Speech Communication Association (64th, Minneapolis, Minnesota, November 2-5, 1978)
Pub Type— Speeches/Meeting Papers (150) — Guides - Non-Classroom (055)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*College Faculty, *College Governing Councils, *Communication (Thought Transfer), *Governance, Higher Education, Legal Problems, Meetings, *Parliamentary Procedures
Identifiers—*Parliamentarians
The faculty parliamentarian is becoming more important as concern for proper procedure and due process is growing on college campuses. The role of the parliamentarian is entirely advisory. This person should work closely with the presiding officer, be available to members and committees for consulting, and give opinions only when called upon or to correct serious errors in the proceedings. Typical problems facing parliamentarians are: maintaining objectivity while being full members of the assembly they advise, lack of knowledge of the rules of order on the part of members and presiding officers, their overreliance on the parliamentarian, and the directing of nonparliamentary questions to the parliamentarian. Problems can be overcome by providing the parliamentarian with all necessary documents pertaining to the assembly's business, through consultation between the presiding officer and the parliamentarian before a meeting, by providing consultation to committees and members in preparing reports or motions, and by being prepared to play an educative role for members and officers. The Communication Consultant in Organizational Settings.
Pub Date—Nov 78
Note—16p.; Paper presented at the Annual Meeting of the Speech Communication Association (64th, Minneapolis, Minnesota, November 2-5, 1978)
Pub Type— Speeches/Meeting Papers (150) — Guides - General (050)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Business Communication, *Change Strategies, *Communication (Thought Transfer), *Communication Problems, *Consultants, *Organizational Communication
The organizational communication specialist can play a significant role in the communication of change. The consultant must begin by determining who the client is and what the unit of change is to be. Then the consultant must choose which intervention is appropriate and what the focal issue is. Before the consultation, the consultant and client must agree on certain considerations including what changes will occur, clarification of responsibilities, and a timetable. The audit process is one intervention that fits an action research model of organizational development and accomplishes the following: measures information flow, message content, and communicator attitudes; provides attitudinal, perceptual, and behavioral data; and allows for organizational comparisons. Follow-up should assure that management is held accountable for action taken to increase the effectiveness of the organization and should include training others to use some of the consultant's skills. Whatever strategy a consultant uses, it should be purposeful, task-specific, integrated, temporal, adaptable, agreed to by the client, and cost-effective. (TJ)

An Overview of Research on the Use of Videotape in the Courtroom and in Legal Education.
Pub Date—Feb 79
Note—22p.; Paper presented at the Annual Meeting of the Western Speech Communication Association (Los Angeles, California, February 18-21, 1979)
Pub Type— Information Analysis (070) — Reports - Evaluative (142) — Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Civil Liberties, Communication (Thought Transfer), *Court Doctrine, Court Litigation, *Courts, Due Process, Higher Education, Justice, *Legal Education, *Legal Problems, Research, *Videotape Recordings
Identifiers—Communication Research
The literature and research about the courtroom use of videotape recordings and similar technology (such as the picturephone and closed circuit television) reveal conflicting opinions about the efficacy of using such technology in the courts. The major criticism seems to be about recording the testimony of witnesses, editing objectionable testimony, and showing the resulting videotape to the jury; this procedure arouses concern for the constitutional issues of right to confrontation, right to counsel and effective assistance of counsel, privilege against self-incrimination, and due process. Opponents argue that spatial and temporal discontinuities will result from editing procedures; and they wonder who should decide the ordering of testimony on the tape and how lawyers can effectively cross-examine a witness (during a videotape recording) without knowing how a judge will rule on challenges by opposing counsel. The advantages of videotape in trials are the speeding up of the judicial process (reducing courtroom time by a half to a third) and the deletion of inadmissable evidence before such evidence reaches the jury. The court decisions and research so far conclude that the "reel" and the "real" are roughly equivalent, with no impairment of legal rights resulting from videotape use. This positive response and the current use of videotape as a law school teaching aid indicate that major social changes in our view of courtroom justice are forthcoming. (RL)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Communication (Thought Transfer), *Creativity, Higher Education, *Speech Communication, Student Evaluation, *Teacher Attitudes, Teaching Methods
Encouraging creativity is an important aspect of communication instruction. Qualities to be encouraged include sensitivity, flexibility, originality, imagination, perception, and the ability to analyze. A teacher can do this by creating the proper atmosphere, generating ideas, focusing on content, and applying content. Creativity can be evaluated with written or oral comments of praise, by using a dual grading system, or by some other method; however, evaluation must be seen by students as an integral part of all efforts and it must be done consistently if it is to be seen as important. Identifiers—*Communication Research
An experiment was devised to apply role theory to the prediction of communication behavior by observing dominance behavior as a function of gender and attitudes toward sex role stereotypes. Task type was used as an exploratory variable. The hypothesized interaction of gender and sex role attitudes did not occur, and the hypothesis that men would be more dominant than women was also rejected. Women with varying sex role attitudes, however, did exhibit dominance behavior in accordance with role theory predictions. Task type had no impact on the subjects' display of dominance or submission. Descriptors—*Communication Skills, Composition (Literary), *Curriculum Design, *English Curriculum, *English Instruction, Higher Education, *Language Arts, Listening Skills, *Preservice Education, Reading Instruction, Speech Communication
Although English teachers must spend 40 to 60% of their teaching time in developing the listening, composition, reading, and speech skills of their students, most college English programs allow only 8% of the professional course time for teacher preparation in these skill areas. Even in those colleges that offer a language arts major, the majority of course requirements are in literature. To provide prospective teachers with a central view of language, the communication arts courses must be brought together under the supervision of one department, and a new kind of major in communication arts must be devised. This major would include the following required courses: English courses in the rhetoric of oral and written composition, the understanding of language structure, and the understanding of literary genre; speech courses that focus on the oral interpretation of literature, listening debate and discussion, acting, and directing; developmental and remedial reading courses; a course on the psychological foundation of reading; and an introduction to journalism. Descriptors—*Debate, *Ethical Values, Higher Education, *Philosophy, *Speech Communication, *Student Teacher Relationship, *Teacher Role
Building a strong college debate program begins in the classroom where the coach can help young people engage in comprehensive research of contemporary findings, integrate the findings into meaningful analysis, develop argumentative skills, think on their feet, and do the best job of debating possible. A coach must also communicate to debaters that while the skills and techniques developed in college should not fall into disrepair, graduation is the time when educational debate is finished, the game is over. In addition to teaching ethics as criteria for debate, a coach can impart a philosophy of ethics that can be applied to the real world concerning one's sense of duty and obligation toward himself or herself as well as to others, to know as much of the truth as can be discerned, to seek arguments in defense of propositions that will lead to the harmonious satisfaction of human wants and needs, and to meet the tests of logical adequacy. Speakers must learn to study their relationships with their audience, assume responsbility for what they advised, welcome diversity of opinion, and not justify the means by the goal. (TJ)

Descriptors—*Behavioral Science Research, *Clothing, *Communication (Thought Transfer), Interaction, *Interpersonal Attraction, *Perception, Reinforcement, Sex Differences
Identifiers—*Communication Research
Three distinct theoretical explanations for the effect of attire on aiding behavior were examined in a study. The reinforcing value of attire itself predicted that well-dressed persons would always receive more assistance than poorly dressed persons. The reinforcing value of perceived similarity predicted that similar persons would receive more assistance than dissimilar persons. Balance theory predicted that dissimilar persons would receive more assistance than similar persons. Seventeen female college students who were well-dressed or poorly dressed approached both males and females in an airport or bus station asking for a dime to complete a telephone call. Well-dressed students received more money at the airport; poorly dressed students received more money at the bus station. The results were interpreted as support for the similarity hypothesis. Descriptors—Academic Achievement, Anxiety, *Communication (Thought Transfer), *Educational Programs, Higher Education, *Interaction Process Analysis, Social Relations, *Speech Communication
Identifiers—*Communication Apprehension, *Conversation Skills
A conversational skills training program for persons who admitted discomfort in most interpersonal situations and who found it difficult to initiate and maintain conversation was designed to teach these conversational behaviors: asking questions, expressing disagreement and agreement, paraphrasing, initiating conversations, giving compliments, and asking for behavior change. Instruction in each conversational behavior was conducted according to a curricular sequence that involved self-monitoring, observation of models, covert rehearsal, behavior rehearsal, and practice of target behaviors. Although the subjects were evaluated consistently throughout the program, a need for more systematic program evaluation was indicated. (References and classroom materials are appended.) (MAI)

Descriptors—*Film Criticism, *Film Industry, *Film Production, *Films, *Film Study, Higher Education, Mass Media, Photography, Popular Culture, Production Techniques
More than 5,400 entries are included in this first attempt to cite and classify all English language books, monographs, and dissertations about film that appeared from 1940 to 1975. Intended as a source of information about existing film books and as a tool for researching available literature on any film topic, the bibliography uses ten basic categories for classifying the literature: reference; film technique and technology; film industry; film history; film classifications; biography, analysis, and interview; individual films; film theory and criticism; film and society; and film and education. Each of these major sections is further subdivided as necessary to increase the precision of classification. Where title and classification do not make the contents clear, annotations are provided. Works that overlap categories are cited more than once. Name and title indexes are included. (RL)

EDRS Price - MF01/PC01 Plus Postage.
Descriptors—American Culture, *Black Achievement, Black Culture, Black Studies, *Jazz, *Musical Composition, Musicians, Music Techniques, Racism, *Rhetoric
Although the success of black jazz has been limited by its lack of recognition in the white-controlled music industry, its rhetorical development as an expression of black consciousness can be traced from the bebop of the 1940s and early 1950s, through the hard bop and free jazz of the 1960s, to the jazz orientation of the disco circuit in the 1970s. The bebop movement represented a musical protest against the image of jazz as simple folk music and expressed an awakening of racial identity in positive terms that offered an alternative to the mainstream of musical expression. Reflecting the rising tide of black consciousness, hard bop with its accent on hard blues, and free jazz with its emphasis on African rhythms and non-Western forms, both celebrated black culture in an intellectual and emotional manner. In the 1970s, many avant-garde artists currently perform on artist-owned labels, thereby maintaining greater control over their material while their music remains focused on third world themes and musical influences. In addition to valid allegations of racism in the music industry, other factors that influence the success or failure of avant-garde jazz include market economics, potential audience, and the industry's promotion of "surefire winners." Descriptors—Budgets, Case Studies, Court Litigation, *Educational Finance, Equalization Aid, Federal Aid, *Federal Programs, Finance Reform, Financial Problems, State Aid
Identifiers—*Atomic Energy Commission Community Act, *New Mexico (Los Alamos), State Aid Formulas
The Los Alamos schools obtain support from a combination of local, state, and Department of Energy funds mandated by the Atomic Energy Commission Community Act. Each year the Los Alamos schools prepare three budgets, and during any week the schools may work directly with all three levels of government concerning funding. In 1974 the state of New Mexico legislated an equalizing method of funding that resulted in Los Alamos receiving considerably less than before. The Los Alamos schools in response sued the state for allegedly violating the supremacy clause by cancelling the effects of the Atomic Energy Commission Community Act. The circuit court decision ruled in favor of the state. Los Alamos anticipates continued payments from the Department of Energy, and an attempt will be made to circumvent the adverse effects of the current state aid formula. Clearly, school finance problems are increasing in complexity. In addition, equalization programs should be amended to stop rewarding schools that exhibit lower quality work and poor performance. Rather, schools doing a good job should be rewarded. Finally, it is the community rather than the state or federal government that can provide a strong education plan for youth. Questions and answers concerning the topic are included. (Author/JM)

Identifiers—Role Clarification, *School Planning Evaluation Communication System
Made up of five components, the School Planning, Evaluation, and Communication System (SPECS) is an approach to program planning and evaluation applicable to all instructional and noninstructional programs and activities. As such, it focuses on outcomes, processes, and inputs in a continuous cycle of planning, evaluation, and replanning. As well as being applicable to individual programs, SPECS can be used as a districtwide design for program assessment and development that compares district program outcomes with broad community goals. Successful implementation of SPECS includes several months of preparation, a long-term strategy, a multiyear master plan, an in-district coordinator, adequate provision of time for staff member participation, sufficient inservice training, and adequate resources. A three-phase series of activities has been developed to facilitate the implementation process. SPECS produces immediate effects such as informational products and long-term effects such as more systematic program planning and evaluation, a more systematic view of the school and classroom, greater efforts to individualize instruction, and increased role clarity. This manual is intended to assist facilitators helping educational organizations plan and implement the School Planning, Evaluation, and Communication System (SPECS). The first section describes each component of SPECS and includes information about documents and data necessary for implementing the system. Section Two provides actual activities to be used in beginning implementation of SPECS. This section includes one district's master plan and suggestions for developing such a plan. The third section includes an outline for an orientation workshop, a checklist for the consultant, and a sample workshop evaluation form. A matrix chart listing SPECS materials and their use and intended users is also included. This third section also contains SPECS materials as modified by school personnel and a set of SPECS terminology designed to ensure that the consultant and organization personnel are using the same terminology. Section Four contains tips about what to do and what not to do that were gleaned by the development team during the field test. The final section presents ideas from consultants and field-test site personnel present at the final SPECS field-test conference. (Author/JM)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors—Educational Objectives, Elementary Secondary Education, Guides, Organization, Program Development, Program Evaluation, *School Districts, *Systems Analysis
Identifiers—*School Planning Evaluation Communication System
The School Planning, Evaluation, and Communication System (SPECS) is an overall design for districtwide program assessment and development. It is both a way of interrelating planning and evaluation of individual programs and a way of comparing the outcomes of all district programs with the district's community-defined educational goals. Component One of the five SPECS components calls for a descriptive systems analysis of the school district and has two major objectives. The first is to collect and display information about a district's current functions, activities, and programs. The second is to specify the levels of programs for which cost data and program outcome and process data will be documented. The three ways to implement Component One are through a full systems analysis of all programs, functions, and activities; a limited function analysis of the program structure; and a function analysis based on a fiscal chart of accounts. This implementation booklet on Component One is designed to be used in conjunction with the other four components of SPECS or alone as a discrete set of activities to be undertaken by a school district. The School Planning, Evaluation, and Communication System (SPECS) is an overall design for districtwide program assessment and development. It is both a way of interrelating planning and evaluation of individual programs and a way of comparing the outcomes of all district programs with the district's community-defined educational goals. Component Two of the five SPECS components is a program budgeting and accounting system that provides a way to collect and analyze financial information about actual operating programs. This booklet is designed to assist school district personnel in implementing a program budgeting and accounting system from line item to program format. For districts interested in a more comprehensive approach to developing management information, this booklet can serve as a guide to the financial accounting portion of the district's programs. The booklet may be used either alone to install program budgeting and accounting procedures or in conjunction with the remaining SPECS implementation booklets that detail procedures for implementing the other four components of SPECS. The booklet attempts to answer key questions, sets down 14 steps toward implementation, suggests other applications of the system, and lists benefits and problems. (Author/JM)

Identifiers—*School Planning Evaluation Communication System
The School Planning, Evaluation, and Communication System (SPECS) is an overall design for districtwide program assessment and development. It is both a way of interrelating planning evaluation of individual programs and a way of comparing the outcomes of all district programs with the district's community-defined educational goals. Component Three of the five SPECS components focuses on the application of SPECS to instructional program planning and evaluation. Section One discusses the underlying rationale of the component, major objectives, and its relation to other components. The second section outlines the process a district might use in preparing for implementation. Section Three presents alternative formats for documenting instructional program's desired and actual outcomes, processes, and inputs. It includes descriptions and simulated examples of both the SPECS documents and several comparable documents developed or used during the past six years by teachers in the SPECS field-test sites. Section Four explores some of the issues related to combining, summarizing, and using data from multiple instructional programs to improve curricular scope and sequence. The final section of the booklet describes some of the potential benefits and spin-off effects of the SPECS approach to instructional program planning and evaluation. (Author/JM)

The School Planning, Evaluation, and Communication System (SPECS) is an overall design for districtwide program assessment and development. It is both a way of interrelating planning and evaluation of individual programs and a way of comparing the outcomes of all district programs with the district's community-defined educational goals. Component Four of the five SPECS components is the monitoring subsystem of SPECS and is designed to solicit from the district's citizens their views of preferred district programs. This implementation booklet for Component Four describes the rationale behind the component, discusses the challenge of developing goal statements that can guide program planning and evaluation, and raises a series of nineteen questions about the content and processes of community-based goal definition. Designed for use as a kind of workbook, the booklet can help a group in a school district develop an initial description of their strategy for involving community representatives in broad goal definition. A companion booklet describes in detail how personnel in a particular school district developed and implemented their own strategy for goal definition. (Author/JM)

Identifiers—*School Planning Evaluation Communication System
The School Planning, Evaluation, and Communication System (SPECS) is an overall design for districtwide program assessment and development. It is both a way of interrelating planning and evaluation of individual programs and a way of comparing the outcomes of all district programs with the district's community-defined educational goals. This companion booklet to the Component Four implementation booklet describes in detail how personnel in a particular school district successfully developed and implemented a strategy for involving representatives of their community in identifying broad educational expectations, including the processes used to plan the strategy, the activities carried out during implementation, and the resulting product. Strategy planning included three preliminary planning sessions, identification and organization of a steering committee, and development of a detailed goal definition strategy. Implementation activities included meetings of a community advisory committee, administration of an opinion poll, and use of response forms. The resulting product of these activities is the completed hierarchy of community-defined educational goals reproduced here. Based on actual experiences in South Lane School District (Oregon), the strategy is presented here to illustrate one of many possible approaches to implementing Component Four. (Author/JM)

Identifiers—Oregon, *School Planning Evaluation Communication System
The School Planning, Evaluation, and Communication System (SPECS) is an overall design for districtwide program assessment and development. It is both a way of interrelating planning and evaluation of individual programs and a way of comparing the outcomes of all district programs with the district's community-defined educational goals. Component Five, the final SPECS component, is the needs assessment or policy-making subsystem of SPECS. This implementation booklet describes the rationale for the component and discusses the assessment of the achievement of the district's community-defined goals. It describes in detail how a school district's board of education might go about identifying the most critical discrepancies between program outcomes and community expectations and the ways in which such discrepancies might be solved. The booklet discusses the method one school district used to answer its own needs, including the formation of a task force and the task force's summary of district programs and identification of the gaps and matches between the reported program outcomes and goals as defined by professionals and the community. As an example of Component Five activities, the mathematics portion of these activities at one elementary school is included. (Author/JM)

Information Systems Plan.
Tulsa Public Schools, Okla.
Pub Date—Oct 78
Note—58p.; Prepared by the Information Systems Task Force; Pages 31-40 may be marginally legible
Pub Type— Reports - Evaluative (142)
EDRS Price - MF01/PC03 Plus Postage.
Descriptors—Computer Oriented Programs, *Electronic Data Processing, Elementary Secondary Education, *Information Needs, *Information Systems, Interviews, Program Planning, Records (Forms)
Identifiers—*Tulsa Public Schools OK
A task force sought to determine the information needs of the Tulsa Public Schools (Oklahoma) by studying goals of the school district, identifying all processes necessary for operation of the school system, and conducting interviews with 48 key members. A detailed information systems matrix was constructed to show the interrelationships between departments within the organization, the process essential to the operation of the schools, classes of data required, and necessary information systems. Among nine conclusions reached by the task force was that a district crisis in data processing appears imminent. The "application approach" being followed seriously restricts access to data, and there is excessive manual processing of data. Also, present data processing equipment, systems, and staff are inadequate. The task force made 12 recommendations, including that data processing capabilities should be upgraded immediately and an integrated data base developed; a long-term commitment must be made to the project; priority should be given to data bases in student, financial, and personnel records; and early emphasis should be given programs that directly serve students. A lengthy appendix discusses methodology, process definitions, current systems review, interviews, analysis of information systems needs, the information systems network, and risk assessment and prioritization. High School '77: A Survey of Public Secondary School Principals.
National Inst. of Education (DHEW), Washington, D.C.
Pub Date—Dec 78
Note—107p.
Pub Type— Tests/Questionnaires 160) — Reports - Research (143)
EDRS Price - MF01/PC05 Plus Postage.
Descriptors—Administrator Attitudes, Bureaucracy, Charts, Educational Problems, Educational Research, High School Curriculum, High School Organization, *National Surveys, *Organizational Effectiveness, Principals, *Program Effectiveness, *Secondary Education, Statistical Data, Tables (Data)
This report gives the results of a 1977 survey of secondary school principals by the National Institute of Education, Washington D.C. The purpose of the study was to empirically describe high school organization and programs and how they are affected by federal, state, and district characteristics. The results of the survey counteract many existing criticisms of today's high schools. For example, the extent of individual attention and organizational flexibility appear to be broader than is commonly thought. In addition to offering the basics, high schools provide considerable program diversity. The findings provide data to help administrators make more informed decisions about the problems high schools face in the areas of organization, man-

agement, and finance. (Author/LD)

Descriptors—Administrator Guides, Affirmative Action, Cocurricular Activities, Elementary Secondary Education, Personnel Policy, Principals, Questionnaires, Recruitment, *Salary Differentials, *Sex Discrimination, Statistical Data, Student Attitudes, Tables (Data), Teacher Attitudes, *Teacher Salaries

Identifiers—Delaware

The major goal of this report was to minimize complaints due to discrepancies in the salary schedule for male and female sponsors of extracurricular activities at Caesar Rodney School District, Delaware. The four objectives were (1) to develop a salary schedule for teachers of extracurricular activities, (2) to develop a guide for the recruitment of sponsors and coaches, (3) to develop criteria to serve as a basis for the district's collective bargaining process, and (4) to provide evidence of affirmative action on the part of the district. Questionnaires were distributed to students and teachers to assess the existing salary schedule. A task force composed of teachers and administrators developed evaluative criteria that provided a rating scale matrix from which salaries were established. A guide for the recruitment of sponsors was distributed to all district principals and department heads. Principals were able to use the guide to provide objective information to prospective sponsors, thus assuring mutual understanding and a minimum of complaints. A lengthy appendix provides data on such things as needs assessment, recruitment, results of the questionnaire, evaluation of criteria, and a copy of the administrator guide. (Author/LD)

Identifiers—California, State Mandates

State mandates–constitutional, statutory, or administrative actions that either limit or place requirements on local governments–are often opposed because they are not reimbursed or because they restrict the decision-making authority of local government officials. This report of the Advisory Commission on Intergovernmental Relations examines the state role in mandating local actions. It also highlights the experience of one state, California, and explains the commission's eight-point case for its policy of deliberate restraint. An extensive appendix lists state mandates that govern local personnel, police, fire, environmental protection, education, and social services. (Author/LD)

Identifiers—*Ontario

The basis for this report is a large research project undertaken by The Ontario Institute for Studies in Education (OISE) for the Ontario Ministry of Education from July 1974 through December 1975. It also uses evidence from two earlier small studies of OISE, from the academic years 1972-73 and 1973-74. The project was designed to be the main research evidence of the Ministry Task Force on Dropouts. The data analyzed in the report are from the sample of 26 school systems drawn from the 9 regions of the province that contain a total of 79 systems. The within year dropout rate for the sample as a whole was 20,027 or 8 percent. Information obtained from the systems about these dropouts included region, age, sex, month of dropout, achievement level, and program. In addition, questionnaires were sent to all the dropouts and returns were received from 8,141 or 41 percent. Finally, telephone interviews were conducted with 423 dropouts in the sample. The task force mandate was to look into the number of dropouts, who they were, where they came from, why they dropped out, what happened to them, and what were their future plans. The aim was to cover all Ontario secondary school students who failed to complete their courses of study as expected. (Author/MLF)

Identifiers—*Illinois

The purpose of this paper is to outline some policy options that might be considered by decision-makers in Illinois as they struggle with school finance in adequately funding the public schools, but also bringing about property tax relief. First the report looks at ways of attaining property tax relief through the distributive side by discussing state dollars to aid local school districts offset inflation, for equity purposes, and for property tax replacement. Then the report describes ways of attaining property tax relief through the options on the revenue side. Options discussed include freezing property tax levies, property tax reductions, property tax assessment, and property taxes not allowed to exceed a standard percentage of an individual's income. A general strategy is outlined for attaining property tax relief without at the same time reducing the level of educational services in the school districts. (Author/MLF)

Descriptors—*Educational Finance, Elementary Secondary Education, *Inflation (Economics), *Property Taxes, School District Spending, *State Aid, State Legislation, *State School District Relationship

Identifiers—*Illinois

The current method of financing education in Illinois is explained and reasons are advanced for changing it to afford property tax relief by a more equitable formula. The proposed plan and the arguments supporting it are then offered. The plan increases the state basic support level per student to $1,400, and the state assumes the full cost of the previous year's inflation on the basic $1,400 program. When school districts exceed the state-used rate in step one, the state assures those districts that their tax rate will at least get the dollars that the average of all like districts in the state would receive. Property tax relief would be achieved by replacing part of a property tax with alternative tax sources. It is suggested that the law authorizing this require the local collection form to calculate the tax bill, reduce any taxes that the bill reflects between 2 percent and 3 percent, and show on the form that the levy made by the board of education has been paid to the local district and that the taxpayer's bill was reduced by the amount of such taxes levied, but paid by the state. The tax reduction would be obvious and the prerogative of the local board would remain. (Author/MLF)

The hearings contain an interim report on federal paperwork in the area of education by the Commission on Federal Paperwork. The commission's mandate was to develop ways of reducing paperwork associated with federal information demands while recognizing legitimate program planning and administration data needs. The commission examined the testimony of many witnesses at its hearings, reviewed letters, interviewed Congressional committee and agency staffs, and analyzed a substantial

number of hearing records, government reports, and special studies. Two major respondent groups devoted special efforts to supply information about current reporting requirements; indepth studies were made at two institutions of higher education; and a task force studied federal reporting requirements for institutions of higher education and made recommendations for their consolidation. Problems selected are discussed from the standpoint of grants and contracts, student financial aid, nondiscrimination, and management controls. In each of these areas, salient problems are stated, analyzed, and recommendations are made. The next section contains a prepared statement from Carolyn Warner, Superintendent of Arizona State Department of Education, explaining how federal paperwork has been reduced by almost 60 percent in Arizona. The final section of the hearings contains testimony and prepared statements from several members of Congress and a number of individuals representing schools and organizations. (MLF)

Identifiers—Congress 95th, *Impact Aid

This document contains testimony, prepared statements, letters, and supplemental materials submitted during six days of hearings held in June, 1977. Under consideration was a five-year extension of the Impact Aid program that compensates school districts for educating children who are in an area as a result of federal activities. Primarily, the program compensates for the loss in tax base of federal property. William L. Stormer, program director, reviewed the status of the Impact Aid program, especially as it was amended by the Education Amendments of 1974, and testified concerning the complexities of the law and the resulting major administrative problems. James D. Martin testified on the findings of an assessment by the General Accounting Office of the Impact Aid program. Subsequent testimony was from parents and officials from impacted area schools concerning their problems with suggestions for amendments to the law. Also discussed were disaster assistance provisions, and schools totally paid by the U.S. Office of Education under the Impact Aid laws but which are administered by other federal agencies, with special emphasis on problems existing at Fort Buchanan in Puerto Rico. Further testimony focused on the provision of the Impact Aid laws affecting children from federally assisted low rent housing units, handicapped children of military parents, and Indian children. EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Academic Achievement, Achievement Rating, Charts, *Class Size, *Comparative Analysis, Educational Research, Elementary Secondary Education, Literature Reviews, *Statistical Analysis, Statistical Data, Statistical Studies, Tables (Data)

The first in a series of reports by the Far West Laboratory for Educational Research and Development, this report demonstrates the positive relationship between reduced class size and pupil achievement. The researchers collected about 80 studies that yielded over 700 comparisons of the achievement of smaller and larger classes. The results showed that as class size increases, achievement decreases. For example, the difference in being taught in a class of 20 versus a class of 40 shows an advantage of 6 percentile ranks. The relationship between class size and achievement is slightly stronger at the secondary level, but it does not differ appreciably across different school subjects, levels of pupil IQ, or several other demographic features of classrooms. The report suggests that schools cannot afford the consequences of maintaining large classes all the time and must find ways to finance smaller classes for some pupils or for all pupils for part of the school day. Identifiers—45 15 Plan, Virginia (Prince William County)

One objective of this study was to discover whether education of students on the 45-15 plan differed from that provided on the traditional schedule. Another objective was to assess the attitudes of the educators, parents, students, and business people of Prince William County toward the two plans. The educational evaluation compared, across calendars, indicators of student achievement and quality of education such as test scores, grades, failure rates, attendance, extracurricular activities, course offerings, pursuit of further education by high school graduates, and summer school attendance. Results showed that education afforded by the two plans did not differ, but attitudes about them were considerably polarized. Negative aspects of the 45-15 plan included potential problems involving student use of time outside of school, vacations and time spent with the family, and opportunities for part-time jobs. Identifiers—*Management Implications of Team Teaching, Project MITT

As a companion study to the primary analysis of the Management Implications of Team Teaching (MITT) study, the unitized schools in this study were examined alone for predictors of differential success in implementing the innovation. This report briefly describes how the MITT staff handled a problem in the companion study of reducing the number of predictor variables while still retaining as much information as possible about all of them. They did so by using multiple linear regression to combine conceptually related variables into clusters or blocks. Once the researchers had identified a group of variables that logically comprised a cluster, they regressed the most logical dependent variable in the group (if that were possible to determine) into the others. For each school, they multiplied the resulting raw score regression weights times the obtained score on their respective variables to produce a predicted dependent variable score; conceptually, such a predicted score reflects all the information shared among the variables in the block. Identifiers—*Management Implications of Team Teaching, Project MITT

This paper discribes the analysis of data in the Management Implications of Team Teaching Project (MITT). It touches on the interviews conducted with teachers and principals, presents the breadth of information obtained in the questionnaire, and explains how the data were aggregated and how issues were grouped. Information collected in the interview focused on how decisions were made in schools in a number of areas. The task was to develop indices by which decision-making in each school could be characterized. The researchers formulated nine types of control structures on the basis of the interface between the "input population" (who made the decision) and the "output population" (who were affected by the decision). The evidence gathered was combined into groupings to reflect components of the instructional program about which decisions were made. Profiles were clustered through multidimensional scaling, internal analysis was conducted resulting in recombination of the clusters, and a complex external analysis was conducted. (JM)

Reducing the Variations in Per Pupil Operating Expense Among New York State School Districts by Enlarging the Tax Base: A Regional Tax Base Model.
New York State Div. of the Budget, Albany.
Pub Date—Sep 78
Note—126p.
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC06 Plus Postage.
Descriptors—Educational Finance, Elementary Secondary Education, *Equal Education, *Equalization Aid, *Finance Reform, State Aid, Tables (Data), Tax Allocation
Identifiers—Boards of Cooperative Educational Services, *New York, State Aid Formulas
Uneven access to taxable real property wealth currently produces wide disparities in per pupil expenditures among New York state school districts. The state's operating aid formula does not compensate for the inequities in low wealth districts having an operating expense level of more than $1,500 per pupil. In the last decade several proposals were suggested to equalize school district fiscal resources. Although school district consolidation has tended to reduce the variations in per pupil wealth, per pupil operating expenditures, and tax rates, large differences continue. The money that could be obtained from repeal of the minimum guarantees provided for the state's wealthiest districts is inadequate to equalize expenditures. Data presented here demonstrate that averaging per pupil wealth and per pupil expenditures on the basis of Boards of Cooperative Educational Service (BOCES) regions reduces the range in wealth and per pupil expenditures, thus justifying investigation of a regional tax base model. Variations in district spending for districts within a sample BOCES region were examined using both current law and the redistribution of 5 mill, 10 mill, and 15 mill regional tax levies. The least variation in per pupil expenditures occurred with a 15 mill regional tax distributed equally among school districts located with the BOCES region. (Author/JM)

Measuring the Wealth of School Districts for the Apportionment of Aid to Public Schools in New York State: Full Valuation vs. Personal Income.
New York State Div. of the Budget, Albany.
Pub Date—Aug 78
Note—114p.
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC05 Plus Postage.
Descriptors—Elementary Secondary Education, *Equalization Aid, *Finance Reform, Income, Property Taxes, *State Aid, Taxes
Identifiers—Full Valuation, *New York, State Aid Formulas, Valuation Measures
The purpose of this study was to assess the merit of using personal income in the determination of a school district's fiscal capacity for the apportionment of New York state aid. Both personal income and full valuation of real property suffer from technical weaknesses, but improvements in the data are possible if the state is willing to underwrite the cost. Calculations replacing full value of real property with 1970 personal income data produced several changes in state aid allocation. The state's five poorest districts, five big cities, and other central cities would experience a drop in formula aid. Conversely, the five wealthiest school districts with pupil populations over 500 and the suburban areas would receive less aid. If 1976 New York State taxable income is used instead of 1976 full valuation as the wealth measure, similar shifts occur. Because of limitations with the census data, findings are suggestive, not definitive. Personal income will not be acceptable as a total substitute for full valuation as the measure of a school district's wealth. Before personal income is used in a composite wealth index for the apportionment of aid, viable combinations need to be examined within several alternative formula options. (Author/JM)

Descriptors—Achievement, *Motivation, *Objectives, Organizational Theories, *Organizations (Groups), Research Reviews (Publications), Rewards, *Task Performance, Work Attitudes
Identifiers—*Goal Setting
Twenty-seven studies on goal setting were reviewed to evaluate the practical feasibility of goal setting in organizations and to evaluate Locke's theories of goal setting. The organizational research reviewed provides strong support for Locke's proposition that specific goals increase performance and that difficult goals, if accepted, result in better performance than do easy goals. The field studies do not provide relevant evidence concerning Locke's propositions that goal setting mediates the effects of participation, monetary incentives, and performance feedback. The laboratory study concerning monetary incentives produced findings contrary to Locke's theory. Field research is needed that is designed to test the mediation propositions and to investigate the possibility that participation, monetary incentives, and feedback affect performance independently of goal setting or interact with goal setting. Limiting conditions for effective goal setting may be complexity of the job and performance measures, degree of managerial attention and support, interdependence of jobs, and individual traits of employees. Descriptors—Achievement, Competition, Employer Employee Relationship, *Incentive Systems, *Merit Pay, *Motivation, Organizational Theories, Organizations (Groups), *Personnel Evaluation, Rewards, Self Esteem, *Task Performance, *Work Attitudes
The basis for most problems with merit pay plans is that the great majority of employees believe their own job performance is above average. Even a well-administered merit pay plan cannot give positive feedback to this majority. The likely consequence is that the employee's self-esteem is threatened. Often one copes with such a threat by demeaning the importance of the job or by derogating the source–that is, disparaging the boss or management in general. Merit pay forces employees to compete for rewards, thus increasing hostility and decreasing communication between employees. In addition, merit pay emphasizes the direct relationship between job performance and dollar rewards, thereby detracting from intrinsic motivation in the work itself. A system that would switch the emphasis to rewards for self-development and opportunities for greater responsiblity appears to serve both individual and organizational goals in a more effective manner. This paper discusses ways managers can motivate their employees to work and at the same time to increase their performance. Two theories of motivation–Vroom's theory and Atkinson's theory–focus on the use of extrinsic and intrinsic rewards respectively. A managerial strategy that combines the best of both intrinsic and extrinsic approaches to motivating employees is desirable. When a person is intrinsically motivated, he or she engages in an activity to feel competent in relation to the activity. There are no external rewards as found in extrinsic motivation. For example, jobs should be structured to let employees participate in decision-making. At the same time, extrinsic rewards should be administered so that the most effective performers receive the most rewards. Thus the challenge to managers is to make rewards directly contingent upon performance without decreasing intrinsic motivation. (Author/LD)

Litigation on Rights of the Handicapped in Education.
Pub Date—3 Feb 79
Note—11p.; Paper presented at the Inter-University Conference (Columbia, Missouri, February 1979)
Pub Type— Legal/Legislative/Regulatory Materials (090) — Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Cocurricular Activities, *Court Litigation, Due Process, Elementary Secondary Education, *Equal Education, Equal Opportunities (Jobs), Equal Protection, Expulsion, *Handicapped, Higher Education, *School Law, Student Rights
Identifiers—*Education for All Handicapped Children, Fourteenth Amendment
The constitutional basis for laws concerning rights of the handicapped lies in the Fourteenth Amendment's equal protection and due process clauses. Recent litigation has been based on Section 504 of the 1973 Rehabilitation Act, P.L. 94-142. Significant court decisions affecting education have been handed down in five areas. Regarding right to free education, the courts have held that public schools cannot exclude children from school nor charge them extra tuition for special programs. Regarding right to an appropriate education, courts have held that the schools must identify all handicapped students and provide them an appropriate education. In the area of disciplinary exclusion, cases challenging the expulsion of handicapped students have generally ended in requiring schools to offer alternative placement to the students. Regarding the right to the least restrictive alternative, courts have maintained that a handicapped child cannot be excluded from the regular classroom or from regular extracurricular activities if otherwise qualified. In a case regarding discrimination against handicapped school employees, the Third Circuit Court upheld a lower court decision that struck down a school district policy of not hiring blind persons. These cases appear to produce more questions than answers, especially concerning the recourse available when rights are denied. (Author/JM)

Descriptors—*Classes (Groups of Students), *Classroom Research, Educational Change, Educational History, Educational Philosophy, Educational Research, Elementary Secondary Education, *Grouping (Instructional Purposes), *School Organization, Self Contained Classrooms
Identifiers—Calvinism, Industrial Revolution, Scotland (Glasgow)
This study reports a preliminary investigation into the origins, assumptions, and practices of one of the most widespread innovations in schooling: the classroom system. Material for the historical study is drawn from sources in Glasgow, Scotland, where the combined influences of Calvinist theology, Scottish-French philosophy, and the industrial revolution created a solution to the emerging problems of mass schooling, which in the years that followed, was exported all over the world. The theoretical underpinning of the report is that the classroom system, like all educational systems, can best be studied as a form of production tied into the general

productive systems of society. That is, it is a social and ethical mechanism for realizing, transforming, and distributing the cumulated experience of humanity. (Author/JM)

Descriptors—Behavior Problems, Counseling Programs, *Discipline, Discipline Policy, Discipline Problems, *Program Design, *Program Development, School Policy, *Suspension

Identifiers—*Alternatives to Suspension

Because of widespread disillusion with suspension as a discipline procedure, school officials are developing inschool alternative programs. Institution of such a program must begin with reflection about how current disciplinary programs are succeeding or failing. The primary purposes of the program must include helping the child and identifying the root problems of disciplinary offenses. The referral must be sufficiently documented, afford due process rights, and last no more than three days without a review. The alternative facility must be removed from normal traffic patterns and provide appropriate study materials. The carefully selected staff must include individuals who want to work in the program with children who have problems and who can relate well with problem youngsters of different classes and cultures. The program must be well understood by the regular faculty and parents. The program must include high quality academic instruction and individual or group counseling that aims to involve the student in confronting and solving the reasons for the root problem. The program must have access to the school system's support services and provide a mechanism for following up the student's subsequent progress. Finally, the alternative must be carefully monitored and evaluated. (Author/JM)

Health and Safety in the School Environment. A Manual of Recommended Practice.

Center for Disease Control (DHEW/PHS), Atlanta, Ga.

Report No.—DHEW-CDC-78-8368

Pub Date—Sep 78

Note—85p.

Pub Type— Guides - General (050)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—*Educational Facilities, *Environmental Criteria, Facility Guidelines, *Health Conditions, Physical Environment, *Safety

This manual emphasizes the health relationships in the physical school environment and provides environmental criteria by which existing or planned facilities can be evaluated. Individual chapters deal with school health programs; planning for new schools; school site selection, building plan, and plan review; water supply; plumbing; sewage disposal; food service facilities and operation; illumination; thermal environment; acoustics; injury control; solid waste management; anthropod and rodent control; general housekeeping and maintenance. Appendix A lists publications on state guidelines and regulations. Appendix B offers recommendations concerning design of buildings for energy savings. Appendix C gives the American National Standards Institute specifications for making buildings accessible to the physically handicapped. This manual should prove useful to all persons concerned with providing healthful schools, including parents, teachers, administrators, planners, and health service workers. (Author/LD)

Descriptors—*Administrative Personnel, Case Studies, *Communication (Thought Transfer), Communication Skills, Intermediate Administrative Units, Organizations (Groups), *Persuasive Discourse

Identifiers—*Northwest Tri County Intermediate Unit PA

This study examines the following question: Under what circumstances, for what purposes, and in what forms does the head of the state and federal liaison services of the intermediate administrative unit studied employ rhetorical strategies to gain compliance from his associates? This document presents information on the justification for the study, the intermediate unit studied, the author's internship with the unit, and the author's methodology before presenting seven case observations. In the case observations, the author examines the goals of the speaker in the given case and how these goals concord with organizational goals; the nature of the target audiences; the speaker's oral behavior, showing particularly how he altered such things as his style, content, and delivery to meet situational needs; and the author's assessment of whether the speaker adapted consciously or unconsciously to the audience and situation. This document should be regarded as an exploratory study seeking to describe and understand persuasive talk used in a set of conditions peculiar to the type of voluntary organization the intermediate unit typifies. Identifiers—*Asbestos, *Toxic Materials

This petition requests the Environmental Protec-

tion Agency to promulgate regulations in compliance with section 6 of the Toxic Substances Control Act to control asbestos emissions from spray-on materials containing 1 percent or more asbestos that has been applied in public school buildings for insulation, fireproofing, decorative, or other purposes. Specifically, the petition requests the administrator of the agency to establish a program no later than March 1, 1979 that will identify all public schools in which these materials have been used. It also asks the administrator to require the manufacturers and processors of such fiber to take appropriate corrective action to eliminate the emission of asbestos fibers from surfaces that have been sprayed with it. The petition presents evidence that asbestos is a potent carcinogen capable of inducing lung cancer in the human population. (Author/LD)

Descriptors—*Administrator Responsibility, *Administrator Role, *Assistant Principals, Literature Reviews, Principals, Questionnaires, Secondary Education, Statistical Analysis, Statistical Data, Tables (Data)

Identifiers—Minnesota

The purpose of this study was to investigate the duties and responsibilities assigned to assistant principals in select Minnesota secondary schools. The objectives were to determine (1) the degree of responsibility delegated to the assistant principal for each duty assigned, (2) the level of authority involved in the completion of the delegated duty, (3) the degree of importance the duty had to the proper functioning of the school, as viewed by the respondents, (4) differences evident between the roles of assistant principals in junior and senior high schools, (5) differences evident between the roles of assistant principals in urban, rural, and suburban schools, and (6) differences in the perceptions of principals and assistant principals relative to the responsibilities, authority, and importance of the duties delegated to the assistant principal. The study concluded that assistant principals in Minnesota secondary schools are involved in practically all aspects of the administrative process and that most of their duties involve shared responsibility. Descriptors—*Administrator Attitudes, *Budgeting, *Case Studies (Education), *Decision Making, Elementary Secondary Education, Literature Reviews, Program Descriptions, Questionnaires, *Resource Allocations, School Systems, Tables (Data)

Identifiers—*Philadelphia School District PA

This study analyzes the process used in developing the 1977-78 operating budget of the Philadelphia school district. The purpose of the study was to determine what changes are required to assure greater efficiency and effectiveness in resource allocations in the face of increasingly scarce funds available to urban public school systems. Using a questionnaire, the study quizzes administrators on how decisions are made regarding the allocation of available revenue. It concludes that the school district has great difficulty developing a budget that emphasizes education, satisfies the political powers, and is acceptable to employee unions. (Author/LD)

Identifiers—Project MITT

The purpose of this report by the staff of Management Implications of Team Teaching (MITT) was to explain the use of unit-level analysis to get a more exact characterization of the general innovative phenomena previously observed in unitized schools. The report examines three central variables that describe involvement of the teaching staff in the innovation–collegial decision-making, instructional interdependence among teachers, and reciprocated communication among teachers. Individual chapters explain (1) how the outcome variables were arrived at, (2) how the effects of unitization on teacher involvement were arrived at, (3) how unit-level indices on three variables (team management, instructional interdependence, and communication) were formulated, and (4) how the analysis incorporating unit characteristics concerning the three main variables were formulated and their meaning. Descriptors—*Assistant Principals, Elementary Education, Junior High Schools, National Surveys, *Principals, *Salaries, Senior High Schools, Tables (Data)

Based on information obtained from the Educational Research Service, Inc., survey collecting 1978-79 data about scheduled and paid salaries from 1,110 responding school districts, this report contains current data relating to salary schedules for principals and assistant principals. To facilitate analysis of the data, Section 1 compares 1978-79 minimum and maximum salary schedule summaries by district enrollment size, Section 2 makes the comparison by using a per-pupil expenditure factor, and Section 3 contains a maximum scheduled salary trend analysis. Caution should always be used when drawing inferences from these data because of the sampling variance associated with studies of this type. (Author/LD)

The Texas plan for computer services provides services to public school districts through a statewide network of 20 regional Education Service Centers (ESC). Each of the three Multi-Regional Processing Centers (MRPCs) operates a large computer facility providing school district services within from three to eight ESC regions; each of the five Regional Processing Center (RPC) computer facilities provides services to school districts within one ESC region; and Remote Job Entry (RJE) terminals transmit data and instructions from an ESC or a school district to an MRPC where actual processing takes place. Among the computer applications available to school districts are class scheduling, grade reporting, student master files, attendance accounting, test scoring, payroll, financial accounting, tax accounting, and personnel accounting. This booklet contains information about the objectives and financing of the plan, and tables that show for the MRPCs and the RPCs the personnel, participation in the different services offered, hardware information, and the 1977-78 budget. A directory lists the statewide advisory committee for computer services and education service center executive directors. (Author/LD)

Identifiers—Management by Group Objectives, Zero Base Budgeting

Today's schools are faced with a new challenge–namely, how they can be managed more effectively. This book evaluates concrete management plans such as Management By Objectives (MBO) and Zero-Base Budgeting and explains the principles that different systems work on, where they have been tried, how they have succeeded or not succeeded, and why. Detailed case studies are cited and charts illustrate the methods discussed. The book also offers alternatives for simplifying and updating existing types of management. Individual chapters deal with administrator training and school district policies, management methods, management approaches, personnel management, school-community relations, and school organization. The appendix offers a sample teacher evaluation form and a model superintendent contract. The book is written for superintendents, administrators, and school board members. (Author/LD)

In 1978, Congress reviewed and revised the major federal education programs covered by the Elementary and Secondary Education Act (ESEA). Programs were expanded, tightened up, or redirected. For example, Title I and impact aid will direct millions more in federal aid to the big cities of the North and Midwest at the expense of the rural South. A new and already controversial basic skills program was created, along with 12 new categorical aid programs. Disadvantaged children attending private schools were guaranteed equal shares of federal education funds. This report contains chapters on all the major ESEA programs: Title I, impact aid, emergency school aid, bilingual education, and basic skills. Charts and graphs illustrate where the money will go, including breakdowns by state and for the 50 largest school districts. The report presents and explains the details of each program and is intended to help the educator develop and implement plans that will ensure the best return for a school's dollars. Explanations concerning how the legislation worked its way through Congress are also included. (Author/JM)

Descriptors—Academic Achievement, Comparative Analysis, Educational Research, Elementary Secondary Education, *Open Plan Schools, *Principals, *Program Evaluation, Questionnaires, Statistical Data, *Student Attitudes, Tables (Data), *Teacher Attitudes, *Traditional Schools
Identifiers—*Quebec (Montreal)
The four objectives of this study, conducted in the Montreal school system, were (1) to report the effects on students of having attended open-area elementary schools versus more traditionally constructed schools, (2) to report ways in which interests and aptitudes of pupils may affect their suitability for open-area and open schools, (3) to report the pedagogical advantages of open-area schools, and (4) to report areas in which teachers and administrators in open-area elementary schools would benefit from inservice education. Questionnaires were submitted to teachers and students of elementary and secondary schools in Montreal and Quebec. Results showed that the secondary school itself seems to be a greater influence on adaptation than is open-area elementary schooling. Students in open-area elementary schools tend to be at a slight advantage in their acceptance of responsibility for learning and in some types of social development. No relation was found between pedagogy and architecture, and systematic inservice training of teachers is essential. (Author/LD)

Measuring Trends in Salaries and Wages in Public Schools: ERS Composite Indicator of Changes. ERS Information Aid.
Educational Research Service, Arlington, Va.
Pub Date—79
Note—34p.
Available from—Educational Research Service, Inc., 1800 North Kent Street, Arlington, Virginia 22209 ($10.00)
Pub Type— Reports - Research (143)
Document Not Available from EDRS.
Descriptors—Administrative Personnel, Comparative Analysis, Educational Research, Elementary Secondary Education, Graphs, *Measurement, *Measurement Instruments, Public School Systems, Records (Forms), *Salary Differentials, *School Personnel, Statistical Data, Tables (Data), *Teachers, Trend Analysis, *Wages
The composite indicator, published annually by the Educational Research Service (ERS), was designed to reflect overall changes in average salaries and wages paid by public school systems. The purpose of this book is to describe the nature of the indicator, how it is compiled on a national and state basis, and how local school systems can compile data for use in salary and wage decision-making. The composite indicator is based upon data for 28 of the 33 public school employee positions on which ERS reports. For example it shows that changes in average salaries and wages paid by reporting school systems in 1978-79 increased by 6.7 percent over those paid in 1977-78. This compares with a 7.7 percent increase in the Consumer Price Index for calendar year 1978. Procedures, work sheets, and outline graphs for making local computations and comparisons are included in the final section of this information aid. (Author/LD)

Descriptors—Administrative Personnel, Educational Finance, Elementary Secondary Education, *National Surveys, *Professional Personnel, Public School Systems, *Salaries, School District Spending, *School Surveys, Statistical Data, Tables (Data), *Teacher Salaries
This publication, part 1 of a three-part report, is based on a survey conducted in fall 1978 that collected data on salaries scheduled and salaries paid for 23 select professional positions and 10 select support positions in public school systems throughout the United States. The questionnaire was mailed to 1,877 of the approximately 11,502 public school systems enrolling 300 or more pupils. All the systems enrolling 10,000 or more pupils were sent questionnaires. The total sampled group accounts for approximately 99 percent of all those employed in the public schools of the nation. A total of 1,100 of the school systems responded to the survey. This volume gives the salaries scheduled by school systems in 1978-79 for superintendents, deputy or associate superintendents, assistant superintendents, certain other central-office administrators, and for principals, assistant principals, classroom teachers, counselors, and other select professional personnel. For the first time this year, information is included on the number of school systems with salary schedules for professional position categories surveyed. Summary tabulations bring together data for analysis by enrollment strata, by categories of per-pupil-expenditure for current operations, and by geographic region of school systems. The school systems included in the system-by-system listing are arranged in alphabetical order by state without regard to enrollment size. (Author/LD)

This publication, part 2 of a three-part report, discloses the annual salaries actually being paid to persons employed in 23 professional positions by 1,100 public school systems for school year 1978-79. These include salaries paid superintendents, deputy or associate superintendents, assistant superintendents, and personnel in certain other select central-office administrative positions related to such functions as public relations, finance and business, instruction administration, and supervision of subject matter areas. Similar data are shown for salaries of professional staff assigned to individual school buildings, including classroom teachers, principals, assistant principals, deans, counselors, librarians, and school nurses. Part 2 presents data on mean, lowest, and highest salaries paid to personnel in select professional positions. This year, for the first time, information is supplied on the number of school systems employing personnel in each professional position category and the total number of persons in each category on which salary data in the report are based. Part 1 and part 2 of the report are companion documents that present data essential for comprehensive comparisons of salaries scheduled and paid for professional personnel. (Author/LD)

This publication, part 3 of a three-part report, presents hourly wage rates and annual salaries actually being paid in school year 1978-79 by 1,100 public school systems to personnel employed in 10 select support positions. It provides data on the lowest, highest, and average hourly wage rates being paid to individuals in each of the 10 support positions surveyed–plus the number of persons employed in each category. The categories include teacher aides (both instructional and noninstructional), building custodians, cafeteria workers, and school bus drivers. Also shown are the annual salaries being paid central-office secretaries/stenographers, accounting and payroll clerks, and clerk-typists; and the annual salaries paid school secretaries/stenographers and library clerks working in individual school buildings. Descriptors—Change Strategies, *Community Service Programs, *Educational Finance, Elementary Secondary Education, *Equal Education, Equalization Aid, *Finance Reform, Program Descriptions, Program Guides, *Public Affairs Education
Identifiers—Idaho, New Jersey, South Carolina, Voter Education Programs
This report describes League of Women Voters citizen education campaigns concerning the financing of public schools. Launched in South Carolina, New Jersey, Idaho, Vermont, Missouri, California, and Maine, the campaigns were aimed at raising public awareness and interest in the issues and problems involved in funding public schools, thereby creating an atmosphere in which legislative reform could take place. In South Carolina, the citizen education campaign launched in 1973 was instrumental in defining the issues and developing grass-roots understanding that made reform legislation possible. In Missouri, a citizen education campaign helped prepare the way for a governor's conference on education that led to reform legislation. And in California, the education campaign helped increase public understanding of a major court ruling, sweeping new 1977 school finance legislation, and the school finance implications of a controversial constitutional amendment. The report details how the education campaigns were mounted, how they fared, and what can be learned from the experience. It explains the history of, and issues involved in, school finance reform and includes a chapter on 15 basic ingredients for a fair school finance campaign. (Author/JM)

Descriptors—Accountability, Community Agencies (Public), *Community Involvement, *Community Schools, Educational Research, Elementary Secondary Education, Interagency Cooperation, Interagency Coordination, Interviews, Organizational Communication, *Program Improvement, Recordkeeping, Surveys
Identifiers—*Eugene Public Schools OR
This evaluation attempted to determine if the Eugene, Oregon School District 4J community schools program was accomplishing its goals. Researchers completed interviews with 770 community residents, 46 community school teachers, 45 noncommunity school teachers, 14 principals, and 154 agencies. Researchers found that no community school had carried out a successful comprehensive survey of the needs and interests of residents. Overall, participation and volunteering were not greater at community schools than at noncommunity schools, although socioeconomic differences may have confounded this finding. Regarding the meeting of needs in curriculum and instruction, 19 of the 36 objectives of the 7 community schools programs were met, 12 were partially met, 4 were unmet, and 1 was unverifiable. It was found that community schools offer their students slightly more field trips and significantly more instructional services to school children. Representatives of participating organizations reported that the program did not improve communication or cooperation among agencies but the program did enhance communication between community residents and organizations. Evaluators recommended that school district and city representatives should discuss program goals, that record keeping and accountability should be improved, and that the district should consider issuing additional guidelines. Descriptors—Educational History, Elementary Secondary Education, Information Dissemination, Interagency Cooperation, Interagency Coordination, *Intermediate Administrative Units, *Research and Development Centers, Research Reviews (Publications), *School Districts, *State Departments of Education, Urban Schools
Identifiers—*Research and Development Exchange
This paper examines the existing and potential roles of educational service agencies (ESAs) and their relationships with state education agencies (SEAs) and local education agencies (LEAs). Special attention is focused on urban school districts. The paper also critically analyzes these roles and relationships as they relate to dissemination functions, with particular emphasis on the role of the ESA in the Research and Development Exchange (RDx). The history of the ESA is outlined, and studies of the education service agency in Michigan, Pennsylvania, and other states are examined. These studies lead to specific recommendations regarding generally appropriate roles and functions. Roles and functions for the ESA in dissemination evolve from recent federal legislation focusing on research relative to educational change, broker/facilitator roles, nature of the educational enterprise, state and national dissemination agencies, and educational renewal and reform. A number of specific conclusions and recommendations relevant to the ESA and RDx are offered: no nationwide single-agency system or configuation for dissemination can adequately respond to all education needs; the professional community must support comprehensive research and development evaluation studies about regionalism; and the RDx configuration needs more client user input at all levels of planning, management, and stages of development. Identifiers—*Pakistan
This model is an attempt to create a measure of resources to reflect the value of persons, groups, villages, provinces, or nations in terms of education. It attempts to measure human assets and nonhuman material elements. To measure gross cumulative factors, this measure of wealth considers population, environmental learning, and formal learning. To measure attenuating factors, the model considers personal dynamics, nonhuman resources, community development, nonformal and informal educational offerings, village management, school learning environment, school personnel and administration, and school facilities. This model of the gross product of education was applied to villages and provinces in Pakistan as well as to the whole country. The model is intended to provide a tool for use in community and village development and long-range planning. It is also meant to be used in pinpointing deficiencies in the development of a village; in comparing villages, provinces, or nations; or in assessing progress in human resource development. Descriptors—*Alternative Schools, *Educational Alternatives, Educational Objectives, Elementary Secondary Education, Inservice Teacher Education, *Program Administration, Program Costs, Program Evaluation, Teacher Selection
During the 1970's, school districts throughout the country have created alternative educational programs allowing students and parents to choose the appropriate educational structure and methodology that suit their individual needs. School boards who establish alternative schools must assess, plan, design, effect, and evaluate educational programs to meet the particular needs of local students. The purpose of this report is to assist school boards in these undertakings. Authors asked people recognized as knowledgeable and experienced in the field of nontraditional education programs to provide responses to the most persistent questions of school leaders about alternatives. The interview format allows the expression of a diversity of experiences, beliefs, and attitudes, rather than offering only one correct answer. Questions and answers center around setting goals for alternative schools, dealing with problems, initiating creative planning processes, estimating expenses, matching students with the options, evaluating alternatives, selecting and training staff, ensuring the survival of alternatives, and getting started. This four-part report deals with minimal competency testing with a focus on test development and the federal role in competency testing. The first section presents highlights of a 1978 conference on "Achievement Testing and Basic Skills" chaired by Secretary of Health, Education, and Welfare Joseph

Califano. The second section contains the committee report "Improving Educational Achievement" issued by a nine-member committee headed by Stephen K. Bailey. This report, as well as the conferees at Secretary Califano's conference, advised the federal government against entering the business of developing national tests. Relying on the report, Califano recommended to the conference that the federal role be that of research, technical assistance, and as a clearing house for information. The third section of the publication presents the results of a survey of school board presidents about issues in competency testing. The results indicate that school boards would be vehemently opposed to the federal government's creation of national tests. The fourth section of the document is made up of recommendations concerning competency testing that the Education Commission of the States (ECS) has made to state and local governments. The ECS urges a joint effort by state and local authorities in the establishment of testing programs. (Author/JM)

Identifiers—*Curriculum Specialists, Professional Autonomy

A persistent problem for supervisors and curriculum workers has been the unresolved tension between the demands of the organization and the drive for professionalism. Emerging in the late nineteenth century, the problem was greatly influenced by the transformation of the school system along bureaucratic lines. Supervisors and curriculum workers during the early decades of the new century tried to counteract past bureaucratic influences by attempting to professionalize. Supervisors and curriculum workers attempting to improve instruction and make curriculum more valid were hindered by bureaucratic rules and regulations. The problem became increasingly apparent to supervisors and curriculum workers toward the middle 1930s. Because of the exigencies of the organizational framework of schooling, it is doubtful that even present day supervisors and curricularists are able to attain their professional goals. (Author/JM)

Identifiers—*Professional Autonomy

In the early twentieth century, supervisors began to move toward increasing professionalism in their positions. In the late nineteenth century, supervision was characterized by bureaucratic methods in a centralized school management system. Research reveals that after the turn of the century, there was a concerted effort by supervisors to deemphasize bureaucratic procedures and to increase emphasis on a more democratic and professional outlook, at least in theory. One reason for this change of emphasis was that supervisors realized the tenuous position they occupied in the hierarchical school organization. The ill-defined nature of supervision and the indefinite and obscure status of supervisors within schools contributed to the desire to find legitimacy for their work. Second, supervisors sought to professionalize as a result of mounting criticism by teachers and other educators against rating and other bureaucratic devices for measuring teacher efficiency. Third, supervisors sought to professionalize to distinguish their work from that of administrators. The supervisors' quest for professional status to combat bureaucratization assumed greater importance after 1920. An analysis of literature in this field indicates that while theory supported the democratization and professionalization of supervision, very little actual progress toward these goals was made. Descriptors—Educational Research, Elementary Secondary Education, *Instructional Materials Centers, Interviews, *Library Technical Processes, *Negative Attitudes, Questionnaires, School Libraries, School Personnel, Statistical Data, Tables (Data), Teachers, Textbooks, *User Satisfaction (Information)

Identifiers—*Eugene Public Schools OR

Due to increased dissatisfaction with Media Services, the evaluation department of Eugene School District 4J was asked to look into the centralized ordering and processing of library materials and textbooks. Areas of complaint included time lags in receiving books, loss of control of ordering and processing at the school level, and processing errors. Data were collected in 43 interviews, questionnaires were sent to all district schools, and a random sample search was made of 36,000 media service orders. A number of findings emerged, including the findings that unacceptably long time lags exist in ordering and processing; school personnel have lost control over ordering and processing, but this is inevitable in a centralized system; and Media Services has acknowledged processing errors and is trying to correct them. Included in the report is a brief history of the district's centralized processing system, the methodology used to review the complaints, five tables showing actual time lags involved in the major steps of ordering and processing broken down by type of book and type of school, and a discussion of the complaints. The report concludes with recommendations for the establishment of an advisory committee and a review of Media Services' staffing. (Author/LD)

Dembowski, Frederick L.

The Effect of the Minimum Compensating Cash Balance on School District Investments.

Pub Date—Jul 78

Note—16p.; Not available in paper copy due to light print of original document

Pub Type— Guides - Non-Classroom (055) — Reports - Evaluative (142)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Banking, Comparative Analysis, Elementary Secondary Education, *Financial Policy, Interest, *Investment, *Money Management, *School Districts, School District Spending, Tables (Data)

Identifiers—Miller Orr Cash Management Model

Banks are usually reimbursed for their checking account services either by a fixed service charge or by requiring a minimum or minimum-average compensating cash balance. This paper demonstrates how to determine the optimal minimum balance for a school district to maintain in its account. It is assumed that both the bank and the school district use the Miller-Orr cash management model and that not maintaining a minimum compensating cash balance will result in charges for approximately 99 overdrafts a year. Calculations presented for a sample school district indicate that the district should not maintain a minimum compensating cash balance but should negotiate an annual fee to compensate the bank and invest the funds that previously constituted the cash balance. The paper concludes that the use of negotiated bank charges, short-term lines of credit, zero minimum checking balances, and investment of cash balances in short-term investments could result in thousands of additional dollars for school districts. Identifiers—State Regulation

In the midst of a trend toward uniformity of education, parents, teachers, community groups, and government groups are struggling for control over what that education shall be. Regarding problems concerning religious and ethical education, the courts' interpretations of the establishment clause ultimately conflict with interpretations of the free exercise clause. Case origins of contemporary constitutional guidelines regarding parental rights over a child's religious education concern state regulations of private schools, prayer, Bible-reading, and evolution cases in public schools, and financial aid to religious schools. Parents who are not satisfied with public education have two real options–attempting to control and influence the public schools or pursuing alternative education at home or in private schools. Parents' ability to influence their child's public schooling is limited both by law and by practical considerations, as evidenced by court cases regarding the teaching of evolution or sex education, a child's exposure to sexually explicit or offensive material, and parents' right to determine a program for their handicapped child. Parents who pursue alternative nonpublic education have problems evidenced by court cases regarding state

regulation of private schools. Parents who choose home instruction confront state laws concerning what constitutes instruction equivalent to that of public schools. (Author/JM)

Eliminating Sex Bias–Pipe Dream or Possibility? A Program Description and Evaluation Summary of the Title IV/C, ESEA Project, "Eliminating Sex Bias in Education."

Minneapolis Public Schools, Minn.

Pub Date—15 Jul 77

Note—13p.

Pub Type— Reports - Evaluative (142)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Elementary Secondary Education, Inservice Education, Instructional Materials, Interviews, Observation, Program Descriptions, Questionnaires, *Sex Discrimination, State Programs, Statistical Analysis, Student Attitudes, Teacher Attitudes, Textbook Bias, Validated Programs

Identifiers—Elementary Secondary Education Act 1965 Title IV, *Minneapolis Public Schools MN

This paper describes a three-year project funded by Title IV/C of the Elementary and Secondary Education Act (ESEA) and initiated by the Minnesota state board of education to reduce sex bias among students and teachers in Minneapolis. Emphasis during the first year of the project was on the development of nonsexist curriculum materials to be used in intermediate and secondary classrooms. During the second year, lessons were developed for use in primary classrooms. The third year focused on the extent of attitude change. By the end of the project, 95 percent of Minneapolis teachers had received inservice training in nonsexism with the understanding they would teach the nonsexist lessons in their classrooms. Data were collected via questionnaires, interviews, and observations. Results showed that the use of nonsexist curriculum materials changed student and teacher attitudes to a significant degree. With the exception of the secondary level, teachers reported they and their students became more aware of the need to focus on the elimination of sex bias from the educational system. The report hypothesized that because students continually change classes at the secondary level, there is less chance for any single teacher to serve as a role model. Also, nonsexist lessons being taught become much more diffused when they are only a part of a one-hour class. (Author/LD)

Descriptors—Academically Gifted, *Cost Effectiveness, Data Analysis, Early Childhood Education, Educational Finance, Elementary Secondary Education, Equalization Aid, Expenditure Per Student, Federal Aid, Graphs, Operating Expenses, Program Evaluation, *Resource Allocations, School Systems, *State Aid, Statistical Data, Tables (Data)

Identifiers—*New York State Public Schools

The purpose of this report by a panel of school finance specialists appointed by the governor to guide a budget study in New York State is to summarize studies on the existing apportionment system of public school aid and to suggest short-term steps for improving the equity of the present system. Parts 1 and 2 discuss the present operating aid formula and other major state aid programs. Part 3 examines two programs for which aid is currently available to only selected New York State school districts: early education and the education of the gifted and talented. Part 4 deals with reorganization of school districts and other aspects of the educational finance system. Recommendations for changes that could make the current operating aid formula more equitable are described at the end of each chapter. Tables and graphs are provided throughout the document. (Author/LD)

Descriptors—*Cost Effectiveness, Data Analysis, *Educational Finance, Elementary Secondary Education, *Expenditure Per Student, Graphs, Operating Expenses, *Resource Allocations, *State Aid, Statistical Data, Tables (Data)

Identifiers—*New York State Public Schools

The major purpose of this report is to examine what the operating aid formula for the 1977-78 New York State school year could have been for the 347 save-harmless districts and the 236 limited aid districts if the 1977 legislature had not based apportionments on the previous year's aid. The study, conducted by a governor-appointed task force, summarizes the 1977-78 operating aid apportionment system and operating aid formula and discusses the impact of using three other major formulas. Also included in the report are discussions of the payable operating aid scheme for the state's school districts, state and local support levels, and variations in per pupil operating expense. The final chapter discusses how school districts can receive their operating aid without save-harmless provisions or limits on increases. (Author/LD)

Index of Property Tax Non-Uniformity Among School Districts in New York State.

New York State Div. of the Budget, Albany. Education Study Unit.

Pub Date—Aug 77

Note—78p.; Not available in paper copy due to marginal legibility of original document

Pub Type— Reports - Research (143) — Numerical/Quantitative Data (110) ()

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—*Assessed Valuation, Elementary Secondary Education, Finance Reform, Inequalities, Measurement Techniques, *Property Appraisal, *Property Taxes, School Districts, *School Taxes

Identifiers—Inequities, *New York

This report measures the inequities in school taxes on New York State residential property that result from assessment nonuniformity. The index of nonuniformity is a measure of the average percentage difference in school tax bills paid by owners of like residential properties in the same school district but in separate assessing units. Using this measure, on the average, in almost three-fifths of the 544 school districts that include parts or all of more than one municipality, homeowners as a class in one assessing unit pay in excess of 20 percent more school taxes than homeowners in another assessing unit within the same school district. The adjusted index of nonuniformity is a conservative measure of the percentage difference in school tax bills paid by owners of two homes of equal market value located in different assessing units but in the same school district. Using this measure, in almost 85 percent of the school districts that include more than one assessing unit, some homeowners in one assessing unit pay at least 100 percent more in school taxes than homeowners in another assessing unit. The report concludes that equalization rates do not now fairly apportion school tax levies and that the magnitude of school tax inequity warrants immediate action. (Author/JM)

Descriptors—*Assessed Valuation, Elementary Secondary Education, Finance Reform, *Property Appraisal, *Property Taxes, *School Support, *School Taxes

Identifiers—Inequities, *New York

The property tax is the single most important revenue source for local governments and school districts in New York State. Its positive attributes are its stability, simplicity, efficiency, predictability, and its contribution to local government. Yet gross inequities are associated with assessment administration of property tax. An analysis of a 1973 equalization survey shows that only 6.8 percent of municipalities fall within plus-or-minus 20 percent accuracy of assessment. Without drastic reform of assessment administration, meaningful reform of the state-local system of educational finance will be difficult. Although there are alternatives to the full value standard of taxation, great problems stem from using these standards. No matter what standard is used, proper apportionment of property tax burdens is impossible without first determining full value of property. If a full value standard were implemented, the residential class would experience the greatest tax levy increase, although only 23.7 percent of all municipalities would be affected, and most of the dollar shifting would result from correction of intraclass inequity. If no changes are made, cases challenging improper overassessment will force school districts to pay refunds of improperly collected tax money. Thus an inescapable relationship between educational finance and New York real property tax administration exists. (Author/JM)

Descriptors—*Educational Finance, Elementary Secondary Education, *Equal Education, Ethical Values, *Finance Reform, Mathematical Models, *Measurement Techniques, *Tables (Data)

Identifiers—Federal Expenditure Disparity Measure, Per Pupil Expenditure Disparity Measures

This report evaluates alternative approaches to and measures of equity in state school finance plans. It also evaluates the Federal Expenditure Disparity Measure (FEDM). Following an introduction, Part II describes alternative conceptions of equity in education and identifies three components of these conceptions: groups treated, alternative treatments, and criteria for equity. Part III presents numerical models that show how alternative combinations of group, treatment, and criterion can yield different conclusions when applied to a hypothetical school district. In Part IV, the value judgments that underly the alternative conceptions of equity are examined. Since few value judgments are widely held, a number of equity conceptions must be considered valid. Also in Part IV, the value judgments inherent in Per Pupil Expenditure Disparity Measures (PPEDMs) are reviewed and analyzed. In Part V, the theory behind the FEDM and the way the Office of Education applies the FEDM to calculate measures from state data are discussed. In Part VI, recommendations concerning equity measurement in federal regulations and particular procedures used by the Office of Education to measure expenditure disparities are presented. A lengthy appendix considers social welfare theory, social choice theory, equity measures calculations, and the tax price of education. (Author/JM)

Identifiers—Pearson Product Moment Correlations
The purpose of this study was to determine whether or not the elementary school principal has an impact on the outcomes of schooling manifested by students and, if so, to determine the nature of the role of the principal in influencing cognitive and affective outcomes manifested by students. The three sets of principal-related variables used were background, leadership, and utilization of time. From a national sample of 41 Individually Guided Education (IGE) schools, a subsample of 28 principals was generated for use in the study. Pearson Product-Moment correlations, multiple regression analysis, and path analysis were used to analyze the data. In general, results showed that principals do make a difference in producing student outcomes. The principal-related variables were significantly related to student achievement in reading and math and to student self-concept. Suggestions for further study include (1) developing an instrument to measure students' perceptions of the principals' leadership, (2) studying other subsystems in the schooling process, (3) conducting additional studies using path analysis techniques, and (4) gathering data on individual students. Descriptors—*Costs, *Educational Administration, Instruction, *Operating Expenses, *Program Costs, *School Size, Secondary Education, Small Schools
Identifiers—Economies of Scale, *Illinois
This study attempted to determine the relationship between average daily attendance (ADA) and costs in 72 Illinois high schools having only one attendance center. Costs included administrative, instructional, and operational costs. The schools were divided into three populations, namely all those under 5,000 ADA, those less than 2,000 ADA, and those less than 1,000 ADA. Data were obtained from records of the Illinois Office of Education, and both linear and curvilinear regression were employed. Regarding administrative costs, findings show that for all three populations there is economy of scale (lower costs associated with large enrollments), although there is some evidence of increasing costs beyond an optimal point. Instructional costs rise in schools below 1,000 ADA. Regarding operational costs, only the population of small schools showed economies of scale. Findings suggest that for at least smaller high schools there are economies of scale when size increases, although some of the findings are ambiguous. Results indicate that economy can be achieved by eliminating very small high schools. (Author/JM)

Descriptors—Educational History, Educational Philosophy, Intermediate Grades, *Middle Schools, Program Development, Teacher Education Curriculum
This paper traces the historical development of the middle school from its beginnings in 1893. It presents philosophical background for the middle school concept and compares middle schools and junior high schools. Psychological theories underlying the middle school are discussed, including the theory of the period of "transescence" between childhood and adolescence. Practical considerations involved in instituting a middle school are listed, beginning with initial decisions about objective-setting, grade span, public relations, staff selection, curriculum, facilities, and long-range planning. The need for special teacher training is stressed. Guiding principles for a middle school regarding grading, student involvement in decision-making, learning objectives, encouragement of creativity and diversity, and interdisciplinary experiences are offered. A need is recognized for functional models for middle school programs, organizations to aid planners, and research yielding insights into local needs for a middle school program. (JM)

Descriptors—Administrator Role, Comparative Analysis, *Comparative Education, Cross Cultural Studies, Economics, *Educational Administration, Educational Economics, Educational History, Educational Philosophy
Identifiers—Position Papers
Comparative educational administration is not yet a recognized field, although a number of works concerning cross-cultural educational literature are directly applicable to such studies. Four themes are apparent in relevant works. Beginning in the 19th century, the earliest works focused on European schools in the hopes America could learn from the European systems. The second period of literature was marked by comparative works ranging from analyses of cultural and political barriers and structural-functional descriptions. In the post-World War II period, American educators concentrated on how to import democratic ideals to formerly totalitarian systems. At present, the literature of comparative inquiry is dominated by economics, including rate of return studies, and studies concerning the consequences of structured economic relationships. Comparative educational administration lacks the literature base found in the fields of comparative law, public administration, or political science. The time is overdue for a comparative approach to the study of educational administration. The role of administrators can be studied in conjunction with such issues as the nature and effects of schooling, preserving cultural integrity, the viability of rural areas, the role of education in national development, the responsiveness of educational bureaucracies, and change models. Tools to be used in this field are social and philosophical analysis and knowledge about cultural imperatives. (Author/JM)

The State Board's Role with Private Schools.
Pub Date—14 Oct 78
Note—10p.; Paper presented at the Annual Meeting of the National Association of State Boards of Education (16th, Hershey, Pennsylvania, October 1978)
Pub Type— Opinion Papers (120) — Speeches/-Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Accreditation (Institutions), *Board of Education Role, Cooperative Planning, Elementary Secondary Education, Government School Relationship, *Private Schools, Public Schools, *State Boards of Education, State Standards
A state board of education has several major responsibilities regarding private schools. It should have an understanding of the legal constraints regarding its relationship with private schools. It should have information about the character of private schools nationwide and in their state. Research is needed regarding how private schools affect the educational performance of all children, the performance of public schools, community satisfaction with schooling, and community stability. State boards should use this information to strive for well-integrated and well-articulated private school policies. The National Association of State Boards of Education and individual state boards must create a climate to encourage the collaborative use of public and private resources. Toward this end, private school people should be routinely invited to participate in the consideration of education issues, policies, and practices. State boards should coordinate such efforts and encourage private school participation. Regarding control of private schools, the state education agency has the responsibility to protect the public's health, safety, and morals. Accreditation requirements concerning other factors should be unrestrictive and offer wide choices. Technical support services should be offered for upgrading private schools, but the best test of worth of a private school must be its ability to attract and retain a clientele. (Author/JM)

Community school centers have evolved from many experiments in interagency cooperation and community involvement. A community school center is a place that provides a variety of services that may include health, recreation, day care and after school care for the young, senior citizen programs, job placement, vocational and manpower training, public library, adult education, performing and creative arts, crafts, family and youth counseling, municipal services, and public K-12 education. It is also a forum for focusing community action and improving the quality of life for the residents. This booklet is the first in a series that examines community school centers as a phenomenon of national importance to the coordinated delivery of social services, better use of public resources, and revitalization of community life. The publication is organized as a series of responses to questions about characteristics of centers, how the coordinated services work, shared space, governance, financing, planning, examples of existing centers, declining enrollments, assessing community needs, and how to get started in planning a community school center. gency Coordination, Needs Assessment, *Neighborhood Centers, Objectives, *Planning, *School Community Cooperation, *Shared Facilities, *Shared Services, Social Services, Space Utilization

This booklet is the second in a series that examines community school centers. Because the exact nature of the planning process for a community school center must be developed in context, specific procedures are not prescribed. Rather, the issues that should be considered are outlined, alternative strategies and solutions are analyzed, and common pitfalls that may be encountered are described. Topics discussed include planning, establishing the philosophy and goals of the center, designing an adminstrative structure, developing an architectural program, and funding both the planning process and construction. This booklet is the fifth in a series that examines community school centers. Because of the decline in school enrollments, many school districts must now cope with staff reductions, fiscal constraints, and an excess of unused space in school buildings. Although the school population is declining, the overall population in most communities is not. Rather, the population mix is changing and other kinds of services are needed. The needs to house new and expanded services and to find alternative uses for surplus space are complementary. This booklet explores the opportunities for reusing surplus school space as community service centers, and the issues and constraints in planning. (Author/MLF)

Descriptors—*Annotated Bibliographies, *Community Schools, Declining Enrollment, *Directories, Elementary Secondary Education, *Information Sources, Interagency Cooperation, *Neighborhood Centers, *Resource Guides, School Community Cooperation, Shared Facilities, Space Utilization

This booklet is the sixth in a series that examines community school centers. This compendium of resources for planning community school centers contains information on published materials, organizations and associations, and a geographical listing of community school centers. The materials include recent literature on community school centers and interagency cooperation, enrollment decline and the reuse of surplus school space, and general background information. Most of the cited publications contain extensive bibliographies. Reference books, catalogues, federal laws, specific leases, and documents on governance are listed. The section on organizations lists national groups offering newsletters, technical assistance, and other services in planning community school centers. It includes resources for locating regional and state assistance agencies and organizations. The final section presents a selected, briefly annotated, list of community school centers throughout the country (and some in Canada). It includes centers in new buildings and centers operating in surplus space. In addition, it lists communities actively involved in districtwide interagency planning for shared facilities. Landmark Court Cases Affecting School Governance. Volume II. Resource Guide.

Arizona State Univ., Tempe. Bureau of Educational Research and Services.

Pub Date—Feb 79

Note—68p.; Prepared for Arizona educators through Arizona Educational Information System

Pub Type— Legal/Legislative/Regulatory Materials (090)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Bilingual Education, Civil Liberties, Corporal Punishment, *Court Cases, Educational Accountability, Educational Administration, Elementary Secondary Education, Equal Education, Reverse Discrimination, *School Law, School Segregation, Student Rights, *Supreme Court Litigation, Teachers

During the late sixties and early seventies, school-related court decisions increased. The purpose of this publication is to present significant information for school board members and other interested people concerning selected landmark decisions in which the United States Supreme Court has rendered opinions on school issues. Many of these cases have established legal principles which may serve as guidelines for other potential litigation. For each case, the publication presents the citation, the facts of the case, the holding, and the basis for the decision. The cases selected concern segregation, aid to nonpublic schools, students' rights, corporal punishment, separation of church and state, liability, educational malpractice, bilingual education, equal educational opportunities, teachers' rights, school salaries, emotionally handicapped children's rights, maternity leave policies, and reverse discrimination. Cassette Sync Recorders. Parameter for Evaluation. Laboratory Test Findings. EPIE Report Number 86e.

Educational Products Information Exchange Inst., New York, N.Y.

Pub Date—78

Note—88p.

Available from—EPIE Institute, 475 Riverside Drive, New York, New York 10027 ($20.00; quantity discounts)

Pub Type— Reference Materials - Directories/-Catalogs (132) — Reports - Research (143)

Document Not Available from EDRS.

Descriptors—Audio Equipment, *Equipment Evaluation, Equipment Standards, *Magnetic Tape Cassette Recorders, *Merchandise Information

This quarterly report by the Educational Products Information Exchange (EPIE) analyzes cassette sync recorders, giving parameters for evaluation and laboratory test findings. The report offers evaluations of the compatibility of different models and the standards for audio and cue tones. It also discusses national and international standards, EPIE tests on cue tone and audio performance, acoustical and safety testing, and American National Standards Institute (ANSI) standards applied in EPIE laboratory tests. The last half of the report supplies laboratory test findings for individual models, including a general description, basic data, test results, laboratory evaluation of the test, and construction, service, and alignment. Identifiers—Portland School District OR

This report describes the relationships and programs the city of Portland, Oregon, maintains with its public schools and with some private schools, colleges, and universities. The document grew from a survey conducted within the city government in June 1978 and from subsequent studies concerning school boundaries, enrollments, public service employment, and the like. The studies indicated that the health of the city's neighborhoods is directly related to the health of the public schools. Over 100 city-school programs are noted, covering the bureaus of parks, police, streets, fire, and 30 other city bureaus. In many cases the programs show the efficient use of public funds through cooperative ventures in support of neighborhoods and schools. This report is intended as a background for understanding the city-school policy. (Author/LD)

Identifiers—*Portland School District OR
This document is a draft of a proposed city of Portland, Oregon, school policy. Four themes run through the document: (1) neighborhood revitalization, (2) best use of public facilities, (3) greater efficiency in human services, and (4) the best use of public funds. In particular the policies address questions of equal access to education, school closures, facility sharing, parks and recreation, safety, the arts in education, human services, youth employment, and general city services. This document is the first major definition of the city's relationship with the city's school district and other educational institutions in the city. Each chapter discusses goals, policies, background, and sample programs, and the appendices list the city's response to school closures, school crossing lanes and safety patrols, and the public schools' goals of education. Descriptors—*Administrator Attitudes, Adoption (Ideas), *Comprehensive High Schools, Conventional Instruction, *Employer Attitudes, Postsecondary Education, Secondary Education, *Student Attitudes, Tables (Data), *Teacher Attitudes, *Vocational Education
Identifiers—*Georgia
The purpose of this study was to assess the procedures and performances of comprehensive high schools in Georgia and to gather data for guiding future programs. The 112 comprehensive high schools in Georgia offer a combination of vocational and traditional academic programs. This report focuses on the input, process, and output of the comprehensive school system. Questionnaires were distributed and interviews conducted with principals, faculty, and students in vocational programs. Highlights of the findings showed that a majority of the students intend to pursue postsecondary training; vocational instructors have the most influence on students' selection of programs, jobs, and postsecondary training; graduates feel vocational programs prepare them slightly better than academic programs; and employers favor graduates of comprehensive high schools over those from strictly academic high schools. Recommendations are offered for guiding the future development of the comprehensive high school system in Georgia. (Author/LD)

Leadership Competencies for Department Heads: Needed Areas for Inservice Education.
Pub Date—[79]
Note—12p.
Pub Type— Reports - Research (143) — Numerical/Quantitative Data (110) ()
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Administrator Attitudes, Administrator Role, *Department Directors (School), *Leadership Qualities, Leadership Responsibility, *Role Perception, *Secondary Education, *Statistical Analysis
The purpose of this study of secondary school department heads was to measure their level of competency in relationship to the perceived importance of leadership responsibilities. Any information acquired could then serve as a basis for inservice programs directed at improving their competence. The instrument used to measure perceived discrepancies between importance and competence was a set of 30 tasks organized into four leadership categories: education, supervision, organization, and administration. A self-evaluation checklist was distributed to 76 secondary school department heads. Results showed a substantial difference between importance and competence in three areas: human relations, educational planning, and staffing management. Department heads judged these areas to be important, yet they consider themselves to be less competent than they would like to be in fulfilling them, which could make inservice programs desirable. Also, neither years of experience as a department head nor standard masters degree programs were shown to have any regressing effect on the differences between perceived importance versus competence. (Author/LD)

Who Influences Curriculum Decision-Making in the Local Community?
Pub Date—11 Apr 79
Note—46p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April 8-12, 1979)
Pub Type— Reports - Descriptive (141) — Speeches/Meeting Papers (150)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Community Attitudes, *Community Influence, *Community Leaders, Community Study, Curriculum Development, Elementary Secondary Education, Questionnaires, Tables (Data)
Identifiers—Bonjean Noland Technique, *Indiana, *Reputational Method
The purpose of this research was to study a school district in a small American city to understand who controls school curriculum in the local community. The research approach used was reputational analysis, a survey method whereby the reputed influence of leaders is measured rather than taken for granted. Also used was a technique developed by Bonjean and Noland to identify visible, concealed, and symbolic leaders in the community. Findings showed that those who influence curriculum decision-making in the local community do no work overtly. Their power is in the minds of others who, for unknown reasons, allow themselves to be influenced. The study offers two warnings about reputational analysis. First, when school officials use this method to communicate with community leaders, serious legal, political, and democratic-ethical problems are raised. Second, this method weighs reputations more heavily than actions so that its very use results in the discovery of elitism and hierarchy. (Author/LD)

This paper discusses the improvement process used in schools to bring about change, as well as the influence of external agencies on improvement activity. It considers school district processes as they relate to improvement activity, the strategies and roles performed by external agencies, and the issues that might effect planning by an external agency. Questions that external agencies should consider in regard to support and influence of a school district provide a basis for drawing the paper together. (Author/LD)

Identifiers—Quadrant Assessment Model
A need for research and development in community education competencies was the impetus of this study. Community educators identified and field tested competencies determined to be essential in four community education roles: superintendent, district coordinator, principal, and building level director. Results showed that participants in this two-year, two-phase study developed professionally. Participants also (1) experienced a high degree of gratification from clarifying their real and comparing their ideal role descriptions; (2) clarified the importance of competencies described for each role; (3) evaluated and compared their competency with a group ideal; (4) began to clarify their own roles in community education; (5) developed a better understanding of community education; (6) developed confidence in the data and its use in school settings; and (7) were able to diagnose personal areas of weakness in a nonthreatening environment. Recommendations included repeating this work in community education circles around the country, developing correlates between training and on-the-job performance, and developing accurate and imaginative indicators of competence. Identifiers—Quadrant Assessment Model
This document is the result of a 1977-78 study by the department of educational administration, Arizona State University, to identify and field test competencies determined to be essential in four community education roles: superintendent, district coordinator, principal, and building level director. The monograph discusses the question of role definition and performance evaluation as primary administrative tools. It shows how these tools affect administrative processes like planning, organizing, and controlling, and how they are basic to the health of an organization in such areas as role clarification, role conflict resolution, evaluation, and staff development. Chapter 2 discusses concepts, Chapter 3 the rationale and plan of the project, Chapter 4 the methodologies, and Chapter 5 the summary and recommendations. Two appendices at the end reproduce the ideal profile rankings and the superintendents' ratings of training. (Author/LD)

Identifiers—*Quadrant Assessment Model
This manual is the result of a two-year study by Arizona State University involving identification and assessment of competencies needed in community education. The goal of the study is to help community educators (1) identify competencies needed for superintendents, principals, coordinators, and directors; (2) establish priority rankings for those competencies by role category; (3) assess actual performance of those competencies by role incumbents; (4) establish job descriptions for each of the roles; (5) identify areas needing role clarification; and (6) identify areas of role conflict. Chapters 1 and 2 discuss the procedures and theories that lead to competency identification and assessment. Chapter 3 details the steps necessary for identifying and validating ideal competency items, while Chapter 4 describes the actual assessment process. Analyses and suggested uses of the data are summarized in Chapter 5. An extensive appendix reproduces sample lists of competencies generated by workshops. (Author/LD)

Descriptors—Administrative Personnel, Administrator Attitudes, Elementary Secondary Education, *Insurance Programs, Legal Responsibility, School Systems, *Statistical Analysis, Teachers
Identifiers—*Indiana
This study of 50 rural and 50 urban randomly selected Indiana school districts was conducted to investigate current liability insurance practices of public school districts in the state. The districts were surveyed on the number and character of suits against either the district or professional school district personnel, amount of current liability insurance protection carried by the district, degree of legal representation of the district and district personnel, and opinions of respondents about educational malpractice. Responses were received from 52 percent of the urban sample and 68 percent of the rural sample. Among the conclusions are that urban districts and personnel are more likely to be involved in liability suits than are rural districts and personnel; most liability actions are brought on the grounds of negligence or personal injury; urban districts provide for more types of liability, greater amounts of coverage, and larger deductible amounts than do rural districts; and urban districts pay more than twice the yearly fee for legal services dealing with personal liability than do rural districts. Descriptors—*Organizational Theories, *Personal Values, Sciences, *Scientific Methodology, *Social Science Research, Social Values, Theories
The author argues that particular theories tend to harmonize with certain values and beliefs and to clash with others. Further, theories may reflect the dominant values of a certain culture or a time, not to mention those of individual theorists or groups of theorists. In exploring the nonscientific side of certain theories, the author begins by examining alternative general orientations to the world. These orientations, or values, are often expressed in such dichotomies as the world is changing/the world is stable, and the world is characterized by unity/the world is characterized by diversity. The author examines how these orientations are included in three organizational theories–Marxism, phenomenology, and the garbage can model. He then questions the epistemological and scientific adequacy of the three approaches. The author deplores shifts from curiosity and detachment toward ideology, and argues that theories and research should be aimed at warranted explanations, not at the vindication of ideological commitments. This monograph contains seminar papers concerning educational policy issues presented in Nebraska from 1972-1978. In the papers, recognized educational experts in the state react to substantive issues and follow up with a current status report. The issues discussed include networking to develop policy, accountability, federal involvement, educational service units, roles and functions of the state department and the state board, collective bargaining, competency-based education, community education, governance of postsecondary education, determining educational policy, and the need for an educational policy commission in Nebraska. Descriptors—*Adoption (Ideas), Change Agents, *Decision Making Skills, Elementary Secondary Education, *Organizational Change, *Problem Solving, Program Improvement, *Urban Schools
The purpose of this book is to explain how urban schools can deal productively with problems found embedded in their organizational structure. Written for persons interested in organizational change in schools, the book focuses on the theory of how problem solving in schools does work, how it can work, and how it can be facilitated by change agents from inside or outside the school. Following an overview, chapter 2 discusses the definition of a problem and describes how problems are manifested in schools. Chapter 3 outlines a sequence for solving problems, taking into account the human element. Four metaskills necessary for effective problem-solving are presented and discussed in detail in chapters 4 and 5. The book concludes with a summary of some of the knowledge and skills necessary if schools are to reach a sustained capacity for solving problems: knowledge of the complexities of humans and their school organizations, and skill in communications, in a systematic procedure for solving problems, in diagnosing organization conditions and processes, in getting information from inside or outside the group, in synergistic group action, and in monitoring the effectiveness of other skills. Identifiers—*Pennsylvania
This report contains data collected from 275 school districts in Pennsylvania for the 1978-79 school year. The data reflect policies and practices affecting salaries and staff utilization for professional employees. The report is divided into three major sections. The first presents comparative data for each of 41 variables on a statewide, size, and wealth basis. The second section examines each variable on a regional basis. The third section deals with the interaction of the control variables, district size and wealth, with the dependent variables of staff and salary. Data tend to support the hypothesis that principals serving on less than 12-month contracts earn more salary per month than their yearround colleagues. Teacher salaries appear to be quite comparable to principals' and, in fact, are slightly higher than those of certain elementary principals. Ratios for professional employees and pupils were calculated from data based on weighted average daily membership, not enrollment. (Author/LD)

Identifiers—*Pennsylvania
This report contains data collected from 275 Pennsylvania school districts for the 1978-79 school year. The data reflect policies and practices affecting fringe benefits for professional employees. The report is divided into three major sections. The first section presents comparative data for 30 variables on a statewide, size, and wealth basis. The second examines each variable on a regional basis. The third deals with the interaction of the control variables, district size and wealth, with the dependent

variable, fringe benefits. The data concerning insurance coverage indicate that most school districts provide hospitalization and life insurance coverage. The percent of school districts providing dental coverage has increased. Visual coverage was provided by relatively few districts. Graduate study reimbursement tended to be reported by roughly three-fourths of the school districts. Leave usage has increased and varies by regions and by size and wealth of districts. (Author/LD)

Identifiers—Management by Behavioral Objectives, New Hampshire (Portsmouth), *Teacher Corps

This document presents the management system developed by the University of New Hampshire-Portsmouth Twelfth Cycle Teacher Corps Project. This system, although very flexible and continually modified, is presented as a model that may be useful to other projects. According to the report, project goals, training objectives, and expected outcomes are clearly stated. A Management by Behavioral Objectives Task Analysis (samples of which are contained in the document) is done. The project evaluation design has four stages: context, input, process, and product evaluations. Documentation of project activities and accomplishments is collected in a central documentation file, documentation records or journals kept by each project member, and a monthly documentation interview of each member. The planning period of the project contains needs assessment and major decision-making for tailoring and beginning each project component. Process evaluation is used to determine the extent to which the program has been implemented as planned. Product evaluation requires the specification of directly measurable objectives. Both an internal and external evaluation are conducted. The research evaluation design, the evaluation timeline, the statement of policy and procedures, and the list of contents of the documentation file are also included. (Author/JM)

According to this paper, in private schools where parents make up the corporation and board of trustees, both administrators and trustees face particular problems and considerations. The paper attempts to deal with those problems, with an emphasis on the development of cooperative working relations among students, teachers, administrators, trustees, parents, and community residents. The first section deals with the board and the trustee, offering advice on clear definitions of role structure, trustee function, and awareness about the school. The section on the trustee and parents deals with the tension between representation of parents and personal or professional beliefs, the necessity for the board to keep others informed, and parent activities. Section three discusses relations between the board and the head and the difference between their personal investments in the school. The section on the trustee and the faculty highlights hiring, firing, and communication. Relationships and communication with students are also highlighted. Final chapters deal with money, authority, and relationships with the community. (Author/JM)

Material for this directory was gathered from two questionnaires distributed to independent elementary and secondary schools affiliated with the National Association of Independent Schools. More than 250 schools responded. Four areas of inquiry were covered. The first concerned new organizational structures instituted in schools. Special emphasis was placed on the ways schools have made an effort to build a capacity for research and development to test new educational ideas. The second area of inquiry concerned programs that serve new student constituencies such as the disadvantaged or non-English speaking. The third area was new curricula instituted such as parenting, ecology, or child development courses. Finally, the questionnaire concerned public interest programs. These were programs implemented in cooperation with some public agency or programs that filled a community need. The publication is both an overview of innovative programs at independent schools and a directory of specific ideas. An index of responding schools, including full addresses and cross-references to programs, is also included. (Author/JM)

Descriptors—*Boarding Schools, *Day Schools, Elementary Secondary Education, *Employment Practices, Faculty Development, Fringe Benefits, Organizational Climate, *Personnel Policy, *Private Schools, Teacher Attendance, Teacher Evaluation, Teacher Housing, Teacher Salaries

This 1971 study by the National Association of Independent Schools (NAIS) is a survey of employment practices, and policies in member schools. Questionnaires were sent to 721 schools yielding a response rate of 84 percent. Data were broken down into five categories for analysis: boarding schools, day schools, enrollment, salary ranges, and geographic location. The report follows the format of the questionnaire, with actual questions repeated and answered in the original order and the survey results listed. Starting with general information about the schools polled, the results are analyzed under 10 headings: employment practices of the schools, compensation, education of faculty children, fringe benefits, personnel services, organzational climate, teacher evaluation, vacation and absence, professional development, and food and housing for faculty. This paper reports on Catholic elementary and secondary schools in the United States. It gives statistical information on schools, enrollment, and faculty with a 10-year overview. The historical statistics include tables listing schools, pupils, and teachers by diocese, state, and region. Information was gathered from 161 diocesan offices, with the help of state conferences. Interspersed with the tables are brief reports on such topics as the role of religious communities, characteristics of private education, enrollment characteristics, and Catholic school faculty. Descriptors—*Comprehensive High Schools, Data Collection, *Educational Quality, Ethnography, *School Size, School Surveys, Statistical Studies, *Student Attitudes
Identifiers—*Quality of School Life Scale, *Quebec (Montreal)
This monograph discusses a study of the quality of school life of students in comprehensive high schools in Quebec. Two methods were used to compile data: a survey of 30 secondary schools involving 2,000 students from 15 large and 15 small settings, and an ethnographic study of one large and one small school. Student attitudes toward school both as individuals and as a group were considered. The survey measured student attitudes toward teachers, their commitment to school work, and their satisfaction with school. Findings of the enthnographic study indicated two major similarities between large and small schools. First, regardless of school size, teachers tend to direct classes while students act as passive learners. Second, student participation in school activities both in and out of class is extremely limited. The study concludes that both survey and ethnographic methods can be used successfully together to gain insight into complex social phenomena. (Author/LD)

The purpose of this document, the second of a five-volume series, was to analyze the various reviews of organizational development (OD) in general, and case studies of school districts in particular, in order to synthesize information about OD as it applies to schools. The review is organized into four main categories: (1) values, themes, and goals of OD; (2) operating characteristics; (3) outcomes; and (4) the future. The volume closes with a bibliography containing some 70 sources. (Author/LD)

The third of a five-volume series, this volume consists of two empirical studies of organization development (OD) in school systems. Part 1 reports on information gathered from over 300 OD consultants in the United States and Canada regarding job title, work base, sex, geographical region, type of training, and nature and extent of OD work in schools since 1970. Part 2, which forms the major part of this volume, details the OD programs in 76 school districts. Data were gathered through questionnaires and telephone calls and subjected to multiple regression analysis. Information is presented on the characteristics of the districts, the nature of and approaches to district OD programs, operating issues, outcomes, and recommendations. The appendices reproduce the consultant and the school district questionnaires and list the statistical outcomes of the study. (Author/LD)

Identifiers—Canada, United States
This volume, the fourth of a five-volume series, contains three onsite case studies of organization development (OD) selected from a sample of 76 school districts. The purpose of the case studies was to analyze in detail different types of OD programs and their use. Each case study represents a different OD focus: case study A involves a survey feedback and professional development approach, case study B combines a management by objective focus, and case study C is curriculum-based. From 13 to 21 interviews were conducted with OD coordinators, central administrators, board members, principals, teachers, and change agents. Questions covered description of the OD program, perceptions of the main goals, reasons for success and failure, role of internal and external change agents, consequences and impact of the program, and the future of OD in the district. Some of the findings suggest the need for a reasonably stable district environment, a close linkage between an internal OD specialist and a top manager, a clear image of the program, and a longer time-line for institutionalization. Identifiers—*Connecticut
The purpose of this manual is to provide the instructor an outline and prototypic documentation to lead a course on the topic of staff performance evaluation. The course is set up as a 30-hour event comprising 10 sessions of three hours each. This conforms with the policy of many higher education institutions and may, therefore, be used as an elective course offering. An alternate use is for a local district to use this course as an inservice program. The course sessions are presented in the following manner: session content, relation to other sessions, desired outcomes, procedures and activities, suggested readings, handouts, transparency masters, and assignments for later sessions. The instructor is encouraged to supplement these offerings with his or her own ideas and resources. The titles of the ten sessions are "Introduction and Orientation," "The Law and Guidelines," "System-Wide Goal Setting," "Preparing Instructional Objectives," "Writing Performance Objectives," "Self-Evaluation," "Target Setting Simulations," "Developing a Plan for Staff Performance Evaluation," "Editing the Plan," and "A Plan for Staff Performance Evaluation." This report presents an account and evaluation of a two-year survey-feedback problem-solving organization development (OD) project in a small city's school district. The project combined the survey-feedback technology with structural alterations in the school district and the training of internal change agents. Both planned and unplanned events have been reported. Chapter 1 presents the theoretical justification for the particular intervention. The field settings and the entry processes are described in chapter 2. Chapter 3 presents the model and design for both the summative and formative evaluations and describes all forms of data collection and the specific instruments that were used. Chapter 4 compares the groups of participating elementary schools with the nonparticipating. Chapter 5 describes the program implementation during the first year. Chapter 6 provides three kinds of summative evaluation. Chapters 7 and 8 provide a formative evaluation consisting of systematic case studies and evaluation of process data. Chapter 9 provides a summary assessment of the project viewed in terms of a framework for decision-making and evaluation. The final chapter discusses this approach to OD and to school improvement in the context of other possible strategies and programs for change. (Author/IRT)

Identifiers—*Cohort Survival Technique, *Wisconsin
This edition of "Planning for Better Education in Wisconsin" gives special attention to the number one problem facing both public and private schools in the state–declining enrollments. Although some of the data included looks at enrollment trends in both public and private enrollments, the handbook is primarily concerned with the nature and extent of the problem in the public schools, what can be expected in the future, and how school districts can cope with the problem. Also included in Part 1, along with the general discussion of declining enrollments, is a short article providing guidelines for projecting enrollments. Part 2 provides general information about Wisconsin school districts and includes a good deal of information on enrollment and population trends. It has been compiled not only to provide general statistical data on state and regional trends, but also to suggest how such information can be compiled and presented by planners developing materials relating to specific school districts. Part 3 includes current enrollments data and shows how enrollments have changed from 1970-71 to 1977-78 in each district in the state. (Author/IRT)

Special Education Programs for Emotionally Disturbed Adolescents. A Directory of State Agency Services.
National Association of State Directors of Special Education, Washington, D.C.
Pub Date—Sep 78
Note—48p.
Available from—National Association of State Directors of Special Education, 1201 Sixteenth Street, N.W., Washington, D.C. 20036 ($3.00)
Pub Type— Reference Materials - Directories/-Catalogs (132) — Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Consultants, Definitions, *Directories, *Emotionally Disturbed, Identification, Incidence, *School Services, *Secondary Education, *Special Programs, Student Placement
The directory, 80% of which consists of appendixes, is a compilation of information concerning secondary programs tor the emotionally disturbed, based on replies to a National Association of State Directors of Special Education national survey. The principal section reports summary data relating to terminology and definition, prevalence, services available, personnel involved in service delivery, diagnosis and placement, program administration models, and provision of state consultants for programs for the emotionally disturbed. Some of the data is expanded and elaborated in appendixes, which list such things as state definitions of emotional disturbance, recommended test batteries for determining eligibility and placement, and prevalence figures. The appendixes also report types of services available in the states, caseloads of professionals serving emotionally disturbed students, state reports of quality programs for emotionally disturbed adolescents, and use of consultants by state education agencies. Report No.—544AH70621
Pub Date—Jul 78
Grant—G00700051
Note—109p.; For the projects dissemination packet, see EC 113 506
Pub Type— Reports - Evaluative (142)
EDRS Price - MF01/PC05 Plus Postage.
Descriptors—*Career Education, *Gifted, *Internship Programs, Senior High Schools, *Talented Students
Identifiers—*Oregon (Eugene)
The booklet presents the final report of an evaluation of a high school internship program in career education for the gifted and talented in Eugene, Oregon. Program problems discussed involve such aspects as recruiting sponsors, coordination, selecting interns, and program expectations. Among the findings reported are that students did develop greater awareness of their career goals, aptitudes, and interests as a result of the program; that students adjusted quickly and well to work site demands, except where there was insufficient agreement on the role the student would play; and that students clearly grew in their understanding of the kind of organization in which they were placed, but did not demonstrate the ability to generalize about the qualities, skills, and knowledge of executives or managers. Recommendations presented center around the areas of program coordination/-management and program goals. Summaries and analyses of interviews with several of the students are also provided, along with a list of evaluation activities and timelines. Included in the appendixes are evaluation worksheets and questionnaires. (DLS)

Intended to help other school districts who may be interested in starting a similar program, the report provides information about a high school internship project in career education for gifted and talented 11th and 12th graders in Eugene, Oregon. For a 12-to 18-week period, students spend 4 days a week as non-paid interns working with executives, managers, and professionals in business and municipal government agencies. Included in the report are an overview of the project, samples of the placements and activities experienced by the students, and suggested steps for getting such a program started. Criteria for identifying the gifted and talented, a sample program budget, and the program coordinator's job description and list of qualifications are appended. (DLS)

Information-Processing Models for Addition, Subtraction, and Multiplication in the Mentally Retarded and Non-Retarded.
Pub Date—78
Note—37p.; Paper presented at the Annual Meeting of the American Educational Research Association (Toronto, Canada, March 29, 1978); Best copy available
Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Addition, Adolescents, *Arithmetic, *Cognitive Processes, Computers, Conceptual Schemes, *Educable Mentally Handicapped, Exceptional Child Research, *Information Processing, Memory, Mentally Handicapped, *Models, Multiplication, Operations Research, Reaction Time, Subtraction
A computer model of memory (based on input, retrieval, and reaction time) was applied to the rapid processing of simple arithmetic facts (addition, subtraction, and multiplication) by 18 educable retarded adolescents when compared with 18 nonretarded fourth graders (of equal mental age) and 18 normal adolescents. Results for addition indicated that all three groups use a digital (rather than analog) processing model with the faster reaction time of the normal adolescents attributable not to memorization but faster perceptual and motor processes. Results for subtraction supported the digital model for the retarded and young Ss but suggested that the normal adolescents used a memory retrieval system. Results for multiplication also supported the digital model for all three groups indicating that addition and multiplication are based on the same common mental processing mechanism. Results support educational practices of encouraging retarded children to manipulate objects and actively participate as they learn arithmetic facts. (Appended are a list of terms with definitions and statistical tables.) (DB)

Descriptors—Aurally Handicapped, *Deaf, *Educational Television, *Programing (Broadcast)
Identifiers—*Rainbows End
The document presents the final report of an educational television series for deaf children and their families designed to: show on TV persons and situations which would enhance the self-image of deaf children, encourage activities which lead to the acquisition of language and reading skills, stimulate family interaction and interaction within the classroom, and present to hearing persons an awareness of the communication process and culture of deaf persons. Initial sections cover the background of the program, production considerations, and primary program segments. Reported among results from a program evaluation involving 67 hearing impaired children (5-14 years old) is that of the students who viewed the program all but four paid attention 100% of the time. Also presented are evaluation statistics, observations of students, evaluations by profession-

als and parents, and sample comments from evaluators. A major portion of the document is made up of segments from the original project application and a resource guide for the television series. (SBH)

Michigan Univ., Ann Arbor.
Spons Agency—Bureau of Education for the Handicapped (DHEW/OE), Washington, D.C.
Pub Date—Sep 77
Note—60p.; Report on a Symposium, September 14-16, 1977
Pub Type— Reports - General (140)
EDRS Price - MF01/PC03 Plus Postage.
Descriptors—*Research Needs, *Visually Handicapped
A symposium involving personnel from universities and colleges, individuals from government and private agencies concerned with visual impairment, and doctoral level students was conducted to exchange information on current efforts and future needs in research with the visually handicapped child. Participants were divided into three groups to discuss goals and priorities in: organizational structures for the research community, training of researchers, and areas of needed research. Among evaluation results was that there seemed to be a general feeling that too much was planned for the symposium. (Appendixes, which make up the bulk of the document, include a copy of the initial letter, a list of participants, copies of the second letter and questionnaire, a paper titled "Childhood Visual Impairments-Sources and Uses of Knowledge" by D. Warren, an outline of the agenda, and a sample evaluation form. (SBH)

Identifiers—*TRAC Monitoring System
The kit is a multilevel assessment and reporting instrument for continuously evaluating the progress of multiply handicapped and retarded children receiving instruction in basic living skills. The TRAC System is designed to pretest a child to prescribe individual instruction and to then monitor the child's progress in his or her program. The system is structured to monitor student progress at three specific levels: an area of adaptive behavior, skills within that area, and subskills within that skill. The adaptive behaviors covered include eating, dressing, communication, social behavior, personal hygiene, motor performance, basic skills, concept formation, and toileting. The kit includes recording sheets to tabulate student performance in each of the three specific levels. A reference guide is also provided, covering how to use the TRAC System, its limitations and possible misuses, its use with other instruments and/or specific curricula, and its technical development. Descriptors—Ancillary Services, Curriculum, *Exceptional Child Services, *Handicapped Children, Identification, *Mainstreaming, Parent Participation, Preschool Education, *Preschool Programs, Program Planning
Identifiers—*Project Head Start
The report presents an executive summary of the findings, conclusions, and recommendations of a comparative study to assess the services being provided to handicapped preschool children by Project Head Start and non-Head Start programs. This study is Phase I of a larger study of the process of mainstreaming handicapped children in Head Start Programs. Limited comparison of Head Start program services are made with those offered by other programs located in the same communities. Findings are presented in a question-and-answer format within each of the following areas of investigation: mainstreaming, staff characteristics, recruitment and outreach, screening services, diagnostic services, planning and curricula, monitoring activities, auxiliary service providers, and parent involvement. Four basic areas are recommended in which Head Start services to handicapped children can be improved: diagnostic services, program services (particularly with respect to individualized planning), program facilities and materials, and outreach procedures to seek out unserved handicapped children. (DLS)

Descriptors—*Handicapped Children, *Mainstreaming, Parent Role, Preschool Education, *Preschool Programs, Student Placement, *Surveys
Identifiers—*Project Head Start
The document presents the final report of a national study to evaluate the process by which handicapped children were mainstreamed in Head Start programs. Findings related to the following areas of investigation are presented: placement of handicapped children after leaving Head Start, Head Start's role in establishing the new placement, Head Start activities designed to provide new program staff with information concerning the handicapped child, parental assistance provided to ease the transition of the child to a new program, follow-up of the child's adjustment to the new program, and differences in service continuity activities as a function of type of Head Start program organization. Recommendations presented focus primarily on two broad areas: strategies to enhance efforts to insure service continuity to handicapped children, and further investigation into the area of service continuity and its impact on handicapped children. A discussion of sampling strategy, a case follow-up schedule questionnaire, and definitions of post-Head Start placements are appended. (DLS)

Descriptors—*Handicapped Children, *Mainstreaming, Methods, Parent Attitudes, Preschool Education, *Preschool Programs, Teacher Attitudes
Identifiers—*Project Head Start
The document presents the interim report for Phase II of a study to determine how services provided by Project Head Start programs impact handicapped preschool children. The report summarizes the baseline data obtained and identifies the key methodological issues for consideration in the final data analysis effort. The instrumentation and methodology are reviewed, a preliminary analysis of baseline findings is presented, pretreatment conditions are documented, and certain methodological issues are clarified for the analysis plan. In addition to comparing handicapped children's progress in Head Start and other programs with a small sample of unserved children, the study also focuses on involvement with Head Start as it affects parent and teacher attitudes. A description of the sample is presented, and instrumentation issues are discussed, including the Alpern-Boll Developmental Profile and measures of attitude towards mainstreaming of the handicapped. Group differences considered include personal characteristics of the child, attitudes and characteristics of the child's family, attitudes and characteristics of the teachers, characteristics of the programs, and classroom integration. Data collection procedures, instruments, frequency tables for demographic data, and the Duncan Socio Economic Index are appended. (DLS)

State of the Art Literature Review on the Mainstreaming of Handicapped Children and Youth.
Applied Management Sciences, Inc., Silver Spring, Md.
Spons Agency—Administration for Children, Youth, and Families (DHEW), Washington, D.C.
Pub Date—1 Sep 76
Contract—105-76-1113
Note—76p.; Parts are marginally legible due to print quality
Pub Type— Information Analysis (070) ()
EDRS Price - MF01/PC04 Plus Postage.
Descriptors—Administration, *Handicapped Children, Identification, Incidence, Labeling (of Persons), *Mainstreaming, Methods, Preschool Programs, Teaching Methods
The report presents a state-of-the-art literature review on the mainstreaming of handicapped children and youth. An overview of mainstreaming is presented, along with an historical perspective that includes discussions of such aspects as legal impetus and reaction to labeling. Methodological issues considered include the presence of intervening variables, the over-generalization of findings, and the presence of undefined and vague variables. Among the useful findings on mainstreaming reviewed are successful assessment methodology, optimal administrative procedures, and optimal teaching procedures. Some implications of the research reviewed are covered, including such issues as who benefits from mainstreaming and what its costs are. Non-mainstreamed programs designed for handicapped preschoolers are also considered, including state legislated and grassroots programs. Surveys of the incidence of handicapped children aged 0-5 are also covered. A bibliography is included. (DLS)

Comparisons Among Principals, Regular Classroom Teachers, and Special Education Teachers of Their Perceptions of the Extent of Implementation of Administrative Practices Pertaining to Mainstreaming Mildly Handicapped Students.
Pub Date—77
Note—15p.
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Administrator Attitudes, *Educational Administration, *Handicapped, *Handicapped Children, *Mainstreaming, Principals, *State Surveys, Teacher Attitudes, Teachers
Identifiers—*Mississippi
The perceptions of 355 principals, regular classroom teachers, and special education teachers regarding the extent of implementation of administrative practices pertaining to the mainstreaming of mildly handicapped children in Mississippi were studied. The results indicated that the first year of mainstreaming in Mississippi saw only moderate implementation of administrative practices considered essential to effective mainstreaming programs. Analysis identified three areas where the perceptions of the three groups of professionals were not congruent (whether or not the principal should become cognizant of the characteristics of mildly handicapped children, whether or not community resources should be utilized in exceptional child education, and whether or not teachers should be encouraged to educate children about handicaps), thus indicating a need for cooperative planning in developing a rationale for mainstreaming mildly handicapped children in the years ahead. Descriptors—Course Descriptions, Higher Education, Inservice Teacher Education, *Material Development, *Program Development, *Severely Handicapped, *Teacher Education, Teaching Skills
The document reports on a training program to equip a variety of educational personnel to deal effectively with a population of severely/profoundly handicapped young children. Section I describes the program in terms of the problem, the need, and goals and objectives (which include the development of training materials which enhance the effectiveness of personnel preparation programs for the severely/profoundly handicapped). Section II, which makes up the bulk of the document, relates the rationale, methodology, and procedures for carrying out the three program components: preservice training leading to a Master's or Specialist in Education degree; inservice training for personnel working in community settings, and development of training materials. Proposals for evaluation of the program are outlined. (SBH)

Descriptors—Curriculum, Delivery Systems, *Demonstration Projects, *Disadvantaged Youth, Enrichment, *Gifted, *Handicapped Children, Identification, Preschool Education, Remedial Programs
Identifiers—*Gifted Handicapped
The monograph reviews the first 2 years of a model program to identify gifted-handicapped and gifted-disadvantaged children (2 1/2-6 years old) and to provide them with a preschool program that would offer a balance between stimulating enrichment activities and therapy and remediation in developmental areas, delayed because of specific modality deficits or limited environmental experiences. Following a project overview are sections which address the following components: need for services; guidelines and inservice training for identification; two studies including "Education and the Gifted-Handicapped Child" by A. Raper, et al and "Parents and the Gifted-Handicapped Child" by D. Cansler; delivery of services; the curriculum model; dissemination, training, and outreach; staff development; the family program; results of the 1975-77 and 1977-78 evaluations; and resources. Appendixes, which make up a large portion of the document, include referral forms, a copy of the Gifted-Handicapped Project Parent Manual, program evaluation forms, a sample workshop agenda, and a copy of the Parent Inventory Scales. Descriptors—*Aurally Handicapped, Classification, Deaf, Educational Programs, Elementary Secondary Education, *Foreign Countries, Learning Characteristics, Teaching Methods
Identifiers—*Australia
The document summarizes the findings of the Western Australian Council for Special Education regarding the methodological and administrative problems involved in educating hearing impaired children. Following an outline of specific principles and recommendations relating to education of hearing impaired children are chapters focusing on the following topics: historical background of schools for the deaf in Western Australia; auditory impairments and its classifications; educational characteristics of children with impaired hearing and methods used in their education; educational facilities in Western Australia for children with impaired hearing; the Speech and Hearing Center's program; teachers of the deaf; and education of the adult deaf person with acquired hearing loss. Also included are a list of references and charts on classification. (SBH)

ED 168 246 EC 113 911
Education of Visually Handicapped Children in Western Australia.
Western Australian Council for Special Education, Churchlands.
Pub Date—Mar 78
Note—57p.; Report to the Minister for Education; For related information, see EC 113 909-910 ; Parts of appendix marginally legible due to small print
Pub Type— Information Analysis (070)
EDRS Price - MF01/PC03 Plus Postage.
Descriptors—Educational Programs, Elementary Secondary Education, *Foreign Countries, Postsecondary Education, Preschool Education, *Visually Handicapped
Identifiers—*Australia
The report focuses on the education of visually handicapped children in Western Australia. Chapter 1 deals with the medical terminology of visual impairment and related educational issues. An historical review is the content of a second chapter, and Chapter 3 provides information on educational programs for visually handicapped children at the preschool, primary, secondary, and post-secondary levels. A final chapter presents recommendations made by the Western Australian Council for Special Education regarding changes in the system of educational services for the visually handicapped. Among suggestions are that a centrally located library and reference center be established and that all teachers working with students using brailled materials receive an adequate braille training course before appointment. (SBH)

Alternative Responses to the Problems of Delinquent Behavior Patterns of Youth.
Pub Date—Mar 77
Note—23p.; Position paper resulting from workshop held at Northeast Regional Child Welfare League Conference (March 17-18, 1977)
Available from—Providence Mental Health Center, 160 Broad Street, Providence, Rhode Island 02903 ($2.00)
Pub Type— Reports - Descriptive (141) — Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Adolescents, *Delinquency, *Demonstration Projects, *Intervention, *Needs Assessment, Prevention
The document reports the suggestions offered by workshop participants regarding alternative responses to the problems of delinquent behavior patterns in youth. Recommendations offered include the following: priority must be given to services to children in need, with the goal of preventing entrance into the traditional justice system; programs should be encouraged with priority going to high risk locales where parents could attend parent education seminars; and helping professionals should be specifically trained for intensive work with troubled families and for involvement with resistant adolescents. Several models (including the Job Prep model of Hartford, Connecticut; the National Youth Project Using Minibikes, which offers community based services; and the Youth Diversionary Program of the Rhode Island Opportunities Industrialization Center) are considered. Descriptors—*Aesthetic Education, Art, *Creative Expression, Creative Writing, Dance, Demonstration Projects, Drama, *Handicapped Children, *Humanistic Education, Music, Research Reviews (Publications), Teacher Education
The book illustrates the value of the arts to special education, describes arts education programs and activities, reviews research on positive changes in children as a result of arts experiences, and considers ways to incorporate arts education in personnel preparation. Possible contributions of art, music, dance, drama, and creative writing to special education are examined. Recent and in-progress research is reviewed. Features of various arts-in-education approaches are described, and three prototype programs are cited. The role of the National Committee - Arts for the Handicapped is discussed, and 24 model site projects are described. Current gaps in personnel preparation are identified, and suggestions for collaboration, training, and research and development are given. (CL)

Professional Training Activities as a Part of Mainstreaming the Handicapped: An Analytical Survey of the Literature. (Intensive Courses for In-Service Staff Development.)
Pub Date—[78]
Note—49p.
Pub Type— Guides - Non-Classroom (055)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors—*Handicapped Children, *Inservice Teacher Education, *Mainstreaming, Program Development, Staff Improvement, Teacher Education
The paper is designed to help managers of mainstreamed programs set up intensive staff training courses on mainstreaming. A brief analytic survey of the literature is followed by a discussion of practical applications of mainstreaming (including philosophy, curriculum, support services, and evaluation). The remainder of the paper reviews procedures involved in developing intensive staff development courses. Topics considered include merging several courses into one through the selective use of performance-behavioral objectives, curriculum articulation by objectives, and the transition from teacher-centered to learner-centered programs. Note—12p.; Paper presented at the Annual Convention of the Genesee Valley Psychological Association (5th, Rochester, New York, October 20, 1978)
Pub Type— Reports - Evaluative (142) — Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Age Differences, *Behavior Patterns, Behavior Rating Scales, *Educable Mentally Handicapped, *Learning Disabilities, Mentally Handicapped, *Sex Differences
Identifiers—*Devereux Adolescent Behavior Rating Scale
The Devereux Adolescent Behavior Rating Scale was used to investigate the effects of age and sex on the classroom behavior of 294 educationally handicapped adolescents. An analysis of variance (ANOVA) indicated that the five age groups (12, 13, 14, 15, 16 years) were significantly different on one behavioral scale (heterosexual interest). Analysis further revealed three scales (domineering-sadistic, hyperactive-expansive, and bizarre action) that were significantly different at the p .05 level for males and females, and one (heterosexual interest) at the p .01 level. Descriptors—Aurally Handicapped, Childhood, *Context Clues, Cues, *Exceptional Child Research, *Hard of Hearing
Use of contextual cues in language comprehension by hearing impaired persons is considered in two sections. The first section summarizes a study of how 21 hard of hearing children (7-12 years old) used contextual cues to identify words in sentences heard from a tape recorder. Results are explained to indicate that identification of words on the basis of auditory cues is often difficult for hearing impaired children. The second section presents a proposal for a study on the use of contextual cues in the comprehension of interpreted lectures. (Author/CL)

Teacher and Peer Observations of Mainstreamed Elementary School Pupils: A Comparative Group Study.
Pub Date—Oct 78
Note—10p.; Paper presented at the Annual Convention of the Genesee Valley Psychological Association (5th, Rochester, New York, October 20, 1978)
Pub Type— Reports - Evaluative (142) — Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Behavior Patterns, *Behavior Rating Scales, *Educable Mentally Handicapped, Elementary Education, *Exceptional Child Research, *Learning Disabilities, Peer Relationship, Teachers
Teacher and peer ratings of 37 mainstreamed educationally handicapped (EH) elementary aged children and 37 non-EH controls were analyzed according to the Rochester Teacher and Peer Rating Scales' independent behavioral competence factors and combined teacher-peer integrated behavioral competence domains. Results indicated significant differences between EH and non-EH groups for the behavioral domains of academic problem solving abilities and social normative skills. (Author/CL)

Child Behavior Profile Patterns of Children Referred for Clinical Services.
Spons Agency—National Inst. of Mental Health (DHEW), Bethesda, Md.
Pub Date—Aug 78
Note—25p.; Paper presented at the Annual Meeting of the American Psychological Association, Toronto, Canada, August 30, 1978)
Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Behavior Problems, *Behavior Rating Scales, Elementary Secondary Education, Emotionally Disturbed, *Exceptional Child Research, Interpersonal Competence, Standardized Tests, *Test Construction
Identifiers—*Child Behavior Profile
The paper describes the development and use of the Child Behavior Profile, a measure of behavioral problems and competencies standardized for each sex at ages 4 to 5, 6 to 11, and 12 to 16. Cluster analysis is explained to have produced six reliable profile types for boys 6-11 years old; five reliable profile types for boys 12 through 16 years old; six types for girls aged 6 through 11; and seven for girls 12 through 16. Followup data is cited to show that the Child Behavior Profile can be used in research on the relationships between child characteristics and the effectiveness of various services. (CL)

The Gifted: A Perishable Resource.

Appalachia Intermediate Unit 8, Ebensburg, Pa.

Pub Date—Jan 79

Note—77p.; Document may not reproduce well due to color of paper of the original

Available from—Appalachia Intermediate Unit 8, 227 Bedford Street, Hollidaysburg, Pennsylvania 16648 ($1.53)

Pub Type— Guides - Non-Classroom (055)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Adolescents, Civil Rights, Creativity, *Due Process, Evaluation, *Family Resources, *Gifted, High Achievers, Individual Characteristics, Individualized Programs, *Parent Participation, Parent Role, Social Characteristics, Special Education Teachers

The booklet is designed to help parents understand how they can help in the development of their gifted children. Included are such topics as the characteristics of giftedness; the four "faces" of gifted adolescents (high achieving studious, social leader, creative intellectual, and rebel); the role of parents; a checklist for assessing the school's needs; and individualized educational plan facts for parents. Due process procedures - including the rights to notice, program placement conferences, a due process hearing, and appeal - are discussed. A section for teachers of gifted children provides chapters with the following titles: "Establishing Goals for You and Your Students", "All Gifted Children Don't Learn Alike", "Meaningful/Less Meaningful Learning for the Gifted", and "A Point to Ponder" (which examines the necessity of special program for the gifted). A list of suggested reading and bibliographies are provided. (PHR)

The Development and Implementation of a Plan for Mainstreaming Retarded Educable Students Into Regular Classrooms in the Comprehensive High School: Phase II.

Nova Univ., Fort Lauderdale, Fla.

Pub Date—77

Note—216p.; Parts may not reproduce clearly; Doctoral Thesis, Nova University

Pub Type— Dissertations/Thesis (040) — Reports - Research (143)

EDRS Price - MF01/PC09 Plus Postage.

Descriptors—Academic Achievement, Basic Skills, Cocurricular Activities, *Educable Mentally Handicapped, *Educational Planning, *Grades (Scholastic), *Mainstreaming, Parent Attitudes, Peer Relationship, Physical Education, *Program Development, Secondary Education, Teacher Attitudes

The paper reports on the organization and implementation of a plan that assisted 75 mainstreamed educable mentally retarded students meet high school requirements. The report indicates that by the end of the second year 50% of all the mainstreamed students received a passing grade in all high school subjects with the exception of physical education. Attitudes of teachers are described as changing positively and parental involvement is shown to have increased significantly. It was established that the students showed significant gains in academic achievement and relationships, and greater participation in extracurricular activities. Among appendixes are sections on helping students develop desirable classroom behavior, various forms (such as a resource room behavior checklist and a due process notice), and a staff development questionnaire. Descriptors—Adolescents, Calculation, Communication Skills, *Community Resources, *Consumer Education, *Daily Living Skills, *Delinquency, Emotionally Disturbed, Health Education, *Interpersonal Competence, Jobs, Knowledge Level, Laws, Problem Solving

The manual describes a program in survival skills for use with delinquent youth. The program covers the following six areas of functional competency: interpersonal relations, occupational knowledge, consumer awareness, law, health, and community resources. The skills necessary for successful functioning are listed as communication, interpersonal relations, computation, and problem solving. The goal and objectives of each of the six areas of competency are outlined. A list of materials for teaching each of the areas is provided along with the reading difficulty grade level, availability of audio tapes, suitability for group or individual instruction, and the publisher. A sampling of the worksheets for each of the six knowledge areas is provided. (PHR)

Pub Date—Jan 79

Note—99p.; For related materials, see EC 114 069-071

Available from—California Juvenile Court Schools Training Program, 100 Skyport Drive, San Jose, California 95110 ($4.00)

Pub Type— Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Adolescents, *Affective Behavior, *Delinquency, Elementary Secondary Education, Emotional Development, Emotionally Disturbed, *Humanistic Education, *Individual Development, *Interpersonal Competence, Learning Activities, *Self Concept, Values

The manual contains affective educational materials and methods for use with delinquent students (grades 4-12). The introductory section explores a suggested timetable for the activities provided and gives suggestions for setting up the classroom, the use of a 'group circle' and an opening exercise or icebreaker. Each activity is described in terms of the rationale, materials, and activity content. The activities are divided into the following four sections: image building - self awareness, with activities such as writing an autobiography; image building - giving and receiving, including activities which foster the individual's sense of self; awareness of others through awareness of self, in which cooperation is stressed; and values clarification - getting to know self through others, which includes activities designed to explore individual differences, stereotypes, and values. Specialized Vocational Services for the Individual with Epilepsy.

Washington Univ., Seattle. School of Medicine.

Spons Agency—National Inst. of Neurological and Communicative Disorders and Stroke (NIH), Bethesda, Md.

Pub Date—Aug 78

Contract—N01-NS-6-2341

Note—35p.; Paper presented at the Annual Convention of the American Psychological Association (86th, Toronto, Canada, August 29, 1978)

Pub Type— Speeches/Meeting Papers (150) — Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Epilepsy, Interpersonal Competence, Job Skills, Neurologically Handicapped, On the Job Training, *Rehabilitation Programs, *Seizures, Special Health Problems, *Vocational Education, Vocational Followup, *Vocational Rehabilitation

A specialized vocational program served 108 epileptic individuals who participated in the program during the first 18 months of its operation. The following are some of the aspects of the program: utilization of the neuropsychological data in rehabilitation planning, brief work adjustment, a job station program, training in job seeking skills, social skills training, on-the-job training, a job finding club, placement services, and followup programs. Among conclusions are that seizures do not appear to be the major barrier to employment maintenance, rather it is "epilepsy associated" problems (psychosocial difficulties and performance problems) which cause loss of employment; and the need to establish satellite vocational units to more effectively reach and work with epileptics. Descriptors—*Architectural Barriers, *Building Design, *Consultants, *Handicapped
The book presents a directory of consultants on barrier free environments for handicapped people. The directory is organized into three sections. The principal section is arranged geographically, with consultants listed alphabetically within states. A profile of each consultant is provided, giving address, telephone number, professional category, type of services available, a brief summary of experience with accessibility projects, and names and addresses of up to two references. In the second section, consultants are listed by professional or agency category, arranged alphabetically by name within categories. The third section is an alphabetical name index. Both sections 2 and 3 have page references to the consultant profile in the geographical section. (DLS)

Identifiers—*Education for All Handicapped Children Act, Pennsylvania (Montgomery County)
The final report describes a project designed to serve preschool handicapped children in Montgomery County, Pennsylvania. Seven service components are outlined: creating public awareness of programs and services available to previously unserved handicapped individuals; locating, identifying, and verifying unserved handicapped persons; providing individualized program plans for handicapped persons; providing instructional programs and related services for preschool handicapped children for whom such programs are not mandated or otherwise available; developing and maintaining a child-tracking system; providing resource information necessary for adequate services to handicapped persons under the Education for All Handicapped Children Act, Part B (EHA-B); and to gather, summarize, and report information about EHA-B programs and services for management, accountability, and ongoing planning purposes. Sections cover major objectives, projected target groups, a project overview, component based activities, the evaluation framework, evaluation results for each program component, and dissemination. Appendixes, which make up the bulk of the document, include the following materials: sample "Starting Early" brochures (for identification of exceptional children), a preschool survey form, a sample IEP (individualized educational program), external evaluation reports, and lists of criteria by competencies. (SBH)

Descriptors—Elementary Secondary Education, *Handicapped Children, *Individualized Programs, *Inservice Teacher Education, *Parent Education, *Parent Role, Program Planning, *Teacher Role
Identifiers—Pennsylvania (Montgomery County), *Project Partners in Education
The final report describes "Project Partners in Education", a Montgomery County (Pennsylvania) project, designed to create a corps of resource persons composed of parents and teachers who would be knowledgeable about the entire IEP (individualized educational plan) process; and to obtain data on the extent of actual IEP implementation on the classroom, the time committment necessary on the part of teachers and supervisors for the total IEP process, and the cost of teacher and supervisory time incurred in IEP implementation. Initial sections address the following topics: project personnel; original project objectives; participants, clientele, and organizational setting; procedures, services, and activities; evaluation procedures; formal research and evaluation findings; project results; implications of project results; factors relevant to success and shortcomings; concrete project output; dissemination activities; continuation of project activities after cessation of federal funds; and efforts by other agents to adapt or adopt project activities. Appended materials, which make up the bulk of the document, include a copy of the Partners in Education inservice training manual, parent visitation forms, the Partners in Education IEP cost study, a list of resource persons for IEP implementation, a consultant report, and partial dissemination listing. (SBH)

The fourth of nine documents on community based recreation for handicapped persons (EC 114 401-409) examines federal funding for special recreation. The first section reviews functions of assistance in the federal budget, scope of federal programs, and barriers to receiving funds. Three major problem areas (lack of funds for provision of local services, lack of Federal/State support programs and services, and lack of "purchase of service" status with health and rehabilitation agencies) are identified. Options for federal and federal-state support and funding are discussed, primary and secondary Federal and Federal-State programs are listed, and detailed program information is included from the Federal Assistance for Programs Service the Handicapped catalog. The report closes with information on funding and related resources. (CL)

The final report of the project on community-based recreation for the handicapped details training activities, materials and evaluation findings. A chart lists approximately 40 primary training activities with information on date and location, faculty resource person, number attending, number of requests, and number of evaluations. The primary materials produced by the project are summarized and distribution procedures reviewed. The evaluation section includes mean ratings for 13 criteria at 26 institutes, and general comments from participants. Five conclusions and recommendations are presented, including the existence of such new models for recreation services as consumer, advocate, commercial, and creative and performing arts models. Descriptors—*Handicapped Children, *Intervention, *Preschool Workshops, *Program Evaluation
Identifiers—*Project PUSH Outreach
The report details the accomplishments and slippages of Project PUSH-Outreach, a program for the early education of handicapped children, during the year June, 1977 to July, 1978. It is explained that the staff conducted five workshops during the years and the objectives, methods of presentation, number of contract hours, agency, number of participants, and participants' evaluation are provided for each workshop. Reasons for slippage, such as lack of response to training programs, are discussed. Much of the document contains tables and exhibits listing information on participants and project impact. A regional conference report and specific objective data are appended. (PHR)

Resident Manager Education: A Curriculum Model for Educating Foster Parents and Group Home Personnel.
Macomb-Oakland Regional Center, Mt. Clemens, Mich.
Spons Agency—Social and Rehabilitation Service (DHEW), Washington, D.C.
Pub Date—Mar 77
Grant—HEW-56-P-25400/5-03
Note—46p.; Small print may be marginally legible
Pub Type— Guides - Non-Classroom (055)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—*Administrator Responsibility, Behavior, Community Involvement, *Educational Programs, Family Relationship, Fire Protection, *Foster Family, Leisure Time, *Mentally Handicapped, *Normalization (Handicapped), Sexuality
The booklet is a curriculum model for educating foster parents and group home personnel who work with mentally retarded individuals. The first chapter discusses the need for training. Subsequent chapters explore course development and presentation of topics, with emphasis on the importance of the approach the training should take and the rationale for the curriculum. Twelve topics are presented in chapters which outline the learning objectives, discussion stimulants, and resources (references are included). The chapters have the following titles: "Orientation to Mental Retardation"; "Maintaining Healthy Environments, Providing Emergency Care"; "Fire and Safety Considerations"; "Administrative Responsibilities"; "Elements to be Considered in Programming"; "Normalization"; "Managing Behavior"; "Leisure Time Recreational"; "Educational Considerations"; "Community Placement"; "Realtionships with Natural Families"; and "Thoughts on Sexuality". 100 Essential Signs.
Texas School for the Deaf, Austin.
Spons Agency—Office of Education (DHEW), Washington, D.C.
Pub Date—Jan 78
Note—29p.
Available from—Texas School for the Deaf, 1102 South Congress, Austin, Texas 78704 ($1.00)
Pub Type— Reference Materials - Vocabularies/-Classifications (134)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Aurally Handicapped, *Deaf, Safety, School Personnel, *Sign Language, Spanish
The booklet contains illustrations of 100 basic signs for use by school employees in working with the deaf. The signs were chosen for inclusion in the booklet by a committee which reviewed hundreds of signs and evaluated their importance in communicating with the deaf. The illustrations, taken in large part from the "Preferred Signs for Instructional Purposes" text, appear with the English and Spanish word equivalents. The signs are broken down into three categories - safety signs such as stop, go, wait, cold, and hospital; informative signs such as where, boy, mother, teacher, after, and month; and courtesy signs such as good morning, hi, sorry, and excuse me. A brief explanation of the markings appearing in the booklet and the manual alphabet are also included. (PHR)

Pub Date—May 78
Note—156p.
Pub Type— Reports - Descriptive (141) — Reports - Research (143)
EDRS Price - MF01/PC07 Plus Postage.
Descriptors—*Day Care Services, *Delivery Systems, *Exceptional Child Research, Family (Sociological Unit), *Handicapped Children, *Home Instruction, Individual Development, Infants, Parent Child Relationship, Parent Reaction, *Program Evaluation
Identifiers—*Triple T Consortium (Teaching Texas Tots)
The report evaluates the impact and effectiveness of the Triple "T" Consortium (Teaching Texas Tots) using data gathered from nine of the 14 projects, pre-post test scores of a sample of 126 handicapped children (under 2 years) from the project, case studies reports from selected families, reports of sample children, and a parent reaction questionnaire. The consortium projects generally combined home/center delivery service, with the average age of children served being 21 months, and the number of children served totaling 924 (including 118 in the 3-year and older group). Results of the post test scores of the sample children showed highly significant improvement (greater than could be expected from a growth or maturation effect). Data from individual case studies showed that even those who had made the least progress had improved in one or more developmental areas. Family case study reports evidenced many positive changes during the project. Results of the parent survey demonstrated strong positive reaction to the project. (PHR)

Note—23p.
Pub Type— Reference Materials - Bibliographies (131)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Adults, *Attitudes, Audiovisual Aids, Childrens Books, Elementary Secondary Education, *Handicapped Children, Preschool Education
Disigned for teachers, library media specialists, and parents; the annotated resource bibliography contains titles of children's books and other media selected to promote an understanding of handicapped children and adults. The titles selected represent the last 5 years in which a new awareness of attitudes and feelings toward the handicapped has emerged. The children's book section is divided into books for preschool and primary grades, books for the middle grades, and books for young adults. An audiovisual section and a professional reference section are also provided. Addresses of the publishers and producers are included in a separate section. (PHR)

Evaluation of the Process of Mainstreaming Handicapped Children Into Project Head Start. Phase II, Executive Summary.
Applied Management Sciences, Inc., Silver Spring, Md.
Spons Agency—Administration for Children, Youth, and Families (DHEW), Washington, D.C.
Pub Date—15 Dec 78
Contract—105-76-1113
Note—24p.; For related information, see EC 113 808-811 ; Parts marginally legible due to small print
Pub Type— Reports - Evaluative (142) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Academic Achievement, *Exceptional Child Research, *Handicapped Children, Intervention, *Mainstreaming, Preschool Education, *Program Effectiveness
Identifiers—*Project Head Start
The report summarizes the findings and conclusions from the second and final year of an evaluation of Head Start's efforts to serve handicapped children. It is explained that baseline and posttest data were collected on 391 handicapped children in non-Head Start preschool programs, and 121 unserved handicapped children. Results of comparative analyses are seen to indicate that Ss in both Head Start and non-Head Start programs, (particularly speech impaired Ss), showed gains in motoric, self help, social, academic, and communication skills that were generally greater than those of non-served Ss. Data also is reported to show that Head Start compared favora-

bly with other service alternatives in terms of child-specific outcomes. Other findings reported include that program benefits for Head Start Ss were variously associated with the amount of time Ss spent in a mainstreaming situation, small class sizes, and low ratios of handicapped to non-handicapped Ss. (Author/CL)

Conducting the Annual Program Review: A Guide.
Drake Univ., Des Moines, Iowa. Midwest Regional Resource Center.
Spons Agency—Bureau of Education for the Handicapped (DHEW/OE), Washington, D.C.
Pub Date—Dec 78
Contract—300-78-0023
Note—92p.
Pub Type— Guides - General (050)
EDRS Price - MF01/PC04 Plus Postage.
Descriptors—*Handicapped Children, *Individualized Programs, *Program Evaluation, Program Planning
Identifiers—Annual Program Reviews
Designed to assist local education agencies (LEAs) in conducting annual program reviews, the handbook focuses on evaluating Individualized Education Programs (IEPs) for handicapped children. An annual review meeting guide discusses purposes and procedures of the review. The second section provides a background on the planning-evaluation process, ideas for pre-meeting activities, a step by step analysis of the meeting itself, and ideas for followup and evaluation of the entire process. Among four appendixes are examples of IEP review questions. (CL)

Identifiers—Lau v Nichols
This book's purpose is to satisfy a perceived need for a straightforward, non-academic, non-bureaucratically worded guide to bilingual education planning and to provide objective information on compliance procedures and federal and state funding opportunities to school district policy planners, whether they be administrators, teachers, or parents. The guide is designed to fill a gap in the literature that has arisen with the passage of "Lau vs. Nichols" and with the establishment of rigorous enforcement procedures by the (HEW) Office For Civil Rights. It is hoped that the book will help clarify issues, suggest strategies for interacting with state and federal bureaucracies, present alternatives, and suggest additional resources. Each of the book's seven sections explains the public policy issues and answers the most commonly asked questions. The sections are: Lau Centers (Technical Assistance Units); the "Lau vs. Nichols" Supreme Court decision; letter of non-compliance; California state laws and advisory opinions; task force findings; compliance timelines; and funding opportunities for bilingual education programs. (EJS)

This book sketches the educational history of Mexican Americans and describes bilingual education as one way they can draw on their heritage and teach in bilingual elementary schools. Chapters are devoted to: (1) the profile of depressed educational achievement of the Mexican American and its attendant circumstances; (2) the bilingual school as a possible solution to the problem; (3) identification of the special competencies needed by the teacher in the bilingual-bicultural elementary school; (4) statement of a rationale; (5) the nature of performance-based education and its implications for program design; (6) a response to the basic issues–the St. Edward's Program for the preparation of teachers for Spanish-speaking children in the bilingual-bicultural elementary school in Texas; and (7) conclusions and suggestions for further research. Tabular information, graphs, and a bibliography are included as is an appendix describing a bilingual teacher education conference at St. Edward's University. (EJS)

This guide describes bilingual, bicultural, and English as a Second Language (ESL) materials adopted for use in California. The guide is divided into three sections: (1) a list of publishers, including addresses and phone numbers; (2) an annotated index to the guide that includes basic information about each item; and (3) detailed information on each set of materials. The annotated index provides the following information: type of material (basic or supportive), kind of material, publisher's grade level, State Matrix grade level, instructional emphasis, special conditions or comments, and page reference in the guide. The following information is provided on each set of materials: (1) components; (2) general description; (3) goals and objectives; (4) organization–scope and sequence; (5) methodology; (6) provisions for student evaluation; and (7) related materials. On each page, the indication is given that materials should be carefully reviewed before ordering. The instructional materials listed include textbooks, workbooks, filmstrips, tapes, records, multi-media kits, games, maps and charts, tests, dictionaries and a duplicating master set. (Author/AMH)

Descriptors—French, *Grammar, *Individual Needs, *Language Instruction, Language Skills, Latin, *Learning Activities, *Pattern Drills (Language), Remedial Instruction, Secondary Education, *Second Language Learning, Spanish, Student Needs, Syntax, Verbs, Vocabulary
A group of activiites for responding to individual learner needs designed by seven teachers of Spanish, French, and Latin, are presented as practical application exercises to meet identified learner problems in their classrooms. The source of learner problems was identified and correlated to specific learning tasks according to the original model of "Diagnosing and Responding to Individual Learner Needs" by Diane Birckbichler and Alice Omaggio. The corresponding activities were then developed along the suggested remedial models of the authors. The activities can be used as they are presented, or as models for other teachers to develop similar activities for their own classroom learning needs. (Author/AMH)

Descriptors—Cultural Education, *Curriculum Development, *Language Instruction, *Language Skills, Listening Comprehension, Modern Language Curriculum, Reading Comprehension, *Secondary Education, *Second Language Learning, Speech Skills, Writing Skills
This curriculum was completed during phase III of Project SEARCH, a nationally validated project designed to humanize elementary and secondary education by creating, developing and implementing innovative models in the curriculum through an integration of the humanities and the arts. Project SEARCH is an attempt to help students apply both intellect and feeling to the problems of living and to develop reasoning skills. It is also an inter-school effort committed to joint inquiry, to collaborative action, and to interdependence among schools, school systems and other educational agencies. The program used the entire district-wide staff and special area personnel over a three-year period, totaling 800 teachers and about 13,000 students. The two major tasks carried out by the project were: to help teachers acquire curriculum development skills in order to horizontally and vertically articulate district-wide curricula; and to assist staff through a district-wide in-service training program. This articulated curriculum outlines foreign language instructional goals for students grades 9-12 for levels I-IV in the areas of speaking fluency, aural-oral comprehension, reading comprehension, culture insight, and writing fluency. Report on the Joint Evaluation Session of Intensive Overseas Language Programs.
Bureau of Postsecondary Education (DHEW/OE), Washington, D.C. Div. of International Education.
Pub Date—Jun 78
Note—174p.
Pub Type — Reports - Descriptive (141)
EDRS Price - MF01/PC07 Plus Postage.
Descriptors—Information Dissemination, *Intensive Language Courses, International Educational Exchange, International Programs, *Language Instruction, *Language Programs, Program Coordination, Program Evaluation, *Second Language Learning, Student Evaluation, *Study Abroad, Testing
A report is presented on the joint evaluation session of intensive overseas language programs. The evaluation session was attended by representatives of the following federally-funded programs: American Institute of Indian Studies, Berkeley Urdu Language Program in Pakistan, Center for Arabic Study Abroad (Cairo), Cooperative Russian Language Program at Leningrad State University, Indonesian Language Abroad, Inter-University Center for Japanese Language Studies in Tokyo, and Inter-University Program for Chinese Language Studies in Taipei. The goals of the session were: (1) to share more broadly the rationale, experiences, methods, and problems of each of the participating groups; (2) to develop a mechanism which would lead to a continuing dialogue among the programs for the maximum dissemination and sharing of exemplary practices; (3) to discuss the development of a common procedure for student pre-testing and post-testing as well as teacher and general program evaluation; and (4) to prepare a report of the session

to increase awareness of the programs in the foreign language and areas studies communities at home. Detailed accounts of the curriculum, student selection procedures, administrative organization, and background of the different programs are provided. Recommendations of the 12 study groups and suggestions concerning the effective administration of foreign language centers are offered. Two short reports and data are appended. (SW)

Ethnic Attitudes and Language Usage.
Pub Date—78
Note—23p.; Paper presented at the convention of the National Council for Social Studies (Houston, Texas, November 22, 1978); Parts may be marginally legible due to light print
Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Black Attitudes, Blacks, Caucasians, Cross Cultural Studies, Cultural Factors, *Cultural Images, Ethnic Groups, *Ethnicity, Ethnic Stereotypes, Ethnic Studies, Language Patterns, *Language Usage, Language Variation, *Nonstandard Dialects, *Racial Attitudes, Regional Dialects, Sociolinguistics, *Speech Habits, Standard Spoken Usage, Urban Studies
Identifiers—*Ethnic Attitudes
The purpose of the study reported here was: (1) to determine whether any predictable relationships exist between the spoken language patterns of individuals and those individuals' ethnic attitudes; and (2) to identify the degree of association present among various selected demographic factors, language patterns, and ethnic attitudes. The particular questions under study here sought information on the relation of standard-nonstandard language patterns to ethnic attitudes on a black-white racial base. Recordings were made of interviews with 162 Atlanta Metropolitan area residents who were classified according to educational level and to the kind of speech they used (standard or nonstandard). The data collected were analyzed as follows: (1) each subject's speech was classified; (2) subjects received numerical scores on the Cultural Attitude Scales (Anglo-Black); (3) subjects were sorted into groups based on the demographic data collected; and (4) a multiple regression computation was used to assess the relationship of scores on the cultural attitude scales to speech, education level, race, age group, and sex. A Pearson correlation was also computed on all of the above categories of data. It is noted that educational level seems to be the best predictor of speech pattern. From the findings, it is concluded that (1) nonstandard speech patterns and black race when found together may predict high black ethnic preference; and (2) in this study, none of the variables have predictive value for ethnic attitude toward whites. Descriptors—*Child Language, Cognitive Development, Concept Formation, *Discourse Analysis, Interaction Process Analysis, *Language Development, *Language Processing, Language Skills, Preschool Children, *Psycholinguistics, Semantics, Speech Communication, Syntax, *Verbal Development, Verbs
In any successful conversation, a speaker must select both what is said and how it is said on the basis of various estimates of the listener's abilities, knowledge and interests. Most research on linguistic input to children has focused on the tendency of speakers to simplify their speech for the younger listener. Little attention has been paid to the ways in which adults might introduce material that is outside the child's current system, but that the child is ready to acquire. This paper reports a longitudinal study of the "fine-tuning" of parents' speech to a child over a particular conceptual domain: reference to events that happened outside the current context at an earlier point in time. Reference to past in the adults' speech was chosen for study since temporal reference is a complex part of language acquisition where one finds both the child's comprehension and usage changing gradually over a long period of time. The data consisted of transcripts of interactions between a first-born child and her mother or father when she was 20 months to 29 months old. It was concluded that speakers are sensitive to specific cues from the linguistic behavior of the child, and use these cues in selecting topics that (1) structure the conversation to allow the child to participate most effectively, and (2) present opportunities for the child to acquire new forms at appropriate times. Identifiers—*Ysleta Independent School District TX
The teaching of foreign languages in the elementary school (FLES) as an integral part of the elementary curriculum has met with varied success in the U.S., despite increasing evidence that young children are capable of learning to speak a foreign language with less effort and more success than any other age group. The earliest FLES programs date to 1840, and since then, their incorporation into school curriculums and acceptance by communities has experienced dramatic fluctuation in the U.S. in general and in Texas in particular. The Ysleta Independent School District in El Paso, Texas, has maintained a strong FLES Spanish program despite negative trends. The success of the Ysleta FLES program can be traced to competent handling of such problems as community support and appropriate funding, the availability of qualified teachers, the use of comprehensive, updated instructional materials, with supplementary activities that are constantly being evaluated, and the need to articulate FLES with upper level Spanish programs. FLES holds a promise to the student who wishes to become a functioning bilingual upon graduation from high school. (Author/MHP)

Communication in Writing: The Problem of Cueing.
Pub Date—[78]
Note—25p.; Not available in hard copy due to marginal reproducibility
Pub Type— Guides - Classroom - Teacher (052) — Guides - Classroom - Learner (051)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors—Charts, Classroom Materials, Communication Skills, *Composition Skills (Literary), *Cues, Diagrams, Grammar, Illustrations, Instructional Materials, *Language Instruction, Language Skills, Maps, Pictorial Stimuli, Second Language Learning, Sentence Structure, Syntax, *Teaching Methods, Verbs, *Visual Aids, Visual Learning, Visual Stimuli, *Writing Exercises, Writing Skills, Written Language
Writing exercises used as a means of reinforcing language presented and practiced in the spoken medium should include clear cues for the student that can stimulate and guide the writing of connected sentences. Three principles are suggested as being fundamental to the planning and use of effective exercises: (1) focus throughout should be on the particular form which the student has to learn; (2) the form should be presented in the context in which it usually occurs; and (3) a variety of techniques that include different media as well as a range of ways of cueing should be used in order to present and practice the items concerned. Visual items, such as individual pictures, picture sequences, maps, flow or tree diagrams, tables, and histogram or line or pie graphs, are included in the text, and the way each cues the learner to a different form and method of verbal presentation is shown. The aim of these exercises, in which the linking of the verbal and visual is vital, is to limit the visual display in such a way that key language forms and functions may be incorporated in the model text. The learner should be able to transfer smoothly from one medium to another. Actual or potential difficulties for each example are discussed. (Author/MHP)

Descriptors—Analysis of Variance, *Case (Grammar), *Child Language, Comprehension, *Comprehension Development, *Language Development, *Language Research, Language Tests, *Linguistic Theory, Morphology (Languages), *Pronouns, Psycholinguistics, Semantics
A study was conducted to test the validity of the Linguistic Features Hypothesis, which predicts that unmarked personal pronouns will be learned first by children, yielding the following order of acquisition: first person before second, followed by third; singular before plural; and subjective case before objective or genitive. A review of the literature generally supports this view. This study, motivated by the lack of a comprehensive approach to pronoun acquisition research, studied comprehension data for "I," "you," "he," "she," "it," "we," and "they." The subjects, 30 middle-class male and female English-speaking children from 2 1/2 to 4 1/2 years of age, were tested for comprehension of the genitive and objective cases through commands eliciting behavioral responses, and for comprehension of the subjective case through commands eliciting verbal responses. No correct responses were found to "it," and this pronoun was dropped from further analysis. The oldest subject group (4 1/2 years) performed better than the two other groups (3 1/2 and 2 1/2 years). No support was found for the prediction that first person precedes second. However, singular forms were comprehended significantly better than plural ones. Finally, no effects were found for case. Thus only partial support was found for the Linguistic Features Theory. (AM)

Descriptors—Auditory Perception, *Linguistic Theory, *Perception, *Phonemics, *Phonology, *Psycholinguistics, Semantics, *Speech, Syntax, Visual Perception
Identifiers—*Perceptual Fusions
This paper suggests that some features of the syntactic and semantic structure of sentences sometimes influence the phonemic analyses assigned to stretches of speech by the perceptual system. It is argued that the role of higher-order levels of linguistic analysis in speech perception can be productively studied. Theoretical issues appropriate for such study are outlined; the discussion centers on fusion phenomena occurring in speech perception, i.e. when the simultaneous presentation of two or more disparate stimuli causes an observer to perceive some third stimulus different from either of those actually presented. Pilot research confirming the existence of phonological process fusions is reported; these are suggested by existing fusion phenomena, but have not been previously observed. Among the general conclusions is the view that the speech perception system can exploit specifically phonological knowledge and that lexical knowledge appears to play some role in speech perception. Tabular material is appended. (EJS)

The Acquisition of Complex English Structures by Adult Native Speakers of Arabic and Hebrew.
Pub Date—Dec 78
Note—38p.
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Adult Students, Arabic, Comprehension Development, Contrastive Linguistics, *English (Second Language), Error Analysis (Language), Hebrew, Interference (Language Learning), *Language Development, *Language Processing, Language Proficiency, *Language Skills, Learning Processes, Listening Comprehension, *Second Language Learning, *Syntax
This investigation examined the acquisition of five complex English syntactic structures by Egyptian and Israeli adult learners at different levels of proficiency. Carol Chomsky's methodology, as adapted by d'Anglejan and Tucker, served to assess comprehension of these structures. The responses of the Egyptians and Israelis, which were similar to one another as well as to those of the French Canadians previously studied by d'Anglejan and Tucker, suggest that first and second language learners of English encounter some of the same difficulties. Their responses also suggest that the creative construction hypothesis can be applied to second as well as to first language acquisition. (Author)

The field of Spanish language instruction for bilingual Chicanos has been an area of pedagogical neglect within most college and university language departments. In the past, teachers wishing to implement a significant modification in their approach and methodology found the task virtually impossible because of a scarcity of commercially prepared materials. The recent appearance of several titles on the commercial market indicates that this trend of neglect may be drawing to a close. This paper reviews eight of these works which represent a cross section of the pedagogical approaches as well as a large portion of the currently available Spanish language textbooks for the Spanish speaker. The literature reviewed includes books by Paulline Baker, Marie Esman Barker, Fidel de Leon, Rosa Kestelman, Susan Maiztegui, Lequerica de la Vega, Sara and Carmen Salazar Parr, Guadalupe C. Quintanilla, James B. Silman, Guadalupe Valdes Fallis and Richard V. Teschner. For each of the books there is a description and analysis of the contents. (Author/AMH)

A Brief Dictionary of Grammatical Terminology for Students and Teachers of French.
Pub Date—Dec 78
Note—23p.
Language—English; French
Pub Type— Reference Materials - Vocabularies/-Classifications (134)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Case (Grammar), *Form Classes (Languages), *French, *Grammar, Higher Education, *Language Instruction, Language Patterns, Morphology (Languages), Secondary Education, *Second Language Learning, Sentences, Sentence Structure, Syntax, *Traditional Grammar, Vocabulary
Identifiers—*Grammatical Terminology
A glossary of commonly used grammatical terms that would be useful to students and teachers of French is presented here. Although not complete, it offers basic definitions in English of grammatical forms and functions as well as examples in French of each term defined. The definitions cover parts of speech, grammatical functions, sentences, phrases, and clauses. (Author/AMH)

Although educational psychologists are concerned with the acquisition of knowledge, particularly in the classroom, language acquisition and knowledge of language are areas slighted in their textbooks. Integration of developmental psycholinguistics into educational psychology courses should employ the recently emerging rationalist view rather than the older empiricist view. The rationalist view suggests that the human mind contains preconceptions about the nature of language, enabling persons to implicitly determine the linguistic rules of their community. This position has three major implications for teaching: (1) language differences among children do not reflect differences in cognitive ability, but rather differences in the speaker-hearer community; (2) individual differences in children's linguistic performance in classroom settings should be distinguished from their linguistic competence, and each aspect should be dealt with accordingly; and (3) teachers who have an understanding of language acquisition and knowledge can provide experiences that develop the child's metalinguistic awareness. Several practical methods for implementing each of these three aspects of psycholinguistics in the classroom are discussed. Suggested source materials and annotated bibliographies for student and instructor are appended. (Author/MHP)

Descriptors—Annual Reports, Comparative Analysis, Cultural Context, English, Etymology, Females, German, Language Research, *Language Standardization, *Language Usage, Males, Plurals, Publications, *Semantics, *Sex Discrimination, *Sex Fairness, Sex Role, *Sex Stereotypes, Sociolinguistics, Standard Spoken Usage
Sexism is a social issue in the U.S. which is suggested both by the popular press and the scholarly world. Teachers of English, psychologists, publishers, the U.S. government, the legal field, dictionaries, and especially the women's movement have commented upon and have been involved in the study of sexism, and in the advocacy of change toward more equality. Semantic stereotyping occurs in certain elements across cultures, which can be seen by comparing the written annual reports of selected U.S. and German companies. Neuter terms occur in publications of both cultures, but gender marking is both visually and linguistically evident across cultures; plural subjects are frequent and thereby demand neuter pronouns, but suggest plurality of groups rather than avoidance of sexism; use of generic "he" is infrequent with more use given to the sex-specified pronoun; and women's names as part of an annual report are non-existent in both cultures. Of the two cultures, the German annual report appears to be more male-oriented. However, although more females appear in the U.S. annual report, they are often portrayed in stereotyped roles. Four theoretical papers and fourteen modules are presented that are to be used by local school systems to educate teachers and staff members in the understanding of curriculum content and acquisition of skills in teaching-learning procedures. The papers discuss the selected theories upon which the language program of the Southwest Educational Development Laboratory (SEDL) is based. They provide rationale and understanding for more detailed information found in "Back-up Information and Theoretical Foundations for Development of a Coding System." The modules include: (1) "Disruption, Disengagements, and Behavior Control"; (2) "A Rationale for Modeling and Drill Management Teaching Strategies Employed in Bilingual Programs"; (3) "Verbal Rewards"; (4) "Experience Referents"; (5) "The Self-Concept and Its Importance in Bilingual Education"; (6) "Developing an Awareness of Phonological Interferences"; (7) "The Why of Phonological Interferences and Techniques for Correcting Them"; (8) "Teacher/Pupil Talk Patterns"; (9) "The Bilingual Child and How He Differs"; (10) "Historical Considerations of Hispanic Contributions to the Settlement and Development of the Southwest"; (11) "Anthropological and Sociological Considerations Relating to the Hispanic People of the Southwest"; (12) "Psychological Foundations for Second-Language Teaching"; (13) "Minority Groups and the Problems of Prejudice, Discrimination, and Poverty"; and (14) "Cultural Contributions: Our Debt to the Hispanic People." A collection of Christmas projects that can be adapted to different levels of German study are presented. The text is in German, except for the overview which is in English. It is advised that the teacher be well acquainted with the craft items to be presented to the students. The language of the classroom should be German to provide a total foreign language experience. After the craft projects are completed, they should be placed in the classroom for decoration and for increasing aesthetic appreciation. The materials are designed to stimulate imagination and include patterns, puzzles, and a recipe. Approximately 25 projects are included. (SW)

Descriptors—*Autoinstructional Aids, *Cultural Awareness, Cultural Differences, *Cultural Education, Cultural Traits, *Eating Habits, *German, High School Students, *Instructional Materials, *Language Instruction, Secondary Education, *Second Language Learning, Self Evaluation, Student Evaluation
A self-instructional unit on eating habits and customs in Germany is presented for the high school student studying second-year German. Notes to the teacher outline general goals of the unit, specific objectives, additional activities, equipment, and student evaluation. The general goals are: to be able to eat a meal in Germany without offending or attracting undue attention and to develop an appreciation for customs that are different. Additional activities include (1) teaching a friend how to conduct oneself at a German meal; (2) making a list of German expressions needed to get through a meal successfully; (3) explaining American table manners to a German; and (4) suggesting possible reasons for the development of the table customs either in America or Germany. Student evaluation includes four self-quizzes, one of which is a cross-word puzzle. Illustrations are included in the unit. (SW)

Identifiers—*Germany, *McDonalds Fast Food Restaurant
A self-instructional unit for first-year high school students of German is presented which is designed to familiarize the student with McDonald's in a German city and to increase appreciation of the similarities and differences between a McDonald's in America and one in Germany. Notes to the teacher outline specific objectives, student evaluation, and materials, and notes to the student provide facts about McDonald's in Germany and Europe that will be helpful in the study of the unit. Students will order a meal in German, converse with other students about the food, set up a miniature McDonald's in the classroom, convert money from DM to American dollars, and from American dollars to DM. Materials used in this exercise include order slips from McDonald's, German coins (actual or simulated) and advertising buttons, which can be used as rewards for successful completion of the unit. The unit contains many illustrations. (SW)

Pub Date—75
Note—44p.; Best copy available
Available from—American Council on the Teaching of Foreign Languages, Materials Center, 2 Park Avenue, New York, N.Y. 10016 ($2.50)
Pub Type— Guides - Classroom - Teacher (052)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—*Classroom Materials, Cultural Education, Grammar, High School Students, *Instructional Materials, *Language Instruction, Pronunciation, *Proverbs, Secondary Education, *Second Language Learning, *Spanish, Visual Aids, *Vocabulary
This unit on Spanish proverbs for second year students includes five main lessons, each dealing with a different way of using proverbs to teach or reinforce certain grammatical points and vocabulary. Each exercise and suggested vocabulary list also has a corresponding transparency. Lesson one contains 18 Spanish proverbs which have a common English equivalent. The accompanying illustrations should make clear the idea of the proverb without reference to its English translation, and pronunciation of difficult words may be practiced. In lesson two, proverbs are used to practice present tense verb forms, including stem-changing, reflexive, and irregular verbs. In lesson three, proverbs containing imperatives are presented to review familiar and formal command forms. Lesson four includes a group of proverbs that rhyme and were selected for pronunciation practice. In lesson five, proverbs with a common theme have been grouped for vocabulary study. The categories include: women, wisdom, animals, love, and marriage. Lesson five is followed by comments on the appropriate use of a proverb. In lieu of any post-test, supplementary exercises are suggested. If the teacher feels the need for any testing materials, exercises in the packet can easily be converted into testing situations. This paper examines three ways in which the Spanish imperfect and preterite are theoretically conceptualized and how such conceptions are realized practically in elementary Spanish textbooks. An attempt is made to present the three approaches as constituting a theoretical progression rather than viewing them as isolated treatments of the same phenomenon. First, the traditional grammatical ideas about the preterite and imperfect from Ramsey (1894) are introduced and correlated with the presentation given in a new college text. Next, the innovations found in Stockwell et al. (1965) are examined along with their application in the elementary Spanish text of which Stockwell was the advising linguist. The traditional ideas are then compared and contrasted with the newer structuralist approach. Finally, the system devised by William Bull (1960, 1965) is examined as it is put into practice in a college oriented textbook. Bull's ideas are discussed in relation to those of Stockwell et al. in order to demonstrate the hypotheses advanced in this paper, i.e., that there is a growing trend toward a comprehensive explanation of the Spanish past tense. The Group-Discussion Language Laboratory Developed to Assist a Subject-Language Interaction Method. CILA Bulletin, No. 28.

Commission Interuniversitaire Suisse de Linguistique Appliquee (Switzerland).

Pub Date—78

Note—6p.

Pub Type— Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Discussion (Teaching Technique), Electronic Equipment, English (Second Language), *Group Discussion, Higher Education, Instructional Aids, *Language Instruction, Language Laboratories, *Language Laboratory Equipment, *Second Language Learning, *Teaching Methods, Verbal Communication

New group-discussion language laboratories and the implementation of a subject-language interaction method are described. The use of the language equipment emphasizes free oral intercourse and allows the subject and language or other didactical questions to be dealt with in turns, rather than simultaneously. The laboratories allow students' 14 microphones, with or without the teachers' two microphones, to work together. The crucial aspect of the method is the process of teaching in sequences. A whole sequence of discussions, whose length depends on content, may elapse before the teacher concentrates on purely language questions. The system allows tracing back the passages or the particular words to be the object of didactical comment. During students' speaking or reading, the teacher, when noticing mistakes of pronunciation and intonation, can imprint an impulsion on the recording tape by pressing a button. When the student has finished, the teacher can press buttons "play" and "repeat" and the recorder will unwind the tape, stop at the last impulsion and start playing back the passage with a mistake or anything worth noting. The method can be used to discuss terminology encountered in a passage, the contents of the same passage, and sequences of actual discussing or debating the subjects. Each kind of sequence will be recorded while the teacher can imprint impulsions for consecutive teaching purposes. The equipment used prior to this newly designed equipment is also discussed. (SW)

Major federal bilingual education programs are described, and data are presented to show the nature and extent of bilingual education activities. The report attempts to present the current estimates of the number of limited English-speaking persons who may require bilingual education and some demographic characteristics of these persons. State efforts in programs for the limited English-speaking are briefly summarized, and major court cases relating to bilingual education are listed. The following federally supported programs that contain bilingual education activities are covered: Emergency School Aid, Bilingual Vocational Training, Public Library Services, Right to Read–National Reading Improvement Programs, Special Programs for Students from Disadvantaged Backgrounds, Strengthening Developing Institutions Programs, Adult Education, Migrant Education, Follow Through, and Indian Education. Additionally, Title VII of the Elementary and Secondary Education Act and other legislation are described. (SW)

Identifiers—*Poland

Procedures used in foreign language teaching are discussed from the point of view of developing communicative strategies in students. Literature on communicative competence is reviewed and the implications for foreign language instruction are discussed. It is shown that: (1) from the very beginning of language instruction, the classroom setting, exercises, language activities, and tests should lead toward the objective of attainment of communicative competence; and (2) teaching methods must take into consideration sociolinguistic factors. In this context, an English teaching situation in Polish secondary schools is described and its inadequacies, especially in the area of grammar instruction, are indicated. It is noted that the teaching techniques used do not lead to a functional knowledge of grammar and so do not result in the development of communication skills. Therefore, a description is provided of a sequence of exercises consisting of four phases that aim at a functional mastery of a grammatical item. In connection with grammar exercises the problems of error correction and testing are dealt with. Finally it is observed that the teacher's most important task is to get students to talk and that this objective must be central in all classroom activities. (Author/AMH)

An explanation of and guide to the resource document, "Un niveau-seuil" (A Threshold Level), is presented here. A brief presentation is made of the history of the project that produced the document, the operative definitions and concepts, and the contents of the sections of "Un niveau-seuil." Following the introductory materials, suggestions for use of the document are given under three headings: preparation, evaluation and analysis. Each of these aspects of the program is discussed in relation to the role of potential users of the document, namely, persons responsible for organizing language programs, persons who devise courses, and instructors. Examples are given in each case to indicate some of the ways in which the document might be used. A short bibliography is attached. (AMH)

Identifiers—*Threshold Level
This document on the threshold level in French is the result of a project commissioned by the Council of Europe to produce a system of units in foreign language instruction for adults in Europe. The "threshold level" is conceived as the compilation of knowledge and skills a person would need in order to express oneself simply but effectively in a foreign environment. It is not limited to communication for survival but rather it aims to enable the person to communicate with others on an interpersonal level, that is, to be able to share to some extent their interests and life style. This document is intended to provide theoretical and practical information to persons involved in the administration and construction of programs and courses. The material is presented under the following general headings: (1) the threshold-level approach; (2) potential students and scope of interest; and (3) speech acts. The first section treats learning systems, analysis of needs and determination of objectives, the relationship between the communication situation, language function, and the choice of approach. The second section deals with types of student, social relations and language activity, and possible orientations. The third section presents an inventory of speech acts under the headings: ordering, social acts, and discursive operations. (AMH)

This paper focuses on language diversity in Chicano speech communities in the United States and its relation to the teaching of Spanish to Chicano bilinguals. Attempts to teach standard Spanish to Spanish-speakers in the United States have been unsuccessful for the most part, because the schools recognize only a single standard of "correctness" that is not always the same as that used in the communities. Attempts to teach Spanish as a mother tongue to Chicano students are reviewed, and the need to establish guidelines for the evaluation of current positions and programs is addressed. The sociopolitical, socioeconomic, and educational experiences of Chicanos are reviewed based on an assessment of the present sociolinguistic situation of Chicanos. This situation consists of a language repertoire with various codes that depart from the Mexican Spanish linguistic tradition, an asymmetrical type of bilingualism, and the use of Spanish viewed as transitional and not valued in the broader society. It is concluded that collaboration between sociolinguists and language instructors is needed since Spanish language instruction for Chicano bilinguals is not equivalent to instruction in a first language. The factors that are involved in the choice of address to women as compared to men by speakers of American English were investigated in public interactions regarding provision of a service. In addition to proper names, there are two major types of address forms in general usage: the traditional respect forms, such as "ma'am" and "sir," and the so-called terms of endearment. A third possibility is that people may avoid using any address form at all. It was found that two of the three major address types occurring in service encounters can be and are used in absolutely parallel fashion to men and women. The use of the third address type, terms of endearment, in a non-reciprocal pattern paralleling its use by adults to children, carries the implication that the addressee is in some way subordinate to the speaker. Cases were found in which women were addressed by these intimate forms while men were not, but the opposite was not found. (SW)

The rise of American English as the medium for exhange of scientific and technical information worldwide is a linguistic phenomenon. For some time, applied linguists in Britain have provided texts to meet the demand for English for special purposes and English for science and technology. Their works use a British form of language and cover British applications. Lately, American educators also have entered these fields. Typically, they cover the terms and concepts of a particular profession or trade like engineering or the use of hand tools, and they show model forms of technical communication, including resumes, letters, and reports. Technical English, American style, however, is not essentially professional jargon or simply standard English applied to special purposes. It is a distinct variety of American English with definable semantic features, morphology, and syntax. Its lexicon is delimited, and its phonology is characterized by low-level American phonetic rules. Along with the English writing system, it relies heavily on pictorial representation; and its rhetoric, strongly deductive, has distinguishable characteristics. Precise descriptions, like those provided here, may be useful as an aid in developing and implementing instructional materials in technical English. (Author/AMH)

This Russian language guide is of assistance in carrying on simple conversations in Russian and is used in conjunction with records. Russian ranks after Chinese and English as the third most widespread language in the world. All the words and phrases are written in a simplified spelling which is read like English. Useful words and phrases include greetings and general phrases, location, directions,

numbers, asking for things, money, time, and other useful phrases. Additional expressions are included which the learner will be able to pronounce without hearing them. The learner will also be able to form sentences of his own by using the section called "fill-in sentences." Important signs that the learner/tourist will want to recognize and an alphabetical word list are included. (SW)

This paper presents historical information about language teaching methods and focuses on "formal" and "functional" strategies of teaching and learning. Particular attention is directed toward the immersion type of education. A table that lists developments in language teaching theory from 1840-1977 is presented. A table that summarizes teaching/learning strategies, shown as dimensions, is also presented. Examples are cited to distinguish between formal and functional language learning strategies. Formal techniques, which are techniques of study and practice, do not coalesce into a full language in use. A problem with using language in isolation is that what is learned in the language class, may be difficult to apply in actual communication. Functional use of language is dictated by communication needs such as occur in residence abroad and in immersion programs. (SW)

Abraham, Roberta

The Nature of Cognitive Style and Its Importance to the Foreign Language Teacher.

Pub Date—78

Note—34p.

Pub Type— Information Analysis (070)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Behavioral Science Research, *Cognitive Development, Cognitive Processes, *Cognitive Style, Conceptual Schemes, Educational Research, Language Instruction, *Language Research, Learning Processes, *Learning Theories, *Second Language Learning

A brief review of the history of cognitive style research and a summary of definitions and terminology used by investigators in the area are presented. Most of the research on cognitive style has been motivated by work from three major groups: Witkin and associates; Holzman, Gardner, and associates; and Kagan and associates. Various definitions of cognitive style have been reworked from the ideas of these three groups, and there are a number of terms which are used more or less synonymously with the term "cognitive style": "learning style," "conceptual style," "cognitive strategy," "learning strategy," "mode of information processing," and "cognitive control principle." Some authors distinguish among some of these terms. Cognitive styles are traits of an individual distinct from intelligence and other abilities. Differences between cognitive styles and abilities mentioned by Messick (1976b) are presented. Some of the dimensions of cognitive styles that have been proposed are presented in three models: the Messick model, the McKenney model, and the Hill model. The following topics are also addressed: origins of cognitive style, modification of cognitive style, modification of learning environment, and cognitive style and research in foreign language learning. Descriptors—*Applied Linguistics, College Language Programs, Communicative Competence (Languages), *Cultural Factors, Educational Objectives, Higher Education, Language Development, *Language Instruction, Language Learning Levels, Language Processing, *Language Proficiency, Language Skills, Learning Processes, Linguistic Theory, Psycholinguistics, *Second Language Learning, Sociocultural Patterns, Student Needs, *Teaching Methods

This thesis clarifies the role of the applied linguist in the language and language teaching sciences with particular application to advanced language learning that takes place after five years of study. Students' deficiencies identified at matriculation together with the psychological and practical needs of the students and their society identify the needs that relevant, advanced courses must meet. Although the present pattern of advanced language teaching is found to be unsatisfactory, no comprehensive studies are available to provide the methodological insights needed to rectify the situation. In order to develop advanced language teaching methodology rationally, insights must be sought from the factors that determine its effectiveness: the nature of language, the learner and his or her learning strategies, and the needs of society. A survey of developmental psycholinguistics elucidates the strategies of advanced second language learners although some extrapolation from the native child language and second language learning is necessary. The outcome of language learning in a multicultural society is also determined by the social context. The psycholinguistic and societal issues lead to a methodology focusing on use, communication, and contextualization in which community involvement plays an integral and integrating role. Descriptors—Cultural Education, Cultural Factors, *English (Second Language), *English Curriculum, *English Literature, Language Attitudes, *Language Instruction, Language Role, *Literature Appreciation, *Second Language Learning, Second Languages, Teaching Methods

This inquiry into the role of literature in English as a second language is based upon an examination of six basic issues or principles: (1) the position of English as a foreign language within a country; (2) the aims of English instruction within a country; (3) the way in which the native literature is taught in a country; (4) the availability of English literature translations; (5) the particular nature of the English vocabulary and the well-established facts of word frequency and distribution; and (6) the role of literature in transmitting the target culture. Individual chapters are devoted to such topics as the role of English in the nation and in the schools; teaching the native literature; the teaching of literature in foreign language classes; factors influencing the teaching of literature in the foreign language curriculum including availability of translations, the cultural component in the literary curriculum, the vocabulary problem, and abridged texts; and what literature to teach. References are included in the text. (EJS)

Descriptors—*Communicative Competence (Languages), Comparative Analysis, Complexity Level, *Contrastive Linguistics, Discourse Analysis, English, English (Second Language), Error Analysis (Language), *Language Instruction, Language Learning Levels, *Language Proficiency, Language Research, *Linguistic Performance, Research Methodology, *Second Language Learning, Verbal Communication
Identifiers—Danish, *Interlanguage
This study focused on linguistic analyses used in the PIF Project (Project in Error Analysis, Interlanguage Studies and Contrastive Linguistics), an ongoing study of learner language and a project in foreign language pedagogy. For the project, 120 Danish learners of English were divided into 12 groups representing different Danish educational levels. Testing materials, several of which were computerized for multiple linguistic analyses, consisted of an oral and a written summary of a film, essays in English and Danish on set topics, and a video-taped 20 minute conversation with a native speaker of English. Analyses used included performance analysis, an expansion of traditional error analysis to include correct aspects of learner language, which can be broken down into: (1) linguistic performance analysis, dealing with phonological, syntactic, lexical and pragmatic properties of native or foreign language samples, and especially with the notion of "complexification," a process leading to increased correctness; and (2) communicative performance analysis, a measurement of communicative potential. Also used in the project were developmental performance analysis, which deals with stages of foreign language development, and contrastive performance analysis, i.e., comparing the learner's performance in his native and foreign languages or comparing the learner's and the native speaker's performance of the language in question. Implications for further interlanguage studies and pedagogical research are discussed. (MHP)

Descriptors—*Adolescents, *Class Activities, Classroom Games, Communicative Competence (Languages), Educational Psychology, *English (Second Language), Group Dynamics, *Humanistic Education, Individualized Instruction, Instructional Aids, Junior High School Students, *Language Instruction, Psychoeducational Processes, Psycholinguistics, Secondary Education, Second Language Learning, Small Group Instruction, Talent Development, *Teaching Methods, Teenagers
Boys and girls in the early years of adolescence can best learn ESL communicative skills if the instructor has an understanding of the main characteristics of early adolescence and an appreciation of the teaching techniques best adaped to them. Characteristics which should be taken into account when designing an ESL course include the following: (1) extreme swings of mood, emotional unbalance, and quickness to take offense when none is intended; (2) painful shyness and self-consciousness; (3) a need to conform and be accepted by the group; (4) the striving for independence; and (5) the search for identity. Many of these characteristics are especially pronounced in students in ESL classes, who have been uprooted from their own cultures. Among the instructional techniques which can be readily adapted to such students are human dynamics exercises, small group activities, individual projects, a multi-talent approach, a multi-media program of individualized instruction, and the supportive environment of the humanistic classroom. Suitable teaching aids for an ESL classroom include student-made materials (games, slide-tapes, skits), teacher-made materials, magazines, games, and pop music, the international language of adolescence. Descriptors—Business Communication, *Business Correspondence, Business Education, *Business Skills, International Trade Vocabulary, Job Skills, *Language Guides, Languages for Special Purposes, *Language Skills, Postsecondary Education, *Russian, *Skill Development, Translation, *Typewriting, Verbs, Vocabulary, Writing Exercises
This textbook was designed for undergraduate students who are interested in a basic study of Russian typewriting with particular emphasis on the following business documents: the memorandum, applications, statements, declarations, business letters, receipts, calculations, agreements, inquiries, references, certificates, basic documents used for trading with the USSR, contracts, and telegrams. Each of the ten lessons contains the following elements: (1) the introduction of a type of business document in Russian; (2) an example of the document in Russian and in English; (3) introduction of letters of the typewriter keyboard; (4) an exercise on verbs commonly used in business transactions; (5) homework exercises for translation practice; and (6) vocabulary. The business letter is stressed and translation exercises on it are provided with an emphasis on importing and exporting terminology. Examples of actual business letters are given in the appendix as well as examples of all the documents mentioned. (Author/AMH)

Identifiers—*Sexism, *Sexist Language
This paper examines the proposition that languages may differ in their potential for non-sexist usage, and that the structure of a language, in particular the gender system, affects the nature of the

linguistic response to changing social attitudes regarding sex roles. A brief historical survey of gender and sex-marking is followed by a review of the situation in several languages including contemporary English. It is concluded that the structure of a language is one factor influencing the rate of linguistic change in response to social change and that, while the sex-based system of English does not present a serious obstacle to language change, the grammatical gender of some languages may constitute an impediment to change. It is also hypothesized that, as pressures for social change make speakers aware of the sexist implications of the gender system, the purely grammatical and the sex-based criteria will come into conflict, introducing instability into the system. Data from several languages are presented indicating the presence of such instability, especially in words denoting professions and other social roles, and some tentative predictions are made regarding future developments. Sociolinguistic Change Towards Nonsexist Language: An Overview and Analysis of Misunderstandings and Misapplications.
Pub Date—78
Note—25p.; Paper presented at the World Congress of Sociology (9th, Uppsala, Sweden, August 14-19, 1978).
Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—English, Feminism, Grammar, Language Patterns, *Language Research, *Language Role, *Language Usage, Morphology (Languages), *Sex Discrimination, *Sex Fairness, Sex Role, Sex Stereotypes, Social Attitudes, Social Change, *Sociolinguistics, Vocabulary
Identifiers—*Sexism, *Sexist Language
The first section of this paper focuses on misunderstandings surrounding two of the proposals for changing sexist aspects of the English language, namely, avoiding the use of masculine pronouns (he, his, him, himself) with alleged sex-indefinite reference, and replacing the word and morpheme "man" with "person" in sex-indefinite usage. Several arguments against adopting these and other changes aimed at reducing sexism in language are discussed and examples of them are provided. It is noted that the content and tone of the arguments against change have remained essentially the same from 1972 to 1978. In a second section of the paper, a number of misapplications of the proposals for changing sexist language are discussed in detail: (1) overextensions that violate morpheme structure; (2) violations of parallelism in reference to the sexes; and (3) partial changes that retain sex-stereotyping and the coining of words to ridicule other coinages. Data are presented on the misuse of "Ms." and on male-first word order (e.g., he and she; men and women). It is concluded that despite the misunderstandings and misapplications there is a strong awareness of changes toward nonsexist language in American society as represented in newspapers, magazines, and scholarly newsletters. Descriptors—*Collective Bargaining, *College Administration, *College Faculty, Decision Making, Faculty Promotion, Faculty Workload, *Governance, Higher Education, *Teacher Administrator Relationship, *Teacher Participation, Teacher Role, Teacher Salaries, Tenure
A followup survey was conducted in 1977 to determine faculty participation in institutional decision-making. The first survey was conducted in 1970 of about 1,000 colleges and universities. The resurvey design, administration, and scoring are described. In addition to the requested responses to 31 questions comprising the survey, requests were addressed to the institutions for information related to the decision to hold an election. Graphs are presented comparing control group institutions, collective bargaining groups, and no agent groups for 1970 and 1977 on the following practices: appointments; reappointments, non-renewals; promotions; tenure; faculty salary scales; individual salaries; curriculum; degree requirements; types of degrees; new educational programs; admissions; teaching assignments; department committee membership; academic discipline (students); selection of academic deans; selection of department chairperson; teaching load determination; and short term budget planning. It is concluded that all of the institutional groups under study have been successfully motivated to improve their governance roles, and that collective bargaining has failed to establish itself as a particularly effective medium for doing so. Intra-institutional changes over the period 1970-77 have followed a progressive course toward fuller faculty participation and responsibility in decision-making on matters that are essential components of academic life. A sample questionnaire and instructions and statistical data of results are appended. (SW)

Identifiers—*Competence, *UNESCO
The problem of comparing studies and degrees and diplomas completed in different countries and problems that arise in connection with the comparability of studies and the evaluation of competence are examined, and new solutions are suggested. A comprehensive analysis must consider the concerns and needs of the users, including students, researchers, and teachers, and the demands and behaviors of the institutions. Based on results of a UNESCO survey of countries, some of the publications of different countries about study opportunities for foreign students are cited. It is concluded that there is presently inadequate information about aims and courses of study of institutions. The following approaches to agreeing upon equivalence of foreign diplomas, degrees, or qualifications are discussed: centralized unilateral approach, "nostrification," decentralized unilateral approach, bilateral approaches, and multilateral approaches. The following topics are addressed: problems of comparability by disciplines, methods of learning and teaching, comparability of methods and means of testing and evaluation, proposals for effecting unification of curricula, and the methods for measuring equivalency of programs. UNESCO supports an approach that appraises the man, not the diploma; i.e., appraising the fund of knowledge, experience, and human resources that a person possesses. The appraisal of studies and abilities and the use of an international document to facilitate the recognition of studies and diplomas are discussed. (SW)

Identifiers—*Pennsylvania
This publication is divided into three sections that provide profiles of the colleges and universities in Pennsylvania, program listings, and information on student aid. The guide is designed to help high school students and their counselors select those programs and institutions of higher education that best match the students' needs, interests, and resources. The institutional profiles present general information, admission procedures, admission requirements, 1975 Scholastic Aptitude Test scores and class rank in fifths, information on financial aid, and a brief description of unique or distinctive features of the college. The program listings are organized according to the taxonomy of the Higher Education General Information Survey, which classifies all degree programs into major areas of study. A profile of student aid for Pennsylvanians through the Pennsylvania Higher Education Assistance Agency (PHEAA) and a list of regional offices of PHEAA are provided. Very brief summaries of the following federal programs are included: Basic Educational Opportunity Grant Program, National Direct Student Loan Program, Supplemental Educational Opportunity Grant Program, and College Work-Study Program. Descriptors—*Administrative Personnel, *Administrator Selection, *College Administration, Decision Making, Educational Administration, *Females, *Feminism, Higher Education, Interpersonal Competence, *Leadership, Power Structure, Recruitment, Role Models

Viewpoints about women in academic leadership roles were obtained from women administrators and experts on women in power in academe. Data cited indicate that there are few women at the top. Cultural practices like sports have influenced men to need to win; women acquire interpersonal skills and learn to achieve their ends by less direct means than men. Women also tend to simplify things since they have learned to devise short cuts that work. The ability to ask good, fresh questions and to seek answers to them through channels not commonly used is part of what makes women good on committees. Women in leadership positions provide role models for students. It is valuable for men as well as women to see women achieving. The first problem in appointing women to top positions is to find the women. Internships and training programs are essential, but expensive. An on-the-job approach might be helpful. There must be a willingness to identify able women and to give them support on the job and job security. Women who have top positions must bring other women in. Women must learn to understand the ways of power, which is diffuse, or distributive, in academe. (SW)

Descriptors—Case Studies, *College Faculty, Court Cases, Employment Opportunities, *Equal Opportunities (Jobs), *Federal Legislation, Federal Regulation, *Females, *Higher Education, *Sex Discrimination, Women Professors

Identifiers—Civil Rights Act of 1964 Title VII, Equal Opportunity Act of 1972, Equal Pay Act of 1963, Executive Order 11246, Executive Order 11375, Higher Education Act of 1972, Higher Education Amendments of 1972, Title IX

Data are presented on women in higher education, along with information on federal legislation to eliminate sex discrimination, issues concerning redressing employment discrimination, specific problems with legislative procedures and enforcement of legislation, and case studies that highlight some of the processes involved. Evidence is cited that demonstrates patterns of discrimination against women faculty members. Title VII of the 1964 Civil Rights Act, The Equal Opportunity Act of 1972, the Higher Education Amendments of 1972, the Equal Pay Act of 1963, Title IX of the Higher Education Act of 1972, and Executive Orders 11246 and 11375 are cited. The following factors concerning the predicament of women faculty members in regard to employment discrimination are discussed: the recency of legal protection and the few precedents; the focusing of attention on pattern and practice and class action cases, rather than on individual complaints; general societal attitudes toward academia and academic women; and three types of discrimination. Specific loopholes that women need to take into account when seeking redress from employment discrimination are discussed. One major factor working against the complainant is time; unless a preliminary injunction is granted, a considerable period of time can be expected to elapse before she is granted reinstatement and/or tenure. Injunctions are granted only if "irreparable damage" can be demonstrated to occur should she be terminated or not promoted. Specific problems with Title IX procedures and enforcement and with Executive Orders are covered. (SW)

As part of a study of access and admission to higher education in Germany and the United States, a group of papers on medical admissions in various countries was commissioned. The papers presented in this book reveal wide differences in admissions policies and procedures. Barbara Burn examines some of the major issues in a foreword: representation of socioeconomic strata and minorities, foreign student enrollment, access to medical education for women, human and personal qualities in admission, alternate careers for medical applicants, and the role of government. The situations in 10 countries are described in turn by specialists: Australia (R. R. Andrews); Canada (Barbara M. Ferrier, Ronald G. McAuley, Robin S. Roberts); Denmark (Jorgen Worm-Petersen); France (Pierre Pene and B. Antoine); Federal Republic of Germany (Hans E. Renschler); Italy (Gaetano M. Fara); The Netherlands (N. H. F. W. Wijnen); Sweden (Helmer Larsson); the United Kingdom (A. D. M. Greenfield); and the United States (John Z. Bowers). (MSE)

Identifiers—*United States

As part of a study of access and admission to higher education in Germany and the United States, a German specialist was invited to critique the American system of access to higher education, especially admission testing and open admission. The author's objective is to present selected problems related to objective testing within the framework of admission to higher education and to open admissions in the U.S., and to interpret these problems in the context of German experiences. Of primary concern is admission to undergraduate study; graduate and professional education receive only limited consideration. It is suggested that while objective tests have a certain usefulness whenever the criteria for judging achievement in the schools vary widely and the higher education system is hierarchical, tests play a role in the U.S. greater than can be explained on this basis. From one point of view it is argued that objective testing can be eliminated in the U.S. Three thematic issues in open admissions are addressed: the limits of openness; the coexistence of open and selective admissions, and the problems it creates; and procedures in open admissions. A bibliography is included. (MSE)

Identifiers—*Germany

The final report of the study group is the culmination of a three-year project to examine the similarities and differences in German and U.S. higher education access and admissions and the ways in which the two systems can learn from each other. The study consisted of a seminar, plenary meetings in both countries, and commissioned papers and research studies. Specialists from both countries participated. The contents of the final report include sections comparing and evaluating structures and systems, equal opportunity for access and selection, educational articulation, access and employment, and access and the role of government. In each section, recommendations are made for decision-makers in government, industry, and educational institutions concerned with these issues in each country. Appended are lists of the study group members, consultants, and meetings, publications of the study group, and publications and papers generated by the work of the group. (MSE)

Identifiers—Selective Admission
Papers are presented that were prepared as part of a study group of the International Council for Educational Development on criteria and procedures for admission to higher education and the relationship between higher education and the law. In "Access to Higher Education and the Law," Larry G. Simon analyzes the role of law and especially the equal protection clause of the federal constitution on admissions. He provides a brief introduction to U.S. higher education for West German scholars and officials and a ready reference of major institutional and legal considerations for American scholars and officials. In "A Review of U.S. Admissions Policies and Practices," Alice J. Irby reviews access to higher education in the 20th century from a U.S. perspective, considers admissions policies within the context of institutional policies and planning, and considers admissions practices and their impact on access. In "College Admissions Testing in the United States," Jenne K. Britell and William B. Schrader present historical information and discuss the nature of tests, precision of measurement, test validity and use of test scores, and criticisms of tests. In "Nonintellectual Factors in Admissions," Simon V. Keochakian focuses on a review of the literature pertaining to the role of nonintellectual factors in admission to higher education, especially graduate and professional education. Specifically, he attempts to report on the actual or potential role that personality factors, biographical data, and interview information can play in the admissions process. (SW)

Identifiers—Canada, England, Great Britain, Ontario, Scotland, Sweden, Wales
Three essays are collected in this study of access to higher education in other countries: "Part-Time Undergraduate Studies in Ontario," by Robert M. Pike; "Access to Higher Education in England and Wales," by Naomi E. S. McIntosh; and "Strategies for a Broader Enrollment in Swedish Higher Education," by Urban Dahllof. The first essay explores the larger opportunities that part-time studies provide for access, the clientele, and the impact of such studies on higher education institutions, within the context of postsecondary education in Ontario. In this essay, concern is limited to part-time undergraduate study for degree credit. The second essay looks at the post-1945 expansion of higher education in Great Britain, concentrating on the last fifteen years. The objectives are to chart the nature and causes of the expansion, to examine how increased access has affected and been affected by government policy, to determine whether the expansion in numbers has led to a greater equality of opportunity, and to look for indications of future developments in this area. The third essay describes the recent reorganization of the Swedish system of colleges and universities, the latest step in an overall reform of education in that country. Case studies are provided on distance courses and other forms of external study, and a new general admissions policy. (MSE)

Five papers from a conference on the state legislative process and higher education are presented. The authors of the papers are experts experienced in relationships between the campus and the capitol, including a governor, the chairperson of a senate education committee, the former director of the Educational Commission of the States, and an executive director of NCHEMS. In addition to the five major presentations, comments of panelists are interspersed throughout the publication. The five papers and authors are: "Future Relationships Between State Legislators and Higher Education" (Jerome M. Hughes); "The State Legislative Process: Its Effect on the Governance of Higher Education" (Donald R. McNeil); "Quantitative Approaches to Higher Education Management: An Assessment of Utility to Legislative Concerns" (G. Ben Lawrence); "Legislative Expectations About the Accountability of Higher Education" (John Folger); and "A Governor's Agenda for Action in Higher Education" (David Boren). (BD)

Identifiers—*Institutional Self Evaluation, *Kalamazoo College MI
An institutional analysis of Kalamazoo College written by an Intern in the President's office is presented. Examined are such aspects of the college as the board and its major committees; the operations of the President's office; students, faculty, administration, and staff; community involvement; institutional data; budget data; institutional policy; and the social, political, and academic climates. The three critical areas are identified: (1) institutional research does not have a natural tie to the computing facility and usually compiles data in a piecemeal fashion; (2) there is an attitudinal factor that prevents the college from diversifying–the college makes a national effort to duplicate its similarities; and (3) the college is experiencing a serious retention problem. (BD)

Suggested are concepts and ideas for organizing for institutional research so that it might become a legitimate and separate entity within higher education administration. The following three-way categorization of institutional research is advocated: institutional studies; management analyses; and periodic management reporting. The role of the institutional research office as it relates to institutional studies, management analysis, management information, policy development and implementation, office and institutional operations, and function by subject area is defined. Four organizational models for institutional research are presented (the bureaucratic structure, the systems structure, the collegial structure, and the political structure). The internal institutional research office organization is discussed, and an organizational prototype which serves to demonstrate how the considerations which have been discussed can be used to form a real structure is described. Identifiers—*Germany
A study on access to higher education in Germany was written as part of a larger study on access and admission in that country and the United States. The complex dimensions of the access situation in Germany are set forth, along with the many factors that have produced crisis: demographic trends, reforms in secondary education, legal and constitutional considerations, and employment expectations of graduates. The history and administration of admission to higher education in Germany are described, and changes in current laws governing access and admission are examined. (MSE)

Identifiers—Basic Educational Opportunity Grants, College Work Study, Guaranteed Student Loans, Health Education Assistance Loans, National Direct Student Loans, State Student Incentive Grants, Supplemental Educational Opportunity Grants
This handbook is intended primarily to help postsecondary institutions administer the major federal student financial aid programs: Basic Educational Opportunity Grants (BEOG), Supplemental Educational Opportunity Grants (SEOG), College Work-Study (CWS), National Direct Student Loans (NDSL), Guaranteed Student Loans (GSL), Health Education Assistance Loans, and State Student Incentive Grants (SSIG). It may also be used as a reference document by other persons and organizations working to expand postsecondary opportunities for students. It should be used as an adjunct to the requirements provided in the authorizing statutes and the applicable program regulations. (A list of all current program regulations is appended.) General provisions of the programs are described and common elements of campus-based programs are discussed. Also included are: Determination of Eligibility Index, 1978-79 and 1979-80 (reserved); Validation, 1978-79 and 1979-80 (reserved); administrative standards (reserved); institutional eligibility (reserved); terms of agreement; a student affidavit; a progress report; Student Validation Roster; explanation of figures on payment schedule; a list of regional administrators for student financial assistance; a directory of SSIG officials; sources of information on GSL; a Self-Evaluation Worksheet Checklist; Necessary Documents (reserved); special terms and conditions for SSIG; a sample SSIG roster; and FISL Application (OE Form 1154). This is the eighth in a series of annual reports on the actions of state legislatures in providing higher education for their respective states. The first section consists of digests of the 1964 legislation relating to higher education considered by the 50 state and three territorial legislatures, including appropriations for current operations and capital improvements. The second section consists of analyses of the data, some general observations on the findings, and certain implications growing out of various proposals which the legislatures did not pass. It points out those areas of higher education to which legislatures gave considerable attention, and identifies gaps in public and legislative awareness and concern about some of the problems of higher education. Topics include: finances, bond issues, building programs, land acquisition and transfer, general financial procedures, government aid, institutional growth, tuition, student financial aid, admissions, personnel, administration, curriculum, and surveys and studies. A topical index to state documents and statistical data is included. (SW)

Identifiers—*Long Range Planning, *North Carolina
The long range plan for the University of North Carolina system is the third edition of a plan initiated in 1976. The revised plan incorporates new information on and changes in the system and its programs: status reports on all new degree programs and program tracks previously authorized for planning; requests for authorization to plan new degree programs or program tracks; recommendations for the discontinuation of existing degree programs or program tracks; requests for the establishment of new colleges or professional schools or proposals for major reorganizations in the structure or status of existing colleges or schools; and requests for change in the public service role of the institutions and proposals for change in the organization or performance of public service functions. This report is divided into six parts: a review of higher education in North Carolina in 1978; constraints, assumptions, and projections affecting higher education planning; goals, tasks, and objectives; instruction, research, and public service functions; student services; and future planning and program review. Identifiers—*Touring Performing Arts
This study of the professional touring performing arts during the 1976-77 season sought to determine how the performing arts are programmed and funded by college and community organizations. The questionnaire, which is appended, was mailed to all institutional members of the Association of College, University, and Community Arts Administrators. The questionnaires from 136 colleges and universities, and 33 nonprofit organizations were analyzed. Information is presented on the educational level of institutions, student enrollments, departmental assignment and divisional assignment of performing arts programs, and employee and volunteer information. Administrators are described in terms of demographic and background information, job and work characteristics, professional affiliations and activities, and salaries. Information on facilities includes seating capacity, facility use rate by type, and facility descriptions. Additional information concerns types of performances, regional variation in programs, number of performances, financial statistics, and marketing information. Appendices provide information on regional groupings of states; comparative data for previous surveys; information on regional program variation; comparative data on different types of programs; and detailed institutional descriptive statistics. Information is presented on National Association of State Scholarship and Grant Programs (NASSGP), based on a 1978-79 academic year survey. These are state or territory funded scholarship/grant programs for undergraduate students with financial need. The contents include: historical data; summary data of programs by public and private sectors; administrative cost data; comparative data on dollars, number of awards, and related data by states for 1977-78 and 1978-79; index of effort by state, ranked mean award by state, competitive programs awards and dollars; data on State Student Incentive Grant Programs; responsibility for state administration; need-based undergraduate, gift, and aid programs administered by states; programs administered through other agencies; other programs administered by states; non-funded programs; state advisory committees; program characteristics; agency's definition of a self-supporting student;

comments from individual states; and a 1978-79 NASSGP Directory. In addition the survey provides answers to the following questions: Is the agency receiving basic grant application information regularly? What impact/decisions relating to Federal BEOG has the agency made? Is the existence of basic grants causing any significant change in state-funded gift aid programs? How does the agency attempt to influence the overall packaging of student aid awards? What changes or planned changes in programs and/or operations are occurring? (SW)

Descriptors—*Administrator Selection, Board Administrator Relationship, *College Administration, College Role, *Governing Boards, Higher Education, *Improvement Programs, Orientation, Recruitment, *Trustees

Suggestions are offered on establishing an effective board of trustees for colleges and universities. The first step in improving a board must be review of the mission and status of the institution. Four steps in this process are to decide what is wanted and needed on the board, establish a search-and-recruit procedure, establish an orientation procedure, and establish a procedure for terminating service. Deciding on the composition of the board involves two dimensions: considerations about diversity of the board and the individual talents or professional backgrounds that a good board needs. Questions that should be addressed concerning board composition, include recruitment of women and minorities, faculty and students, and skills and knowledge needed by board members. It is suggested that a profile of the existing board be prepared on paper in order to clarify where the board is strong, adequate, and weak. An illustration showing the format for a typical profile is provided. Some advice is offered about choosing new members from over-recruited groups like alumni and parents, individuals who have reached the top of the career ladder, and persons who are already overcommitted. The importance of inviting the selected individual in a way that makes clear the expectations for the person if he joins the board is emphasized. Orientation of the new trustee, involvement in projects, some considerations concerning lay board members at church-related colleges, conflict of interest, and terminating members who have lost their effectiveness are covered. Descriptors—*Educational Finance, Federal Aid, *Financial Support, Futures (of Society), *Higher Education, Loan Repayment, Needs Assessment, Parental Financial Contribution, *Student Financial Aid, Student Loan Programs, *Tuition

This analysis of higher education financing examines the need for the provision of additional funds to higher educational institutions and the availability of adequate aid funds to parents and students. It is concluded that there is no single solution to the problems associated with higher education finance that is suitable for all colleges and students. A variety of educational financing techniques are needed which could be employed individually or in conjunction with other devices. It is important to insure that higher educational institutions become more efficient in using new funds. Differential tuition pricing is an effective device for generating more funds for an institution, but it would succeed only if other sources of funding were provided for the parent and student. Other sources of funding are long-term, low-interest loans made by the government directly to the student and the "E" Bond device. These schemes must be politically feasible, the amount of money available for the loan must be meaningful, and the terms for repayment must be reasonable. Existing federal support programs and some of the associated problems are discussed. (SW)

Descriptors—*Attrition (Research Studies), *College Students, *Dropout Research, *Dropouts, Higher Education, Junior College Students, Minority Groups, Motivation, Persistence, *School Holding Power, *Student Characteristics, Student Employment

Some findings about attrition from two- and four-year colleges and universities are presented based on NCES's National Longitudinal Study of the High School Class of 1972. Attrition is generally defined as withdrawal from college without completing a degree; in this report, students who had attended courses in the first two years after high school but did not attend in fall 1974 are defined as withdrawn unless they had completed a two-year program. It is shown that after two years, the four-year institutions lost 23.5 percent of their entrants, which is a lower rate than most earlier studies reported, with estimates ranging from 21 to 46 percent. (However, the figures are not strictly comparable, since other studies usually measure attrition four years after entering college.) Among two-year college students, 39.3 percent withdrew without completing a degree, so two-year colleges clearly lost more students than four-year institutions did. Private schools and schools with higher than average test scores for entering students had lower attrition rates. The majority of students who worked full-time withdrew at nearly double the rate of those with a part-time job or no job at all. (Author/LBH)

Identifiers—*Council on Social Work Education

An investigation of the feasibility of a project designed to improve the effectiveness of social welfare administration is described. The study sought to determine what action might be taken for the development and implementation of curricula in social service management at interested graduate schools of social work. Literature in the field was surveyed to obtain an overview of current issues in administration and management, and a nationwide mail survey of all graduate schools of social work accredited by the Council on Social Work Education was undertaken to secure current statistical data descriptive of graduate social work education for administrative practice. Interviews were held with members of faculties in schools of social work with established concentrations in administration. In addition, information was obtained from schools of business administration, particularly those in universities without a school of social work, but that indicated a commitment to preparation of personnel for effective management in the fields of human services. A review was also made of activities underway at the Council on Social Work Education in the area of administration, and consultations were held with the executive director and his staff. Information is presented on dual degree programs, doctoral degree programs, student characteristics, employment, recruitment, faculty, grant support, interdepartmental study, and administration specialization courses. Priority needs, recommendations, and implications for future action based on reactions of four individuals are presented. (SW)

Descriptors—*Administrative Organization, Educational Coordination, Educational Planning, Higher Education, *Management, *Planning Commissions, Policy Formation, *Staff Role, *State Agencies, State Programs, *Statewide Planning

Identifiers—*Minnesota, Minnesota Higher Education Coordinating Board

The management plan for 1979-81 of the Minnesota Higher Education Coordinating Board provides an outline of the major functions and programs assigned to the board, a general outline of the role and scope of the board as an agency of the state, a statement of the mission of the board staff, an organizational chart, a board calendar for 1979-81, and roles of staff units and management objectives. The staff units include the Office of Executive Director, the Division of Program Planning and Coordination, the Division of Financial Aid, and the Division of Policy Planning and Research. The development of the management plan is a procedure by which board staff reviews its anticipated work for the year, establishes priorities for resource allocation, and coordinates individual and unit objectives with board objectives. The document serves as a focal point for the board's review of its own objectives, both annually and long range. (SW)

Identifiers—*College of Saint Rose NY, *Institutional Image

The College of Saint Rose, Albany, New York, conducted surveys about the image of the college with random samples of its students, high school seniors, high school guidance counselors, and the college's faculty and administration. Four similar surveys were developed. The students' surveys had three parts: demographic data, data on the ideal college, and comparison of four area colleges. The staff surveys contained the same sections, but the respondents were asked to respond as they thought students would respond. Based on the findings, four major recommendations were made: the total public relations program of the college should be reevaluated and strategies should be designed to yield greater awareness of the college in general and to strengthen the college's market position; alternatives for new and/or restructured programs that respond to the interests of high school students should continually be explored; a campus atmosphere that incorporates more of the elements that students believe necessary to college life should be established; and career counseling and job placement services should be made a marketing focus for the college. Specific courses of action were suggested. A copy of the college preference survey for high school seniors is included. (SW)

Identifiers—*Career Teacher Program, National Institute of Alcohol Abuse and Alcoholism, National Institute on Drug Abuse

This first volume of the evaluation of the Career Teacher Program describes the background of the program, the purpose of the evaluation, a description of the evaluation methodology, the results and findings of implementing the methodology, program outcomes, and conclusions and recommendations for the program. The program was designed to improve the training of medical students concerning drug abuse and alcohol abuse by increasing the number and knowledge of academic faculty in medical schools in these areas and by developing regular courses of instruction on these major health problems, and in continuing education programs for doctors. Training grants to qualified degree-granting programs to provide an opportunity to fund medical school faculty members for further training in drug abuse and addiction were authorized by the program. In order to answer evaluation questions and test the hypotheses of the study, a data collection plan involving six different checklist instruments was developed. The activities involved: site visits to career teacher sites and training centers, a telephone survey of "career" teachers, an institutions survey of "noncareer" teachers, a trainee mail survey, and interviews with officials of the National Institute of Alcohol Abuse and Alcoholism (NIAAA) and the National Institute on Drug Abuse (NIDA). Conclusions and recommendations are presented concerning the career teacher project grantees (career teachers, sponsors, and institutions); the training centers; and the NIAAA and NIDA. (SW)

Identifiers—*Castleton State College VT

A practicum at Castleton State College, Vermont, was conducted to provide recommendations to modify the faculty governance structure so that administrative leadership would have an efficient organizational governance decision making process and, at the same time, to provide faculty a means of expressing their concerns. The history of governance at the college since formal collective bargaining occurred in 1973 and existing research on governance were examined. The Vermont State Colleges Board of Trustees meeting minutes from 1973 to December 1978 were examined to ascertain the board's position on the role of faculty in governance. Interviews were also conducted on the topic with the two top administrators at the college, the last two faculty assembly presidents, and two union representatives from the college. As a result of the interviews it was generally accepted that some degree of faculty participatory governance was necessary and would probably continue as long as the high level of trust of the present college president remained. There was also agreement among the majority of individuals interviewed that total faculty participation in governance was difficult for various reasons and that some type of representative faculty governance structure (i.e., faculty senate) might be more appropriate. Additionally, a need for a new type of position that would assume major responsibilities in the area of faculty development and curricular program development was identified. Other recommendations are discussed. (SW)

Descriptors—*Academic Achievement, *College Environment, College Students, Comparative Analysis, Higher Education, *Individual Characteristics, Institutional Characteristics, *Nontraditional Students, Personality Theories, *Student College Relationship, Student Needs, Tables (Data), Testing

Identifiers—*Georgia, *High Risk Students

Studies were conducted through the University System of Georgia to determine: if there were significant differences in the environmental presses of the eight institutions in the study; if there were significant differences in the personality needs of the special studies students; the degree of compatibility between the institutional environmental press and the personality needs of the special studies students; and if there were any significant associations between higher or lower achievement in reading, English, and mathematics of the special studies students in the various environmental presses. The theoretical framework centered around the personality theories of Henry Murray and John Holland. The population under investigation, the special studies students, did not qualify for regular admission to the institutions they were attending. The College Characteristics Index, Form 1158, was chosen to assess the evaluation of the environment; the Stern's Activities Index, Form 1158 (short form), was administered to the special studies students. The Comparative Guidance and Placement Test, a six part test published by the College Entrance Examination Board, was also administered. To obtain a valid environmental press assessment, the College Characteristics Index was administered to a representative stratified cross section of upperclass students at each institution. Among the conclusions were: that the eight institutions provide significantly different environmental presses for their student bodies; and that there were significant differences between the perceived personality needs of the special studies students. Descriptors—*Behavioral Objectives, *College Faculty, *Faculty Development, *Faculty Evaluation, Higher Education, *Performance Contracts, Program Development, Program Evaluation, Resource Guides, Self Evaluation, *Teacher Improvement, Teacher Role

Identifiers—*Gordon College MA, Growth Contracts

The program of faculty development by growth contracting at Gordon College, Massachusetts, is described and evaluated, and a faculty development manual is presented. Under the growth contracting program, each participating faculty member writes a faculty profile that contains an assessment of strengths and weaknesses, a statement of current faculty roles, an assessment of effectiveness in carrying out these roles, and a statement of long-range professional and personal goals, typically for a period of from three to five years. The profile forms the basis for a series of yearly individual development plans (growth contracts) intended to cumulatively implement one's long-range goals. Principles for faculty growth contracting and questions and problems that have arisen are discussed. Suggestions are offered for institutions which are contemplating growth contracting as a means for faculty development. A summary of results of an evaluation of the program and a discussion of possible factors contributing to positive results are presented. The faculty development manual defines responsibilities of personnel and departments and outlines implementation procedures. Appendices include a sample faculty profile, annual plan, budget form, ledger sheet, evaluation form, and suggested guidelines for advisory committees. (SW)

Trends in the Availability of Senior Fellowships in the United States, 1968-1977.

John Simon Guggenheim Memorial Foundation, New York, N.Y.

Pub Date—Aug 78

Note—24p.; A preprint of the Report of the President, 1977

Pub Type— Reports - Research (143) — Numerical/Quantitative Data (110) — Information Analysis (070)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Faculty Fellowships, Federal Aid, Federal Government, *Fellowships, *Grants, Higher Education, Nonprofit Organizations, *Post Doctoral Education, Private Financial Support

Identifiers—Guggenheim Foundation NY, Philanthropic Foundations

Information is presented on senior fellowships awarded in the United States from 1968 to 1977. Applicants for Guggenheim fellowships were asked to provide information on the applications they made to other fellowship programs in order to identify the major senior fellowship programs. The definition of "senior" was more than five years beyond the Ph.D. or over 35 years of age. After the other fellowship programs were identified, the program directors were asked to provide, year by year since 1968, statistics concerning the number of grants made, the amount of money awarded, and the number of applications received. The replies are summarized under three headings: senior fellowships awarded by private foundations and learned societies, senior fellowships awarded by agencies of the federal government, and senior fellowships awarded by scholarly centers with residential programs. The overall figures show a steady growth in applications, fellowships, and amount of money until 1974, with some leveling off after that year. It is noted that there is an increasing proportion of senior faculty members, from among whom applicants for mid-career fellowships are drawn. The availability of sabbatical leave on part salary also affects the fellowship programs. Implications of the findings and an overview of the Guggenheim Foundation program are presented. For each year the number of fellowships, the amount of money awarded, and the average amount of money awarded are presented for individual agencies. (SW)

Descriptors—College Programs, *Educational Coordination, *Educational Finance, Federal Programs, *Higher Education, Private Colleges, *State Boards of Education, State Colleges, *State Programs, State Universities, *Statewide Planning, Student Financial Aid, Student Loan Programs

Identifiers—*New Mexico

The planning and coordinating activities of the New Mexico State Commission on Postsecondary Education for the year July 1, 1977 through June 30, 1978 are described. The following areas are covered: funding recommendations, special studies, activities of the academic council, the year ahead, and statutory responsibility. Profiles of public and private colleges and universities and information on legislation relating to private and/or proprietary colleges are presented. Descriptive statistics are provided concerning: estimated operating expenditures, capital outlay projects approved during the year, inventory of academic programs at public institutions, inventory of academic majors at private institutions, fall term full-time equivalent college credit enrollment, and degrees awarded by New Mexico institutions of higher education. Brief descriptions are also presented on the following federal and special programs: Postsecondary Education Planning (Section 1201, 1203, Higher Education Act (HEA]; Financial Assistance for Improvement of Undergraduate Instruction (Title VI-A, HEA); Community Service and Continuing Education (Title I, HEA); New Mexico Student Incentive Grant Program (Title IC, HEA); Educational Information Centers Program (Title IV, HEA); New Mexico Medical Student Loan Program; New Mexico Osteopathic Medical Student Loan Program; Title I Projects in Progress in 1977-78; and Title I Projects Funded in 1977-78. Identifiers—*Nontraditional Education, Open University (England), Outcomes

Summaries of five keynote addresses and proceedings of task forces of a conference on postcompulsory education in the 1980s, attended by educational theorists and planners from 30 nations, are presented. The opening address by Lord Asa Briggs provided a worldwide overview of postcompulsory education, and Burton Clark spoke about academic coordination of postcompulsory education. Urban Dahllof addressed the topic of "recurrent education" and indicated that sharp distinctions between secondary and higher education would fade in the future. Lord Vaizey spoke about the subject matter of postcompulsory education in the coming years, and Gordon Oakes suggested that the walls of elitism of the universities be removed, without diminishing the quality, to break the barriers between them and other legitimate institutions. The task force on postcompulsory structures primarily considered national educational systems. The task force on education and the working life recommended that postcompulsory institutions assume the leadership in helping to solve socioeconomic problems through new models and research, and the task force on student learning considered the processes and outcomes of learning. The group on staff development considered reorganization, realignment or closure of postcompulsory institutions, changes in student populations and diminishing resources. The group on media noted the utilization of television and radio broadcasting and print media by England's Open University and the distance learning networks of Australia and New Zealand. Priorities of postcompulsory education were discussed by the task force on priorities. (SW)

Gross, Francis M.

A Comparative Analysis of the Existing Budget Formulas Used for Justifying Budget Requests or Allocating Funds for the Operating Expenses of State-Supported Colleges and Universities. A Dissertation Summary. Office of Institutional Research Bulletin, Volume XIV, Number 9, December 1973.

Tennessee Univ., Knoxville. Office of Institutional Research.

Pub Date—Dec 73

Note—158p.; Some tables marginally legible due to small type

Pub Type— Dissertations/Thesis (040) — Reports - Evaluative (142) — Collected Works - Serials (022)

EDRS Price - MF01/PC07 Plus Postage.

Descriptors—*Budgeting, Calculation, *Educational Finance, Educational Philosophy, Educational Quality, Evaluation, Government Role, *Higher Education, *Mathematical Formulas, National Surveys, Operating Expenses, *Resource Allocations, State Aid, State Boards of Education, State Colleges, State Universities, *Statewide Planning

The purposes of the study were to (1) identify formulas currently used for justifying budget requests or allocating funds for operating expenses of state-supported colleges and universities; (2) provide a comparative analysis of each formula with respect to the functional budget areas recognized, the base and formula factors used, methods of computation, and the extent of differentiation among academic areas, levels of instruction, and institutions; and (3) determine which formula or formulas met general standards of acceptability through an assessment using performance criteria. Ranking officers of higher education coordinating or governing

agencies in 46 states and directors of institutional research or finance in four others furnished copies of their current operating budget formulas. Criteria for assessing formula acceptability were derived from previous studies and extrapolated from the literature. Among the conclusions were that: (1) formula funding had increased considerably since its inception in 1951; (2) budget formulas tended to be used by states spending relatively less on higher education or with limited resources; (3) two funding philosophies were reflected in the formulas used statewide: a program equalization policy, and a policy to avoid jeopardizing existing high-quality programs; and (4) for reasons of diversity, no single formula or combination of formulas could be designated as a model for national use. Recommendations are made in the form of guidelines for developing and applying budget formulas. (Author/MSE)

The Office of Management and Budget Circular A-21 on cost principles for educational institutions, which was published in the Federal Register on March 6, 1979, is reproduced in its entirety, and a brief introduction by Max A. Binkley is presented. The circular established principles for determining costs applicable to federal grants, contracts, and other agreements with educational institutions. The principles deal with the subject of cost determination applicable to research and development, training, and other sponsored work performed by colleges and universities under federal aid or under other agreements with the federal government. The circular discusses direct costs, indirect costs, the identification and assignment of indirect costs, the determination and application of indirect cost rate(s), a simplified method for small institutions, and general provisions for selected items of cost. This circular is a revision of Federal Management Circular 73-8. A summary of comments received on the revision, grouped by subject area, is included. (SW)

This report presents the findings and recommendations of a study by the Veterans Administration concerning the necessity for including in the computation of the 85-15 ratio those students in receipt of grants from federal agencies other than the Veterans Administration. The problems incurred by educational institutions in the implementation of the provisions of the law (section 1673(d), title 38, United States Code) are also examined. The study was conducted from May 15, 1978, through July 24, 1978, by staff members of the Veterans Administration. Officials of 16 schools in California, Georgia, Illinois, New York, and Texas were interviewed. The officials were asked to describe in detail their school's administrative organizations, registration procedures, policies for declarations of majors by students, and the information systems that are used by their schools. This report includes background information on the 85-15 ratio rule, the Basic Educational Opportunity Grant Program (BEOG), and the Supplemental Educational Opportunity Grant Program (SEOG). Based on the findings and conclusions of the study, it is recommended that the law be amended to rescind the requirement that recipients of BEOG and/or SEOG benefits shall be considered in computing 85-15 ratios. Appendices included the revised DVB circular 20-76-84; the interview schedule; and student, veteran, BEOG, and SEOG enrollment data for the educational institutions visited during the study. (SW)

The Evergreen State College, Washington's newest four-year college, was established in the midst of an unprecedented enrollment expansion. It also responded to contemporary calls for reform in higher education. Two conditions, the recent lack of growth in higher education and a subsiding of enthusiasm for nontraditional higher education, have created problems for the college. In 1977 the state legislature called for a study and recommendations on the curriculum and costs of the college, in order to broaden its clientele and reduce total operating costs, which are relatively high, to the level of the state's regional universities. The response to that request is organized in seven parts. The first describes the series of decisions leading to the establishment, location, size, and style of the college, and the second examines the pertinent demographics. The third examines cost and identifies the enrollment level at which it is believed Evergreen's unit costs will become comparable with those of the regional universities. The fourth part describes the curriculum and the changes since its establishment, and includes findings of the two major peer reviews it has undergone. The fifth part reports on "client" evaluations, and the sixth reviews national trends in nontraditional education. The final chapter summarizes the findings and presents recommendations. The armed services' efforts to aid and encourage uniformed personnel to participate in the Veterans' Educational Assistance Program (VEAP) are reviewed. VEAP is a pilot program designed to promote and assist the all-volunteer armed forces program in attracting qualified persons to serve by offering educational assistance. Several factors that appear to have limited participation in the program include: failure of the cognizant agencies to develop comprehensive program guidelines in a timely manner, variances and inaccuracies in program information provided to recruits, the timing and sequence of VEAP briefings within certain services, and a low opinion of VEAP that appears to be held by some of the personnel responsible for program implementation at the installation level. Questionnaires were administered to an arbitrarily chosen sample of recruits eligible to participate in the program at nine reception stations and training centers to determine current enrollment rates, compare enrollees with nonenrollees, and determine why recruits were electing not to participate. Out of the 2,534 respondents, 512 or about 20 percent had enrolled in the program. Reasons for nonparticipation are presented. Information on the efforts of each of the military services is presented, and recommendations are offered to the Administrator of Veterans Affairs and the Secretary of Defense to improve the VEAP. Identifiers—*New Jersey, Private Higher Education, Public Higher Education
Statistical data are presented on tuitions and required fees at New Jersey colleges and universities for academic year 1978-79. Full-time undergraduate tuitions and required fees are provided for two-year, four-year public, and four-year independent colleges, and full-time graduate tuitions and required fees are provided for public, independent, and professional colleges. Similar information is provided for part-time undergraduate and graduate tuitions and required fees. Data are also provided on average tuition and fees by sector for academic years 1977-78 and 1978-79. The average tuition for the community colleges is based on "in-county tuition" data, and the average tuition for all other colleges is based on "in-state tuition" data. New Jersey's average increases in undergraduate tuitions and fees are also compared with national data. (SW)

Descriptors—*Career Planning, College Freshmen, Demonstration Programs, *Engineering Education, *Experiential Learning, *Experimental Curriculum, *Females, Higher Education, Information Dissemination, Pilot Projects, Self

Concept, Student Evaluation, Testing, *Womens Education
Identifiers—*Purdue University, Womens Educational Equity Act
A model career preparation program for first-year engineering women at Purdue University is described. Key elements of this project, which is funded through the Women's Educational Equity Act, are: a course designed to provide engineering and career information and practical experience; a means of evaluating the methods and results; wide dissemination of all useful information generated by the experimental course; and the collection of information relevant to programs for women in engineering. The program includes lecture-discussions of contemporary problems in the field by role-model lecturers; career-planning and counseling session; and "hands-on" laboratory experiences broadly related to the field of engineering. The first experimental course was evaluated by pre-testing and post-testing with standardized tests and specially-constructed surveys relating to educational goals and self-concepts of students. The pilot course was revised and offered again as a set of three modules to provide more flexibility to meet student needs. Test results for both years (1977 and 1978) are included. Information dissemination about the program has included a slide-tape set about the model program and experimental course; conference papers; professional journal articles; an Associated Press news story; and public service television spots. A brief annotated bibliography focusing on pre-college backgrounds and college and post-college development of women in engineering is presented, and comments from two students are included. (SW)

Identifiers—*Great Society
By the early 1970's, political and scholarly tides had shifted away from the confidence and optimism of the 1960's. The initial broad consensus on the nation's problems and their solutions declined. An evolution is apparent in the attitudes and pronouncements by popular scholars on the role of federal government and its capacity to bring about beneficial change in three areas: poverty and discrimination, education and training, and unemployment and inflation. It can be argued that the political eclipse of the Great Society depended more on external events (the Vietnam war, dissolution of the civil rights coalition, and the Watergate scandal and its repercussions) than on its intrinsic failings. Both the initial commitment to use national policies to solve social and economic problems, and the subsequent disillusionment of scholars and laymen alike rest largely on preconceptions and faiths that have little to do with research findings or with the success or failure of the programs themselves. When the first black colleges were founded more than a century ago they filled an important need for youth who were denied access to all but a few white institutions. Today these same private colleges must compete with more affluent, prestigious white colleges and universities for funding and for black students and teachers. They are losing in this competition. Black colleges should be given special consideration and assistance for two major reasons: (1) they have been dedicated to improving the quality of life for black citizens; and (2) they are the only institutions of higher education controlled by black people, and are thus most responsive to the needs and demands of the community. Without them, blacks as a distinct racial group lose their most effective vehicle for training leaders and for developing an economically and socially mobile middle class. Private black colleges will have to make bold, revolutionary changes to continue their contribution to black progress. Among the recommended changes are mergers, drastic curriculum changes, new approaches to student recruitment, and hiring the most highly trained teachers available. Underlying the proposed innovations is a concept of a "new college" that will address such contemporary issues as the role of values, beliefs, science, traditions, institutions, and social systems. Identifiers—Institutional Self Evaluation
A two-year study and subsequent conference held in November 1977, sponsored by the National Council of Churches of Christ in the U.S.A., focused on the role of church-related colleges in higher education, and on their distinctive contribution to the churches, higher education, and the quality of life in America. In this report, a number of contributors and respondents address these issues: varieties of church-relatedness (myths, categories, examples, and "essentials"); questions for institutional and denominational self-study; creative illustrations of the embodiment of church-relatedness; the history of church-relatedness in higher education; current denominational policies and studies in higher education; and future church-culture relations and their impact on church-related higher education. Descriptors—Access to Education, College Admission, *College Choice, *College Students, Comparative Analysis, Educational Finance, *Enrollment Trends, *Financial Support, Higher Education, Parental Financial Contribution, Private Colleges, Southern States, State Colleges, State Surveys, State Universities, *Student Costs, *Student Financial Aid
Identifiers—Need Analysis (Student Financial Aid), *South Carolina
The impact of financial aid on the distribution of undergraduates among South Carolina's post-secondary institutions during the 1972-73 to 1977-78 academic years was studied. The major purpose of the study was to determine and to demonstrate how changes in educational costs, family ability to pay for those costs, and available financial aid resources affect the way South Carolina students distribute themselves among public and private colleges and technical education centers in the state. The study utilized three separate data bases. The first data base included the survey responses of a representative group of students who were freshmen in South Carolina institutions and similar institutions in other Southern states in 1972. These responses were compared to those of students in other institutions throughout the nation. The responses were also compared to responses of 1977 South Carolina freshmen. The second data base included responses of South Carolina freshmen and undergraduates to the Student Resource Survey. The third data base included: aggregate data gathered from materials completed by institutional representatives; annual reports from the files of state agencies; summary statistics from the College Entrance Examination Board and the College Scholarship Service; student responses to the annual American Council on Education's survey of freshmen; and data from other sources. The analyses of these data are available in four separate impact study technical reports. (SW)

Identifiers—Family Practice (Medicine), Long Range Planning, *Texas
The 1978 annual report of the Coordinating Board of the Texas College and University System is presented. The Board's major accomplishments in 1978 included the development of enrollment projections for the next decade, adoption of faculty workload guidelines, and implementation of a family practice residency program. The contents of the report include an overview of developments and sections on: financial planning, senior college and universities, community colleges and continuing education, health affairs, student services, campus planning and physical facilities development, administration, and other activities of the Coordinating Board. Specific topics include: Texas formula system, higher education appropriations for 1978-79, faculty salaries, research funds, statewide guidelines for faculty workloads and small classes, interdisciplinary degree guidelines, community service and continuing education, family practice residency program, nursing education, college student loan program, Tuition Equalization Grant Program, Texas Public Educational Grants Program; State Student Incentive Grant Program, Texas Assistance Grants Program, monitoring of access to the handicapped, housing survey, federal energy project funds, business services, personnel services, educational data center, data processing, Texas student information system, educational information centers, and research and publications. Descriptors—*Budgeting, *College Administration, College Faculty, *Educational Finance, Enrollment Trends, Expenditures, *Financial Problems, *Higher Education, *Retrenchment, School Funds, School Services
This review of retrenchment in higher education covers background information, basic concerns, suggestions for making cuts, and lessons learned from experience. Contents concern financial pres-

sures, enrollments, faculty relations during retrenchment, services and programs during retrenchment, administration during retrenchment, and case histories of retrenchment action at specific colleges and universities. Specific topics include: enrollment trends and projections, attrition and retention, faculty development, faculty turnover and tenure ratios, alternatives to tenure, collective bargaining, student/faculty ratios, faculty reduction, student services administration, zero-based budgeting, the decision-making process during retrenchment, public funds, tuition, external funds, and operations. Some important steps that higher education institutions should take to prepare for retrenchment are suggested. Extensive notes and a bibliography are included. (SW)

Descriptors—Associate Degrees, Bachelors Degrees, Black Students, *College Integration, *College Students, *Degrees (Titles), Doctoral Degrees, *Enrollment Trends, Geographic Distribution, *Higher Education, Masters Degrees, Place of Residence, Professional Education, *Racial Composition, Resident Students, State Boards of Education, *State Colleges, State Surveys, State Universities
Identifiers—In State Students, *Maryland, Public Higher Education
This summary of the Fifth Annual Desegregation Status Report for the State of Maryland presents data on residency, enrollment, degrees granted, and boards associated with higher education. The data, except for degrees granted, were collected by the state public postsecondary institutions at the beginning of the fall semester 1978. The data on degrees granted covers July 1, 1977 to June 30, 1978. Each section is preceded by a short description of the tables, which are of a summary type. Tables include the following: residence by county of origin by race for Maryland residents; residence status by race for all students; trends in enrollment by race for undergraduates and graduates/first-professionals; enrollment by program by race for undergraduates, graduates, and first-professionals; trends in the distribution of full-time black undergraduate students among the state public higher education institutions; analysis of the 1977-78 drop in black full-time enrollment; degrees granted by program by race for certificates and associates, bachelors, masters, doctorates, and first-professional; degrees granted to black students by race of institution; trends in degrees granted for 1975-78; racial composition of members of boards associated with higher education; and racial composition of employees of boards. Changing Students and the Impact on Colleges.
Pub Date—11 Jan 79
Note—23p.; Paper presented to the Educational Staff Seminar (Washington, D.C., January 11, 1979)
Pub Type— Speeches/Meeting Papers (150) — Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Access to Education, Adult Education, *Adult Students, *College Students, Demography, Educational Demand, Educational Opportunities, Enrollment Trends, *Higher Education, *Nontraditional Students, *Student Characteristics, Trend Analysis
Identifiers—Lifelong Learning
Current trends in higher education, specifically those related to the changing characteristics of students and the impact of those changes on colleges and universities, are addressed. Three distinct trends contributing to the changing characteristics of college students are: the decline of 18-year-olds in the population, the rising proportion of new students in the college population, and the increase in adult part-time learners. New students have resulted from equal opportunity and the expansion of open admissions community colleges. These trends will affect colleges differentially, depending on whether they serve national or local clientele, whether they are located in areas of declining or growing population, and what kinds of students they attract or are prepared to attract. Factors that can be considered in projecting college enrollments are demographic trends and the type of college. Demographic trends behind the adult education movement and characteristics of adult learners are described. The analysis also considers: how the labor market will affect education, differences between actual learners and those who say they are interested in education but who are not currently participating, advantages that would result from funding education information centers, characteristics of the new students, and the lack of federal effort to acknowledge the social desirability of lifelong learning and adult education. Bonham, George W. And Others
The Future of Foundations: Some Reconsiderations.
Pub Date—78
Note—79p.; Part 2 of this book has also been published in the 1976-77 annual report of the Russell Sage Foundation
Available from—Change Magazine Press, NBW Tower, New Rochelle, NY 10801 ($6.95)
Pub Type— Books (010) — Opinion Papers (120) — Historical Materials (060)
Document Not Available from EDRS.
Descriptors—*Agency Role, Government Role, Higher Education, *Nonprofit Organizations, Political Issues, Private Agencies, *Private Financial Support, Problem Solving, *Social Problems, Trend Analysis
Identifiers—*Philanthropic Foundations
Basic questions about foundations are addressed by George W. Bonham, an essay by James Douglas and Aaron Wildavsky is given, and responses are offered by the following people: Landrum R. Bolling, George W. Bonham, McGeorge Bundy, James Douglas, Fred M. Hechinger, John H. Knowles, Waldemar Nielsen, B. J. Stiles, Aaron Wildavsky, and Paul N. Ylvisaker. The essay by Douglas and Wildavsky presents a brief historical survey of foundations. In the first decades of the century, foundations frequently made it a condition of their grants that they be matched by government support. When they first appeared in America, foundations had the main objective of acting directly to meet public needs or ameliorate social ills. Until about the time of the New Deal, foundations acted as a third sector in contrast to the public or government sector on the one hand and the private sector on the other. The rationale that followed was pluralism: taking different approaches to a problem. It is suggested that foundations now change in relative emphasis toward sociopolitical problems. Foundations should become a site for alternative ways of thinking about problems. In such a role, foundations could build on one relatively unique strength that they have: their independence and freedom from having to meet either political or market criteria. (SW)

This hearing before the U.S. Senate considered the proposed family contribution schedule for the Basic Educational Opportunity Grants Program. The schedule determines student eligibility for the Basic Grant program and establishes the degree of financial need for each Basic Grant applicant. After opening comments by Senator Pell, Leo Kornfeld, speaking for the U.S. Office of Education, briefly outlined the progress of the program during the five academic years it has been in operation and described the proposed changes in the family contribution schedule for the 1979-80 academic year. Statistical data and an excerpt from the "Federal Register" on the family contribution schedules are part of his presentation. Dallas Martin presented the positions of the National Association of Student Financial Aid Administrators on the proposed schedule. John Phillips of the National Association of Independent Colleges and Universities offered some general observations about the essential nature and purpose of these proposals. Additional information includes communications on the schedule and statistical data on student funds. (SW)

Identifiers—National Board of Medical Examiners, University of Texas
Testimonies and articles, letters, and statements from a congressional hearing of the U.S. Senate concerning nutrition education in medical schools are presented. The hearing was held to ascertain the present status of nutrition instruction in U.S. medical schools, to determine the need for such instruction, and to identify problems with implementation. Opening statements of Senators Henry Bellmon and Bob Dole are followed by statements of educators and experts. Aaron M. Altschul offers a concept of nutrition education, and Charles E. Butterworth addresses hospital malnutrition and nutrition education. Robert B. Wilson covers the following areas: animal products as food supply, the role of the veterinarian in maintaining the supply of food for people, the relationship between nutritional diseases and animal production, and the state of nutritional education in veterinary schools. John Sandson discusses why nutrition in many medical schools has been poor, and Eleanor A. Young reviews the study of nutrition at the University of Texas Health Center in San Antonio. Jack Metcoff addresses objectives and strategies of pursuing nutrition education, and Jack Rutledge discusses nutrition education from the perspective of a medical student. William D. Holden speaks about examinations and the role of the National Board of Medical Examiners. Additional comments, a study on hospital malnutrition, and supplementary materials are included. (SW)

Information is provided on 14 federal programs providing financial assistance to undergraduate students in universities, colleges, and vocational/technical schools. The programs provide three different types of assistance: grants (or scholarships), loans, and job earnings. Grants and scholarships do not have to be repaid, but loans do. Some of the loan programs have provisions under which part or all of the incurred debt is repaid. Some of the programs provide assistance without regard to the course of study being pursued; others are restricted to certain fields. The following programs are included: Basic Educational Opportunity Grant Program; College Work-Study Program; Guaranteed Student Loan Program; Law Enforcement Education Program–Grants; Law Enforcement Education Program–Loans; National Direct Student Loan Program; Nursing Student Loan Program; Nursing Student Scholarship Program; Social Security Education Benefits; State Student Incentive Grant Program, Supplemental Educational Opportunity Grant Program, Veterans' Education Assistance (Post-Korean Veterans); Veterans' Education Assistance (Post-Vietnam Era Veterans)–Contributory Vesting Program; and Veterans' Education Loan Program. For each program, information is provided on eligibility, money available, and contact sources. A list of publications that provide financial aid information is included. (SW)

Descriptors—Academic Achievement, *Attrition (Research Studies), *College Majors, *College Students, Courses, Discriminant Analysis, *Dropout Research, Higher Education, Institutional Research, Research Projects, *School Holding Power, Selection
Identifiers—*Western Illinois University

The relationship between attrition and choice of major was studied at Western Illinois University. A secondary purpose was to determine whether measures of accademic ability, as well as curricular choice, will provide a basis for determining if attrition is likely to occur. Entering freshmen in the summer and fall terms of 1974, 1975, and 1976 were studied. Discriminant analysis procedures were used to predict attrition by combining college major and the following variables: high school percentile rank, ACT scores in English, math, natural science, social science, and ACT composite score. It was concluded that it is possible to improve prediction of attrition by combining measures of academic ability and achievement and major choice. It was found that information on initial achievement in college did not add materially to the ability to identify dropouts, while it did add to the ability to predict continuing students. The analysis seems to indicate that certain majors–in particular, business, information science, education, and public affairs–and services have a positive effect on retention of students. The study is being continued through the fall 1977 and 1978 classes. (SW)

Identifiers—*Oberlin College OH, *Western Reserve College OH

The role of student societies in higher education in the nineteenth century is reviewed. Among writings on the topic, a myth has been preserved that the student groups played a significant part in augmenting a fixed curriculum, were open forums for the discussion of controversial issues, and provided wider library holdings. Two Ohio colleges, Western Reserve College and Oberlin, are reviewed to illustrate the idea that the student societies did not fill the role of a center for social activism or improvement of the curriculum or library. It is concluded that the student groups were formed with literary and moral self-improvement as their stated and real goal. Social intercourse with fellow students was a by-product of these groups. The groups are judged a success, based on their fairly long history and their support from faculty. They were not a means to achieve social reform, nor were they anything but an integral part of the nineteenth century college and the nineteenth century establishment. (SW)

Descriptors—*Adult Students, *College Curriculum, Higher Education, *Human Development, Nontraditional Students, *Psychology, Research Projects, *Student Centered Curriculum, *Student Interests
Identifiers—*Empire State College NY

The kinds of content areas that mature students in psychological studies and human development select to pursue, given almost limitless free choice, were investigated at Empire State College, New York. One hundred and two programs of study were reviewed during a two-year period. Results indicated that adult students selected traditional course equivalents 50 percent of the time, but that the frequency of these selections was at wide variance with the frequency of offerings across liberal arts colleges. Adult students did not demonstrate interest in natural science orientations in psychology, but did demonstrate a strong interest in applied areas and exceptionally strong interest in social science areas. In addition to traditional social science oriented course titles, psychology and contemporary social problems, humanistic concerns, and topical areas related to personal and social concerns were most selected. Human development students, as opposed to psychology students, revealed a more interdisciplinary choice of subjects within the concentration. A literature review on curricular developments and trends is included. (SW)

The Impact of Federal Funds on Higher Education.
Pub Date—22 Jun 78
Note—21p.
Pub Type— Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Bureaucracy, *Federal Aid, *Federal Regulation, Financial Support, Government Role, *Government School Relationship, *Higher Education, *Institutional Autonomy, Research Projects, *Student Financial Aid
Identifiers—National Endowment for the Humanities, National Science Foundation

The various sources of federal funds and the subsequent problems in conforming to federal rules and regulations are considered. The actual U.S. funds for higher education for fiscal year 1978 and current federal programs dealing with financial aid to students are listed. One of the major problems in the administration of federal student aid dollars is shown to be the existence of inequities in the amount of money going to college campuses and to individual students, and inequities between the distribution of funds to two-year institutions as opposed to four-year institutions. Recently proposed federal regulations intended to eliminate fraud and abuse in student aid programs have been perceived by some college officials as unnecessary government intrusion into their affairs and an addition to the already overburdening paperwork. It is noted that the federal government as a main support for research to the academic professions in America sets the trends in research at institutions of higher education and has recently gotten into the business of regulating the research that it finances. Two of the agencies the federal government has established that significantly influence the workings of higher education are the National Endowment for the Humanities and the National Science Foundation. Problems in cutting federal red tape and proposed changes for improving the federal/higher education relationship are addressed. (SW)

Descriptors—*Career Opportunities, *College Graduates, *Employment Interviews, Employment Opportunities, Higher Education, Information Needs, *Job Applicants, *Job Search Methods, *Occupational Choice

The new or soon-to-be college graduate is provided in this book with the basic facts of the employment process and the system within which this process operates. A master plan is presented for effective representation of self on paper, during the interview, when deciding upon a job offer, and on the job. Guidelines are established for self-analysis to aid in determining career goals, and information is presented about where the jobs are. Concrete examples of the necessary written material–such as resumes, interview forms, and data sheets–are included. Different types of interviews are discussed, from the perspective both of the interviewee and the interviewer, and reference points for determining which offer finally to accept are offered. Through a question-and-answer format, information is presented on the most common and pertinent questions that professionals who work with job seekers are asked. Exhibits include: typical rejection letter, job qualifications form, biographical resume, functional or results-oriented resume, letter resume, personal data sheet, sample interview schedule, response letter to help-wanted advertisement, sample help-wanted advertisements (open and blind), sample job-inquiry letter, interview rating form, offer letters, position evaluation form, job appraisal form, and performance appraisal form. The First Century: A History of the University of Maine, 1865-1965.
Pub Date—79
Note—313p.
Available from—University of Maine at Orono Press, Raymond H. Fogler Library, Orono, ME 04473 ($15.00)
Pub Type— Historical Materials (060) — Books (010)
Document Not Available from EDRS.
Descriptors—Athletics, Cocurricular Activities, College Environment, *Educational History, Fraternities, Higher Education, Historical Reviews, *Institutional Administration, *Land Grant Universities, Photographs, Political Influences, Social Influences, Social Life, *State Universities, *Student College Relationship, United States History
Identifiers—*Institutional History, *University of Maine

The focus in this history of the University of Maine's first century is on the problems facing adminis-

trators and trustees in keeping the institution alive and growing in an environment both politically and socially hostile to public higher education. The establishment and growth of the early university are described, and special periods in its history are given particular attention: the two world wars and the depression. The inner life of the university is also considered, and student life is portrayed from the spartan existence of the early days to the more elaborate patterns of the 1950's and 1960's. Social life, fraternities, and athletics are included. Documentation includes many photographs and other illustrations from the university archives. (MSE)

Identifiers—Briar Cliff College IA, Education and Work, Graceland College IA, Marycrest College IA, Outcomes of Education, Simpson College IA, Westmar College IA

A study was undertaken to provide an opportunity for faculty from five small, independent colleges in Iowa to become familiar with current developments concerning general education programs to facilitate planning and evaluation of general education in the institutions. The participating colleges were Briar Cliff, Graceland, Marycrest, Simpson, and Westmar. The report defines liberal education, liberal arts, and general education and discusses goals and implications of goals for curricular structure. Planning of general education programs, implementing changes in general education, and program evaluation are addressed. Three basic kinds of changes that liberal education should make in the student concern knowledge, personal attitudes or dispositions, and skills. An additional goal concerns the world of work: relating liberal education and the world of work and relating general education and specialization are considered. Varying requirement structures and organizational plans for general education programs, methods and evaluation, and the context of general education, particularly its relation to other components of the curriculum, are addressed. A bibliography on general education from 1974-78 and selected earlier works compiled by Leonard J. Bowman and Kathleen Welch is included. (SW)

Identifiers—Connecticut, Maine, Massachusetts, *New England, New Hampshire, Rhode Island, Vermont

A fact book about 260 New England colleges, universities, and postsecondary institutes presents addresses and telephone numbers, tuition and fees, room and board charges, levels of offerings, application deadlines, admission requirements, and enrollments. Summary tables, charts, and graphs describe the institutions on a state-by-state basis. Information is presented on where to apply for financial aid, including scholarship and loan programs, as well as veterans' benefits, and additional sources of information. Data on the following states are included: Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont. Charts are presented that summarize numerical data reported for each degree-granting institution. The following tables are included: range of tuition and fees by state, 1978-79; range of room and board costs by state, 1978-79; types of institutions by state, 1978; total enrollment in degree-granting institutions, 1977; undergraduate enrollment, 1977; graduate and first-professional enrollment, 1977; non-degree enrollment, 1977; distribution of public enrollment by state, fall 1977; and distribution of private enrollment by state, 1977. Descriptors—Academic Libraries, *College Role, Curriculum Development, Democracy, Educational Benefits, *Educational History, *Educational Philosophy, General Education, *Higher Education, Humanistic Education, *Liberal Arts, Political Influences, Research, Research and Development Centers, School Community Relationship, *Universities

The problem of liberal education in the modern university is confronted in this book directed to academics in all fields. The history of the evolution of American higher education is examined and a philosophical consideration of how liberal education can be achieved today is addressed. The role of the development of libraries, research, and laboratories–along with an emerging democratic spirit that encouraged universities by about 1900 to serve the needs of the communities that supported them–is described. Democracy and research, it is noted, combined to launch the modern "university idea"–an institution devoted to research with the expectation that it would enrich society. Liberal education's place in this modern academic context is established by a reformulation of the problem: to organize scholarship so that it will create and nurture individuals as freely functioning participants in the community. It is argued that there is no simple link between acquisition of knowledge and the growth of a mind, but that the process of growth is mediated by habitual reflection on relationships among various activities. Liberal education, with its emphasis on diversity, technique, and procedure, rather than on subject matter, is concluded to be the working structure of an autonomous intelligence. (LBH)

Identifiers—*Need Analysis (Student Financial Aid), *Office of Education

Three hearings held before the U.S. House of Representatives on student financial assistance programs were concerned with the manner in which the Office of Education's assistance programs were being administered, the extent and nature of fraud, waste and abuse, and the progress of the Department of Health, Education, and Welfare's (HEW) corrective action. Statements were presented by Joseph Califano, Leo L. Kornfeld, and Thomas Morris, and letters and statements were submitted for the record. The seven student assistance programs administered by HEW are described and problems and corrective measures are outlined. The six student financial assistance programs administered by the Office of Education were consolidated into a single bureau, and the relationship between headquarters and the regions was rearranged. A computer systems expert who was experienced in helping educational institutions solve management problems was appointed to head the new bureau. One problem that has been addressed is the need to effectively coordinate HEW student assistance programs with those of other agencies, such as the Veterans Administration. (SW)

After "DeFunis": Affirmative Action and the Jewish Community. Analysis, No. 46.
Synagogue Council of America, Washington, D.C. Inst. for Jewish Policy Planning and Research.
Pub Date—30 Sep 74
Note—9p.; Best copy available
Pub Type— Opinion Papers (120) — Legal/Legislative/Regulatory Materials (090)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Admission Criteria, *Affirmative Action, Civil Rights, *College Admission, Employment Practices, *Equal Education, Equal Opportunities (Jobs), Government Role, Higher Education, *Jews, Quotas, *Reverse Discrimination
Identifiers—*DeFunis Case, Selective Admission
The problems raised by the development of affirmative action and by the Jewish community's response to the complex social and legal issue are analyzed. The analysis focuses upon: initiation of affirmative action by presidential decree and its interpretation and implementation by the Department of Health, Education, and Welfare in the areas of college admission and hiring; the response of various segments of the Jewish community toward affirmative action's questionable turn toward preferential treatment and quotas, including the form of the response, its effectiveness, and what it reveals about being Jewish in America today; and the future of affirmative action and the role group interests should play in society. The analysis also attempts to draw attention to current circumstances that seem to provide an unusual opportunity for constructive action in the near future. Although the major Jewish organizations were firm backers of affirmative action in its neutral non-discrimination phase, they filed complaints when affirmative action provided preferential treatment and quotas. The failure of the bureaucracy to respond in a serious manner to the problem of reverse discrimination led to the "DeFunis" case in the Supreme Court. The Jewish organizations go beyond merely rejecting the legal institution of group rights; they are also critical of the ethnocentricity implicit in the very suggestion of group rights. The larger problem of balancing group interests and individual rights is considered. (SW)

The Connotative Meaning of College Grades.
Pub Date—Mar 79
Note—26p.
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Academic Achievement, *Grades (Scholastic), Higher Education, *Semantic Differential, *Student Attitudes, *Student Evaluation, *Student Reaction, *Undergraduate Students
A semantic differential technique was used to determine the connotative meaning of specific grades to college students. The 161 upper division undergraduates rated each of three specific grades on 20 semantic differential items. Two descriptive questions were answered: (1) What are the basic dimensions of the connotative meanings of grades? (2) How does the continuum of connotative meanings (as measured by "semantic distances" between adjacent grades) compare to the quantitative continuum that grades are assumed to represent? Factor analysis identified four factors: evaluation, realism, complexity, and salience. Comparison of the continuum of connotative meaning and the quantitative continuum revealed discontinuities. Findings are discussed in relation to the general theoretical assumption that grades have meaning to the extent that they initiate in the student an internal process which mediates the intended value judgment of the teacher regarding the performance of the student as a learner. Student Selection: A Review.
Pub Date—78
Note—18p.; Paper presented at the National Recreation and Park Association Congress (Miami Beach, Florida, 1978)
Pub Type— Speeches/Meeting Papers (150) — Opinion Papers (120)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Academic Achievement, *Admission Criteria, *College Admission, College Programs, *Competitive Selection, Higher Education, Individual Characteristics, Leisure Time, *Recreation, *Student Evaluation
Identifiers—*Selective Admission
A summary of factors involved in the college student selection process and implications for leisure service, recreation, and resource programs at colleges and universities are discussed. Criteria for student selection involve objective and subjective measurements of academic ability. Objective selection procedures include scholastic grades, rank in class, aptitude tests, and achievement tests. The three most common subjective measures are information about personal qualities, accomplishments, and biographical data. Arguments used for and against the implementation of selective criteria within a program of study are presented. The process of limiting the quantity and quality of students entering a leisure service program is beginning to become more accepted. It is concluded that if leisure service programs are going to pursue a selective admissions program, it must be based upon academic resources, the available market for graduates, and a realization that there are many other programs without limited enrollment who will be competing for available positions. Identifiers—Canada, *Council of Ontario Universities, *Ontario Council on University Affairs
The 1979 brief on operating support to the Ontario Council on University Affairs (OCUA) is presented. Section One presents an analysis of the revenue implications of the announced level of government funding for 1979-80 and measures this against the advice proffered by both the Council of Ontario Universities (COU) and the OCUA. Section Two sets out recommendations of the COU to OCUA on the factors to be used in its global funding model for 1980-81. Section Three addresses the implications of the extension of the government's program of fiscal restraint to 1983-84. Specific contents include: background information on funding; the impact of inflation on salaries; the increasing cost of benefits; non-salary inflation; furniture and equipment; projected enrollment variation; establishing the funding base for 1980-81; factors used in the calculation of the funding base; and cost of the COU basic funding recommendations. Descriptors—*College Faculty, *Doctoral Degrees, Employment Trends, *Engineering, *Financial Support, Higher Education, National Surveys, Questionnaires, *Research Opportunities, *Scientific Research, Scientists, Trend Analysis
A study was conducted to determine the proportion of young doctoral faculty (i.e., received the Ph.D. within the past seven years), the extent of their activity in seeking research support, and the possible reasons for any slackening in their search for support in recent years. Trends based on earlier surveys on the same topic are analyzed. Department heads were also asked to estimate the number of faculty they expected to hire for 1978-79. The survey was limited to colleges and universities that award the Ph.D. degree, and inquiries were directed to departments in 16 science and engineering fields. Usable responses were recieved from 203 of 235 institutions and 1,366 of 1,684 departments. National estimates were derived from survey responses by a weighting procedure. Results of the survey were weighted to cover 1,809 doctorate-level departments at 288 institutions. In 1977-78, 24 percent of the full-time doctoral faculty of these departments were defined as young. The data show that the proportion of young doctorates in science and engineering departments continues a pattern of decline evident in three previous surveys going back to 1968. On the average the young faculty members submit research proposals with greater frequency than do the senior faculty, and they are only slightly less successful than their senior colleagues in obtaining funds for the research proposals. Statistical data and a sample survey are presented. (SW)

Identifiers—*Law Students, Outcomes
Differences in cognitive styles were studied in a selected group of over 800 students at 20 law schools throughout the U.S. Two major styles are identified in this book: that of the monopath, who follows a single route of established principles and procedures, and that of the polypath, who takes many routes, as circumstances suggest. A battery of both new and standard tests was administered to both law students and their professors to investigate differences in cognitive style and their relationships to self-image, anxiety, and academic achievement. This also revealed differences in prevailing styles at different law schools. The research format developed in this study is applicable to the professions of medicine, education, social work, and others in which cognitive and communication styles play a central role in determining outcomes. Appended to the book are: the research questionnaire; a test called "Oral Solution of Verbal Problems;" and Authorization Statements A and B, for student permission of administrative release of final course grades. A bibliography with nearly 100 entries is also included. (LBH)

Descriptors—Behavioral Objectives, *Curriculum Development, Educational Assessment, *Educational Objectives, Health Needs, Health Occupations Education, Higher Education, *Medical Education, Models, *Performance Based Education, *Physicians, Professional Education, Student Evaluation

Identifiers—*Competence

Designed as a resource for members of the World Health Organization, this guide on competency-based curriculum development in medical education may be applied to programs for other health professions and occupations. An explanation of subject-centered curricula and integrated curricula is offered, and ways in which these models differ from competency-based medical education are discussed. Identifying the elements of competence involves an analysis of: physicians' activities through self-reports, observation, and task analysis; analysis of critical incidents and expert judgment; and analysis of health care needs based on public health statistics, medical records, and social, economic, and political realities. A model is presented to evaluate professional performance through consideration of the client, the problem, and the setting. Three themes are discussed that are important in determining the nature and organization of student learning experiences: time, sequence, and mastery learning. Entry, formative, and summative assessment of competence are covered. New educational roles for the teacher and the student and strategies for curriculum change are also addressed. (SW)

Identifiers—Constitutions (Documents), Faculty College Relationship, *Washington

Broad legal constraints upon legislative authority over faculty tenure rights and the particular application of those constraints to the State of Washington are discussed. After defining tenure and tracing the creation of tenure rights, legislative authority over statutorily created tenure is discussed. Methods of legislative modification of tenure statutes may generally be accomplished in two ways, direct repeal of or amendment to the statute, and indirect repeal or amendment through inconsistent legislation. Whether by direct or indirect amendment, action taken by a state legislature to modify faculty tenure rights depends heavily upon the wording of the pertinent statutes creating the mechanism for award. Variations in statutory authorization for tenure award among higher education systems within a state may also limit a legislature's authority to modify tenure rights. Such a possibility is illustrated by the status of tenure rights in Washington. Appendices include excerpts from the U.S. and Washington State Constitutions; community college statute; four-year institution statutes; employment contract samples; faculty handbook excerpts; and K-12 statute. A bibliography on cooperative education and entrepreneurial development by colleges and universities is presented. This type of program establishes businesses in college communities, enabling students to participate in apprenticeships while the university increases its contribution to the community's stabilization and development. Contents include publications on: the philosophy of cooperative education and survey of programs; the small business; the franchise; minority-owned enterprises; business ventures in hotel, restaurant, fast-food service, dry cleaners-laundry, proprietary day-care facility, and bookstore areas; business capital; franchising; marketing; accounting; legal considerations; management; problem solving; finances; taxes; evaluation; technical assistance; and reference resources. For each of the topics, an annotation of the pertinent considerations and questions is provided. (SW)

Descriptors—Apprenticeships, Bakery Industry, *Business, Business Skills, *Career Development, Colleges, College Stores, *Cooperative Education, Economic Opportunities, *Experiential Learning, Farm Management, Food Service Industry, Higher Education, Income, School Industry Relationship, *Student Employment, *Work Experience Programs

Identifiers—Economic Impact, *Oakwood College AL

The entrepreneurial development and experiential education environments of Oakwood College, Huntsville, Alabama, are described. The college-owned industries of the dairy, farm, garment and linen service, bakery, food manufacturing, conven-

ience store, and snack bar are discussed in terms of markets and marketing, permissions and protections, management and business services, financial aspects, facilities and materials, and schedules and staffing. Steps in the planning, decision-making, and implementation of a business venture are outlined. The principal characteristics of experiential education, including forms of implementation, work arrangements and supervision, and outcomes, are discussed. It is concluded that the primary financial benefit to the college from the industries program results from the opportunities provided for student employment. The college enterprises also sell to the college and to outside markets, generating sales income. (SW)

Identifiers—*Berea College KY, Economic Impact

The entrepreneurial development and experiential education environments of Berea College, Berea, Kentucky, are described. The college-owned enterprises of the Boone Tavern Hotel and dining room, college farms and poultry, college laundry, college store, student craft industries, and the college press are discussed in terms of markets and marketing, permissions and protections, management and business services, financial aspects, facilities and materials, and schedules and staffing. The principal characteristics of experiential education, including forms of implementation, work arrangements and supervision, and outcomes, are discussed. It is concluded that the primary financial benefit to the college of the program results from the opportunities for student employment. Other financial benefits provided by the enterprises include helping the college become a closed economic system and the market return on investment which provides a modest profit for year-end June 1977. NAICU Public Policy Statement for 1979. NAICU News Special Report, March, 1979.

National Association of Independent Colleges and Universities, Washington, D.C.

Pub Date—Mar 79

Note—9p.

Available from—National Association of Independent Colleges and Universities, 1717 Massachusetts Avenue, N.W., Washington, DC 20036

Pub Type— Opinion Papers (120)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Educational Finance, Educational Policy, *Federal Aid, Federal Regulation, Financial Support, Grants, *Higher Education, *National Organizations, Organizations (Groups), *Policy Formation, Private Colleges, School Support, School Taxes, *Student Financial Aid

Identifiers—National Assn Independent Colleges Universities, Policy Statements

This policy statement for the National Association of Independent Colleges and Universities addresses student assistance, categorical/institutional assistance, tax policies, government regulation/self-regulation, and corporate and foundation policies. NAICU recommends to the Congress and the Administration a legislative amendment to Title IV of the Higher Education Act to establish a federal policy goal that every eligible student should receive sufficient aid under BEOG, SEOG, and SSIG programs so that the sum of these grant funds, in combination with a reasonable parental contribution and institutional and state matching grant funds, will constitute 75 percent of total student expenses. Suggestions are offered to serve and support achievement of this 75-percent federal policy goal. It is proposed that 25 percent of student expenses should be provided from self-help programs of work and loans. Recommendations to support achievement of the self-help policy goal are also offered. Proposals for assisting higher educational institutions in building and maintaining their capacity to meet the learning needs of increasingly diverse student populations are included. The need to reverse the trend of intrusive government regulation of higher education is advocated by means of legislative amendments to higher education legislation. (SW)

A Value-Centered Approach to the Western Tradition.

Pub Date—28 Oct 78

Note—17p.; Paper prepared for the Association for General and Liberal Studies (Des Moines, Iowa, October 28, 1978)

Pub Type— Speeches/Meeting Papers (150) — Guides - Classroom - Teacher (052)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—College Instruction, Course Evaluation, *Course Objectives, Ethical Instruction, *General Education, Higher Education, *Humanistic Education, Humanities, *Moral Development, Social Attitudes, *Values, *Western Civilization

Identifiers—Baker University KS

A general education course for sophomores at Baker University entitled "Shaping of Western Thought" is described. The goals of the university's general education program are enumerated and the ways in which this course serves those purposes are discussed. Focus in the course is on both personal and social values. Three values–love, peace, and freedom–are examined. Alternative definitions of these ideas, as they have emerged from particular historical contexts, and their manifold implications for individuals and groups are considered. The contexts in question are great cities in the Western tradition, such as Athens, Rome, Paris, London, and New York. It is hoped that students will come to appreciate the interrelationships between the ideas and attitudes that individuals and groups cherish and the natural and social environments in which they live and work. A brief evaluation of student response to the course is also provided. (Author/LBH)

General Education: Does It Have a Future?

Pub Date—17 Feb 79

Note—11p.; Paper presented at the Higher Education Issues Conference sponsored by the Kansas City Regional Council for Higher Education (Kansas City, Kansas, February 17, 1979)

Pub Type— Opinion Papers (120) — Speeches/-Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Attitudes, *College Curriculum, College Environment, *College Role, Curriculum Development, Definitions, Educational Objectives, *Ethical Instruction, *General Education, Higher Education, Liberal Arts, *Moral Development, Political Influences, Public Opinion, *Values

Three issues regarding general education are addressed in this paper: What does "general education" mean? Why do many faculty members and the public have little regard for general education? Can general education be established as an important part of the college curriculum? It is suggested that a concern for moral values is an important part of general education, and indifference to general education reflects society's uncertainty and confusion regarding values. It is noted that the proponents of general education have been slow to adapt to the post-World War II expansion of American colleges and universities, and they have not stated as clearly as possible the goals of general education, leaving themselves open to charges of irrelevance and mediocrity. Those who want to establish general education as an important part of the curriculum should realize that the college is an intensely political institution and should be prepared to participate in the campus political process. It is concluded that there needs to be congruence between the stated objectives of general education and the actions of the college faculty and administration. (Author/LBH)

Descriptors—Accreditation (Institutions), College Administration, Court Cases, Educational Economics, *Educational Finance, *Federal Legislation, Income, *Institutional Administration, *Laws, *Legal Problems, *Nonprofit Organizations, Politics, Private Colleges, Private Schools, Public Education, Public Policy, Racial Discrimination, Recordkeeping, Research Projects, School Accounting, State Colleges, State Universities, *Taxes, University Administration, Volunteers

Identifiers—Advertising, Charitable Deductions, Philanthropic Foundations, *Tax Exemption

This single-volume reference describes in detail the federal tax laws governing income tax exemption for qualified organizations. All categories of tax-exempt organizations are treated, as well as many related subjects, providing the conditions and requirements for protecting a tax-exempt status. Organized according to the subject's major categories (types of exempt organizations, private foundation rules, unrelated income requirements, exemption application requirements, and administrative and judicial procedures), the deskbook provides factual material and the author's philosophy and practical insights into a variety of problems. Although the volume provides information on many kinds of organizations, references concerning schools, colleges, and universities may be of special interest to members of the education community. Among the specific topics considered are accounting principles, accreditation, the principle of the advancement of education, educational institutions as charitable organizations or public charities, contributions, institutions under foundation rules, legislative or political activities of institutions, financial practices, reporting requirements, research activities, state institutions, voluntarism, racial discrimination, and pluralism. Appended are a list of specific sections of the Internal Revenue Code that comprise the statutory framework for tax-exempt organizations, a table of pertinent court cases, a table of IRS rulings and other items, a directory of IRS key district offices, and an index. The Evaluation of an Information Retrieval System.

Pub Date—74

Note—19p.

Pub Type— Information Analysis (070) ()

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Bibliographies, Cost Effectiveness, Flow Charts, *Information Retrieval, *Literature Reviews, Mathematical Models, *Models, *On Line Systems, *Performance Criteria, Relevance (Information Retrieval), Systems Approach, User Satisfaction (Information)

Various models that have been devised to evaluate the performance of information retrieval systems are reviewed. Such models fall into three categories: (1) evaluation from the viewpoint of the user, who is primarily concerned with how well the system responds to his query; (2) evaluation from the system operator's standpoint, which focuses on the operation of the system; and (3) a merging of these two points of view. Parameters considered include system costs, recall, precision, form of output, and response time. Although most of the models described are mathematically derived, no attempt is made to elaborate upon the equations. A bibliography is attached. (JD)

Descriptors—Activities, Background, Educational Research, *Federal State Relationship, Grants, *Information Dissemination, *Interagency Coordination, National Programs, Objectives, Program Planning, State Departments of Education
Identifiers—*Educational Information, *State Dissemination Grants Program
The evolution, operation, and evaluation of the State Dissemination Grants Program are described. This collaborative effort between the National Institute of Education (NIE) and the State Education Agencies (SEA's) is the third stage in a program development process begun by NIE in 1970 as one of five elements in a dissemination capacity building strategy aimed at building nationwide dissemination capacity. The program presently serves SEA's and will, potentially, address dissemination problems of large urban school districts. Two types of grants–capacity building grants and special purpose grants serving short term dissemination needs–are funded yearly. In each funded project, a balanced development of resources, linkage, and leadership are encouraged. Evaluation of the programs by NIE is difficult because of their non-prescriptive approach and the collaborative nature. Collaborative evaluation is seen as the solution, although it places a burden on the grantee; only experimentation with this type of evaluation will demonstrate the success or failure of such an approach. An outline of NIE's expectations for the program and a summary of the program's activities during 1977 illustrate the program's effectiveness. (Author/MBR)

This study provides an overview of the community and the status of the library through an examination of the city of Virginia Beach, including its demography and needs, as well as the history, organization, administration, and financial support of both the Virginia Beach Public Library System and the Oceanfront Branch Library. The information is presented in numerous figures consisting of maps, tables, and graphs in addition to the appended user survey, results, and analysis. Specific recommendations of the study are further community analysis, further library role analysis, increased community awareness of library services, the establishment of adult programs, the establishment of a staff orientation program, increased parking lot control, a weeding of the library collection, and an evaluation of the record collection. Identifiers—*Individualized Instruction for Data Access
This report provides a brief general summary of progress in a 2-year project renewing earlier work on the development of Individualized Instruction for Data Access (IIDA)–a system for teaching online searching techniques for bibliographic data bases–as well as an in-depth report on the IIDA computer system design. The Connector for Networked Information Transfer (CONIT), from which the IIDA project has borrowed software, is briefly reviewed and the specific CONIT software used by IIDA is examined. The overall flow and a detailed description of the IIDA software are discussed. The report also examines the data structures, including specific contents and routines, and diagnostic programs, used to analyze the search in progress. Exercise and assistance mode, which provide the student instruction in the use of DIALOG through exercises controlled to varying degrees by the computer, and plans for computer program production are outlined. Appendices include context strings in IIDA and a list of IIDA special features. (CWM)

Pub Date—Dec 77
Note—101p.
Available from—Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (Stock No. 052-003-00601-4, $2.75)
Pub Type— Reports - Descriptive (141)
EDRS Price - MF01/PC05 Plus Postage.
Descriptors—Computer Programs, Computers, Data Bases, Information Science, *Information Systems, Library Automation, *Library Networks, Library Technical Processes, *On Line Systems, *Standards
This document describes a proposed computer to computer protocol for electronic communication of digital information over a nationwide library bibliographic network. The protocol allows application tasks at one site on the network to converse with application tasks at any other site, regardless of differences in computer architecture or operating systems. The protocol relies on other standard protocols for supplying a reliable communications network. The physical network environment to implement this protocol can be structured in a variety of ways and might utilize facilities supplied by common carriers, value added networks, or a combination of both. The Task Force suggests that further investigation remains to be done in the areas of implementation details and program impact. (Author/JVP)

Identifiers—Ontario Institute for Studies in Education
A survey of faculty and students to assess user needs and satisfaction with collections and selected library services is described and the resulting data are reported. Questionnaire construction, sampling and distribution, and response rate and factors are discussed. Data analysis is broken into major categories, which include responses to general questions regarding library use and general questions about the OISE library collection. The second category is further broken into the rating of books and periodicals in the specific fields of adult education, applied psychology, curriculum, educational administration and planning, higher education, history and philosophy, measurement, evaluation and computer applications, sociology, and special education. General questions about the library focus on satisfaction with library hours, difficulty in locating material, reference and information service (including satisfaction with reference services), interlibrary loan use, orientation effectiveness, circulation services, special collections (including audiovisual and curriculum resource materials), and library facilities. Conclusions are itemized from the results of each major subdivision of the questionnaire. Appendices include copies of the questionnaires utilized. (MBR)

Reaching the Undergraduate with Government Publications: A Case Study in Bibliographic Instruction.
Pub Date—77
Note—13p.
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Classroom Research, *Government Publications, Higher Education, *Library Instruction, Library Research, *Undergraduate Students, *Use Studies
A documents librarian and a communication instructor attempted to promote the use of government publications by providing bibliographic instruction as an integral part of an argumentation course in the Department of Communication and Theatre at the University of Illinois at Chicago Circle. Specialized lectures related to the needs of the particular class and the topics chosen by students for assigned research project were presented by library faculty. Lectures covered general library usage, types of government publications and access tools, and search strategies for individual student topics. Students were asked to complete a questionnaire at the completion of their projects. Their responses indicated that the lecture and question and answer sessions were successful in providing sufficient information and encouraging student use of government publications, as well as some use of these materials in other courses. An analysis of the sources cited by the students in their final projects is provided, and some implications of this type of bibliographic instruction are considered. (JVP)

Regional Intertype Library Cooperation in Windham and Tolland Counties, Connecticut: A Survey and Plan Prepared for the Governing Board of Cooperating Library Service Unit Three.
Eastern Connecticut Library Association, Willimantic.
Pub Date—1 Aug 78
Note—295p.
Pub Type— Reports - Research (143)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors—Academic Libraries, Library Administration, *Library Cooperation, *Library Planning, *Library Services, Public Libraries, Regional Programs, School Libraries, State Libraries, Statewide Planning, Use Studies

A brief overview of this survey and plan for library cooperation is provided by a summary of key recommendations based on the identification of major needs, plus interviews, statistical analysis, materials checklists, and questionnaires. Priorities are indicated by grouping these recommendations in 10 phases. The main body of the report provides background information; discussion of relevant national trends; the history of local and state library cooperation; statistics on libraries in the two counties; results of surveys–questionnaires sent to library users and to library directors, telephone and in-person interviews, and a materials questionnaire sent to each library; a summary of needs as perceived by users and directors; a plan for regional library services; and general observations on the study. Appendices include footnotes, copies of the questionnaires used, acronyms, an organizational chart, separate lists of persons interviewed and those who attended meetings, and a bibliography. (JVP)

The Nature and Implications of a Resource Network as a Support System for Linking Agents.

Pub Date—Apr 78

Note—48p.; Paper presented at the Annual Meeting of the American Educational Research Association (Toronto, Canada, April 1978)

Pub Type— Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Educational Needs, Educational Planning, *Educational Resources, *Human Resources, Information Dissemination, *Information Networks, Information Processing, Information Services, Information Storage, *Information Systems, Organization, Personnel Needs

A resource network can serve as a strategy for personnel-multiplying by performing many activities and functions that the linking agent would otherwise have to perform; e.g., such a network can provide an organized method for identifying and collecting resources, as well surveying the kinds of resources available. The Illinois Resource and Dissemination Network in the Illinois Office of Education has developed a general survey form to collect information on locally developed programs, federal programs, educational community projects, research, information housing sites, and human resources. The network utilizes consultants to build resource information files and coordinates and formats information and resources. Information must be transformed into user oriented material, and network staff provide a system for collecting and coordinating data in usable form for the linking agent. The information network also serves as a foundation for professional development. Organizational structure and staff roles reflect the functions of the network. The Illinois Office of Education Resource Identification Survey questionnaires and a narrative description of the Illinois Resources File (IRF) and Human Resources File (HRF) are appended. (CWM)

Identifiers—*Elementary Secondary Education Act Title IVB

These standards are intended to assist local school districts in New York State in selecting educational resources and audiovisual equipment and in providing for testing, guidance, and counseling services under Title IV, Part B of the Elementary and Secondary Education Act. The main purpose of the standards is to establish qualitative and quantitative measures which will set minimum levels below which educational programs cannot be effective, and which will stimulate efforts to go beyond minimum levels to achieve excellence in educational opportunity. Operational guidelines are provided for Guidance and Counseling Services, School Library Media Programs, and Educational Communication Programs. Objectives, types of programs, and/or criteria for the selection of materials and equipment are outlined for the following content areas: agriculture, art, bilingual education, business education, distributive education, drug education, English and language arts, foreign languages, health and health occupations, home economics, the humanities, industrial arts, mathematics, music, physical education, reading, safety, science, and social studies. Descriptors—*Decision Making, *Library Administration, Library Automation, *Library Planning, Management by Objectives, Management Information Systems, Performance, *Problem Solving, Program Improvement, Resource Allocations, *Systems Approach

The use of analytical models and quantitative methods for both short- and long-range problem solving offer library managers an excellent opportunity to improve and rationalize decision-making for strategic and organizational planning. The first step is to identify the problems confronting the library and understand its current capabilities. Several dimensions of planning–scope, time frame, nature of decision, and staff involvement–must be considered in the development of a planning strategy. Recognizing these dimensions, planners will be able to focus on the critical issues and to apply the most appropriate quantitative and computational techniques. Critical issues that demand primary attention in the planning process include the information system needed to support strategic planning, the allocation of resources, the analytical approaches to understanding the library environment, the relationships of organizational processes and climate to effective planning, and the assessment of library performance. A comprehensive planning framework should approach the library as a complex dynamic system with interdependent relationships and changing characteristics. Utilization of decision models developed for libraries and computer applications, along with proper staff management, make efficient library planning possible. (CWM)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—Automatic Indexing, Data Bases, *Futures (of Society), Information Needs, Information Processing, Information Retrieval, *Information Science, *Information Services, *Information Systems, Media Technology, Organization, *Technological Advancement, Telecommunication

Identifiers—*Machine Readable Cataloging

The three papers presented at this assembly focused on communications technology and the information industry, organization of information, and development of the Machine-Readable Cataloging (MARC) system. "The Communications Revolution: America's Third Century Challenge" examines the growth of society from a pre- to a post-industrial society and the subsequent growth of the information industry and an information-based economy. While communications technologies can aid in systematically creating "information literacy" for all adults, it is also necessary to prepare individuals so that they may comprehend and apply communication capabilities and realize the potential of these technologies. "The Future of Organizing Knowledge: A Matter of Access" addressed the future of organizing information as the essential precursor of knowledge and wisdom, and claims that the ultimate objective of the information services is to provide access to information, thereby making information processing more efficient. The Machine-Readable Cataloging (MARC) system is examined in "The Many Facets of MARC," which covers the development of MARC, technical processing, files, acquisitions, and other significant aspects of the distribution service. (CWM)

Descriptors—Automatic Indexing, Cartoons, *Cataloging, *Comics (Publications), Fiction, *Indexes (Locaters), Indexing, *Library Role, Parody, *Science Fiction

Identifiers—*Michigan State University

The potential for computers in indexing popular fiction study materials is discussed, and specific examples of comic book indexing are provided through descriptions of projects and a bibliography. The 4-stage evolutionary development of popular fiction studies includes: (1) discovery and reading; (2) bibliography and collecting; (3) cataloging and indexing; and (4) history and criticism. Librarians, particularly with the help of computers, can contribute to the collection, preservation, cataloging, and indexing of comic books, an area of popular fiction largely ignored by libraries in the past. Major comic book indexing projects are now under way for the two largest United States comic book publishers, Marvel and DC. Various other indexing projects have examined specific aspects of comics. A bibliography lists the comic indexes in the Russel B. Nye Popular Culture Collection at Michigan State University. (CWM)

Community Analysis, Stafford County, Virginia.

Central Rappahannock Regional Library, Fredericksburg, Va.

Pub Date—Aug 78

Note—39p.

Pub Type— Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Community Characteristics, Community Organizations, Community Resources, *Community Study, County Programs, Demography, Library Circulation, Library Collections, Library Facilities, *Library Planning, Library Programs, *Library Services, Local History, *Public Libraries

Identifiers—*Virginia

This study of the present and future library needs of residents of Stafford County, Virginia, with emphasis on the North Stafford areas, includes a review of demographic statistics and recommendations for library services. The currently increasing population is highly dependent on the automobile for transportation, and recommendations for library service include increased hours to reflect the commuting pattern and this dependence. It is also recommended that collection growth and programming should reflect the increase in the high school enrollment, and that guidelines for school-branch library cooperation should be very carefully spelled out and new areas for cooperation explored. Initial programming in North Stafford should strongly reflect cooperation with existing clubs and interest groups in the area. Examination of the public library organization, staff, budgeting, facilities, and collection indicate that renovation and/or expansion of the main library facility is necessary in order to keep pace with the needs of the North Stafford Branch and any other branches, either current or projected. Library programs, reference services, and bookmobile services will increase with this trend in county growth. A history of Stafford County and bibliography are appended. (CWM)

ARL Annual Salary Survey, 1977-1978.
Association of Research Libraries, Washington, D.C.
Pub Date—Nov 78
Note—40p.; For related documents, see ED 129 226, 138 310 and 148 348
Pub Type— Numerical/Quantitative Data (110)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Academic Libraries, *Librarians, Library Surveys, Minority Groups, *Personnel Data, *Research Libraries, *Salaries, Sex Discrimination, Statistical Analysis
This survey includes tabulations of median and beginning professional salaries for the year for budgeted positions in all Association of Research Libraries (ARL) member libraries and supplementary tables listing average salaries for filled positions in ARL's academic libraries, displayed by position, sex, minority group membership, and geographic location, size, and type of institution. Year end figures show a 28 percent increase in purchasing power during the year, indicating that librarians did little more than break even. Although there are almost twice as many women as men employed by ARL member libraries in professional positions, the imbalances in the distribution of staff by sex and position favor men at top administrative levels and women as department heads. Average salaries for men are higher than for women in the majority of categories, including minority librarians. Public institutions pay higher salaries than private institutions and, with a few exceptions, bigger libraries pay more. Generally, librarians in the Pacific region earn most, while those in the East South Central region earn least. Footnotes are included. (CWM)

Descriptors—Academic Libraries, Library Acquisition, *Library Collections, *Library Expenditures, Library Materials, Microforms, Operating Expenses, Periodicals, Personnel Data, *Research Libraries, Salaries, Serials, *Tables (Data)
This paper compiles the 1977 to 1978 academic library statistics and rank order tables from 105 members of the Association of Research Libraries (ARL) in the areas of collections, interlibrary loans, expenditures, personnel, microform holdings, and university enrollments and doctorate information. Review of the ARL statistics for 1978 indicates three basic trends: (1) Since 1976 the allocation of the total academic library budget between materials and personnel has remained constant–typically 58 percent of the budget has been used for salaries and wages, and approximately 30 percent has been used for materials. (2) Inflation continues to erode the capability of ARL libraries to provide materials and services. Compared to 1977, 1978 materials expenditures in ARL academic libraries rose 10.7 percent, although volumes added increased by only .3 percent, and the number of current serials increased by only 3.5 percent. (3) While there was a 10.7 percent increase in expenditures for salaries between 1977 and 1978, the number of staff in ARL academic libraries increased by only 1.7 percent. Instructions for completion of the questionnaire that was used to collect the data and footnotes are included. (CWM)

Identifiers—*Advanced Text Management System, *Australian Information Network, Terminal Operation
This manual is designed to provide an introduction and basic guide to the use of IBM's Advanced Text Management System (ATMS), the text processing system to be used for the creation of Australian data bases within AUSINET. Instructions are provided for using the system to enter, store, retrieve, and modify data, which may then be displayed at the terminal, output for the creation of a data base for subsequent information retrieval using STAIRS, or to compile lengthy documents such as reports. The first part of the manual is concerned with terminal operation and procedures for preparing materials for inclusion in a data base; the second part describes additional features, format controls and special formatting techniques, text alterations, and printing procedures for the creation of printed documents. The manual should be supplemented by the "ATMS Terminal Operations Guide" produced by IBM. (JD)

Canadian Union Catalogue Task Group Final Report to the National Librarian of Canada.
National Library of Canada, Ottawa (Ontario).
Pub Date—76
Note—91p.
Available from—Minister of Supply and Services, Ottawa, Ontario, Canada (Cat No. SN3-59/1976)
Pub Type— Reports - Descriptive (141) — Opinion Papers (120)
EDRS Price - MF01/PC04 Plus Postage.
Descriptors—Bibliographies, Communications, Cost Effectiveness, *Data Bases, Federal Aid, Information Retrieval, Library Collections, Library Cooperation, *Library Networks, *National Programs, Tables (Data), Union Catalogs
Identifiers—*Canada
The Task Group advocates the development, with the guidance and support of the National Library of Canada, of a Canadian Library Network with the objectives of equalizing opportunity for access to information and making use of total Canadian library resources more cost-effective. This network would be composed of three interrelated components–a bibliographic network, a resource network, and a communications network. The bibliographic network would be based on a Canadian National Bibliographic Data Base compiled at the National Library of Canada. The resource network would be made up of the holdings of the National Library and other federal governmental libraries, designated resource libraries across the nation, and unique items held in other libraries. A communications network would consist of a delivery system for the actual transfer of items by such means as the postal service, interorganizational delivery, and information transmission systems. Costs of transmitting materials among libraries and of communications among libraries would be absorbed, alleviated, or, at the least, regionally equalized by the federal government. (Author/JD)

Highlights of the Council's activities during the year are briefly reviewed, and the current board of directors, committee members, officers, and staff members are listed. Areas covered include (1) the national and international scene, including the Council's work towards a national periodicals center, promotional efforts for national bibliographic control, involvement in two automated projects–CONSER and COMARC–that came to a close during the fiscal year, activities associated with the development of library networks and library standards, and cooperative international endeavors; (2) planning for institutional change, including programs/projects in library management, services, needs, and collections; (3) professional development, i.e., various intern and fellowship programs; and (4) a look at the year ahead, particularly in bibliographic control, collection building, library management, professional education, and analysis and planning. The report concludes with a list of publications that resulted from Council-supported programs and fellowships, financial statements for projects active in fiscal 1978 (unaudited), a schedule of appropriations for Council-administered projects, and other budgetary data. Criteria for Collection Analysis in the Academic Library.
Pub Date—78
Note—29p.; Not available in hard copy due to marginal legibility of the original
Pub Type— Reports - Evaluative (142)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors—*Academic Libraries, Bibliographies, *Evaluation Criteria, *Library Collections, Literature Reviews, *Research Criteria, Technological Advancement
An assessment of literature from journals, reports, and monographs on criteria for the analysis of academic library collections reveals that there are four primary methods which have been employed in the past and are still being utilized: (1) impressionistic, (2) bibliographic list comparison, (3) measuring unit costs, and (4) quantitative standards. Only recently have there appeared relatively innovative approaches, such as the application of new technology, bibliometrics, and more illustrative sampling techniques. In addition, there have been more frequent and varied discussions as to how the results of these analyses might be more fully utilized. A national effort toward developing readily-available profiles of published materials, to be used in conjunction with institutional profiles for analytical and evaluative purposes, would be a logical step in collection analysis considering the fact that computer technology awaits a practical application. (Author/JD)

Available from—National Library of Australia, Parkes Place, Canberra, Australian Capital Territory, Australia 2600 ($2.50)
Pub Type— Guides - Classroom - Learner (051)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Data Bases, *On Line Systems, *Search Strategies
Identifiers—*Australian Information Network, *Storage and Information Retrieval System, Terminal Operation
This manual for computer searchers describes the software package–IBM's STAIRS (Storage And Information Retrieval System)–used for searching databases in AUSINET (AUStralian Information NETwork). Whereas the first edition explained STAIRS in the context of the National Library's Online ERIC Project and the ERIC data base, this second edition discusses STAIRS as a tool for searching any data base, and includes explanations of sophisticated search techniques not included in the earlier version. A brief description of STAIRS and how it works is followed by instructions for terminal operation, conducting a search, and what to do after the search. Additional search techniques–ranking results, selecting items, sorting results–and a source for information on using STAIRS in the batch mode are included. Data bases available for searching through AUSINET are listed in Appendix 1. (JD)

Directory of United Nations Information Systems and Services.
Inter-Organization Board for Information Systems, Geneva (Switzerland).
Pub Date—78
Note—265p.
Pub Type— Reference Materials - Directories/-Catalogs (132)
EDRS Price - MF01/PC11 Plus Postage.
Descriptors—Agencies, *Information Dissemination, *Information Services, *Information Sources, *Information Systems, *International Organizations, Libraries
Identifiers—*United Nations
This directory brings together in summary form the functions of the various members of the United Nations Organization and the information systems and services they provide. It is intended to show the reader what exists and where to obtain further details. The contents are divided into four parts. The first part lists the organizations of the United Nations whose functions or programs involve the collection, dissemination, or analysis of information; organizations of an administrative nature are not included. The second part gives individual descriptions of the information systems belonging to the organizations listed in the preceding section. The third part presents addresses by country to facilitate contact between users and organizations, systems, and services. The last section is a subject index designed to assist users in identifying the systems and services which deal with information in a given field. (RAO)

This report describes the development and offering of a 4-day short course on the use of computer-based information resources in the college science classroom. The audience for the short course was university, junior college, and community college instructional personnel in the various science disciplines. Instructional units included a survey of important scientific bibliographic information files, experience with on-line retrieval systems, assessment of documented case histories where this concept had been applied in the college science classroom, and development of unique classroom applications of this concept by the course participants. The short course was presented at the four locations of the Central Circuit of the National Science Foundation/American Association for the Advancement of Science Chautaugua Short Course Programs to a total of 65 participants during the 1975-76 academic year. Included in the document are selected examples of interim follow-up and correspondence and three selected examples of short course participants' interim projects. (Author/JD)

tion (Information)
Identifiers—*Educational Information System for Ontario, *Ontario, Question Negotiation, User Characteristics
This report summarizes the findings of the EISO project, which was funded in 1975 to develop, evaluate, and analyze an information dissemination system based upon computerized retrieval of bibliographies. With much of the research component completed, the service component is operational, providing Ontario educators with online bibliographic references in education and the social sciences and with access to original documents. Findings of the report are reviewed in four areas: (1) It identifies EISO users over the past three years, presents their reasons for seeking information, provides analyses of how information they received impacted upon their local situations, and identifies factors that contributed to the use or non-use of information received. (2) It describes factors affecting interview effectiveness in online bibliographic retrieval, outlines a 5-stage pattern or structure in negotiation, discusses the use of open and closed questions and the part role and status play in interview relationships, and develops a preliminary model of the negotiation process. (3) It discusses a systems evaluation model of user satisfaction with EISO. (4) And it reviews the current status of EISO–the result of research, development, dissemination, and evaluation. (JD)

Descriptors—*Comparative Analysis, Glossaries, Information Seeking, *On Line Systems, Records (Forms)
Identifiers—*Educational Information System for Ontario, ERIC
This general user guide to the Educational Information System for Ontario (EISO) deals with the simple logistics of acquiring material from the system. Since EISO was developed as a way for Ontario citizens to use the Educational Resources Information Center (ERIC) data base in the United States, a preliminary description of ERIC is provided. Questions answered by the guide include who uses EISO, how to ask a computer question, who/what is a search analyst, how to make a search request, what kind of answer will be given, how long it takes, and how much it costs. A brief explanation of the way the computer links information using Boolean operators (AND, OR, NOT) is also provided, as well as a sample request form and computer printout, information for ordering microfiche, and a glossary of terms. Evaluation of CAMLS Experimental ILL System. A Report Prepared for the Library Council of Greater Cleveland by the ILL Evaluation Task Force.
Cleveland Area Metropolitan Library System, Ohio.
Pub Date—Sep 78
Note—17p.
Pub Type— Reports - Evaluative (142)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Evaluation, *Interlibrary Loans, *Library Networks, Questionnaires, Statistical Analysis, Tables (Data)
Identifiers—*Cleveland Area Metropolitan Library System
This report is an evaluation of an interlibrary loan system that was put into operation for a 6-month experimental period beginning January 1, 1978, by the Cleveland Area Metropolitan Library System (CAMLS), a regional cooperative network of 19 public, academic, and special libraries in northern Ohio. The objective of the system was to increase efficiency by means of three major components: (1) the use of OCLC as the principal locator source with telefacsimile machines to relay requests directly from borrowing to lending library; (2) the use of a central resource library (Cleveland Public) to screen all requests for which OCLC did not provide a potential lending library; and (3) the use of referral circuit utilizing telefacsimile to route the remaining unfilled requests among member libraries. A statistical analysis of the ILL requests during the period indicated that over one-half of all the requests were handled directly between the borrowing and lending libraries; of the remaining requests, one-third were filled by the resource library; and less than one-third of all requests were placed on the circuit. The evaluation concluded that the experimental system was successful and should be continued. Other recommendations and the questionnaire used in the evaluation are included in the report. (Author)

Identifiers—Library of Congress
Presented as a public service in anticipation of the October 1979 White House Conference on Library and Information Services, the eight papers in this booklet call attention to the key issues which the American Society for Information Science (ASIS) believes have developed from proliferating information and for technological advances. Each of the brief papers is intended to serve as a 'launching pad' for further discussion on specific topics: "Information as a National Resource," Joseph Becker; "'Information Literacy'–Awareness of and Access to Information Resources," Alan R. Benenfeld; "Costs and Funding of Libraries and Information Centers," Ralph E. O'Dette; "The Library of Congress and Its Nationwide Cataloging Support Services," Lenore S. Maruyama; "Proprietary Rights Versus the Public's Need for Information and Data Resources Stored in Various Media," Douglas E. Berninger; "The Role of the Private Sector in Serving National Information Needs," Paul Zurkowski; "Benefits of Information Science," Andrew A. Aines; and "Policies to Coordinate Information Resources," Vernon E. Palmour. An article by Esther E. Horne and Gerald J. Sophar provides a brief overview of the papers. (JD)

Descriptors—Depository Libraries, Federal Government, Financial Policy, *Government Publications, *Government Role, *Information Dissemination, *Library Role, Local Government, *National Programs, Policy Formation, State Government
Identifiers—*National Program Library Information Services
This paper briefly reviews the current status of government publications, including the local, state, and Federal levels, with particular attention to crucial problems of availability and accessibility to the public. It examines issues and proposed changes in government policy with respect to government documents, e.g., (1) Is there a need for a national center for government documents? (2) What should be the relationship of the Government Printing Office to the national program? (3) How should state and local documents be made available nationally? (4) What role should private enterprise play in publishing government information and in assuring its accessibility? (5) How can government publications make a full contribution to the mainstream of useful and used information? Implications for change are highlighted and a proposed alternative structure for the Federal Depository Library Program is appended. (Author)

This collection of delivered papers at the seminar on information needs and utilization in the 1980's comprises the keynote address, "Information in the 1980's" by Donald Fink, and presentations from three panels. The first panel, moderated by Joel J. Lloyd, includes the following: "Aspects and Characteristics of the Future Information Society" by Mary Jones, "Progress in a Developing Country" by Jose Perez Alvarez-Ossorio, and "The Determining Characteristics of the Time-Space Framework of Our Environment and the Special Nature of the Information That Will be Needed" by Dale Baker. The second panel addressed the new media, techniques, and mechanisms for the 1980's and was moderated by J.R. Smith. Papers included "The Information Industry, an Invisible Industry" by Isaac Auerbach, "Shall We Be Ready In the 1980's?" by Nathalie Dusoulier, and "Information Techniques and Mechanisms for the 1980's" by Derek Barlow. The third panel's papers included "Some Considerations on Information Transfer for Developing Countries" by Adam Wysocki, "Global Political Factors" by Lee Burchinal, and "Information Systems in the

Context of a New International Economic Order" by John Woolston. This last panel was moderated by A.K. Kent. Concluding remarks were by Jorge Sahade. (RAO)

Descriptors—Federal Aid, Government Role, Grants, Institutionalized Persons, *Institution Libraries, Librarians, Library Expenditures, Library Facilities, Library Materials, *Library Programs, *Library Services, *State Libraries
Identifiers—Federal Library Services and Construction Act, *New York

This paper examines state and local institutions in New York State and discusses library services, resources and programs available to the institutionalized, with recommendations for improvement. State and federal monies provide library services for seven departments in New York State government which operate 250 institutions. Emphasis on deinstitutionalization and the pursuit of more cost-conscious use of community-based facilities and supportive services places greater responsibility for library service on public library systems. The New York State Library serves as a backup resource for public library systems and institution libraries, including the provision of a variety of consultant and planning services and the administration of state and federal aid. Specific problems in institution library service include lack of materials and space, inadequate facilities, understaffing, lack of administrative understanding of library service potential, lack of sound statistics for planning and evaluation, and lack of agreement on a sound direction for development. Recommendations for improvement should be made based on this needs assessment. An excerpt from "Library Service Now" is appended, as well as lists of institution service programs carried out by public library systems and Federal Library Services and Construction Act grants for institution services. Descriptors—Abstracting, Bibliographies, Information Seeking, *Information Theory, Library Automation, Library Cooperation, *Library Research, *Library Role, Library Services, Search Strategies, Space Utilization, Staff Utilization, Student Attitudes, Use Studies, Vocabulary Development
Identifiers—Berzelius, Tell (Bjorn)

This compilation of essays and papers in French and English written in tribute to Bjorn Tell, covers various aspects of library and information services from an international perspective, including university libraries, librarianship, research, technology, reference, and organization of information. Articles focus on Berzelius, father of scientific abstract and reference literature in natural sciences, and such areas of research as information searching and library use in higher education, the effects of computer information services in a federal university, library staff and space utilization, student attitudes toward the library, the library role in higher education, and a comparison of user and documentalist reference work. Discussions of information theory include national cooperation of university libraries, bibliographic references in research communication, professional conduct in research, psychomethodological terms, the role of information professionals and librarians, technological change, and vocabulary structure. A brief review of Tell's career and a bibliography of his publications are included. (CWM)

Library Automation: A Measure of Attitude.
Pub Date—30 Jan 78
Note—43p.; Specialist in Librarianship, University of Wyoming
Pub Type— Dissertations/Thesis (040)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Attitude Tests, *Library Automation, *Library Schools, Questionnaires, Rating Scales, *Semantic Differential, Statistical Analysis, *Student Attitudes

Findings of the study described in this report indicate that the attitudes of library school students toward library automation were not changed significantly by a semester of relevant coursework. It has been hypothesized that these students would have a somewhat negative attitude toward automation, but that through relevant course instruction their attitude would become more positive. The control group–a class in children's literature–and the experimental group–a class in library automation–were given a pre-test at the beginning and a post-test at the end of the semester. It was expected that exposure to library automation in the experimental group would significantly alter post-test response. The Semantic Differential (SD) test of Ford and Young, with some modification, was used to assess attitude. Attitudes of the students as measured by the 15-concept, 20-item, bipolar scale semantic differential test were shown to be only slightly positive. No significant change, positive or negative, was shown by a re-test after the duration of a semester. Included are statistical data tables, t-test scores, a sample questionnaire, and mean scores by concept. (CWM)

Descriptors—Abstracts, *Gerontology, Indexes (Locaters), *Library Guides, *Library Materials, On Line Systems, Periodicals

Periodicals, indexes, and abstracts important to the interdisciplinary fields of gerontology and geriatrics which are currently available at the Wichita State University are discussed. The section on periodicals includes a discussion of why they are useful as an information source, along with a short description of the scope of 18 journals. The section on how to use indexes and abstracts includes discussion of coverage, focus, relevant subject index terms, arrangement, and short review exercises on 15 of these sources from the fields of anthropology, social work, medicine, psychology, education, and sociology. Four general indexes are also described, and brief notes are included on computerized data bank searches and interlibrary loan. (MBR)

Descriptors—Demography, *Information Needs, *Information Sources, Literature Reviews, Methods, *Public Libraries, Questionnaires, Tables (Data), *User Satisfaction (Information), *Use Studies
Identifiers—*Information and Referral

This study examining public library use focuses on users and non-users and their information needs and sources for everyday living. Responses to a questionnaire completed by 105 male and 106 female residents of Ringwood, a Melbourne suburb, indicate that membership of the community public library was well above the Australian and overseas average. Respondents with higher secondary or tertiary education, and those in professional and managerial positions, were more likely to be users. Reasons for library use reflected the traditional image of the library. Reasons for non-use related more to personal factors than to dissatisfaction with or hostility to the library. Education and library use appeared to have some relation to information subjects considered important, with the library not seen as an important source of information for most areas of everyday living. Popular information sources were media, the city council, government departments, and professionals. There was overwhelming support for the concept of one center to supply all kinds of information. Most people felt the library could better publicize its services. Implications for the library, shortcomings of the study, and suggestions for future research are also discussed. (Author/MBR)

Locally Generated Title Derivative Indexing in Academic and Public Libraries: A Survey of Current Practices.
Pub Date—Dec 77
Note—31p.
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—*Academic Libraries, *Automatic Indexing, Costs, Information Retrieval, Information Systems, Methods, *Public Libraries
Identifiers—Keyword Out of Context

A library survey to examine and analyze locally generated title derivative keyword indexing in academic and public libraries and its findings are presented. The project was organized in two phases. The first attempted to identify successful title derivative indexing programs through a literature review, correspondence with individuals known to be working with such systems, and through notices placed in professional library journals. Phase two involved study of 10 derivative indexing programs chosen to represent those institutions working with a variety of applications, those using the technique for a unique application, and those with unique computer programs. Findings indicate that title derivative indexing was prompted by failure of the local institution to provide adequate bibliographic control of the collection in question because of high acquisition rates, and long length of processing time between receipt of materials and availability to patrons. The keyword-out-of-context as opposed to keyword-in-context technique was most utilized. Problems with KWOC Title derivative indexing include inadequacy of some titles, and use of a variety of terms to describe common subjects. Non-word lists–e.g., articles, prepositions–were also employed to exclude non-descriptive terms. Index structure and format are described, along with discussions of costs, computer programs, user acceptance, and advantages and disadvantages. Appendices include a list of institutions utilizing title derivative indexing. (Author/MBR)

Identifiers—*Kentucky

This description of a three year project of services to educators by the Kentucky Department of Education Materials Center includes the current collections, future collections, and the anticipated procedures necessary to provide optimum service and best utilize those materials. The plan involves better coordination between the three major components of the Kentucky system–the curriculum laboratory, materials center, and retrieval services–by conversion of subject headings from Sears to ERIC as a major change strategy. A flow chart of the information retrieval process is included. Appendices display the comparative cost of ERIC searches using DIALOG and WISE, circulation records

for the materials center in 1977, a general request form, a facsimile printout of a materials center request, an ERIC search printout including RIE and CIJE, a categorical breakdown classification system, and sample computer printout of ERIC searches. (Author/JEG)

Descriptors—Cataloging, Geographic Location, *Information Networks, *Library Networks, On Line Systems, *Program Development, Program Planning, Tables (Data)

Identifiers—*National Library and Information Service Network, Register of Additional Locations

This working paper provides an initial discussion point for the construction of a national location service as a component of a national library and information service network. The study described had a dual purpose: (1) expansion of the Register of Additional Locations (RAL) data base by cooperative means, which involved identifying machine-readable data bases from which location reports could be obtained; and (2) a survey of users of the microform edition of the RAL to determine their requirements for location information and what improvements could be made. The survey was expanded to include all subscribers to the National Union Catalog (NUC) who receive the RAL as part of their annual subscriptions. A summary of responses, and detailed descriptions of the conclusions and recommendations are included. Distribution of the RAL in machine-readable form is recommended, allowing local or national entities the option of developing such online access as they find desirable. (Author/MBR)

Descriptors—Cataloging, Definitions, *Information Networks, *Library Networks, On Line Systems, *Vocabulary, Vocabulary Development

Identifiers—*National Library and Information Service Network

This glossary was developed to fill the need for a commonality of vocabulary for the persons from diverse fields–computer experts, librarians, telecommunications engineers–who are working together in the relatively new field of library networking. The criteria for the inclusion of a term require that it be in current use relative to library networking, that it be a term unfamiliar to the library community but basic to its comprehension of library networking, or that the term's standard meaning be narrowed or modified by its use in a library networking context. The definitions are functional rather than formal. (Author/MBR)

Identifiers—*Authority File, *National Library Information Service Network

This network planning paper discusses creation and maintenance of authority files as one of the essential components of bibliographic control, which is a prerequisite to the access of information. Authority files impose consistency on the organization of information and thereby greatly facilitate information retrieval. In the creation of a union list of materials, these authority files become the normalizers of entries, making it possible for users to obtain maximum holdings information. This paper includes 19 task considerations for the creation of authority and bibliographic files in relation to background data, network configuration, and authority system design. Topics discussed include the library catalog, its functions, basic problems, and cataloging in a network context; the authority file; the national library network resources and participants; a MARC format for the authority file; and guidelines for cataloging and design considerations for the file. Descriptors—*Delivery Systems, *Design, Diagrams, *Information Networks, *Library Networks, Methods, On Line Systems, Program Planning

Identifiers—*National Library and Information Service Network

The Message Delivery System described, a facility that will link automatic bibliographic services and permit the transmission of messages among the various services, is one of the basic requirements for the development of a comprehensive computerized bibliographic system of nationwide scope. The system will enable users of one system to have access to information and services on other systems that are part of the National Library and Information Service Network. This document lists the general technical requirements for the Message Delivery System and discusses the anticipated evolution of the network. It defines the scope of technical network activities, the system development methodology, and the technical work that must be undertaken to realize an operational network. (Author/MBR)

Identifiers—*Oklahoma

This report assesses the library and information needs of Oklahoma residents and proposes goals and objectives, plans of action, allocation of funds, program formulation, and priorities and evaluation procedures for dealing with these designated areas over a five year period. Based on data from a needs assessment study and library evaluations, areas of need are indicated for: (1) unserved and inadequately served populations; (2) public library staff; (3) availability of materials; (4) disadvantaged, limited English speaking, younger and older populations; (5) handicapped persons; (6) institutionalized persons; and (7) interlibrary cooperation. A plan of action is formulated for each area of need, including standards, goals and objectives, Oklahoma Department of Libraries services, legislation and funding, personnel and resources, and interlibrary cooperation and networking. These plans of action support a number of objectives within the long-range plan and are designed to achieve goals as outlined. Various agencies will be responsible for formulating criteria, priorities, and procedures for administering the programs, along certain guidelines, under the Library Services and Construction Act (LSCA). Methods of program evaluation will include public attitude, statistics, program evaluation, and Oklahoma Department of Libraries' evaluation. Library and population statistical data, LSCA information, and Governor's Conference Resolutions are appended. (CWM)

Pub Date—78

Note—101p.; Small type marginally legible

Pub Type— Books (010) — Guides - Non-Classroom (055)

EDRS Price - MF01/PC05 Plus Postage.

Descriptors—*Children, Creative Activities, Library Instruction, *Library Programs, Production Techniques, Public Libraries, *Puppetry, Resource Guides, Story Telling

Written to inspire and encourage librarians to try new ideas with puppets, this generously illustrated book covers financing; some actual uses, e.g., library mascot, a get-acquainted friend, an informal puppet corner; library instruction through puppet use; puppets as part of media-loan kits; and puppets as storytelling aids. Ideas on play production include discussions of the script, action, voice, and rehearsals, as well as sound effects, special effects, and props. Professional puppeteers are also discussed as being an integral part of any library puppet program. Techniques and patterns for making puppets are included, along with several articles describing library programs, and a listing of resources which includes organizations, suppliers, publishers, and additional publications. Descriptors—Cooperative Planning, Energy, *Information Dissemination, *Information Networks, *Library Planning, Public Libraries, *Solar Radiation, Special Libraries, *Statewide Planning, Technology
Identifiers—*Information Transfer, *Mississippi
This summary of the decisions and recommendations of the Planning Conference for Solar Technology Information Transfer includes a brief discussion of the outline of a functioning solar energy technology network in the State of Mississippi. During the conference, participants recognized current energy information needs and recommended ways to meet those needs: (1) effective dissemination of energy information and updating of same, (2) training in the subject for library personnel, (3) avoidance of duplication, (4) a union catalog of Mississippi library holdings, (5) centralized capability for rapid transfer and location of a heavy volume of sophisticated requests, (6) education of target groups, (7) adequate staff and funding for individual agencies, (8) a comprehensive technological collection within the state, and (9) related problems. Recommendations focus on the promotion of better communication and cooperation between agencies, libraries, institutions and professional organizations in fashions supportive of the economical and effective delivery of solar energy information to the public. A list of participants, the conference agenda, and a list of solar energy library materials are appended. (Author/CWM)

Descriptors—College Libraries, Cooperative Planning, Energy, *Information Dissemination, *Information Networks, *Library Planning, Public Libraries, *Solar Radiation, Special Libraries, *Statewide Planning, Technology
Identifiers—*Information Transfer, *Kentucky
This summary of the deliberations of the Planning Conference for Solar Technology Information Transfer includes an outline of a functioning solar energy technology network for the State of Kentucky and a set of recommendations for future action. Four main types of information agents were identified: (1) the State Library System; (2) the State Department of Energy; (3) the State Department of Education; and (4) various departments of the University of Kentucky–all as they relate to solar technology information transfer. Recommendations were made for each of these areas. Appendices include a proposal for an information system, the conference agenda and participant list, a proposal for the continuation of Phase II Operations of the Solar Technology Transfer Program, Kentucky Department of Energy organizational charts and energy conservation plan, a list of regional libraries, and a map of development districts in Kentucky. A Researchers Guide to the Freedom of Information Act.
Pub Date—77
Note—38p.; Appendix 1 may not reproduce clearly due to small print size
Pub Type— Guides - Non-Classroom (055) — Legal/Legislative/Regulatory Materials (090)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Confidentiality, *Confidential Records, Court Litigation, *Disclosure, Federal Government, *Federal Legislation, *Information Retrieval, Information Seeking, Researchers
Identifiers—*Freedom of Information Act
The Freedom of Information Act (FOIA) eliminated the "need to know" requirement for access to information, requiring agencies to give notice of file contents and make records available to all persons. Agencies are required to make available final opinions, statements of policy and interpretations, and staff manuals that affect a member of the public, as well as other records. To enable researchers to locate information, FOIA contains provisions which require agencies to publish organizational descriptions and directions for gaining access to information. Agencies are also required to compile indexes of materials which establish policies or precedents affecting the public. Formal requests for material and appeals should be made by letter to the agency. If the agency denies an appeal, the requestor has the right of judicial review. Exemptions from FOIA include (1) classified national defense and foreign policy documents; (2) internal personnel rules and practices; (3) information exempt under other laws; (4) confidential business information; (5) internal communications; (6) personnel and medical files; (7) investigatory files; (8) financial institutions information; and (9) geological information concerning wells. The text of FOIA and a bibliography are appended. (CWM)

Identifiers—*Site Appraisal for Area Resources Inventory
This document examines the importance and difficulties in resource sharing and acquisition by libraries and introduces the procedures of the Site Appraisal for Area Resources Inventory (SAFARI) system as a method of comparative evaluation of subject collections among a group of libraries. Resource, or collection, sharing offers specific advantages, including costs, fast delivery, ease of direct user referral, and opportunities for regular conferences. The SAFARI method, which was designed to evaluate collections among a variety of types of area libraries for resource sharing, identifies topics to be studied, assembles statistical information, checks holdings, and sends a team of experts (faculty and librarians) into the member libraries to make a site appraisal and identify subject strengths. A detailed subject index and library profiles are published for member libraries. This procedures manual provides information on selecting a SAFARI topic, team selection, identification of libraries, procedures planning, information collection, and report preparation and distribution. Appended are sample forms and reports, and the Higher Education Act, Title II-B grant abstract and proposal. (CWM)

Self-Study of the Ezra Lehman Memorial Library.
Shippensburg State Coll., Pa.
Pub Date—78
Note—86p.
Pub Type— Reports - Evaluative (142) — Reports - Research (143)
EDRS Price - MF01/PC04 Plus Postage.
Descriptors—Case Studies, *College Libraries, *Library Administration, Library Circulation, Library Collections, Library Expenditures, Library Facilities, Library Planning, *Library Research, Library Services, Library Surveys, *Objectives, Organizational Communication, Questionnaires, User Satisfaction (Information)
This self-study of the Ezra Lehman Library at Shippensburg State College presents the analyses and recommendations of two library task forces–one on organization, communication, goals and objectives, and one on user relations. The responsibility of the first group was to develop implementable recommendations for necessary or desirable changes in the library's organizational structure and communication processes, and to design an on-going process for the formulation of goals and objectives. The internal library structure was examined using a systems approach and a questionnaire was designed to measure staff attitudes concerning critical organizational issues. Seventeen preliminary recommendations were proposed. The second task force utilized data gathered in the library user survey to analyze and comment on the library's public service functions, the collections, and the physical facilities. The survey, administered to classroom and administrative faculty as well as a student sample, received a response rate of 47.5 percent and 58 percent, respectively. This task force proposed 24 preliminary recommendations. Staffing and organizational charts, organizational profile display, circulation and holdings data, the user survey questionnaire, and a memo outlining library support of the MBA program are appended. (CWM)

Descriptors—*Junior College Libraries, Literature Reviews, Methods, *Needs Assessment, *Professional Continuing Education, *Professional Personnel, *Program Development, Questionnaires, Tables (Data)

Identifiers—*Illinois

The survey of the professional continuing education needs and interests of Illinois public and private community college library/learning resource center personnel which is summarized was conducted by the Illinois Library Association in conjunction with the development of better continuing education programs for its membership. Major findings indicate interest in continuing education is fostered by operational changes in libraries, a need for improved communication for input on library planning, development of activities for adult learners, and development of technical skills relating to use of new equipment and techniques. Data collected, which should assist in program development of continuing education activities, include extent of previous continuing education involvement, educational formats most effective for professional development, types of programs preferred, incentives for participation, and obstacles to participation. This summary report also includes a review of the literature on continuing professional education, study methodology and a sample questionnaire, data analysis procedures, a presentation of specific findings, and analyses of responses by personnel type and age group. Appendices include lists of participating community colleges and administrative and technical tasks of personnel. A bibliography is included. (Author/MBR)

Identifiers—*Illinois

The process involved in planning, developing, and building a resources file is described in the context of a state education agency. The key decision points which confront the dissemination director are described, i.e., determining the client, the client's resource needs, and the availability of already existing resources. The steps involved in file building once a decision is made are outlined, including selection of a filing system, collection of resources, staff development, and quality control of resources. The discussion covers the key decision points and steps involved for both manual and automated resources files. (Author/CWM)

Identifiers—*Telebook

This is the Final report of a 3-year, 3-phase experiment on the Telebook service, which is a system for delivering the recorded voice of Talking Books directly and electronically to the homes of blind and handicapped persons upon their request at any time of the day or night. The purpose of the third phase was to determine the long-term feasibility of Telebook service, with special emphasis on the question of long-term costs, user and institutional acceptability, and technical performance. The service was offered to all qualified readers in Columbus (Franklin County), Ohio, over a period of nine months, from October 1977 to June 1978. A series of technical measurements was performed to determine comparative, quantitative parameters of audio quality for the semi-automatic and automatic Telebook systems used by readers. A list of 24 recommendations from this study are presented for those who might be involved in planning future replications of Telebook. Appendices include (1) descriptions of both automatic and semi-automatic Telebook systems with operating and maintenance instructions; (2) Telebook staff job descriptions; (3) reader's introduction to Telebook operation; (4) reader recruitment letter; (5) Library of Congress reader survey questionnaire; (6) press conference material; (7) Federal Communications Commission order regarding frequency constraints for cable television systems (excerpt); and (8) agreement in principle between Columbus cable corporations and The MITRE Corporation. The Development of National and International Information Systems and Networks Involving Combinations of Print and Non-Print Media.

Pub Date—Aug 78

Note—37p.; Paper presented at the NATO Advanced Study Institute on Information Science (Crete, Greece, August 1978)

Pub Type— Reports - Descriptive (141) — Speeches/Meeting Papers (150)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—*Audiovisual Aids, *Information Networks, *Information Processing, *Information Systems, International Programs, Library Networks, National Programs, *On Line Systems

This discussion of the design, development, and operation of information systems functioning at the national or international level focuses on some of the current interests and concerns of those networks designed to facilitate the sharing or exchange of particular types of nonprint media (NPM) materials. Three categories of NPM materials/resources of "documents" include those which contain information about informative/informational resources/-materials which are themselves in NPM formats, those which themselves comprise informative NPM materials, and those which encompass both types. Two basic assumptions are made: the first is that electronic nonprint material information systems will be increasingly necessary for the fast, accurate, and efficient control of the complicated and interdependent processes of our high technology civilization, and the second is that national and international networks will henceforth continuously have a considerable influence on regional, state, and local information systems, as well as on the whole realm of information science. Distance Learning in Music Through the Teleconferencing Principle: A Six-Year Experience in Wisconsin on a State-Wide Basis.

Pub Date—78

Note—15p.; Appendices not included because of illegibility

Pub Type— Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Instructional Media, *Music Education, Music Techniques, *Telephone Communication Systems, *Telephone Instruction

Identifiers—*Distance Learning, Teleconferencing

A unique two-way, interactive aural communications system operated by the University of Wisconsin-Extension and serving over 100 locations throughout the state is described and its application to distance music education is explained. A brief survey of telephone use in education is presented, as well as studies relating the effectiveness of distance learning. The concept of teleconferencing in bringing music instruction to a widely dispersed audience, allowing for the simultaneous distribution of music programs, is deemed one of the strong points of the Wisconsin system. Correspondence Education Combined with Systematic Telephone Tutoring.

Lund Univ. (Sweden). Dept. of Education.

Spons Agency—Tri-Centennial Fund, Stockholm (Sweden).

Pub Date—78

Note—139p.

Pub Type— Reports - Research (143) — Dissertations/Thesis (040)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Achievement, Adult Education Programs, Attitudes, *Correspondence Study, Economic Education, *Home Instruction, Home Study, Second Language Learning, *Telephone Instruction, Time Factors (Learning), *Tutoring

Identifiers—*Distance Education

This study focused on the improvement of traditional two-way communication processes in correspondence education through variations on the uses of postal communications, reinforcing the feedback sent by mail with systematic telephone calls, and combinations of mail and face-to-face contacts; the primary focus was correspondence education combined with telephone tutoring. A literature review covers correspondence education, two-way communication, and the telephone as an instructional aid. The experimental design of the study involved two groups of randomly distributed correspondence students. The experimental group received telephone tutoring in addition to the conventional feedback, while the other received only written feedback by mail. Courses included were introductory French and basic economics, both intended for adult learners. Results indicated that students who received telephone tutoring reacted to it favorably; however, no difference was found between the two groups in achievement, amount of study time, or feelings of

isolation. Telephone tutoring proved to be of a greater advantage to those students studying a foreign language than to students studying one of the social sciences. (RAO)

Descriptors—*Broadcast Television, *Children, Commercial Television, Educational Quality, Futures (of Society), *Instructional Media, Life Style, Mass Media, Personality, *Role Models, School Responsibility, Self Concept, *Teacher Responsibility

Electronic media, particularly television, influence children to develop composite, plastic personalities striving after unreal goals, but the teacher can help children identify and develop rational goals and role models without completely abandoning media. Television has influenced children, and many adults, to create personalities assembled from various media images and to believe that the world portrayed by media is real. Everyone is led to believe that they are equal to everyone else. This advanced state of democratization brought about by the pervasiveness of the electronic media has resulted in the virtual vanishing of the hero-model from our culture. Teachers and schools can begin to help children develop rational goals and role models by abandoning their exclusive monopoly on education, dissolving the artificial barrier between classroom and community, and ceasing to pretend that equality of opportunity can be linked directly to equality of achievement. Rather than purchasing equipment designed to present, record or test the kind of factual data normally associated with the sequential and linear approach to learning, schools should equip children with essential survival skills of reading and writing. The unique language of communication in film should be used for the potential good of students rather than the system e.g., to enable them to explore some of the seminal experiences of their lives and thereby become enriched. (CWM)

Guidelines to Update Images of Women in Television.
California State Commission on the Status of Women, Sacramento.
Pub Date—25 Jul 77
Note—62p.
Pub Type— Collected Works - General (020) — Opinion Papers (120)
EDRS Price - MF01/PC03 Plus Postage.
Descriptors—*Broadcast Television, Community Attitudes, *Females, Guidelines, *Mass Media, Programing (Broadcast), Public Opinion, *Radio, Sex Discrimination, *Sex Stereotypes, Television Research

Input from 25 media groups, including the Screen Actors Guild and American Federation of Television and Radio Artists (AFTRA), considered the image of women on television and radio as part of public hearings held by the California Commission on the Status of Women. Presentations included here touch on the citizen's role in assuring fair treatment in the news, programming, ascertainment of community needs, lack of women in the industry, and children's programming, and provide statistical data on these issues. It is argued that the misrepresentation of women in the mass media labor force affects the continuing misrepresentation of women on television and radio programs and in the written media. Research results and statistical data are provided in seven areas: (1) analysis of new three-network prime-time programming; (2) use of women and minorities in prime-time television shows; (3) sex roles in television commercials; (4) public attitudes and preferences in television; (5) statistics for women in news and announcing for Los Angeles, San Diego, and San Francisco; (6) membership breakdown and male-female representation for AFTRA; and (7) number of men and women in specific television programs. Guidelines suggested by the Commission to assist the media in achieving more realistic portrayals of women are based on testimony and data from the hearings. (CWM)

Individualized Instruction, What the Research Tells Us.
Pub Date—19 Apr 78
Note—15p.; Paper presented at the Annual Meeting of the Association for Educational Communications and Technology (Kansas City, Missouri, April 19, 1978)
Pub Type— Information Analysis (070) () — Speeches/Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Behavioral Objectives, Cost Effectiveness, *Educational Research, *Individualized Instruction, Learning Modules, Mastery Learning, Performance Based Education, Proctoring, Retention, Student Teacher Relationship, Study Guides, *Teaching Methods

Literature on individualized learning appearing in the past three years includes many reports which are rewritings from the same data; however, generalizable results do exist for the practitioner. Individualized instruction systems work as well or better than traditional, conventional instruction. Students learn more, make higher grades, save time, perform better on examinations, and feel improvement in self-concept and self-confidence. Withdrawals appear to be about the same as in traditional courses, but great variability is suggested. Student attitudes are favorable; they like self-pacing, although lack of discipline and motivation cause difficulties. Learning modules and study guides are helpful and well liked; the value of lectures is uncertain. Learning objectives produce significant increases in learning, while proctors can improve the rate of student progress. Retention of learning is improved by individualized instruction and mastery learning reduces forgetting. Students like self-grading but feel more is learned with proctor-grading. Test anxiety and grade pressure are reduced with individualized learning, and increased student-staff interaction results in higher student appraisals of staff. Cost benefit studies are infrequent and assessments are imprecise. As materials used in individualized instruction increase in number, researchers continue to investigate their effectiveness and benefits. (CWM)

Identifiers—Information Analysis Product

By definition, the fields of instructional technology and media are committed to an evaluation, generation, and application of research involving the act of teaching and the phenomena of learning, with differences in systems determined by the purpose for which instructional technology and media are applied. However success or failure of any teacher throughout history is related to the type of technology employed and the impact of external technology on the learning process. World War II is generally recognized as the beginning of the fields of instructional technology and media as they are currently conceived. Since then, numerous individuals and organizations, including the military, industry, schools, colleges and professional organizations, have developed, applied, and evaluated the ideas instructional technology and media with varying results. Since these fields are interdisciplinary and are partially a result of a shift away from separate educational movements toward a systems approach, various attempts have been made to distinguish professional functions. Although past research has focused on film, radio, television, instructional technology, systems, and programmed instruction, the greatest immediate need is assessing the informational needs of various publics concerned with education. Interior Communications Supervised Alarm and Warning Systems: Validation of Instructional Materials. Fiscal Year 1977, Final Report.
Navy Personnel Research and Development Center, San Diego, Calif.
Report No.—NPRDC-TR-79-6
Pub Date—Dec 78
Note—22p.
Pub Type— Reports - Evaluative (142)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Educational Programs, *Educational Research, *Equipment Maintenance, *Individualized Instruction, Instructional Materials, Instructional Systems, *Learning Modules, Military Training, *Program Validation, Study Guides, *Training Techniques

An empirical study was conducted using Navy trainees to evaluate the effectiveness of instructional modules designed to train Interior Communications electricians in the maintenance and repair of alarm and warning systems installed in ships to signal unsafe conditions. These modules, each containing six lessons, were developed to augment or replace current instruction on such systems. Six classes of Interior Communications "A" School trainees were trained in supervised alarm and warning systems using the individualized instruction materials. These students and a comparison group of "C" School students were pretested and posttested using comprehensive tests, the difference in scores being the primary measure for evaluation. Results indicate that the instructional materials perform adequately in the training environment, leading "A" School students to perform as well on the posttest as the more experienced "C" School students. A student attitude survey revealed overall neutrality toward the materials. Based on these results, it is recommended that the validated supervised alarm systems materials be considered for inclusion in the individualized Interior Communications curriculum. (CWM)

Identifiers—*Kansas

The plans of the Kansas Public Television Board (KPTB) for development of the Kansas Television Network are detailed for the period extending from FY 1979 to FY 1983; the proposed system is designed to serve the needs of the communities by extending existing capabilities and resources, sharing common resources, and enriching the total system. Surveys have identified unserved areas and citizens' needs and concerns about public television, and a series of concepts for use in network development has been developed through KPTB's review of planning and engineering documents. The five-year plan for development calls for funds to upgrade and support existing stations to serve their audiences and the network, as well as the development of three new public television stations to serve the communities of Hays, Garden City, and Chanute. Stations will be tied together by ground based common carrier microwave and the system will be operated by stations through a committee structure. Interconnection will provide capability for program sharing, live feeds, production inserting, audiovisual feeding and dubbing, central resource sharing, and extension/expansion of services. Funding and broadcast hours data, timetables, and broadcast network maps are included. (CWM)

The rapid growth of the need for technical translations in recent years has led specialists to utilize computer technology to improve the efficiency and quality of translation. The two approaches considered were automatic translation and terminology banks. Since the results of fully automatic translation were considered unsatisfactory by various reports, significant efforts were made to construct automatized terminology banks. A critical comparison of the main existing banks suggests that these banks are the first step toward interactive translation systems. Exchange problems in networks of banks and terminological cooperation between international organizations will necessitate standardization of terms, symbols, and definitions. It is proposed that automatized terminology banks be designed from a different viewpoint by making greater use of well known techniques in computer systems and artificial intelligence, based on evaluation of present and future developmental issues in data base organization, translation research, interactive translation systems, and man-computer communication. Mathematical and Statistical Software Index. Final Report.
Air Force Human Resources Lab., Brooks AFB, Texas.
Report No.—AFHRL-TR-78-66
Pub Date—Nov 78
Note—95p.
Available from—Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20204 (671-056/89)
Pub Type— Reference Materials - Bibliographies (131) 0
EDRS Price - MF01/PC04 Plus Postage.
Descriptors—Analysis of Variance, *Computer Programs, Correlation, Factor Analysis, Item Analysis, *Library Collections, Linear Programing, Multiple Regression Analysis, Statistical Analysis
Identifiers—*Computer Software, *Scientific and Technical Information

Brief descriptions are provided of general-purpose mathematical and statistical software, including 27 "stand-alone" programs, three subroutine systems, and two nationally recognized statistical packages, which are available in the Air Force Human Resources Laboratory (AFHRL) software library. This index was created to enable researchers to identify mathematical or statistical software currently operational on the AFHRL computer system. Information on 27 "stand-alone" programs is presented in the form of an abstract for each item and a list of program documentation references for the reader who wishes to obtain formal program documentation. Each abstract includes general program description, program origin, important program restrictions, and warning about excessive computer execution time incurred in certain circumstances, followed by the symbol of the branch of AFHRL responsible for program development and documentation references. The general descriptions of the software library's three mathematical and/or statistical subroutine systems include a list of the subroutines contained in each system and documentation references. Information provided on two nationally recognized statistical packages, Biomedical Computer Programs and STATJOB, both available in the software library, includes general descriptions, a list and brief descriptions of programs in each package, and package documentation references. Descriptors—Budgeting, *Communication Satellites, Consortia, Cost Effectiveness, Educational Alternatives, Educational Needs, Educational Objectives, *Educational Strategies, *Engineering Education, *Instructional Media, Personnel Data, *Professional Continuing Education

This document proposes, and indicates initial reaction to, a multi-point satellite-based delivery system which will permit expansion of current programs and services of the Association for Media-based Continuing Education for Engineers, Inc. (AMCEE) consortium to a much larger aggregated audience of practicing engineers throughout the country. It will also permit interaction among universities in state-of-the-art seminars, research reporting, course sharing, and broad distribution of special engineering-related events. The use of a communications satellite is proposed to increase continuing education services to engineering professionals, and to provide a service which is effectively responsive to the technical, logistical, and financial constraints of traditional and other forms of educational instruction. Description of the operational plan includes types of services, delivery, media-based programs, course materials and programs, special needs, operating modes, marketing AMCEE services, satellite considerations, operational programs, and first- and subsequent years considerations. The management plan designates objectives and organization, as well as project control and evaluation, while a complete budget evaluation breaks down contract pricing proposals and other operating costs. Resumes of key individuals and brief summaries for Steering Committee members are included, along with a list of papers, reports, and conference proceedings by AMCEE members. (CWM)

Descriptors—Adult Education, American Indians, Budgets, *Communication Satellites, Community Colleges, *Delivery Systems, *Inservice Education, Libraries, Older Adults, Planning, *Professional Continuing Education, *Telecommunication, *Training, Vocational Rehabilitation

The strategies and resources necessary to achieve operational, self-supporting status in the use of satellite-based delivery systems for continuing education and training are described in the context of a four year plan. User populations include vocational rehabilitation, aging, Indian-controlled community colleges, other community colleges, and libraries. A detailed needs analysis for each of the user groups is presented, followed by descriptions of the training needs for these groups, their financial base, and the capabilities of the group sponsoring institutions. Various delivery systems applicable to educational programming are also discussed, including microwave transmission, satellites, telephone, cable television, and combinations of these. The Denver Research Institute's plan to use experimental satellites during the first year of the project and commercial systems thereafter is documented and the technological considerations are discussed. An overall organizational and management plan for the project is provided, including schedules and activities. A profile of each of the five year groups and letters of commitment are appended. The final part contains the four year budget. (RAO)

Identifiers—*Alaska

This report describes the status of this pilot satellite television project for the state of Alaska which provides for the distribution of television programming to the RCA Toll Centers in Anchorage, Fairbanks, Juneau, Sitka, and Bethel, as well as to 23 selected rural sites. The historical background is discussed, as well as the process involved in the project's development, the system as it now exists, and its utilization. Economic factors are described, and alternative means for programming distribution and financing are considered. Conclusions and recommendations for the remainder of the project close the report. Appendices include the contract for services between Alaska and RCA Alaska Communications, Inc. (RCA Alascom) and a detailed description of services provided for both interstate and intra-state satellite television networking. (Author/RAO)

Sex Stereotyping in Instructional Materials and Television: Awareness Kit.
Women's Educational Equity Communications Network, San Francisco, Calif.
Spons Agency—Office of Education (DHEW), Washington, D.C. Women's Program Staff.
Pub Date—78
Contract—300-77-0535
Note—51p.; Best copy available
Pub Type— Guides - Non-Classroom (055)
EDRS Price - MF01/PC03 Plus Postage.
Descriptors—Bibliographies, *Broadcast Television, Check Lists, Childrens Television, Elementary Secondary Education, Information Dissemination, *Instructional Materials, Perception, Sex Discrimination, Sex Role, *Sex Stereotypes, Worksheets

This awareness kit provides information on the portrayals of women and men in two media-instructional materials and television; discusses how to

evaluate and choose the best media materials from those that exist; recommends actions that will help to eliminate sex stereotyping in instructional materials and television; and suggests an approach to teaching children how to be aware of sex stereotyping in the media so they can better counter it themselves. Recognizing that sex is only one basis for stereotyping, ways of developing an awareness of other stereotypes in media messages are suggested whenever possible. References and a selected bibliography are included, as well as sample checklists and examples of guidelines. (Author/CMV)

Descriptors—*Childrens Television, *Cultural Isolation, Elementary Secondary Education, Federal Legislation, Federal Programs, *Minority Group Children, Parents, Preschool Children, Principals, Program Evaluation, *Television Surveys, *Television Viewing

Identifiers—*Emergency School Aid Act

Results are presented of a national survey of in-school students, teachers, and principals to determine the viewership and availability of 11 television series which have been produced and distributed through funding provided by the Emergency School Aid Act (ESAA) to reduce cultural isolation among minority group members. In-home surveys were also conducted with many of the same students, their parents, and preschool siblings. Findings suggest that only a small number of children are aware of the ESAA-TV series. Although viewership is one measure of the success of the programs, comparisons across series must be interpreted cautiously because of the differences among the ESAA-TV series. Similarly, viewership should be seen as one aspect of the funding-production-distribution system and not as the sole measure of the worth of any individual series or the entire set of ESAA-TV projects. Appendices include technical methodology, survey instruments, construction of site-specific questionnaires, television program classification listing, cable coverage, ESAA-TV carriage information, and additional tables of survey data. TV series included in the survey were La Bonne Aventure, Que Pasa, USA? La Esquina, Mundo Real, Gettin' Over, South by Northwest, Vegetable Soup, Carrascolendas, Villa Alegre, Infinity Factory, and Rebop. (CMV)

Identifiers—*Emergency School Aid Act

The U.S. Office of Education, under the legislative authority of the Emergency School Aid Act (ESAA), commissioned a survey of the viewership of 11 ESAA-funded TV series designed to reduce cultural isolation in minority children. Objectives of the survey were to determine the availability of the ESAA-TV series to their target audiences, as well as to determine the viewership of the series by their target audiences. National in-school surveys of viewership were conducted with students from grades 1, 4, 7, and 10 and their respective teachers and principals, with in-home surveys conducted as a validation measure with many of the same students, their parents, and preschool siblings. Despite high availability, a relatively small proportion of the children were aware of the ESAA-TV series. However, children in both the target age and target ethnic groups viewed TV more than other children. Findings of teacher and principal surveys indicated that knowledge of ESAA-TV was minimal. Considerations for future study in increasing viewership include audience awareness, appeal, additional viewership surveys, family viewership, time of broadcast, impact, and in-school viewership. The primary goal of the Texas Telecommunication Satellite Demonstration consortium is to install, operate, and evaluate a comprehensive communication service delivery system which would provide the citizens of Texas with greater opportunity for equal access to education and information. The four major objectives of the demonstration are (1) to install and operate a satellite-based communications system providing a technical capability to meet educational and information needs; (2) to involve service providers and clients in the development, operation, and evaluation of educational services; (3) to provide agencies in the state with experience in the development of program materials and services designed to meet the needs of those areas not now served by adequate telecommunication service; and (4) to extend and coordinate educational inservice and administrative services offered by state agencies. This report includes information on user needs, alternative approaches, operational plan, management plan, and budget. Appendices are included. (Author/JEG)

Descriptors—*Diffusion, *Educational Television, *Elementary Education, Equipment Maintenance, Program Evaluation, Public Schools, *Public School Teachers, *Use Studies

A survey of teachers in West Virginia county school systems which cooperate with a public television station in the scheduling and broadcasting of instructional television (ITV) addressed three questions: (1) What is the magnitude of ITV implementation and utilization? (2) How is ITV used by elementary teachers? (3) What problems are there in using ITV in elementary schools? Description and discussion of the population surveyed and the questionnaire used are followed by a report on the survey findings, including implementation and hardware issues; utilization levels in grades and classroom settings, classtime used for ITV, and programs watched; teachers' reasons for not using ITV and their suggestions for improving ITV use; and conclusions and implications of the findings for extending ITV use in West Virginia. Descriptors—Educational Development, *Facility Utilization Research, Information Utilization, *Instructional Materials Centers, Media Specialists, *Needs Assessment, Planning, *Public School Teachers, Questionnaires, Resource Centers, Teaching Skills, Use Studies

Identifiers—*Instructional Development

This study was designed to arrive at a possible consensus of expert opinions as related to teacher use of library media centers in American public education, and to analyze the essential teacher skills and knowledge suggested by the experts through this systematic methodology. This provided a national needs assessment to serve as a basis for future instructional development in the area of effective teacher use of library media centers. Delphi and Fault Tree analysis were used in combination as the systematic methodology. A 58-item checklist was created from the Delphi phase of the study and the initial input from the national panel of experts was

used to qualify a fault tree. The prime strategic path for effective teacher use of library media centers was determined to be ineffective use of existing learning resources because of failure to use production specialists effectively. The function of the production specialist was defined as using the specifications developed in the design function either to create resources or to locate appropriate existing materials. Other areas of study included inservice training, specifications of learning objectives, effective use of reference books, goals and policies about roles and purposes, evaluation, and selection of learning resources. Spons Agency—Naval Training Equipment Center, Orlando, Fla.

Report No.—NAVTRAEQUIPCEN-77-C-0065-1

Pub Date—Jan 79

Contract—N-61339-77-C-0065

Note—84p.; Marginally legible due to light print

Pub Type— Reports - Research (143)

EDRS Price - MF01/PC04 Plus Postage.

Descriptors—Comparative Analysis, Cost Effectiveness, *Factor Analysis, *Flight Training, Glossaries, Program Descriptions, *Research Design, *Research Methodology, *Simulators, Transfer of Training

A major part of the Naval Training Equipment Center's Aviation Wide Angle Visual System (AWAVS) program involves behavioral research to provide a basis for establishing design criteria for flight trainers. As part of the task of defining the purpose and approach of this program, the applications of advanced experimental methods are explained and illustrated. The general AWAVS research philosophy is discussed, particularly in regard to the relative effectiveness of single versus multifactor experiments. Performance studies to be done in the AWAVS simulator are described, and a fictitious numerical example of how economical multifactor designs would be used is presented. "Quasi-transfer" experiments in the simulator are proposed to study the relationship between transfer and simulator fidelity as a composite concept rather than an entity. Some untried methods of performing multifactor transfer of training experiments more economically are suggested. A glossary of terms is included. (Author/CMV)

This manual for supervisory instructors documents the goals, methods, and operation of the BASIC Instructional Program (BIP), an interactive problem-solving laboratory that teaches elementary programming in the BASIC language. The first two sections describe features of BIP that may be of interest to the supervisor, especially the individualized task-selection algorithm and the Curriculum Information Network (CIN) which stores the relationships among elements of the author-written course material. The remaining sections describe in detail how to supervise the operation of BIP, including (1) the creation and use of certain files that may be written to during BIP execution (e.g., when there is an error in a model solution or when a student disagrees with the solution checker); (2) how to add and drop students from the course; (3) details of adding new tasks to the BIP curriculum and a description of the solution checker; and (4) how to obtain student progress reports. Appendices include a description of the technique groups and the skills in each, lists of syntax and execution errors, sample pages from the tasks file, and sample runs of BClass and Report Programs. A synopsis is provided of a 6-year research and development effort to investigate the feasibility and desirability of using computer assistance to improve leadership and management practices at RTCs (Recruit Training Commands). Information has been derived on the suitability of two computer systems and various approaches for employing these systems in pursuit of the improvement goal. These approaches encompass instruction and performance evaluation for Company Commanders, as well as more general information acquisition and processing capability to assist in the management of RTCs. Some of these programs are ready for operational use, while others would require considerable development and testing prior to operational implementation. Samples of management and evaluation systems outputs are appended. (Author/CMV)

Descriptors—*Computer Assisted Instruction, *Computers, *Computer Science, *Computer Science Education, Educational Technology, Higher Education, *Technological Advancement

In most instances, the papers in this collection present information reflecting the current status of computer usage in education and offer substantive forecasts for academic computing. Two speeches from the special ceremony for the renaming of the computing center in honor of Gerard P. Weeg, which was held as part of the two-day national computer conference, are included. Presentation topics include "Dedication: Reflections and Projections," Duane Spriestersbach; "University Response," Willard Boyd; "Computers in Education: Cycles and Trends," John Hamblen; "Equality of Educational Opportunity through Computer Technology," John Eulenberg and Morteza Rahimi; "Pre- and Post-College Computer Education," Arthur Luehrmann; "Future Trends in Computer Science Curricula," Stephen Hedetniemi; "Personal Computing and Its Impact on Education," Seymour Papert; "Computing in the Research Environment," Walter Doherty; "The Case for the Network," Thomas Kurtz; "The Microprocessing Revolution and Its Effect on Small Colleges," Sister Mary Kenneth Keller; "The Reshaping of Men's Minds via Computing," Grace Hertlein; and "Computers, Education, and the Future of Educational Institutions," Alfred Bork. Identifiers—*ERIC, Information Analysis Products

The experiences with ERIC which are profiled for three public school systems reflect specific user requirements in different environments. In "Meeting Professional Education Information Needs: A Profile of How the Alexandria, Virginia City Public Schools Use the ERIC System," Dale Brown discusses the types of searches used by administrators and teachers at the city school system level. Patricia Mautino, in "Watch ERIC Grow!" describes three levels of ERIC use in New York State, through the Educational Programs and Studies Information Service (EPSIS), which provides state-wide support, the Board of Cooperative Educational Services (BOCES) at the county level, and individual user services at the school level. The use of microforms at East Detroit High School is discussed in Lewis Saks' article, "The Little Grey Cells, The Little Black Cards: An Approach to ERIC Microfiche," as well as a recent study done by Pat Gilmore which surveyed the use and knowledge of ERIC by teachers in the East Detroit School system. Identifiers—ESEA Title II

This report provides benchmark data on the effects that the provision of school library resources, textbooks, and other instructional materials under Title II of the Elementary and Secondary Education Act (ESEA) has had on education in the nation's public and private elementary and secondary schools. The passage of Title II of ESEA set the stage for improving the quality of instruction in elementary and secondary schools through increased quantities of instructional materials of high quality. The Title II program consists of two components–acquisition of materials and administration. This survey covering the first three fiscal years of program operation sought answers to these four questions: Is the intent of the statute being carried out? Is the program effective in attaining the goals reflected in the statute? Has the maximum statutory authority been exercised in attaining the goals sought? and Is a revision of the law necessary? Data were collected by means of five survey instruments which were sent to a sample of public school districts in the U.S.: (1) a school district questionnaire, with (2) a public school and (3) a private school supplement; (4) a school principal questionnaire; and (5) a school media personnel questionnaire. Part II of this report provides the survey data in tabular form. (RAO)

International Telecommunications Bibliography.

Office of Telecommunications (DOC), Washington, D.C.

Spons Agency—Office of Telecommunications Policy, Washington, D.C.

Report No.—OT-SP-76-7

Pub Date—Mar 76

Note—171p.; For related document, see IR 007 114

Available from—Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (1976-210-801/222)

Pub Type— Reference Materials - Bibliographies (131)

EDRS Price - MF01/PC07 Plus Postage.

Descriptors—Broadcast Industry, *Communication Satellites, Computers, Data Processing, Economic Factors, Educational Technology, Federal Legislation, *International Law, Planning, *Policy Formation, Space Sciences, *Telecommunication, Telephone Communication Systems, Television

This annotated bibliography covers international telecommunications, concentrating on reports with possible policy implications for the Office of Telecommunications Policy and other government/industry agencies. Since the scope of international telecommunications policy is broad, the bibliography attempts to provide a framework useful in defining the U.S. role or potential roles within the international telecommunications community. The framework reflects the general scope of international telecommunications that may be of importance to U.S. policy makers, including articles on the technology, economics, industry structures, and legal aspects of telecommunications systems worldwide. An international telecommunications community is inferred, its moods suggested, and its future predicted by various sources. Multinational and international telecommunications programs are documented, as well as telecommunications programs worldwide with only domestic applications. Articles cited on telecommunications in developed and developing countries include both domestic and international applications, emphasizing programs where economic support has originated outside the country. U.S. relationships with these telecommunications systems are documented in several chapters. This is the first of an anticipated series of annual bibliographies for the international telecommunications community and includes sources up to November 1975. (Author/RAO)

Bearley, William L.

Non-Procedural Languages for Information Resource Management.

Pub Date—30 Jan 79

Note—19p.; Paper presented at the International Meeting of Exchange (January 30, 1979)

Pub Type— Opinion Papers (120) — Speeches/-Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Data Bases, *Data Processing, Information Retrieval, *Language Processing, *Management Systems, *Programing, Programing Languages, Programing Problems

The future of information resources management requires new approaches to implementing systems which will include a type of data base management that frees users to solve data processing problems logically by telling the system what they want, together with powerful non-procedural languages that will permit communication in simple, concise statements without complex data descriptions or program logic. A communication gap between the end-user and computer caused primarily by inadequacies of traditional programming approaches and methods of managing files may be remedied by the use of such non-procedural languages. The non-procedural language-base approach provides a "user-friendly" interface between user and computer that does not require knowledge of a data processing language or of data base structure. Decreased cost, increased productivity, and increased system availability to users are significant implications. The Information Resource Management System (IRMS), a non-procedural approach, is applicable for all internal organizational information processing, as a powerful development language for new applications, and as a utility for handing ad hoc requests or for one-time applications. The system focuses on the data, which are accessed through a data base manager. Generalized processing functions are accessed through a com-

mand language useable in both a batch and time-sharing environment, and a procedural language interface accommodates users with special processing needs. (CWM)

Cramer, Robert F.
A Plan and Manual for the First Stage (Fully Operational) of a Computerized Community Skills Exchange.
Resources for Communication, Windsor, Calif.
Pub Date—78
Note—21p.; Not available in hard copy due to marginal legibility
Pub Type— Reports - Descriptive (141)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors—*Community Information Services, Community Resources, Data Collection, *Data Processing, *Human Resources, *Information Systems, *Job Skills, Manuals, Program Planning, Questionnaires
The techniques for data collection and storage using files and punch cards which are described are used by the computerized community skills exchange, A Person To Person Living Exchange (APPLE), in Portland, Oregon. Clients complete questionnaires that register up to seven skill-areas in which they seek help, or where they could provide service to others. To effectively match skills and needs from this data, an item file and an inverted file are manually constructed. The item file is organized by client name and gives address, skills, needs, and other necessary information. An inverted file uses keywords to describe each skill and additional keywords to indicate levels of competence, kinds of compensation needed, and other details. Persons possessing these skills are listed below the keyword as numbers. Overlaps in skills and needs can be detected through this file. A description of the APPLE system, together with the skills and resources list and the membership questionnaire, provides background information to the step-by-step instructions on data preparation. Explanations are given for the construction of item and inverted files and the use of the numbering system and keywords with punch cards. Manual manipulation of punch cards for matching needs and skills prior to programming of the computer using these cards is also described. (CWM)

Identifiers—*Software Design
The theoretical framework for investigating human planning behavior and the procedures, results, and implications of two experiments involving planning in the domain of software design are presented in this report. A plan is defined as a hierarchical structure that underlies the solution to a problem; planning is the process of constructing this structure. This framework makes various assumptions about the nature of a plan and the construction of the planning structure. Experiment one involved the collection of long, thinking-out-loud protocols from three highly experienced computer scientists. Experiment two involved ten undergraduate college students enrolled in an "assembly language" course who were instructed to solve a design problem similar to the one given to the experts in either a written-solutions condition or a written-and-think-aloud condition. Examination of the experimental behaviors indicate that completed plans can be characterized in a variety of ways. Expert subjects differ from less experienced subjects in the knowledge structures that can be retrieved from long-term memory and incorporated into a plan. (Author/CWM)

Descriptors—*Cable Television, Deaf, *Electronic Data Processing, Film Production, Hard of Hearing, *Media Technology, *Programing (Broadcast), Television Research, *Television Surveys, Video Equipment
Identifiers—*Canada, QCTV Limited
This compendium of papers, prepared by staff of a Canadian public cable company, examines cablevision marketing in Canada, multiple replay community programming, the first QCTV film production, QCTV special programming, television coverage of the House of Commons, establishment of a data processing system, use of that system for customer service, and increasing performance capabilities of the expanding system. Results of a survey of 20 cable television companies in urban centers across Canada indicate the effectiveness of marketing practices in the cable television industry. Another survey of QCTV subscribers examines whether multiple replays of community programs result in drawing larger audiences, thereby cost-justifying programming expenditures. The production of and public reaction to QCTV's first film, a documentary, and to a special programming series for the deaf and hard-of-hearing are also presented, as well as the results of a subscriber poll which indicated favorable reactions to television transmission of House of Commons proceedings. The transition from a batch-processing method of subscriber account processing to an online system and the benefits of subscriber-oriented programs in an online computer system are examined. The final paper describes the introduction of hub-headends and conversion to FM transmission, which have resulted in lower maintenance costs, and increased system reliability. (CWM)

This final report reviews research performed in two major areas–instructional theory, and development of a generalized maintenance trainer simulator. Five related research projects were carried out in the domain of instructional theory: (1) the effects of visual analogies of abstract concepts, (2) Markov decision models for instructional sequence optimization, (3) electrophysiological correlates of cognitive processing, (4) cognitive strategies for text processing, and (5) heuristic techniques for logical problem solution. Work on the development of the maintenance trainer simulator included tests of the system in naval training environments and led to a project to further develop the system for regular use in Navy Schools. A list of references includes citations for 14 technical reports, seven chapters in books or articles in journals, and nine papers for professional meetings. (Author/JEG)

Industry structure studies prior to 1968 are briefly reviewed, and an overview of industrial and technological developments up to the present is provided through synopses of more recent studies. Areas covered include overseas telephone and record carriers; the creation of the Communications Satellite Corporation; the current regulatory and oversight environment, which includes statutory background, the FCC regulatory process, and the executive office role; current problems existing within the present institutional arrangements; alternative industry arrangements for providing international telecommunications services; and regulatory and governmental changes with impacts on industry structure. The report closes with a summary of conclusions and recommendations for possible structural, regulatory, and legislative changes for the international telecommunications industry. (RAO)

Descriptors—Aggression, *Cognitive Development, Early Experience, Language Development, Language Skills, *Language Usage, *Parent Influence, Play, *Preschool Children, *Pretend Play, *Television Research, *Television Viewing

This study examined the patterns of ongoing play manifested over a year's time by 141 three- and four-year-old boys and girls at nursery schools and daycare centers. The relationships between such play and concurrent language usage and the child's patterns of television viewing at home were examined during this period. Parents of the children were also randomly assigned to one of three intervention groups or to a control group. Intervention groups received training either in stimulating the children's imaginative play, stimulating the child's cognitive and language development, or in controlling the child's television-viewing frequency and encouraging more discriminating use of the set. The control group merely kept logs of children's viewing as did the other parents. Based on this research, eight recommendations were made. Family interview data relating to home organization, daily routines, patterns of discipline, parental aggressive behavior, and traumatic events or stress, suggest that the laxity of control over TV viewing and a general lack of alternative interests by the family may expose children to greater influence by the TV programming and yield the danger of more initiative aggressive or hyperactive behavior. Identifiers—*PLATO

Descriptions of new developments in the areas of facilities, applications, user services, support staff, research, evaluation, and courseware production since the Second Summative Report (1977) are provided, as well as a summative overview of PLATO applications at the University of Delaware. Through the purchase of its own PLATO system, this university has become the first institution to offer comprehensive PLATO services on the east coast. New applications in accounting, anthropology, chemical engineering, honors, mathematics, military science, and security have brought the number of departments using PLATO to a total of 28. The project has also laid the groundwork for the publication of its PLATO materials on the national CDC PLATO network, and lessons have been produced for publication in the areas of agriculture, art, counseling, education, human resources, languages, music, nursing, psychology, and system utilities. Divided into three main sections, the report covers project history and development, departmental applications, and evaluation. A catalog of courseware under development at Delaware is appended. Through the Tube Darkly.

Pub Date—75

Note—30p.

Pub Type— Information Analysis (070) ()

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Affective Behavior, Anti Social Behavior, Behavior Development, *Childrens Television, Cognitive Development, *Commercial Television, Discriminatory Attitudes (Social), Improvement, *Programing (Broadcast), Public Television, *Television Commercials, Television Viewing, Violence

The research literature on the effects of television on the behavior and attitudes of children shows that most television programs and commercials present a highly distorted view of life and society and show discrimination in character roles with regard to sex and race. Above everything, American commercial television is violent and children represent an extremely large viewing population. Research indicates that television viewing strongly affects children in such areas as creativity, role models, cognitive development, and aggressive-violent behavior. Attitudes toward commercials tend to become more negative as children become older, but tolerance increases with the amount of television watched. The purchasing patterns of families with younger children appear to be affected by commercials. Much publicly-supported children's television programming is cognitively focused, but, despite its apparent success, public commitment to children's television shows little improvement. Child-created television, in which children produce their own programming, provides an alternative model to present practices and allows children's television to program "real" problem situations while controlling for anti-social behavior models. Transferability of Computer-Based Learning Materials.

Pub Date—24 Jun 77

Note—15p.

Pub Type— Opinion Papers (120) — Reports - Descriptive (141)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Computer Assisted Instruction, Computer Programs, *Cooperative Planning, Information Dissemination, Instructional Aids, Instructional Innovation, Interagency Coordination, Intercommunication, *Programed Materials, *Teaching Methods

In order to get a comprehensive view of the problems and present development of the transferability to other locations of computer-based learning materials, it is necessary to examine short-range versus long-range viewpoints and the distinctions between computer-related aspects and those aspects associated with innovative learning and teaching techniques, using as examples present computer systems. With regard to short-range computer aspects, it is determined that the more systems the computer-based materials can run on, the less interesting pedagogically the materials are. Major problems regarding short-range innovative teaching aspects are political and sociological or involve instructors learning whether available materials are suitable for their course and reliable. Due to the changing computer technology, when we consider the long-range point of view, no computer aspects of transferability are important. However, the long-range view of innovative learning aspects poses problems with the marketing of future materials, the development of new materials based on the existence of the computer, and new modes of education. Koontz, F. R. And Others

The Use of Theatrical Skits in Instructional Television Lectures: A Comparative Study.

Toledo Univ., Ohio.

Pub Date—78

Note—233p.

Pub Type— Reports - Evaluative (142)

EDRS Price - MF01/PC10 Plus Postage.

Descriptors—*Comparative Analysis, *Educational Television, *Intermode Differences, Lecture, Production Techniques, *Skits, *Student Attitudes, Surveys, Teacher Developed Materials, Television Research

This study describes the development of an innovative instructional technique, peculiar to television, that presents information in a dramatic form through televised skits. Primary concerns of the project were the measurement of student attitudes toward receiving instructional television material in skit form, the measurement of the amount of learning that occurred as a result of viewing the skit-lectures, and the development of a systematic approach for producing the televised lessons. Two expository lectures comprising all instructional information delivered by the television teacher, each containing two segments of 33 to 35 minutes, were produced as the control lessons. Identical lectures, each containing six or seven 2 to 5 minute skits, were produced as the experimental lessons. A survey solicited student attitudes toward receiving information in skit form, and four 10-question multiple-choice tests were constructed to measure learning. The attitude survey indicated that students had a positive attitude toward learning from skits, that they found them enjoyable, and that the skit content was easy to learn. T-test data showed that students learned as much from the skit-lectures as they did from the expository-lectures. (Author/-RAO)

The Use of Video Tape as an Applied Research Technique.

Pub Date—7 Apr 78

Note—38p.; Paper presented at the Adult Education Research Conference (San Antonio, Texas, April 7, 1978)

Pub Type— Speeches/Meeting Papers (150) — Reports - Descriptive (141)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Community Planning, *Human Services, *Instructional Design, *Professional Training, *Research Methodology, Social Planning, Training Techniques, *Videotape Recordings

This report describes the application of videotape recordings as an applied research technique in a project directed toward the research and development of training designs and materials for human service agency professionals. The multiple applications of VTR and the types of data collection situations in which it has been utilized are briefly reviewed, and the relative strengths and limitations of VTR as an applied research technique in the development of training materials are discussed in the contexts of access to data, quality of data, quality of production, and costs of production. The three approaches described for making evaluative judgements about the strengths and limitations of VTR as a research tool include: type I–the addition of a literature review with a video production, usually as part of the development of training materials after a literature search and the formulation of training content is completed; type II–the addition of a video production phase after both a literature review and a collection and analysis of field data is completed; and type III–the combination of a video production with the collection of field data after a literature review is completed and before decisions are made about the ultimate content of the training. A Comparative Study of Learning Networks in the United States.

Pub Date—Jun 78

Note—150p.; Ph.D. dissertation, Northwestern University; Tables C-J may not reproduce clearly due to small type size

Available from—The Learning Exchange, PO Box 920, Evanston, Illinois 60204 ($15.00)

Pub Type— Reports - Evaluative (142) — Dissertations/Thesis (040)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Access to Education, Certification, Class Attendance, *Community Programs, Comparative Analysis, Educational Administration, *Educational Alternatives, Educational Finance, Educational Innovation, Educational Philosophy, *Educational Problems, *Educational Programs, Information Networks, Models, State of the Art Reviews

This comparative study examines learning networks from an historical perspective and, in addition to determining the state-of-the-art after seven years of independent development, provides operational definitions of the major critical elements needed to assure the development of a successful learning network model. Learning networks are discussed as a response to the problems of American education. To assess the state-of-the-art and to determine the chief characteristics that account for the high failure rate of the concept, seven major operational variables critical to successful learning network development are discussed: (1) general orientation reflected in legal status; (2) philosophy; (3) funding; (4) organization of information; (5) communication programs; (6) client access; and (7) management and administration. Data for these variables were collected through personal interviews with founders or chief administrators of 18 active and 10 inactive learning networks. Each was analyzed comparatively in terms of time in existence, number of participants on file, population of the service area, participation percentage, and clientele demographics. Analysis indicates that lack of funding is a central problem, and that further research is needed in the areas of network users and effects of program modifications. (CWM)

Drug Abuse Prevention Films: A Multicultural Film Catalog.

Development Associates, Inc., Arlington, Va.

Spons Agency—National Inst. on Drug Abuse (DHEW/PHS), Rockville, Md. Div. of Resource Development.

Report No.—DHEW-ADM-79-791

Pub Date—78

Contract—271-77-4523

Note—58p.

Pub Type— Reference Materials - Bibliographies (131)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Audiovisual Aids, Drug Abuse, *Drug Education, Films, *Minority Groups, *Personal Adjustment, *Personal Growth, Prevention

This multicultural annotated filmography lists films reviewed and recommended by the Center for Multicultural Awareness. Films included not only deal with drugs or drug use, but also with the cultural and personal conflicts that can lead to problems with drugs. Each film is listed under one or more of nine categories–drugs, cultural values, personal values, life skills, alternatives, cross-cultural awareness, parent education, films in Spanish, and staff training. Included in each citation are title, distributor, length, configuration, purchase or rental price, intended audience, and a brief summary. A list of other film sources, the distributors and their addresses, other films reviewed, and a user comment form are appended. (JVP)

Information Desk: Testing a Prescribed Model in the Local Environment.

Pub Date—78

Note—32p.; Best copy available

Pub Type— Reports - Evaluative (142)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Information Needs, Information Seeking, *Information Services, Library Reference Services, Library Services, *Program Evaluation, Research Libraries, *Use Studies

This study was conducted in order to ascertain the need for an information desk in a large research library with decentralized reference service where, on the basis of a preponderance of evidence in the available literature, a considerable demand for such a service would be expected. The desk was located in the center of the library's entrance lobby, with the intent of answering directly any questions which did not require the staff to leave the desk, and referring patrons to appropriate resources or departments. Staff recorded patron inquiries on a questionnaire which provided a list of anticipated questions and space to record any that were unspecified. Classification of questions by type was determined inductively after data had been collected, and questions about the library were coded on the basis of the usual distinctions of relative complexity and need for specialized knowledge. Analysis of the data reveals that, contrary to expectations, significant demand for services usually provided by an information desk is limited to only a few weeks per year. (Author/CWM)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Administrative Policy, *Computers, Confidentiality, Data Bases, Electronic Data Processing, *Federal Legislation, Government Libraries, Government Publications, *Information Dissemination, Information Retrieval, Library Automation, Library Collections, *Policy Formation

This compilation of abstracts provides brief descriptions of the 74 new public laws relating to computers and information policy that were enacted during the 95th Congress. Each of these bills is concerned with information, although the diverse subject matter–e.g., energy and clean water, food and health, foreign investments, ethics in government–received attention from different committees of the House and Senate. These laws are listed in eight categories: (1) creating information inventories, programs, or clearinghouses; (2) providing for the dissemination of information; (3) creating news information systems or computerized data bases; (4) government records, documents, and paperwork; (5) library policies, procedures, and assistance; (6) information disclosures and confidentiality/right of privacy; and (7) other related information legislation. Identifiers—Community Analysis Research Institute

This study of the community of Norfolk, Virginia, and its public library system concentrates on an area of the city with a large Black community. The city planning process is explained, and the Model City Program described as a prime example of planning in such areas. The situation and programs of two agencies–a storefront public library and the Black Culture Center–that will be fused into one when a new facility is built in this area are discussed, and the need for a new agency is detailed. Data on library use, user registration, and the collections in branch libraries neighboring the proposed new branch are analyzed, as well as the residence of clients using these libraries during a specified time period. Both the demographic characteristics of the population and the physical characteristics of the area of the proposed branch are also examined. Research findings and recommendations on policy, board and citizen participation, staff, physical resources, and programs are summarized in the conclusion. Fourteen appendices display data collected for the study, maps, and an editorial from a local newspaper. A bibliography is included. (CWM)

Descriptors—Computer Programs, *Computers, Computer Storage Devices, *Government Libraries, Library Administration, *Library Automation, Library Role, Man Machine Systems, Systems Approach, *Systems Development

Identifiers—*Minicomputers

This book for library administrators and Federal library staff covers the application of minicomputers in Federal libraries and offers a review of minicomputer technology. A brief overview of automation explains computer technology, hardware, and software. The role of computers in libraries is examined in terms of the history of computers and current evolving technology. An examination of microcomputers as a solution to library problems focuses on hardware and peripherals, including mass storage devices and man/machine interface devices. Systems software is discussed, with emphasis on program development aids, file management programs, operating systems, and applications. Criteria for system selection are identified, and library applications in the areas of acquisitions, cataloging, serials, circulation, interlibrary loan, reference and information services, and administration are explored. Based on these applications and requirements for space and personnel, guidelines are given for system selection and evaluation. The roles of the library, agency, federal government, and private sector in the application of minicomputers are discussed, as well as future trends. A glossary and systems specifications for procurement of minicomputer systems from the Library of Congress are appended. (CWM)

Descriptors—*Academic Libraries, *Budgeting, Library Acquisition, Library Administration, Library Collections, *Library Expenditures, Library Materials, *Library Planning, Library Research, *Reports, Use Studies

This report presents comprehensive recommendations in the library budget formula area for public 2- and 4-year institutions in Washington based on recommendations adopted by the council in 1976 with some revisions. A review and analysis of statistical data supplied by the 4-year institutions and community college system in the areas of staffing,

collections, usage, acquisitions, and institution size, provides the basis for the recommendation that the library resources portion of the formula be stated in terms of number of acquisitions per year, based on mathematically determined relationships of acquisitions to collection size derived from the experience of comparison institutions and states. These acquisition units would then be converted into dollar amounts based on each institution's experienced unit costs adjusted for inflation. Questions were raised regarding staff years, branch libraries, and the standard dollar amounts for staff years and binding. These questions were primarily related to the interpretation of the recommendations and accompanying definitions and guidelines contained in the council's final report. As a consequence, slight modifications to three recommendations, more explicit guidelines, and specific examples of interpretations of recommendations have been added to the "Operations Element" section of the report. Identifiers—Information Analysis Products

This extensive, selective bibliography of readings, an updating of "Media and Instructional Technology in the Library" by Bruce E. Dewey and Richard Howard, is designed to provide librarians and media specialists with an array of materials dealing with the range of activities and services relating to the inclusion of nonprint material in libraries. It is intended as a resource tool for the practicing librarian faced with problems of selection, acquisition, production, organization, and processing of nonprint materials, as well as for library school students and educational technologists. Over 4,000 items were examined for potential inclusion in the listing, and approximately 500 were selected. Concentration was on library use of nonprint material; instructional technology was treated in a general manner. "Near-print" media, such as microforms, maps, charts, globes, were excluded while "intermediate technology," e.g., slides, 8mm and 16mm film, audiotapes and recordings, were included. A primary source for the search was ERIC. Items are presented in a classified arrangement, and a complete author and title index provides alphabetic access to items included. (Author/JEG)

Although calls for a National Library began as early as 1883, the cornerstone of the future national library was the Canadian Bibliographic Centre, established in 1950, which began work on the national bibliography and national union catalog. When the National Library of Canada was established in 1953 under the direction of W. Kaye Lamb, the National Library Act became effective and Canadian publishers were required by law to deposit two copies of each new book they published at the National Library. From 1956 to 1966, the library moved to a different building, the staff began cataloging the collections and organizing material transferred from the Library of Parliament, and the organizational structure took shape. In 1968, after another move to the National Library and Archives Building, the Office of Library Resources was created and Guy Sylvestre was appointed National Librarian. Since that time, various new divisions have been created to deal with changing needs, including the automation of library service. (CWM)

This account of the 93rd meeting of the Association of Research Libraries (ARL) presents both the Washington and ARL perspectives on national library planning with emphasis on periodicals, bibliographic control, and libraries and information services. These viewpoints are presented by six speakers on two panels with a discussion following each panel presentation. The panel on Washington perspectives calls for a National Periodical Center with a centralized authority and a national bibliographic system to work intensively in the areas of bibliography, national collections, management, professional education, and research and analysis. Planning and funding for the White House Conference on Libraries and Information Services are also discussed. The panel of ARL reactors calls for a more active response from ARL libraries on national library planning decisions and for the establishment of some sort of leadership mechanism. This panel also endorses the need to set forth purposes, objectives, and needs. Recommendations of the ARL Task Force on Bibliographic Control are presented in response to a presentation by a member of the Washington panel on national bibliographic control. A report of the business meeting of ARL is included, and task force reports are appended. (CWM)

Identifiers—*New York State Interlibrary Loan Network

A description of the growth and development of the New York State Interlibrary Loan Network (NYSILL) from its inception in 1976 to its status in 1977, is followed by discussions of the various aspects of the network, reexamining its ability to meet its objectives and proposing recommendations for improvement. These discussions include (1) the structure of NYSILL and its relationship to other networks (e.g., Ohio College Library Center, OCLC); (2) direct regional access to NYSILL referral libraries; (3) document delivery alternatives; (4) NYSILL subject referral libraries; (5) NYSILL and copyright; (6) future automation of NYSILL; and (7) teletype access to NYSILL. The recommendations are presented at the end. Two appendices provide the Cornell direct access proposals, the NYSILL Task Force by-pass proposal, the Greenberg direct access proposal, and a memorandum on planning for an expanded teletype access to NYSILL. Descriptors—*Academic Libraries, College Students, Demography, *Library Surveys, Needs Assessment, Statistical Data, Tables (Data), User Satisfaction (Information), *Use Studies

Identifiers—*Library Users

A survey was conducted of library users of the William Russell Pullen Library at Georgia State University to determine who is using the library, how often respondents use it, how they rate the library's various collections and services, and how the library is used throughout the day and week. The survey instrument was distributed at predetermined time periods to all those entering the library; 52 percent of 6,406 distributed surveys were returned. An analysis of the data was performed, cross-classifying the respondents' opinions about the library with their demographic factors and then with the time variables. Findings showed that, when compared to the general student population, a disproportionate number of males, upperclassmen, and liberal arts and business administration students were library users. Eleven percent of the library users were not affiliated with Georgia State University. No evidence of major barriers to usage were found, and a large majority of students appeared to be satisfied with the library's collections and services, though faculty members' opinions were not as high. The survey instrument and data tables are provided. (JD)

Research on Remembering: Interrogation or Conversation, Monologue or Dialogue?
Pub Date—Aug 78
Note—20p.
Pub Type— Reports - Descriptive (141) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Bibliographies, *Interaction Process Analysis, Interpersonal Relationship, *Memory, Psychology, *Research Methodology
Identifiers—*Dialectical Approach

The implications of the dialectical perspective for research methodology are reviewed and illustrated with examples from research on memory and memory development. Three conversations or dialogues are described: within the researcher, between the researcher and the research participants, and between the researcher and social-historical context. It is suggested that traditional research methodology can be strengthened by embedding it within these dialogues, thus giving greater emphasis to creativity and meaningfulness of research, to the protection and interests of research participants, and to the social responsibilities of the researcher. Identifiers—*National Program Library Information Services

This report of a study of the state of networking in school library media programs nationwide and the role of such programs in the National Program for Libraries and Information Services covers the rationale for inclusion of these programs in library networks, contributions of such programs to a national program, the benefits to the users of participating in networks, and problems and recommendations regarding participation in networks by these programs. This study was carried out by the Task Force on the Role of the School Library Media Program, appointed by the National Commission on Libraries and Information Science (NCLIS) with assistance from the American Association of School Librarians (AASL). The task force was assisted in its work by two papers prepared for use by its members–"School Media Programs and Networking: A Position Paper" by Mary Frances K. Johnson and Theodore Hines, and "Networking and School Library Media Centers: A Position Paper" by David V. Loertscher. Additional evidence was gathered at five open meetings attended by members of the profession, as well as by representatives of publishing companies, book distributors, cataloging services, the library press, and professional associations. Appendices include a list of task force members, examples of existing networks, and definitions. A bibliography is also provided. (JEG)

Applying the ATI Concept in an Operational Environment.
Pub Date—Mar 79
Note—15p.; Paper presented at the Annual Meeting of the Association for Educational Communications and Technology (New Orleans, Louisiana, March 1979)
Pub Type— Speeches/Meeting Papers (150) — Reports - Descriptive (141)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Educational Development, Educational Research, Environment, Flow Charts, Guidelines, *Instructional Design, *Learning Modules, Models, *Statistical Analysis, *Systems Approach
Identifiers—Aptitude Treatment Interaction

This paper describes a model for the systematic design, development, and validation of alternative instructional modules, by incorporating the basic concepts underlying Aptitude Treatment Interaction (ATI) analyses. The proposed working model is based on the premise that the ATI concept is best applied, not in isolation, but as an integral part of a dynamic decision-making instructional environment. Four areas of interest in the application of the ATI concept in an operational environment are discussed: (1) operational methodology, (2) variable categories, (3) statistical procedures, and (4) alternative module development guidelines. Descriptors—Computer Storage Devices, *Electronic Data Processing, Flow Charts, Higher Education, Magnetic Tapes, *Program Administration, Programing Languages, *Teacher Education

The use of the computer to assist in the administration of a teacher education program is described. Given the supply and demand problems in the teachers' job market, there is increasing pressure on teacher education programs to admit and retain only the better students, a task which involves many administrative duties. Performing them manually detracts from the time available for students; however, through the use of Mark IV language, it is possible to eliminate many of these tasks. The master file used for this application is a tape extract of the student master file, which is maintained by the admissions and records office in most colleges and universities. Utilizing the capability of the Mark IV language to maintain a master file with transaction data, the entire system could be maintained by the user department, independent of the professional programming staff. Report No.—NAVTRAEQUIPCEN-IH-308
Pub Date—Dec 78
Note—48p.
Pub Type— Reports - Evaluative (142)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—*Computer Managed Instruction, *Evaluation Methods, *Human Relations Programs, Interaction, Job Skills, *Leadership Training, *On the Job Training, Organizational Development, Personnel Evaluation, Protocol Materials, Self Evaluation, Student Evaluation, Teacher Education, Videotape Recordings

An approach is described for decreasing the costs and difficulties associated with providing adequate feedback to the student concerning his interpersonal performance when he performs operational tasks in simulated or actual job situations as part of his training. The computer is used to assist in the process of eliciting appropriate feedback from judges and providing this feedback to the student, both in coordination with videotaped recordings of the student's performance. Computer programs designed to help judges rate interpersonal performance along a variety of dimensions were developed and tested. Although these programs also are suitable for providing feedback to the student, formal tests of this aspect of the process were not conducted in this project. Several potential benefits of the procedures for interpersonal skills training were demonstrated as a result of both the formal and informal tests of the system. (Author/JEG)

This essay briefly presents the evolution of technology and the resulting warnings that many prominent writers have offered in defense of an analytic inquiry into man's interaction with technology. Various ways in which technology has been used to manipulate people are described, e.g., Vietnam, Watergate, the CIA, the Tuskegee Study, Subliminal Seduction, and Nuclear Weapons. The reader is warned that sophisticated technology needs to be carefully controlled, and society should not become too dependent on it. (Author/RAO)

Identifiers—Information Analysis Products
Research on incidental learning by children from television is both a cause and effect of the increasing attention being given by social and behavioral scientists to the influence of mass media. Laboratory-type experiments and data collected from everyday life are consistent in their findings, providing convincing evidence that television can influence the immediate behavior of children. When this altered behavior is carried over into social interaction, the foundation is established for more far-reaching influence. Television also has varied cognitive and attitudinal effects on children, e.g., it is their principal source of information on public affairs. Television designed to convey information can be quite effective, and entertainment programs occasionally provide instruction, but their impact is sometimes limited by redundancy with one another. Commercials also instruct children by influencing preferences for the value placed upon products. Tastes and preferences in programming and time spent with the medium change along with individual interests and needs as young people grow older. The study of television's influence requires both laboratory-type experimentation and the collection of data from real life, the former to establish the possibility of causation and the latter to confirm the presence in real life of experimental findings. Identifiers—*Educational Information, *ERIC
This most recent in a series of bibliographies of publications produced by the individual ERIC Clearinghouses lists 600 information analysis products (IAP's)– bibliographies, research reviews, state of the art and interpretive studies on topics of current interest–published over a 2-1/2 year period. Designed to list, organize, review, and synthesize the education literature to meet the needs of ERIC users, these publications include both documents and journal articles. The format and arrangement of citations in this bibliography conform to those in the original announcements in RIE and CIJE, and subject, author, and institution indexes are provided. Information for ordering is given for those publications which are available from the clearinghouses which produced them. In addition, IAP's that are announced in RIE are contained in all ERIC microfiche collections and may be ordered in microfiche or photocopy from the ERIC Document Reproduction Service (EDRS). Journal articles announced in CIJE are available in libraries retaining the journals in which they were published; reprints may also be available from University Microfilms International (UMI), depending on the journal. Education to Match Our Mountains . . . and Our People! Mission, Philosophy, and Goals for Anchorage Community College–First Draft. Master Plan 78.
Anchorage Community College, Alaska.
Pub Date—Nov 77
Note—41p.
Pub Type— Guides - Non-Classroom (055)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—*College Role, Community Colleges, *Educational Objectives, *Educational Responsibility, *Junior Colleges, *School Community Relationship
The mission of Anchorage Community College is to reach out to the community to identify needs and anticipate trends so that, in cooperation with other agencies, it can enable the growth of individuals and the strengthening of the community by providing flexible, supportive, visible, and accessible comprehensive life-long learning opportunities. This document outlines the beliefs and goals of the college as they pertain to its various roles. Goals related to the college as a learning center focus on relations with and understanding of the community. Those related to its function as an agency for personal development concern the identification and fulfillment of the needs of the community and the students. As a career development agency, the college intends to gather and analyze data to assess employment demands, trends, and technological changes. In its role as a partner with many agencies responding to educational needs, the goals of the college are to develop and maintain cooperative relationships with other local agencies. Objectives related to the college as a community member focus on maintaining complete data on the whole community and providing flexible community services. Goals are also stated for the college as a social and a cultural center, and finally as an economic agency. (MB)

Planning and Implementation of the Transition to Technology Program (TTT) at Evergreen Valley College, San Jose, California.
Evergreen Valley Coll., San Jose, Calif.
Spons Agency—Department of Health, Education, and Welfare, Washington, D.C.
Pub Date—Jan 79
Note—106p.; Page 50 of the original document has been deleted due to irreproducibility
Pub Type— Reports - Descriptive (141) — Reports - Evaluative (142) — Tests/Questionnaires 160)
EDRS Price - MF01/PC05 Plus Postage.
Descriptors—*Career Awareness, Career Choice, Community Colleges, Educationally Disadvantaged, Enrollment Trends, Females, *Industrial Technology, *Junior Colleges, Manpower Development, Minority Groups, Nontraditional Students, *Occupational Guidance, *Technical Education, Technical Mathematics, Vocational Interests
Identifiers—*Nontraditional Occupations
The purpose of the Transition to Technology Program (TTT) is to introduce persons who have traditionally not been exposed to technological education or careers to an overview of the basic concepts of technology and career options in technical fields. Women, minorities, and the economically and educationally disadvantaged, those groups with low representation in technical education and employment, comprise the primary audience for the program. TTT is a one-semester, nine-hour per week, team-taught interdisciplinary program. Components are modularized and include career advisement and guidance and basic instruction in manufacturing materials and processes, industrial graphics, electronics, computers, and technical mathematics. Course techniques include lecture, small and large group discussions and instruction, speakers from and field trips to local industry, demonstrations, and opportunities for skills development. Following a discussion of program costs and descriptions of the implementation, evaluation, and revision of the program, appendices illustrate its various aspects. These cover: (1) the projected distribution of 166,500 job opportunities among major occupational groups in Santa Clara County; (2) enrollments and student characteristics in occupational programs; (3) student math background; (4) TTT evaluation report and instrument; (5) field trip questionnaire; (6) course development guide; and

(7) course outlines. (MB)

Selected School Laws and Standards. A Summary Containing Specific School Laws Relating to Area Schools, Standards for Area Community Colleges and Area Vocational Schools.
Iowa State Dept. of Public Instruction, Des Moines. Area Schools and Career Education Branch.
Pub Date—78
Note—81p.; Parts may be marginally legible due to light print
Pub Type— Legal/Legislative/Regulatory Materials (090)
EDRS Price - MF01/PC04 Plus Postage.
Descriptors—Administrative Organization, *Administrative Policy, *Area Vocational Schools, Budgeting, Community Colleges, *Educational Finance, Full State Funding, Governing Boards, *Junior Colleges, State Schools, *Statewide Planning, Vocational Education
Identifiers—Area Schools, *Iowa
A selected summary is provided of: (1) Iowa school laws relating to area schools; and (2) standards for area community colleges and area vocational schools. Part one contains the specific Chapters (280A and 286A, Code of Iowa) which pertain to the area schools. Chapter 280A deals with the organization of the school and county systems; plans for merging areas; the roles of state boards, governing boards, and directors of merged areas; budgeting and financial support; district organization and administration; limitations on land and fund use; elections; faculty development; and the area vocational school attendance center. Chapter 286A covers general aid to schools; area vocational schools, community and junior colleges; resource allocation; and a uniform accounting system. The second section contains standards for area community colleges and area vocational schools as set forth in Chapter 670-5 of the Iowa Administrative Code and guidelines for these standards. Rules are cited for administration; faculty; curriculum and evaluation; library and learning resource center; student services; laboratories, shops, equipment, and supplies; physical plant; building and site approval; approval procedures; progress toward regional accreditation; and standards for area schools. The appendices identify related chapters of the Code of Iowa, the grading symbols used by area schools, and the uniform residency policy of area schools. (MB)

Menzel, Dorothy Pappas
Phonetics and Pronunciation Audio Guides.
Napa Coll., Calif.
Pub Date—19 Sep 78
Note—309p.; Includes a paper presented at the Western Speech Communication Association Convention (Los Angeles, California, February 20, 1979)
Pub Type— Guides - Classroom - Learner (051)
EDRS Price - MF01/PC13 Plus Postage.
Descriptors—*American English, Audiotape Recordings, Audiovisual Centers, Audiovisual Instruction, Community Colleges, Consonants, English (Second Language), Individualized Instruction, *Junior Colleges, Non English Speaking, Phonemes, *Phonetics, Phonetic Transcription, *Pronunciation Instruction, Videotape Recordings, Vowels
These study guides were prepared to accompany 32 one-half hour videotapes on the sounds of English, which together serve as the basis for a phonetics and pronunciation course at Napa College. In addition to viewing the videotapes, the students, largely non-English speaking, have contact with their instructor for one and one-half hours per week and can consult individually with the instructor during office hours. Audiotapes must be used in the language laboratory and students must participate in tutorials in the Skill Center which focus on specific pronunciation deficiencies. Weaknesses in the system include the confusing aspects of the International Phonetic Alphabet for non-English speakers, the large time demand upon teachers, and the lack of suitable tutors; however, the course achieves the objectives of teaching the pronunciation of English and increasing vocabulary awareness in a flexible, non-punitive, and non-threatening atmosphere. Introductory materials cover course content, the International Phonetic Alphabet, basic linguistic concepts, American dialects, and standard and substandard English. Audio and video tapes and their companion study guides cover the following sounds: (1) stop plosives, (2) front, back, and central vowels, (3) fricatives, (4) affricates, (5) glides, (6) lateral/-syllabic consonants, (7) nasals, and (8) diphthongs. The study guides contain exercises and instructions. (MB)

The Role of Tutoring in Community Colleges.
Pub Date—30 Mar 79
Note—38p.; Graduate seminar paper, Pepperdine University
Pub Type— Reports - Descriptive (141)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Community Colleges, Compensatory Education, Developmental Programs, *Junior Colleges, *Nontraditional Students, *Peer Teaching, Remedial Programs, Success Factors, *Tutorial Programs, *Tutoring, Tutors
Identifiers—California (Los Angeles)
The role of tutoring services in special programs designed to meet the needs of non-traditional community college students was studied through a review of the literature on history of tutoring programs, the development of special programs to meet the remedial, developmental, and compensatory education needs of underprepared students, special programs featuring tutoring components, and the characteristics of peer tutoring. Additionally, tutorial service coordinators at Los Angeles community colleges were interviewed to determine what procedures contribute to a successful tutoring program, and the West Los Angeles College Tutorial Center was analyzed. On the basis of the study, the following conclusions were drawn: (1) tutoring is an essential support service component in the special programs designed for the non-traditional student; (2) peer tutors are effective because they understand the student's difficulties and are willing to help; (3) peer tutors should be carefully recruited, selected, and trained; (4) tutoring centers vary and reflect the personalities of the individual staff and campus; and (5) successful tutorial programs occur when there is an enthusiastic and able staff and when the college administration is committed to the program. A bibliography is included. (MB)

Descriptors—Age, Associate Degrees, *College Credits, College Graduates, *College Majors, Community Colleges, Females, Junior Colleges, *Junior College Students, Liberal Arts, Males, *Persistence, School Holding Power, *Student Characteristics, Student Mobility, Vocational Education
Identifiers—*Hawaii
This report continues an analysis of the student flow patterns of the fall 1975 entering students at the Hawaii community colleges. Focus is placed on the extreme persisters (students who were enrolled for all six semesters without a break in attendance at their campus of entry) who continued their studies for the seventh semester. Findings are discussed for the community college total and for selected campuses which enrolled at least 150 students. Of the 8,979 entering students in fall 1975, 787 (8.8%) enrolled for seven continuous semesters. At the end of that semester, 132 students had completed their degrees, raising the total number of community college graduates from the 1975 entering group to 1,478 or 16%. Study results indicate that high proportions of business, public services, and technology students, new (as opposed to transfer) students, and students with grade point averages of 3.0-4.0 were in the extreme persister group. There were statistically significant differences, by sex, for educational objective, grade point average, age, and hours carried and earned within the group. Data tables outline correlations by sex, campus, program, educational objective, and graduation. (MB)

Follow-Up Studies of 1975 CCC Graduates. Information Sheets 79-01, 79-02, and 79-03.
Cumberland County Coll., Vineland, N.J.
Pub Date—79
Note—18p.
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Academic Aspiration, Associate Degrees, Career Choice, College Credits, *College Graduates, Community Colleges, Employment Patterns, Employment Potential, Job Placement, Job Satisfaction, *Job Training, *Junior Colleges, Junior College Students, *Participant Satisfaction, Relevance (Education), *Transfers, Transfer Students, Vocational Education, Work Attitudes
Identifiers—*Student Objectives
The 286 students who graduated from Cumberland Community College (CCC) in 1975 were surveyed regarding their educational objectives, educational/occupational status, satisfaction with CCC, method of finding a job, earning potential, relatedness of job to major, and transfer problems and success. Of the 138 (48%) graduates who completed the questionnaire, 52 (38%) enrolled primarily "to prepare for future employment." Of this group, 46 were currently employed either full- or part-time. About 32% enrolled "to prepare for further education at a four-year college." Of these students, 38 transferred and 28 had received baccalaureate degrees (BA's). Job information was provided by 117 graduates, 73% of whom were employed full-time and 12% employed part-time. Few respondents found their job through CCC; however, 66% felt their college program positively affected their earning potential. About 75% were satisfied with their job. After receiving their associate degrees, 87 graduates subsequently transferred to four-year colleges. Most (70%) had no problems transferring credits, 66.6% felt they had been well-prepared for transfer, and 56 had already received their BA's. Half of the transfers were initially enrolled at CCC in career-preparation courses. Of these, 13 had not originally intended to transfer. (MB)

Miller, LaVerne W.
General Education–"Dream of Coherence."
Pub Date—22 May 78
Note—63p.; Paper presented at the Forum on Future Purposes, Content, and Formats for the General Education of Community College Students (Montgomery College, Maryland, May 22, 1978)
Pub Type— Speeches/Meeting Papers (150) — Information Analysis (070) — Opinion Papers (120)
EDRS Price - MF01/PC03 Plus Postage.
Descriptors—Affective Objectives, Cognitive Objectives, College Role, Community Colleges, *Educational Change, *Educational Objectives, Educational Philosophy, Educational Responsibility, *General Education, *Junior Colleges, Junior College Students, *Liberal Arts, Nontraditional Students, Teaching Methods
Originally general education was a reaction against over-specialization and academic compartmentalization arising from the specialized degree structure–a reaction which stressed the need for a common experience for all students and emphasized the heritage of Western civilization. Early authors on the topic sought to define general education and liberal arts, and to assess its outcomes and the various approaches to instruction. Later authors were more concerned with its failures and predicted its forthcoming demise. Recent attempts to revive general education have tried to redefine the core of common experience which all students should share, and to introduce a focus on the present and future. While recognizing the diversity among students, this redefinition establishes universal goals–students must be able to think analytically and critically, to solve problems, and to communicate through a variety of media. The general education teacher, in achieving these goals, must try a variety of instructional approaches, recognizing the problems inherent in repeatedly using a method that appeals to only one group or that stresses only one cognitive style. A state-of-the-art look at general education should consider the areas of study that now comprise the field, the structure of learning within it, content-related tools of technology, the commitment of community colleges, and the new community college students and their objectives and educational choices. (AYC)

ED 168 617 JC 790 190
Holmberg, James And Others
The Teaching of History to Developmental Students: A Block Project.
Allegheny County Community Coll., Pittsburgh, Pa.
Pub Date—79
Note—32p.
Pub Type— Reports - Descriptive (141) — Reports - Evaluative (142)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Academic Achievement, Classes (Groups of Students), College Freshmen, Community Colleges, Composition Skills (Literary), *Developmental Programs, *Grouping (Instructional Purposes), *History Instruction, *Integrated Activities, Junior Colleges, *Junior College Students, Participant Satisfaction, Persistence, Remedial Reading, Social Sciences, Student Characteristics, Student School Relationship
Identifiers—*Block Scheduling
Nearly 37% (80 students) of the 219 entering, first-time freshmen, who were enrolled in second-level (requiring high school level skills) developmental reading and composition courses at the Community College of Allegheny County, were block-enrolled into a social science/history elective, "Man, Time, and Social Change." The same group of students shared classes, teachers, and subjects in order to (1) focus the student's classroom work to obtain maximum learning impact and (2) establish a strong, first-term student orientation to the institution and to their individual programs. In the social science course, using a workbook, classroom lectures, discussions, and films, the students delineated relationships between social events. Blocking the composition course with the others gave the students' writing assignments specific direction in both form and content. The design of "Advanced Reading and Study" complemented the other courses in its integration of the teaching of reading and study skills. Experimental and control populations were compared in terms of placement scores, majors, academic success, retention, and evaluation of the college experience. Project success was evidenced by a higher percentage of A's and B's, an increase in retention, and a greater satisfaction with their majors and the college among the blocked group. Students who felt unfairly placed in developmental courses were given special attention. (AYC)

ED 168 618 JC 790 192
McElroy, Linda Jeanne Rupp
Community College Services for Hearing Impaired Students in Arizona.
Pub Date—13 Jan 79
Note—25p.
Pub Type— Reports - Descriptive (141) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Aurally Handicapped, Community Colleges, Counseling Services, Deaf, Deaf Interpreting, *Handicapped Students, *Junior Colleges, Junior College Students, Sign Language, Special Classes, *Special Services, *Student Personnel Services, Tutoring
Identifiers—*Arizona, Note Taking
In view of the lack of information on special programs for the hearing impaired in Arizona community colleges, a survey, based on the exemplary special programs at the University of Arizona and at Pima Community College, was sent to the 15 community colleges in the state. The survey investigated the following areas: the program supervisor, the number of hearing impaired students at the school, methods used in attracting and informing students with regard to special services, whether or not services such as interpreting, notetaking, tutoring, special counseling, and sign language courses were offered, how many students were involved in each of the programs, and future plans. Most (i.e., six) of the nine colleges that provided useful information were able to provide statistical information about their hearing impaired students; two of these, however, had no such students. Students at five colleges utilized interpreters; notetakers were provided at four schools; five schools offered tutorial services; one college offered special classes for the hearing impaired; special counselors were provided by three colleges; and three colleges had sign language courses. Recommendations based on the study are included and appendices contain a list of consultants at the colleges surveyed, the survey instrument and results, and a bibliography. (MB)

Descriptors—Administrative Policy, Administrator Role, *Apprenticeships, Community Colleges, *Cooperative Education, Coordinators, Federal Regulation, *Junior Colleges, *Program Administration, Program Coordination, State Legislation, *State Standards, *Statewide Planning, Trade and Industrial Education, Vocational Education
Identifiers—Hawaii
This guide was prepared to assist college administrators and apprenticeship coordinators administering the apprenticeship training programs of the University of Hawaii's community colleges. Apprenticeship is defined as training for those occupations commonly known as skilled crafts or trades which require a wide and diverse range of skills and knowledge. Areas outlined in the guide are: (1) the advantages which apprenticeships offer to the individual, the employer, and to society; (2) those state and federal organizations which are concerned with apprenticeships; (3) criteria for and a list of apprenticeable occupations; (4) state and federal recommendations and requirements in the areas of provisions, apprenticeship classifications, the apprenticeship agreement, state apprenticeship standards, and equal employment opportunity; and (5) the role of the apprenticeship coordinator, which is considered in terms of his legal responsibilities, responsibilities related to instruction, suggestions for the establishment of training programs, record and report documentation, apprentice evaluation, and program evaluation. A glossary of terms is included and appendices contain sections from the apprenticeship agreement and from federal and state laws, rules, and regulations. A brief bibliography is also included. (MB)

ED 168 620 JC 790 195

College Wide Former Student Follow Up Study.
Pub Date—8 Apr 79
Note—19p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April 8-12, 1979)
Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Academic Aspiration, *Achievement, College Majors, Community Colleges, Employment Patterns, *Junior Colleges, *Occupational Aspiration, *Participant Satisfaction, Relevance (Education), Student Characteristics
Identifiers—*Student Objectives
A follow-up study was undertaken at Lansing Community College (Michigan) to determine whether former students had achieved their educational objectives, to collect assessment data on instruction and support services, and to identify the impact of college attendance on employment status. A stratified sample of 3,000 non-returning students was mailed a questionnaire. The data were analyzed by educational objective and completion of that objective. Of those who responded, 41% indicated an employment-related objective, 24% a transfer objective, and 12% indicated personal interest as an objective. A majority indicated their objective had been accomplished. Of those with employment objectives, 67% indicated that they were currently employed in an area related to their training. Former students reflected a positive assessment of the college's support systems, instruction, and academic courses. Of the support services, the planetarium programs, classroom and laboratory equipment, and the library facilities received the highest ranking. The general academic courses affected these students most in the areas of improved communication skills, increased feelings of self worth, and an increase in understanding others. A discussion of the mechanics of administering the survey and analyzing the results is also included. (Author/MB)

Garlock, Victor P.
Faculty Development at the Community College: Who Participates.
Pub Date—8 Apr 79
Note—16p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, April 8-12, 1979)
Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Attendance Patterns, College Faculty, Community Colleges, Department Directors (School), Effective Teaching, *Faculty Development, Inservice Teacher Education, *Junior Colleges, Motivation, *Participant Characteristics, Student Evaluation of Teacher Performance, Teacher Improvement, *Teacher Participation, *Teacher Seminars, Teacher Workshops
A dramatic increase in faculty development efforts at Cayuga County Community College (Auburn, New York) followed a change in administration. The three kinds of faculty improvement programs available were: (1) faculty participation projects such as workshops and seminars on professional growth (there were five during 1978); (2) instructional assistance projects in which faculty worked with specialists in areas such as audio-visual media and individualized instruction in a new learning skills center and in the audio-visual center; and (3) traditional practices such as granting sabbatical leaves and course reductions to encourage continued education either by taking university courses or by engaging in on-campus "improvement" projects. In light of the increased development activities, research was conducted to determine who among the faculty were participating. The total number of seminars or workshops participated in by each faculty member was the measure of their involvement. Comparing involvement with student ratings of teacher performance, it was found that those who were already competent participated most frequently. Participation was heaviest among untenured faculty, that is, among those whose job security was threatened. A higher rate of participation was found among department chairpersons, and a slightly higher participation rate among the general faculty as compared to the "skills subject" faculty. (MB)

Owings, Thomas G.
Assessing Public Opinions and Attitudes Through Citizen Surveys.
Pub Date—8 Apr 79
Note—12p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, April 8-12, 1979)
Pub Type— Speeches/Meeting Papers (150) — Guides - Non-Classroom (055)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Community Attitudes, *Community Surveys, *Institutional Research, Interviews, Measurement Techniques, *Public Opinion, Questionnaires, *Research Design, *Research Methodology, Research Needs, Research Problems, Research Skills, Research Tools
Attitude and opinion research requires considerable planning, careful design of survey procedures and sampling techniques, and practical ways of collecting, analyzing, and reporting results. The following suggestions are based on the extensive public opinion research conducted by the University of Alabama. (1) Decide what specific problem is to be solved and whether a survey is the best way to solve it. (2) State the survey objectives clearly in writing. (3) Define the survey population. (4) Allow enough time to plan, conduct, and report the survey. (5) Identify and eliminate biases. (6) Be aware of politics involved. (7) Do not hesitate to ask others for assistance. (8) Budget costs to assure an accurate survey. (9) Recognize survey limitations. (10) Provide for "no opinion" responses. (11) Determine advantages and disadvantages among mailed questionnaires, personal interviews, and telephone surveys. (12) Develop the survey instrument in terms of the type of survey and the budget. (13) Determine the survey procedure in terms of the entire population or a random sample. (14) Design a brief, specific, concise questionnaire using input from those to be surveyed. (15) Pre-test the questionnaire with groups similar to those to be surveyed. (16) Provide a stamped, self-addressed envelope with mailed questionnaires. (17) Tabulate the results as soon as possible and release them. A selected bibli-

ography is appended. (MB)

Descriptors—Adult Education Programs, College Curriculum, Community Colleges, *Courses, *Curriculum Problems, Developmental Programs, *Junior Colleges, Junior College Students, *Relevance (Education), *Social Sciences, Student Needs, Transfer Programs, Vocational Education
Identifiers—Curriculum Balance, Survey Courses
A primary objective of this study was to identify the extent to which different areas within the social sciences (i.e., anthropology, economics, history, interdisciplinary social sciences, political science, psychology, social/ethnic studies, and sociology) are presented in the two-year college curriculum. Information on course offerings in each of these social science areas were obtained from two nationwide studies of approximately 175 two-year colleges each conducted by the Center for the Study of Community Colleges during 1977 and 1978. Results show that over 90% of the colleges offered at least one course in each of the following five areas: sociology (100%), economics (99%), psychology (99%), political science (93.8%), and history (92.1%). Percentages in other areas were 54% in anthropology, 40% in interdisciplinary social sciences, and 20% in social/ethnic studies. In terms of course availability to different student populations, the study revealed that: (1) other than the general introductory survey courses, the range of transfer-oriented courses was very limited; (2) with very few exceptions, social science courses designed especially for occupational students were not available; (3) a low percentage of colleges offered a general introductory social science course for continuing education students; and (4) still fewer social science courses were designed for developmental education students. Jones, Howard J. Smolen, Diane L.
Lansing Community College Reading Study.
Pub Date—10 Apr 79
Note—13p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April 8-12, 1979)
Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Academic Achievement, Community Colleges, Courses, *Grade Prediction, Grades (Scholastic), *Junior Colleges, Performance Factors, Persistence, Predictive Ability (Testing), Predictive Measurement, *Predictor Variables, *Reading Ability, Reading Level, Reading Tests
Identifiers—*Reading Progress Scale (Carver)
The Reading Progress Scale (RPS) was administered to 4,714 students from 46 courses ranging from accounting to welding at Lansing Community College in two studies conducted from fall 1975 to spring 1976. The scale which assesses reading skills sought to answer two research questions: (1) is the RPS a good indicator of student persistence in a common course?; and (2) for those students who receive a grade of 0=F through 4=A (such students were defined to be persistors), is the RPS a good predictor of course grade? In the pilot study the RPS was seen as a good predictor of student persistence in only one of 46 course groups–basic composition. Significant correlations were found between the RPS and course grade in 17 of the 46 courses. Scatter plots indicating the nature of the relationship between RPS and course grade were nearly circular, suggesting that the RPS should not be used as a linear predictor of course grade. In the second study only 13 of 40 course groups showed a relationship between RPS and course grade. The data thus suggest that the RPS score and course grade are not consistently related. There exists little evidence in educational research to indicate that a single variable, such as reading level, should be a good predictor of either student persistence or academic performance. (MB)

Building the Meaningful Vocation into Career. Perspectives on the Church and the Community College, Paper Number Fifteen.
United Ministries in Higher Education, Portland, Oreg.
Pub Date—[79]
Note—48p.
Available from—United Ministries in Higher Education, 848 Pittock Block, Portland, Oregon 97205 ($1.50)
Pub Type— Opinion Papers (120)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Career Awareness, *Career Choice, Career Development, Career Planning, Church Role, Community Colleges, Decision Making, *Individual Development, *Junior Colleges, Occupational Choice, *Religious Factors, *Self Actualization, Self Concept
The integration of religious and educational perspectives on "career" in a life work/career planning process would enable persons to exercise their talents, skills, and spirit through meaningful jobs. If career is understood to mean a course of continuing progress, then vocation becomes those meanings which a person makes or discovers throughout a lifetime of working and living. The vocation which a person must anticipate is not only a progression of occupations, it is also the way a person derives meaning repeatedly from non-occupational as well as occupational activity. The following topics are central to the clarification of the concept of vocation, (1) the swing from an occupational to a career psychology; (2) development of a decision-making framework with two aspects–anticipation, which involves problem exploration, crystalization, choice, and clarification, and accommodation, whose stages are induction or initiation, reformation, and integration of self and group; (3) development of self awareness in decision making through "I" power and language; and (4) the concepts of intuition and evolution and their role in structuring reality. This model of vocation has implications for personal living as well as for the community colleges in their development of career guidance and educational programs. A bibliography is included. Descriptors—Adult Learning, Adult Students, College Role, Community Colleges, Computer Assisted Instruction, *Educational Objectives, Educational Technology, *Individualized Instruction, *Junior Colleges, Mastery Learning, *Nontraditional Students, *Performance Based Education
Identifiers—Student Objectives
If colleges were to accept the mission of helping each student to learn as much and as well as possible, the organization of education would change. In that the three fundamental practices of education–classes, semesters, and grades–are counterproductive to the goal of maximizing student learning and exist only to meet administrative and fiscal requirements, they would no longer serve as the bases of education. Individualized instruction, such as that currently demonstrated in the computerized systems at Miami-Dade Community College, would free instructors to do those tasks which only humans can do–understanding individual learning problems and offering personal encouragement–and would force administrators to find new measures of learning productivity on the parts of both student and teacher. The goal of maximum learning for individuals is best captured by the concept of mastery learning, which makes achievement a constant, and which has both cognitive and affective advantages. Another issue in this view of educational change is that of the adult, non-traditional student, who is more self-directed, more pragmatic, and more experienced than the younger student. Treating these adult students like adults would involve acknowledging their orientation toward competence improvement, and individualizing instruction and curriculum. (MB)

Descriptors—*Access to Education, Administrative Organization, Board of Education Policy, *College Role, Community Colleges, *Educational Finance, Financial Support, *Governance, Governing Boards, *Junior Colleges, State Aid, State Boards of Education, State Legislation
Identifiers—*Colorado
The 27-member Blue Ribbon Community College Study Commission, representing a variety of groups within the educational community, assessed the effects of the statutes, goals, policies, and practices under which Colorado community colleges have operated with the purpose of recommending needed changes with respect to the following ten years. Through the use of questionnaires, interviews, and discussion groups, five major issues were identified: (1) community college role and mission, (2) access to community colleges in Colorado, (3) the State Board for Community Colleges and Occupational Education, (4) state system community college councils and their role in the future, and (5) current and future practices in funding, financing, and budgeting. Findings and recommendations are reported in each of these areas which point out weaknesses and problems revealed by the study, and suggest improvements and changes that should be made in policy, governance structures, and legislation to address these problems. Appendices contain outlines of Senate Bills 62 and 110 which provide for the reorganization of the structure of postsecondary education in the state and separate the functions of the State Board for Community Colleges and Occupational Education among two distinct Boards. CETA Comes to College.
California Community and Junior Coll. Association, Sacramento.
Pub Date—14 Nov 78
Note—41p.
Pub Type— Reports - Research (143) — Reports - Descriptive (141)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Advisory Committees, Agency Role, Community Colleges, Employment Opportunities, *Employment Programs, Equal Opportunities (Jobs), *Federal Legislation, *Government School Relationship, Interagency Coordination, Job Development, Job Training, *Junior Colleges, Local Government, *Program Administration, Youth Employment
Identifiers—California Prime Sponsors, *Comprehensive Employment and Training Act 1978, United States
After outlining the purposes and approaches of the eight titles contained within the Comprehensive Employment and Training Act (CETA), and reviewing local, state, and federal roles in implementing CETA programs, this paper presents the results of a survey of selected California Prime Sponsors and community colleges with CETA programs. The study focused on: the composition and functions of the advisory board; administrative provisions for coordinating programs; Sponsor contracts; liaison with employment development departments; and the programs themselves. The study revealed many different ways to establish and operate a CETA program and provide for local, interagency involvement, but stressed the importance of close communication between the management staff of all agencies so that CETA regulations and the potential for conflict with college policies can be fully understood. There were numerous training programs which segregated CETA employees/students from non-CETA participants, though the study revealed that such segregation did not serve the legislative intent as effectively. A final conclusion of the study stressed the need for legislative action in order for community colleges to participate fully in CETA training efforts and expand their service to youth who are out of school, but under 18. Appendices

contain a glossary, survey questions, and a bibliography. (MB)

Descriptors—Community Colleges, *Educational Needs, *Junior Colleges, Mathematics Education, Mathematics Instruction, *Mathematics Teachers, *Needs Assessment, Role Perception, *Teacher Attitudes, Teacher Characteristics, *Teacher Education, Teacher Education Curriculum, Teacher Responsibility

About 10% of the approximately 6,000 two-year college mathematics teachers were surveyed to assess their views on graduate training needs in their field. A profile of these teachers revealed that two-thirds were less than 45 years of age, all but 6% held masters degrees, 22% were women, and over 60% had high school teaching experience; typically they spent 16 hours per week in the classroom and an additional 15 hours per week on other professional activities. They expressed considerable interest in applied mathematics and felt their teaching background was least adequate in that area. They felt their outstanding problem to be teaching unmotivated students. In terms of desirable professional qualities, the teachers believed it to be essential to think of oneself primarily as a teacher, to be able to move into new areas of teaching as the curriculum evolves, and to be willing to take on remedial courses. This can be contrasted with their perceptions of which activities were being rewarded by their colleges; these included administration, taking courses, and obtaining advanced degrees. Recommendations for the content of graduate programs included teaching internships, problem solving, and courses on methods for remedial mathematics. Continuing education interests included attending short courses and studying math applications to science and engineering. The survey instrument is included. (MB)

Identifiers—Four One Four Schedules

In order to determine whether there were compelling reasons for Schenectady County Community College (SCCC) to change its quarter calendar, and which calendar would be most appropriate to the college and most responsive to the problems that made the change seem desirable, previous calendar change studies were reviewed and administrators of colleges that had made calendar changes were consulted. The types of calendars initially considered were: (1) semester; (2) early semester (the fall semester begins in August and ends before Christmas); (3) trimester (three semesters over 12 months); (4) quarter; and (5) four-one-four (division into four months-one month-four months). Only the quarter and semester systems were considered feasible for SCCC. Issues related to calendar changes include curriculum conversion and related concerns of credit hours and flexibility; comparative academic success rates in various calendars; enrollment patterns as reflected in student program change and the effect on part-time students; and transferability of courses to other colleges. Significant calendar change studies were conducted at Kent State, Cleveland State, University of Akron, Miami University of Ohio, Chabot College, and College of the Redwoods. Advantages and disadvantages of each calendar plan have been outlined by the "Handbook on Undergraduate Curriculum," and are summarized in this report. Results of the study included a recommendation to remain with the quarter system. (MB)

Descriptors—Community Colleges, *Curriculum Development, Equipment, Facility Requirements, Heating, Job Skills, Job Training, *Junior Colleges, Occupational Information, Program Costs, Program Planning, *Solar Radiation, *Technical Education, *Technical Occupations
Identifiers—*Solar Energy

The Solar Energy Task Force Report summarizes data, information, and discussions focusing on solar space and water heating applications. The report is intended to fill a need for curriculum and course development and direction for technical training programs, especially in vocational/technical schools and community colleges. It addresses curriculum suggestions; jobs, tasks, and skills for which training is needed; and equipment recommendations necessary in establishing a solar training center. In general, technical training which produces individuals strictly known as solar technicians, mechanics, installers, etc., is not advocated as the demand for purely solar jobs is uncertain. As such, solar specialization programs at the community college level should be added only in response to the needs of the community. Specific job tasks and functions are outlined for the following solar-related jobs: (1) sales; (2) estimator/designer; (3) installer; (4) electrician (not necessarily trained in the solar program); (5) supervisor; and (6) maintenance service. Examples of existing solar curricula and programs are offered, equipment needs are considered, and cost considerations in setting up a solar training laboratory are outlined. A reading list for solar energy is included. (MB)

Descriptors—*College Role, Community Colleges, *Definitions, *Educational Objectives, Educational Philosophy, *General Education, *Junior Colleges, Student Needs, Teacher Responsibility, Transfer Policy

In view of the many definitions and goals of general education found in the literature, it can be concluded that there is a lack of agreement on what is and what should be included in general education. A number of dominant forces in American colleges and universities have been responsible, in very large part, for the difficulties of community college general education. These include the reluctance of four-year institutions to accept general education transfer credits, the fact that research has assumed greater importance than teaching, and that professional and vocational programs have been structured to permit little, if any, opportunity for student participation in general education. Internally, community colleges have been too concerned with establishing an identity and in so doing have structured departments based on disciplines patterned on existing systems in four-year institutions, rather than putting their full innovative energy and interest into meeting the demands of general education students. To be a comprehensive education unit, the community college must not only retain the function of general education, but must also regain the confidence of the public in its ability to do so. The process of providing general education is complex-an institution must have stated goals and be devoted to the task, instructors must be found who are willing and able to teach, and students must find that it is relevant and worthwhile to learn. (MB)

Descriptors—Capital Outlay (for Fixed Assets), Community Colleges, *Educational Finance, Enrollment, Expenditure Per Student, Expenditures, *Financial Support, Fiscal Capacity, *Junior Colleges, Part Time Students, *Resource Allocations, State Aid, Student Costs, Tax Support, Unit Costs
Identifiers—*New Jersey

Financial information and an analytic narrative concerning the New Jersey community college system are presented for the following major areas: (1) enrollments and educational cost per full-time equivalent student; (2) sources of current revenue; (3) educational and general expenditures; and (4) fixed assets and capital data. The New Jersey county colleges receive funds primarily from four sources-the state, counties, student tuition and fees, and miscellaneous 'other' income. In 1978, the total revenue from these sources was $134,764,000 presenting an increase of 13.2% over 1977. The total amount of state aid increased by 39%, while the amount of county support increased by 2%. The educational cost per full-time equivalent student increased 7% from FY 1977 to FY 1978. The number of full-time equivalent students appeared to be stabilizing, though the growth in the number of part-time students was significant. Educational and general expenditures rose 10% in 1978. The average percentage expenditure in each of the educational and general categories was as follows: instruction, 46%; general expenses and administration, 24%; student services, 8%; extension and public services, 4%; library, 5%; and plant operation and maintenance, 13%. Data tables summarize the sources and changes in revenue, enrollment, distribution of expenditures, fixed assets, capital authorizations, and complete and comparative fiscal details by college for 1976 through 1978. Descriptors—Board of Education Policy, Budgeting, Community Colleges, *Educational Accountability, *Educational Finance, Educational Objectives, Educational Planning, Educational Resources, *Financial Policy, Financial Support, Fund Raising, Governance, *Junior Colleges, School Calendars, School Size, State School District Relationship, *Statewide Planning, Tuition
Identifiers—*California

A proposed California community college long-term finance plan is presented, which outlines finance principles in the areas of accountability, resources, sources of support, and support techniques. A planning and accountability process is proposed to meet existing state-level concerns for accountability while maintaining local decision-making and providing districts with a useful planning tool. It is proposed that use of tuition be rejected and that existing fees be maintained, but adjusted for individuals' ability to pay. Other major recommendations include (1) liberalization of restrictions on the interdistrict attendance of students; (2) extending the results of the flexible calendar pilot to all districts; and (3) revising the timing of budget planning so that it fits more effectively with legal requirements for hiring and layoff of staff. Appendices contain a list of finance task force and study group members, a general description of the various components of the planning and accounta-

bility process, recommendations for calendar and course scheduling, discussion of optimum college size, and reviews of interdistrict attendance and student fees. (Author/MB)

Descriptors—*Basic Skills, Communication Skills, Community Colleges, Compensatory Education Programs, *Dropout Prevention, *Educationally Disadvantaged, *Junior Colleges, Nontraditional Students, Performance Based Education, Persistence, *Remedial Programs, Skill Development, Team Teaching, Vocabulary Skills

In fall 1978, Sacramento City College initiated the Higher Education Learning Package (HELP) to promote the success and retention of students with basic skill deficiencies while mainstreaming them into regular courses. Students work with instructors and tutors in small groups and on a one-to-one basis. Using an integrative team teaching approach, instruction builds on student experience, and progress is measured in terms of established competency criteria. Students commit themselves to a two-package one-year program, taking one package each semester. Package 1 consists of English (written communication skills), psychology (personal relations), mathematics (basic arithmetic), and developmental reading. Package 2 consists of speech (oral communication skills), social science (American institutions), and human development (basic college skills such as note-taking and career planning). By the end of the year students should have completed 24 units towards an associate of arts degree. During the first year, attrition among the two groups of 39 and 45 students each was approximately 25% and 22% respectively. External factors, over which the college had no control, were responsible for many students leaving the program. Another factor influencing attrition was that many students entered the program with skills below the sixth grade level around which the program was designed. (MB)

Student Development: Mainstream or Penumbra?

Pub Date—[78]

Note—28p.

Pub Type— Opinion Papers (120)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Access to Education, Ancillary Services, Community Colleges, Compensatory Education, *Curriculum Development, *Developmental Programs, *Educational Trends, General Education, *Junior Colleges, Nontraditional Students, Program Development, Remedial Instruction

Developmental studies programs are a reality in many colleges and universities, and where they do not now exist, the likelihood of their presence in the near future is high. Student developmental programs are a key ingredient within institutional resources to improve chances of success for students in developmental studies. Student development is not a student personnel program. It is a set of education practices, grounded in developmental education theory, designed to marshal all available resources within an institution into a process which will produce a predictable result–self-sufficiency in students. Both developmental studies and student development programs should move from the penumbra of college curricula to the mainstream. Pivotal issues which bear upon the probability of success in developmental studies include creating a condition of critical mass, the significance of residential settings, and the centrality of self-sufficiency in developmental education. Student development-/developmental studies programs which can be adapted to specific campus environments and characteristics of the developmental studies program and its students include: (1) the Self-Assessment Laboratory, (2) the Life Planning Center, (3) the Curriculum Planning Laboratory, (4) the Human Development Curriculum, (5) an Interdivisional Counseling Network, and (6) the Environment Assessment Laboratory. Freshman English Programs in Alabama Junior Colleges. Leadership Program's Monograph Series, Report Number Two.

Auburn Univ. Junior Coll., Ala.

Pub Date—[73]

Note—39p.

Pub Type— Reports - Research (143)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Class Size, College Faculty, College Freshmen, Community Colleges, *Composition (Literary), *English Curriculum, *English Departments, *English Instruction, Evaluation Methods, Grades (Scholastic), *Junior Colleges, Remedial Courses, Remedial Programs, School Holding Power, Student Evaluation of Teacher Performance, Student Placement, Student Teacher Ratio, Teacher Qualifications, Teaching Load

Identifiers—*Alabama

Surveys eliciting descriptive information on English programs were sent to the deans of instruction, department chairpersons, and faculty in 21 Alabama community colleges; 17 colleges provided institutional data, 19 of 19 department chairpersons returned the survey, and 80% of the English faculty responded. The survey requested information on: (1) average number of sections taught per full-time faculty member; (2) average number of preparations per full-time faculty member; (3) average faculty teaching load; (4) average student load per quarter; (5) average section size for composition, literature, "not separated," remedial reading, and remedial writing courses; (6) support facilities available to the department; (7) placement procedures; (8) remedial English programs and their emphases; (9) regular English programs, their content, and methods of instruction; (10) teacher evaluation of students and student evaluation of teachers; and (11) grade distributions and student retention. Areas of concern emerging from the study include a lack of a consistent pattern of placement, the narrow transfer-orientation of English programs, a lack of sufficient data on retention, and the inadequate training of English teachers who indicate that they have received no graduate level instruction in composition, in the teaching of composition, in the applications of grammar to composition, or in motivational factors in teaching non-verbal students. Attitudes of Community College Administrators Toward Management-By-Objectives.

Pub Date—12 Apr 79

Note—29p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April 8-12, 1979)

Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143) — Numerical/Quantitative Data (110) ()

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Administrative Change, *Administrator Attitudes, Administrator Responsibility, College Administration, College Planning, Community Colleges, Decision Making, Employer Employee Relationship, *Junior Colleges, *Management by Objectives, *Organizational Communication

Administrators from 32 public two-year community colleges were surveyed to reveal the extent to which Management by Objectives (MBO) programs affected organizational conditions; 200 questionnaires (71%) were returned. Approximately 65% of the administrators indicated that the MBO system did not change the amount of formal contact between superior and subordinate, though the administrators were generally pleased with the amount of change. In response to whether superiors encouraged suggestions during joint goal-setting meetings, 83% indicated that suggestions were encouraged. A slight majority perceived an increase in the amount of job responsibility following joint goal-setting meetings with their superiors. Similarly, 57% perceived an increased role in decisions within the administrative unit. Though a slight majority (54%) indicated that MBO had contributed positively to communication within administrative units, negative effects on administrative communication were identified in relation to communications across division lines. The following conclusions were drawn: (1) MBO programs can increase formal contacts between superior and subordinate; (2) they encourage suggestions from subordinates and are likely to result in a higher percentage of suggestions being accepted by superiors; and (3) MBO can clarify the responsibility of the administrator and increase feelings of taking a greater part in decision making. Stull, William A.

The Role of the Cooperative Education Director in the Two-Year College.

Pub Date—78

Note—13p.

Pub Type— Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Administrator Attitudes, Administrator Responsibility, *Administrator Role, Community Colleges, *Cooperative Education, *Junior Colleges, Program Administration, *Role Perception, Teacher Attitudes, *Vocational Directors

In order to determine the actual and ideal role of the cooperative education director as perceived by the director, immediate supervisors, and faculty, a random sample was drawn from 474 two-year colleges with cooperative education programs. Responses were received from 73 directors (77%), 54 supervisors (84%), and 38 faculty members (66%). The questionnaire asked respondents to rank 44 role behavior activity statements in terms of their actual and ideal importance. In terms of the directors' actual role, it was found that supervisors believed that directors were more involved with recruitment and selection of employers than did directors; and that faculty perceived directors as emphasizing proposal preparation, attendance at meetings and conferences, and student assignment more than directors believed was the case. On 40 of the 44 activity statements, the three groups expressed similar ideas on ideal behavior; however, supervisors would ideally involve directors with employer evaluation, conducting surveys of prospective students, and with the affirmative action role more than the directors' perceptions indicated would be ideal. The mean ideal score was significantly higher than the mean actual score on 36 of the 44 activity statements, indicating that directors were not satisfied with their own performance; however, perceptions held by directors as to their ideal role may be unrealistic in terms of the amount of time available to the director. Schorzmann, Eugene F.

An Analysis of the Equitability of the Full-time Equivalent Enrollment Formula for the Distribution of State Aid Among Iowa Community Colleges.

Pub Date—79

Note—204p.; Ed. D. Dissertation, Nova University

Pub Type— Dissertations/Thesis (040) — Reports - Research (143)

EDRS Price - MF01/PC09 Plus Postage.

Descriptors—Average Daily Attendance, Average Daily Enrollment, Community Colleges, Educational Finance, *Enrollment, *Junior Colleges, Mathematical Formulas, Resource Allocations, *State Aid, Unit Costs, Vocational Education

Identifiers—*Full Time Equivalent Enrollment, Iowa, *Reimbursable Contact Hours

The full-time equivalent enrollment (FTEE) has been a significant factor to Iowa's 15 area community colleges for cost analysis, production comparisons, and for the distribution of state aid. The FTEE formula calculates units of production according to the ratio of reimbursable contact hours (RCH) to total contact hours generated by student attendance. For this study, annual budget data from all 504 vocational programs in the Iowa community colleges were analyzed to test the hypothesis that there was a significant difference in the mean RCH of programs among the 15 merged area colleges, caused by allowing flexibility in formula application when calculating FTEE. The results showed statistical differences in the mean percents of RCH of vocational programs among the colleges. A literature review revealed that the Florida and Texas community college systems had existing funding methodologies that were based on reliable units of measurement. It was concluded that: (1) the funding methodology used to distribute state aid moved away from program production accountability when cost-based funding was adopted for 1979; (2) the FTEE formula was an unreliable unit of measurement; and (3) the student contact hour, credit hour, or FTEE were acceptable provided that there was a standard definition for each. Appendices contain

data analysis forms plus the Florida and Texas models. (Author/MB)

Diverse Dimensions of a Two-Year College Guidance Program.
Pub Date—79
Note—25p.
Pub Type— Reports - Descriptive (141)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Career Awareness, Community Colleges, Emotional Development, *Females, *Guidance Objectives, *Guidance Programs, *Junior Colleges, Peer Counseling, Private Colleges, *Student Testing, *Vocational Counseling
Identifiers—Harcum Junior College PA

The guidance program at Harcum Junior College, a two-year, private, independent college for women, is incorporated into its educational programming. The measurement and interpretation of student placement test information is an essential component of the guidance function, as it assists students in making decisions and examining their progress in reference to their aspirations and goals, and it offers important information to assist faculty guidance advisors in counseling students. The comprehensive guidance service at Harcum embraces the following dimensions: (1) testing the reading ability, critical thinking, study habits, and personality of freshmen; (2) individual counseling regarding social, personal, and educational/vocational problems; (3) a rotating counselor available during evenings; (4) group counseling; (5) a team approach to counseling; (6) special interest speakers; (7) referral to outside agencies; (8) the Peer Resources Program; and (9) the Career Resources Center. All counseling personnel are provided with information on typical problems, and with suggestions for making interviews more fruitful–ways to put the counselee at ease, ways of winning confidence, and ways of best conducting interviews. (The Career Resources Center and its importance, and eleven paths to emotional maturity are discussed in detail.) (MB)

Report of the Distribution of Financial Assistance to Students in Florida's Community Colleges 1977-78.
Florida State Dept. of Education, Tallahassee. Div. of Community Colleges.
Pub Date—Mar 79
Note—23p.
Pub Type— Reports - Research (143) — Numerical/Quantitative Data (110) ()
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Black Students, Caucasian Students, Community Colleges, Enrollment Influences, *Ethnic Groups, Females, *Junior Colleges, Males, Scholarship Loans, *Scholarships, *Student Financial Aid, *Tuition Grants, Work Study Programs
Identifiers—Basic Education Opportunity Grants, *Florida

The distribution of financial aid funds to students attending Florida community colleges is summarized in data tables outlining the following: (1) financial assistance to students, 1977-78, by number of awards, dollars awarded, and average amount per award for specific categories; (2) financial aid by race/ethnic group; (3) comparison of enrollment to financial aid distribution; (4) financial aid by sex; (5) assistance by college and major aid group; and (6) trends in the distribution of total financial assistance, 1974-1975 through 1977-1978. Findings of the study include the following: the number of awards (89,912) exceeded the unduplicated recipients (66,306) indicating that a large number of students received more than one award; 70% of the aid dollars were for "Grants" and 14% for "Loans"; Blacks received 36% of all awards and 41% of all dollars; 39% of all "Grants" went to Blacks and 83% of all "Scholarships" to Whites; Blacks made up 14% of the college enrollment, but 36% of all aid recipients were Blacks, while Whites made up 78% of the college enrollment and 53% of all aid recipients were Whites; 57% of the total recipients were females and they received 64% of all aid dollars; and in all aid categories except "Loans," dollar amounts increased, as did average amounts per recipient. The total dollar amount has increased over the years with the greatest increases in the "Grants" category. (Author/MB)

Armstrong, David F.
Tentative Ten-Year Enrollment Projections Fiscal Years 1980-1989: A Supplement to the FY 1980 Capital and Operating Budgets of Montgomery Community College.
Montgomery Coll., Rockville, Md. Office of Institutional Research.
Pub Date—Nov 78
Note—99p.; Best copy available
Pub Type— Numerical/Quantitative Data (110) ()
EDRS Price - MF01/PC04 Plus Postage.
Descriptors—*College Bound Students, College Graduates, Community Colleges, Credits, Enrollment Projections, *Enrollment Trends, High School Students, *Junior Colleges, Nonresident Students
Identifiers—*Maryland, Stop Outs

Extensive tables, figures, and data summaries outline the following components of tentative (as of November 1978) 10-year enrollment projections (1980-89) for Montgomery College (Maryland): (1) high school graduates–immediate enrollment, delayed enrollment, early graduations, private and parochial school graduations, and early placement students; (2) out-of-county and out-of-state residents; (3) returning matriculated students; (4) special or non-matriculated students; and (5) off-campus or extension credit students. Data is also provided for individual campus enrollment, student credit hour load, non-credit or credit-free short courses, and fiscal year 1979-80 estimates of number of students and number of credit hours expected. The model upon which the projections are based consists of a system of linear equations, and a number of sub-units of these which are related to a sector of the college's total student body. Each sub-unit allows for external information in a data matrix; past experience derivations in a factor matrix; professional judgment and reasonable expectations that are not reflected in past history in a prognostication matrix. High School Juniors: Their Career Aspirations, Educational Plans, and Perceptions of Howard Community College.
Howard Community Coll., Columbia, Md.
Pub Date—Dec 78
Note—120p.; Some charts may be marginally legible
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC05 Plus Postage.
Descriptors—Academic Aspiration, College Bound Students, *College Choice, Community Colleges, Females, *High School Students, *Institutional Research, *Junior Colleges, Males, *Occupational Choice, Student Attitudes, Student Characteristics, *Student Recruitment
Identifiers—*Student Objectives

In order to be able to more effectively serve the Howard County high school graduate, Howard Community College (HCC) surveyed high school juniors in spring 1978 as to their career interests and educational plans, their attitudes toward the college and its recruitment efforts, and their reading and listening habits (for advertising purposes). Responses to the survey came from 1,119 students or 61%. Some of the findings include the following: (1) nearly all career interests of juniors could be accommodated through HCC major programs; (2) 10% of the students planning college attendance planned to attend HCC; (3) students were dissatisfied with the variety of courses and programs at HCC; (4) students' attitudes toward the college were moderately positive; and (5) college recruitment efforts were inconsistent and inadequate around the county. Recommendations to improve attitudes, recruitment efforts, and the college's success in enrolling recent high school graduates are included in this report. Appendices contain the survey instrument, and attitudinal response items tabled by specific high schools, sex, HCC attendance plans, and adequacy of recruitment information rated by high schools. (Author/MB)

Financial Support for Community Colleges: A Bibliographic Summary with Abstracts.
Maricopa County Community Coll. District, Phoenix, Ariz.
Pub Date—20 Apr 79
Note—32p.; Prepared for the Presidents' Council of the Arizona Community Colleges
Pub Type— Reference Materials - Bibliographies (131)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Budgeting, Community Colleges, Educational Economics, *Educational Finance, *Financial Support, *Junior Colleges, Statewide Planning

This annotated bibliography, arranged alphabetically by title, cites ERIC information analysis products; state annual fiscal reports, budget recommendations, and descriptive reports; articles; project reports; case studies; position papers; and monographs. Topics covered by these materials include: issues and trends in community college financing, cost per student studies, tuition and tuition-free schools, financing specific projects, interstate comparisons, methods of financing, funding policies, statewide planning, and economic impacts. Many of the documents cited are in the ERIC system and ERIC Document Numbers are provided. (AYC)

Disadvantaged Student Grant Program for Illinois Public Community Colleges, Fiscal Year 1978–Fiscal Year 1979.
Illinois Community Coll. Board, Springfield.
Pub Date—Mar 79
Note—64p.; Parts may not reproduce clearly due to light type
Pub Type— Reports - Research (143) — Reports - Descriptive (141)
EDRS Price - MF01/PC03 Plus Postage.
Descriptors—*Adult Students, Age, College Credits, Community Colleges, *Developmental Programs, *Educationally Disadvantaged, Ethnic Groups, Females, Financial Support, *Grants, *Junior Colleges, Males, Remedial Programs, Student Characteristics, Student Financial Aid
Identifiers—*Illinois

Thirty-eight public community college districts in Illinois have Disadvantaged Student Grant Programs operating on 50 individual campuses. State funds are appropriated annually to the Illinois Community College Board for distribution to the districts. The colleges are required, by contract, to provide a local matching effort at least equal to the state funds received. Part I of this report contains selected anecdotal accounts of unique, exemplary achievements of persons or groups served by the Disadvantaged Student Grant Program. Part II includes data tables on funding for 1978; comparisons of funding for 1977 and 1978; numbers of students involved by racial/ethnic origin, sex, and age; and types of program activities provided by the grant. Part III contains narrative reports, by district, as submitted by the director or dean responsible for the programs regarding the kinds of activities provided, client groups served, and nature of the outcomes. These reports also include information on amount of state and local funds budgeted, contact persons, number of persons served, and total contact hours. Part IV takes a look at FY79 and the future direction of serving the disadvantaged adult students. (Author/MB)

Statewide Master Plan for the Public Community Colleges of Illinois: RAMP/CC 1979.
Illinois Community Coll. Board, Springfield.
Pub Date—Mar 79
Note—74p.; Appendices showing by college enrollment projections, educational outcomes, personnel data, and capital facilities data have been deleted due to small size of type. Not available in hard copy due to marginal reproducibility of original document
Pub Type— Legal/Legislative/Regulatory Materials (090)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors—Community Colleges, Curriculum Planning, *Educational Finance, *Enrollment Trends, Facility Planning, *Junior Colleges, Nontraditional Students, Operating Expenses, Personnel Needs, State Aid, *Statewide Planning
Identifiers—*Illinois

The first sections of this Master Plan outline the history of the Illinois Public Community College System and its mission and scope. The next section deals with enrollment projections in terms of the changes in the state's population, and implications for enrollments; the decreasing college-going rate of high school graduates; increased competition for students; economic conditions; recent enrollment trends; and the enrollment projections of the Com-

munity College Board and the colleges. The Plan provides for increases in the following areas: cooperative educational arrangements, training programs in new and existing industries, educational services to academically disadvantaged students, and continuing education programs for adults and senior citizens. Community college educational outcomes are considered in terms of instructional areas, community education/non-credit courses and their outcomes, community services, outcomes in instructional areas, comparison of credit hours generated by the colleges, and educational outcomes from follow-up studies and the statewide transfer study. Personnel requirements and salary costs, both current and projected, are examined, and operating finance requirements and funding plans are presented. In addition, capital finance and facilities are discussed, and alternatives to the present criteria for capital construction are offered. Data tables are included. (MB)

Research Needs and Priorities as Perceived by Community College Administrators in Illinois.
Illinois Community Coll. Board, Springfield.
Pub Date—Feb 79
Note—56p.; Best copy available
Pub Type— Reports - Research (143) — Numerical/Quantitative Data (110) ()
EDRS Price - MF01/PC03 Plus Postage.
Descriptors—*Administrator Attitudes, Community Colleges, Community Surveys, Curriculum Research, Educational Research, *Institutional Research, *Junior Colleges, Longitudinal Studies, Needs Assessment, *Research Needs, *State Surveys, Trend Analysis
Identifiers—*Illinois
A survey was conducted of the principal decision-makers in each institution and district in the Illinois public community college system to determine research needs for statewide, interinstitutional, and locally conducted studies. Over 80% responded. The results indicated that the areas with the most pressing general statewide research needs were impact of the community college system on the community; system management and resource allocations; and curriculum and program needs and priorities. More specific needs on the state level were identified in the areas of techniques for decreasing student attrition; procedures and standards for awarding credit for life experience; longitudinal studies of community college impact on student achievement and values; community demographic data and population, income, ethnic distribution, and educational trends; and in-service training needs of faculty and staff. The three top general local research needs were impact of the college on the community; characteristics of community, institutions, staff, and students; and management and resource allocations. Highest priority specific needs were in the areas of allocation and funding of facilities; evaluation of instructional programs and courses; cost-effectiveness of instructional modes; effectiveness of academic advising; and evaluation of organizational and administrative structures and processes. Appendices to Excellence and the Open Door: An Essential Partnership. A Report of the Commission to Study the Mission, Financing, and Governance of the County Colleges, State of New Jersey. Volume Two.
New Jersey State Board of Higher Education, Trenton.
Pub Date—Apr 79
Note—108p.; For a related document, see JC 790 161 ; May be marginally legible due to small print
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC05 Plus Postage.
Descriptors—*Access to Education, Adult Education, Board of Education Role, Community Colleges, Community Education, Delivery Systems, *Educational Finance, Ethnic Groups, *Governance, Governing Boards, Government School Relationship, Institutional Characteristics, *Junior Colleges, Literature Reviews, Manpower Needs, Questionnaires, Remedial Instruction, Trustees, Vocational Education
Identifiers—*New Jersey
Surveys, interviews, and literature reviews were conducted to provide data upon which the Commission to Study the Mission, Financing, and Governance of the County Colleges in New Jersey could base its recommendations. The following areas were investigated: (1) composition of the trustee boards of the colleges and effective methods of selecting members; (2) the statutory and non-statutory relationships between the county colleges and county governmental and political structures; (3) the role of community college trustees as they perceive it in relation to planning and guidance; (4) the current and future position of community and adult education in New Jersey; (5) models for financing community colleges based on mission-directed funding and upon the taxonomies of Garms and of Wattenbarger and Starnes; (6) research specifically related to trustees of public two-year colleges, their role and responsibilities, and the diversity of their membership; (7) characteristics of the New Jersey county colleges in terms of their students, enrollments, ethnic components, degrees awarded, majors offered, tuition rates, accreditation status, and conditions promoting access; (8) demand for and delivery of vocational/occupational education; (9) the viability of the mission of open access of community colleges; and (10) efforts toward remediation. (Survey instruments and interview forms are included.) (MB)

Descriptors—College Faculty, Community Colleges, *Curriculum Design, Curriculum Guides, *Educational Interest, Effective Teaching, Faculty Development, *Inservice Programs, Institutional Research, *Junior Colleges, *Needs Assessment, Scheduling, School Personnel, *Staff Improvement, Staff Orientation, Teacher Attitudes, Teacher Participation
As part of an effort to design and implement staff development and instructional improvement opportunities for personnel at the College of Alameda (California), questionnaires were distributed to all 250 staff members (105 responded–24 classified and 81 faculty). Additionally, the concerns of the college president and the staff development committee were determined. The questionnaire elicited information on: (1) improving job assignment; (2) the value of various staff development activities and willingness to participate in them; (3) preferences with regard to formats and frequency of activities; and (4) methods of improving instruction. Using the results of the survey and a review of current successful programs at other colleges, nine mini-courses were developed. The five courses designed for faculty were "Community College Staff Development," "Exploring Alternative Teaching Methods," "Community College Curriculum," "Group Dynamics and Human Interaction," and "The Community College Student." The four mini-courses developed for classified personnel were "Classified Staff Orientation," "Office Practices," "Classified Staff Seminar," and "Skills Specialization Workshop." The survey instrument, a bibliography, and course outlines are appended. (Author/MB)

Nuclear Taskforce Summation.
Spons Agency—Department of Energy, Washington, D.C.
Pub Date—Jan 79
Note—50p.; Prepared for the National Education, Business and Labor Conference on Energy-Related Vocational and Technician Training, Employment and Public Energy Awareness ; Parts of appendix are marginally legible
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—*Curriculum Planning, Electrical Occupations, Employment Opportunities, Job Training, *Manpower Needs, National Surveys, *Occupational Information, Occupational Surveys, *Postsecondary Education, Radiation, Technical Education, Technical Occupations
Identifiers—*Nuclear Energy, *Nuclear Technicians
At the end of 1978, there were approximately 230 nuclear-fueled electric generating plants around the world; 72 of these were in the United States. Each plant requires an operations-and-maintenance workforce of 92 people, and attrition occurs at a rate of 8% per year. Requirements for a nuclear taskforce and job training, in view of current development rates, are running high. Seven major technical occupations appear to be specific to nuclear-fueled electrical generating plants: power plant (reactor) operator, radiation protection technician, quality-assurance/quality-control technician, nuclear instrumentation and control technician, chemical technician, mechanics, and electricians. Training programs for these occupations exist through 21 postsecondary schools and through employer programs. Before committing themselves to a nuclear program, school administrators and curriculum planners should consider the following factors: (1) employer needs within the school service area; (2) relevance to industry pre-employment levels; (3) convenient location to reactors for specialized training; (4) absorption of program costs; and (5) public education to counteract adverse publicity. A list of instructional materials is included and appendices contain a list of schools with nuclear programs, job descriptions, a sample local needs survey, and examples of industrial and governmental training programs. (MB)

Verbal Interaction in Junior/Community College and University Classrooms: Do Disciplines and Settings Differ?
Pub Date—[79]
Note—27p.
Pub Type— Reports - Research (143) — Numerical/Quantitative Data (110) ()
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Classroom Observation Techniques, Community Colleges, *Comparative Analysis, *Interaction, Junior Colleges, *Postsecondary Education, Student Behavior, *Student Teacher Relationship, Teacher Behavior, Teacher Characteristics, Teaching Techniques, Universities, *Verbal Communication
Identifiers—Flanders System of Interaction Analysis
The objective of this study was to determine whether there were verbal interaction differences between junior/community college and university settings and among disciplines. Theoretically, student achievement and student attitudes are influenced by the types of verbal interactions taking place within classrooms. Forty-eight different classes located in three junior colleges and a university in Texas were used to collect the data. Over 39,000 tallies representing approximately 32.5 hours of time were recorded using Flander's categories for interaction analysis. An analysis of variance revealed significant differences between two-year college instructors and university instructors in several verbal categories. Two-year college teachers used more praise and reinforcement, asked more questions of their students, and reflected greater verbal flexibility than did the university instructors. Data tables outline analysis of variance groupings among course disciplines (English, Chemistry, History/Political Science, Economics, Psychology, Mathematics, and Biological Sciences). (Author/MB)

Descriptors—Community Colleges, Courses, *Junior Colleges, *Marketing, *Mathematics, *Publicize, Public Relations, *Student Recruitment, Teacher Role
Peter Drucker defined marketing as "the promotion of a product or service from its inception through every step of its evolution and distribution until it reaches the satisfied customer." Inherent in this definition are the four components of marketing: pricing, product, place, and promotion. The product itself is the most important element and the price the least important in relation to getting the customer to buy it; i.e., people will buy quality no matter the price. Believing themselves to have a good product at a reasonable price, members of the mathematics department at Lane Community College (Oregon) employed educational marketing

methods to increase course enrollment. Four objectives emerged in the promotion of the mathematics program: (1) to create comfortable, attractive class and study areas; (2) to stage quarterly "events" at registration which would alleviate standing-in-line boredom and provide genuine caring, humanistic help to confused math students; (3) to get quarterly, positive media coverage that would change the image of the math department from threatening to friendly; and (4) to develop new courses to draw new students. Additionally, the philosophy was adopted that one must create, act, risk, and enjoy to obtain success. One example of the department's activities was the funeral for the English system of measurement during National Metric Week. (MB)

Descriptors—Age, College Credits, College Majors, Community Colleges, Educational Background, *Enrollment Trends, Females, *Junior Colleges, *Junior College Students, Liberal Arts Majors, Longitudinal Studies, Males, Part Time Students, *Student Characteristics, Vocational Education
Identifiers—Full Time Students, *Hawaii, Student Objectives
Data tables summarize selected personal and academic characteristics of students enrolled at the seven Hawaii community colleges in the spring 1979 semester, focusing on students enrolled as classified and unclassified students in credit programs. Registrations in various community college offerings numbered 27,033. Of these, 71% were regular students enrolled in credit programs; 2% were early admits or concurrent registrants; 7% were apprentices or journeyworkers in non-credit programs; and 20% were in special programs. For the first time in several semesters vocational education majors outnumbered liberal arts majors (46% compared to 44%). There was very little change in the mean age of students (25.4 years) and in the percent of continuing students from the fall semester (over 70%). Several trends which had emerged in previous years were found to be continuing: there were again more women than in previous spring semesters; there were proportionately more part-time students than in previous semesters; students continued taking fewer credits; and the proportion of students with a Hawaii permanent address had continued to increase. In general, enrollment showed a decline by 3% compared to spring 1978 and by 7% compared to fall 1978. (MB)

Descriptors—Community Colleges, *Junior Colleges, Performance Contracts, Reading Comprehension, *Reading Improvement, *Reading Instruction, Reading Material Selection, *Reading Programs, Remedial Reading Programs, Study Skills
Six articles concerning college reading instruction are presented in this special interest journal. Chester Tillman and A. Garr Cranney offer informal guidelines for evaluating commercially produced reading improvement materials in terms of their purpose, educational and psychological factors which affect appropriateness for a class, cost, and instructional staff attitudes. In the second article, Charlene Z. Holler presents an exercise worksheet to facilitate student evaluation of graphic aids in terms of comprehension of concepts, theories, or problems presented. Anne L. Mason reviews the use of the learning contract as a practical instrument for helping a teacher individualize a reading program. Janell B. Lang presents a form which can aid students in analyzing periodical literature related to their career program. Next, Bruce A. Lloyd describes a reading improvement program for mature adults designed to increase reading speed, comprehension, and vocabulary knowledge as a basis for continuing education and training. In the final article, Nancy Krigbaum and Archie Davis describe a college reading and study skills course with an open enrollment policy which enables the student to receive help when needed. (MB)

Descriptors—Community Colleges, Developmental Programs, Group Experience, *Junior Colleges, Memory, Paraprofessional Personnel, *Predictive Measurement, Predictor Variables, Reading Comprehension, *Reading Instruction, *Reading Programs, Remedial Reading Programs, Student Motivation, *Teaching Techniques
Five articles concerning college reading instruction are included in this special interest journal. Karen L. Pelz, William E. Pelz, and David L. Stritmater present a study of input sequence, exposure, and modality effects on recognition memory, which revealed that students who read assignments and attended lectures performed better on tests on the material than those who did only one or the other and that those who read the assignment before attending the lecture did better than those who attended the lecture first. In a second paper, Harriet Shenkman discusses the use of a classroom learning method to overcome students' lack of motivation. The "Check, Convince, Conclude" approach entails instructor modelling of a skill to be learned in sequential individualized, paired, small group, and whole class experiences. Bernard W. Fuhr and Faye Curran present a model for accountability assessment for developmental education using the college entrance test scores to predict a base or minimum grade and the grade-point scale to measure outcome. Bernard H. Levin, Lila Foster, and Lloyd A. Leake present a study using the Nelson-Denny reading test as a predictor of community college English and psychology grades. Results indicate that the test scores correlate positively with final grades. In the final article, Karen Miller and Mary J. Henning describe a successful program to train and use reading paraprofessionals in the community college. (MB)

Identifiers—*Notetaking
Three articles are presented which concern college reading instruction. Karen Pelz describes an intensive approach to teaching reading and writing which entails: (1) special classes for underprepared students; (2) standard administration of freshman reading tests; (3) teaching reading and writing together; (4) using the same instructor to teach Basic English and Analytical Reading employing a related syllabus and complementary materials; (5) gearing the instructional approach to the students' actual level rather than to an expected level; (6) coordination with related student services; and (7) emphasizing the value of reading and writing. In another article, Michael Kahn provides suggestions for effective notetaking, which outline student and teacher responsibilities, use of abbreviations and short hand notation, paraphrasing, and determining the main idea and supporting details from lectures and texts. In the third paper, Robert C. Gerace discusses the use of videotapes in the improvement of comprehension. The videotape, "The Fine Art of Seeing," and related materials which introduce in layman's terms the techniques employed by artists in the creation of a painting, are examined as aids in fostering motivation and achievement in humanities courses. Gerace considers the usefulness of relying upon the text for content and the tape for appreciation of technique. (MB)

Descriptors—*Articulation (Program), Community Colleges, Counselor Role, Graduate Surveys, Institutional Characteristics, *Institutional Research, *Junior Colleges, Participant Satisfaction, Questionnaires, Student Attitudes, *Transfers, *Transfer Students
The Transfer Programs Outcomes (TPO) system developed by Oakton Community College (Illinois) focuses on the evaluation and communication of community college transfer students' perceptions of selected senior institutional characteristics. The objectives of the program are (1) to develop an effective, rapid feedback method for follow-up of community college students at senior institutions; (2) to develop a dissemination strategy for results; (3) to develop tools for assuring collection, analysis, and transmission of information about transfer to the senior institution; and (4) to increase the accuracy of prediction of success of transfer students. TPO data gathering procedures entail each college counselor being responsible for transfer relationships with one senior institution within the state. A one-page questionnaire eliciting information from the transfer students on the community college, senior college, and articulation was designed to provide a textual summary of results to be sent to transfers within four weeks of the original mailing, which also encourages non-respondents to return their questionnaires, and to generate an annual report comparing senior institutions and providing a composite of student perceptions of their community college experience. The development of the data base, methods of analysis, and the dissemination strategy are discussed and a bibliography is included. (MB)

Descriptors—Community Colleges, Employment Interviews, *Faculty Recruitment, *Junior Colleges, *Personnel Policy, Student Attitudes, Student Participation, Teacher Attitudes, Teacher Participation, *Teacher Selection
In order to recognize and assess the qualities and qualifications of potential new faculty at the State University Agricultural and Technical College at Delhi, Vermont, a study was made to develop and implement faculty selection procedures through campus participation. The study involved a comprehensive review of the literature, consideration of industrial models of employee selection, surveying faculty to determine their characteristics and attitudes on new faculty selection, and polling students on their attitudes toward participation in the hiring of faculty. Three steps to a successful selection policy were noted: (1) knowledge of how to attract applicants; (2) a clear conception of what the job description is, and what qualities are necessary for

satisfactory completion of the job; and (3) a means of assessing the candidate. The study indicated that a participational model of governance was best suited to implementing the policy. Recommendations outline the method of implementation of the selection process, with emphasis placed on the use of all available assessment techniques and structured interviews. Two unique recommendations were to use an initial group interview with the top candidates and to have each candidate teach one class session. The survey instruments and a bibliography are appended. Program development in the Massachusetts community college is heavily influenced by the processes established to control and monitor program approval. Such procedures, usually supported by forms and time-tables of various sorts, can work to the detriment of responsible local program development, especially systematic need assessment and meaningful governance involvement. The intent of this investigation was to create a model for need assessment for program development, and to specify a role in that model for the local governance structure. The product of the investigation is a marketing-based need assessment model with a specific, active role for the curriculum committee of an academic council. In addition, the product includes material detailing how information obtained by implementing the model is used as a substantial basis for program approval. The eight interacting stages of the model include: (1) defining the college mission and service area; (2) searching for ideas; (3) evaluating the ideas; (4) developing the concept; (5) testing the concept; (6) allocating resources; (7) estimating program demand; and (8) evaluating the program. Appendices contain forms and a charter for an occupational advisory council, a bibliography, and recommendations for action and further research. (Author/MB)

Descriptors—Cognitive Style, Community Colleges, Educational Environment, Educational Trends, *Junior Colleges, Predictive Measurement, Reading Comprehension, *Reading Instruction, Tutoring, *Vocabulary Development, Word Study Skills

Six articles are presented in this special interest journal focusing on two-year college reading instruction. Mindy Brooks discusses teaching and learning styles in terms of individual approaches to gathering and evaluating data. W. E. Jackson and Twalah Jackson discuss changes in the educational environment as related to the concept of "getting back to basics." In another article, Kathy Carpenter describes a successful vocabulary expansion program using word games. Barbara Crist and William Anderson present a study which demonstrates that when dealing with students with lower than average verbal skills, the vocabulary subscore of the SAT is more predictive of grade point average than the comprehension subscore for first semester freshmen. Glenda Hammond and Dianne McKay describe a skills instruction component of a tutor training program and discuss a management approach which the tutor can employ to increase the value of the tutoring session. In a final paper, Edward J. Dwyer reviews a system to improve reading comprehension through prereading of questions. (MB)

Context and Structure of Educational Organizations: Application of Aston Methodologies to Community Colleges.
Pub Date—10 Apr 79
Note—30p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April 8-12, 1979)
Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—Administrator Role, Centralization, Community Colleges, Horizontal Organization, *Junior Colleges, *Organization, *Organizational Theories, *Organization Size (Groups), *Power Structure, Specialization, Vertical Organization
Identifiers—Ontario

Interviews were conducted with the presidents and senior administrators of 20 Colleges of Applied Arts and Technology located in the province of Ontario (Canada) to assess the relationship between organizational size and organizational structure. It was found that a relationship existed between the size variable and certain structural dimensions. Size was positively related to specialization, delegation, vertical span, and supervisory span (subordinate ratio), and was negatively related to centralization. However, the forecasted size-formulation relationship was very small. The fact that the size variable showed a strong relationship with certain organizational structural variables led to the conclusion that size is important in influencing structural dimensions in the organization. The results contributed to organization theory in three ways: (1) the number of full-time employees was supported as an adequate measure of size; (2) the generalization of the relationship between organizational size and dimensions of organizational structure was upheld; and (3) the proposition that size is predictive of structure was supported. Another result of the study was that the applicability of the Aston methodology for research on educational organizations was demonstrated. A bibliography is included. (MB)

Descriptors—*Bibliographies, *College Administration, Community Colleges, Institutional Characteristics, *Institutional Research, *Junior Colleges, *Program Development, *Research Directors, Research Utilization, School Size

This paper reviews the empirical literature regarding factors associated with the development of Institutional Research (IR) offices in community colleges. The IR office is defined as any organizational unit which has at least one half-time staff member given responsibility for the synthesis and reporting of institutional data, is visibly identified with this responsibility through job description and title, and displays visible products indicating some data handling. Three kinds of descriptive research are considered which demonstrate important factors associated with IR office development: brief case descriptions, national and state-wide surveys, and focused interview studies. A synthesis of this literature reveals that: (1) IR offices have been established in increasing proportions; (2) IR offices seem to operate on a slim proportion of institutional resources, in no case exceeding 1% of total operating budgets; (3) such offices are created by and for top administrators; (4) they require administrative support to be maintained; (5) staff of IR offices are typically small; (6) reporting relationships have been maintained primarily with institutional chief administrators; (7) institutional size appears to be related to the existence of an IR office; (8) various conditions conducive to IR office development can be identified; and (9) IR offices can have considerable room to maneuver. A bibliography is included. (MB)

In an effort to integrate the large number of part-time faculty into their college program, instructional administrators at West Virginia Northern Community College (WVNCC) developed a professional development program for part-time faculty. The initial literature search considered the characteristics, needs, and status of adjunct faculty, identified colleges with successful programs, and synthesized recommendations for program development. A second step in this effort was a nationwide survey of community colleges to determine general characteristics of the colleges in terms of headcount enrollment, the number of full- and part-time faculty, credit hours taught, and salary of part-time faculty. This study also determined whether the college had a faculty development program and, if so, whether it included pre-service and/or in-service training. Another survey was conducted of WVNCC adjunct faculty employed to teach degree-objective courses in academic programs during fall 1976. Its purpose was to identify needs for future development activities, types of professional activities most desirable, and times most suitable for activities, and to gather other anonymous suggestions. A final aspect of the study involved preparing a proposal for a professional development program. An outline is presented of the guidelines, objectives, and specific topics of the program. A bibliography and the survey instruments are included. (Author/MB)

Identifiers—*Community Education Councils

This report focuses on the second year of the education-to-work councils established by the American Association of Community and Junior Colleges in six communities across the country. The development of the programs is described in terms of the following process: (1) current data relevant to school-to-work transition issues were collected; (2) primary goals and objectives were determined; (3) task groups were organized and given responsibility to devise action programs; (4) task group programs were adopted by the Council; (5) programs were implemented using Council members as resource people; and (6) efforts were made to inform the community of the Council's purposes and achievements. Recommendations for achieving program goals are presented, as are discussions and recommendations in the following areas: the Youth Employment and Demonstration Programs Act (YEDPA); funding uncertainties; community colleges as initiators; volunteerism; council life cycles;

national intermediaries; budget; state and local Comprehensive Employment and Training Act (CETA); the project's third year; and assessment. The demography, council activities and problems, budget summary, institutional impact, documents, plans for the future, and assessment of the individual programs are presented for each of the six locations: Bayamon, Puerto Rico; Enfield, Connecticut; Fairbanks, Alaska; Lincoln, Nebraska; St. Albans, Vermont; and Tullahoma, Tennessee. Descriptors—*College Bound Students, College Choice, College Freshmen, Community Colleges, *Enrollment Influences, *Enrollment Trends, Junior Colleges, *Junior College Students, National Norms, *Research Reviews (Publications), *School Holding Power, School Surveys, Student Characteristics, Student Interests, Student Needs
Identifiers—*Student Objectives
Studies of the Plans of high school students and the characteristics of first-time freshmen can reveal trends in community college enrollments that should be considered in marketing. Studies at Johnson County Community College (JCCC) reveal the continued importance of meeting the needs of the 18 to 20 year old student who is still strongly represented among full-time students and among the group that attended another college the previous year. One such study surveyed 2,000 high school students in the JCCC service area as to their goals, plans, and reasons for selecting a given college. National trends, such as those pointed to in the freshmen surveys conducted by the American Council on Education and the report of the National Center for Educational Statistics are also important to marketing. Trends have emerged in percentages of males and females, percentages of part-time students, reasons for attending college and for selecting a specific college, anticipation of success, educational objectives, and social values. Another concern of many colleges is the non-returning student. Studies in this area have focused on reasons for not returning and student characteristics. An additional variable to be considered is student intent. A JCCC study compared the number of students who intended to graduate with total enrollments and total graduates. An appendix presents survey results. (AYC)

Descriptors—*Adult Education, College Role, Community Colleges, Community Education, *Continuous Learning, Educational Needs, *Educational Objectives, Educational Policy, Futures (of Society), *Junior Colleges, Nontraditional Students, State Legislation
This monograph reports the recommendations developed by a national assembly sponsored by the American Association of Community and Junior Colleges with the aid of the W. K. Kellogg Foundation to consider issues and problems affecting lifelong education. An initial paper by Edmund J. Gleazer, Jr., outlines the purposes of the assembly in relation to the changing objectives of community college district systems. In a second paper, Harold L. Hodgkinson projects what education will look like in 1985 in terms of differential fertility, federalization of programs, the segmented education market, faculty diversification, and the costs of education. Herbert E. Striner discusses the pay-off of lifelong education and training as reflected in national capital investment and productivity, and in inmate training programs. Penelope L. Richardson appraises lifelong learning and politics based on her experience as former director of HEW's Lifelong Learning Project. In another paper, R. D. Justice and Jacquilyn Amperse explore obstacles to addressing the needs of the adult, part-time evening student. S. V. Martorana and Wayne D. Smutz review the official legislative policies of several states in regard to lifelong learning. In a final paper, Robert H. McCabe evaluates the restructuring of community colleges for lifelong education in terms of funding, educational attitudes, personnel policies, facilities, and program organization. (MB)

Integrated User Instruction and the Community College Library.
Pub Date—[79]
Note—21p.
Pub Type— Opinion Papers (120) — Information Analysis (070)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Community Colleges, *Junior College Libraries, *Junior Colleges, Junior College Students, Librarians, *Library Instruction, Library Programs, *Library Skills, Student Needs, *Units of Study
Although no major longitudinal studies of library user education programs have been conducted at the community college level, several surveys have been conducted at the senior college level that can be combined with data about community colleges and their students to draw some conclusions in this area. First, there is a real need for bibliographic instruction at the community college level. Such instruction is consistent with professional guidelines and with the goals of community college education and with the characteristics and goals of community college students. Bibliographic instruction can take the form of separate courses dealing specifically with the library and methods of access or it can be integrated into the existing curriculum through specially designed units that can be presented at appropriate points during the semester to augment existing courses. Student enrollment patterns, the faculty status of librarians at community colleges, frequently small enrollments, and other factors make the integrated approach to library instruction especially well suited to the two-year college. However, although community college librarians may have a somewhat easier time of instigating programs of integrated instruction than their colleagues at senior institutions, they are likely to meet resistance, and must be prepared to promote such programs as well as to develop the skills necessary to conduct them successfully. Descriptors—*Church Related Colleges, College Role, Community Colleges, Declining Enrollment, *Educational History, Financial Problems, *Financial Support, *Junior Colleges
Identifiers—*Southern Baptists
The purpose of this study was to trace the development of the Southern Baptist junior colleges from 1927 to 1977. During this period a total of 35 junior colleges were in operation at some time. However in 1977 there were only seven Baptist colleges in six states; of these only one was among the 27 Southern Baptist junior colleges that were operating in 1928. Twelve of these original colleges were closed for financial reasons, one had become a private institution, and over half had become four-year institutions. Most of the colleges still operating in 1977 had been established between 1927 and 1946. Three of these colleges had been first organized as academies, one was a senior college at its inception, and two were chartered as junior colleges. No new junior colleges were established by the denomination after 1946. A secondary purpose of the study was to assess the strengths and weaknesses of the remaining Southern Baptist junior colleges in terms of finances, enrollments, and curriculum development. Recommendations to improve the viability of the colleges include: emphasis on uniqueness, reexamination of the curriculum, revision of recruiting and admissions procedures, reorganization of resource management, and a closer relationship to the denomination. A literature review and bibliography are included. (Author/MB)

Descriptors—Community Colleges, Educational Needs, *Educational Objectives, *Educational Planning, *Educational Policy, *Junior Colleges, *Master Plans, *Needs Assessment, Policy Formation, Program Planning
Cumberland County College with a team of consultants developed a long-range plan along with a continuing planning process to assure the college's continued effectiveness. Aspects of the planning process include: review of available reports relevant to the college's long-range planning; identification of preliminary goals and objectives; assessment of county needs for postsecondary educational services; review of available educational programs in the county; assessment of community influence on planning; and projection of fiscal and other resource needs. Elements of the long-range plan include: (1) reaffirmation to fulfill the full range of community college services; (2) growth in enrollment of 10-12% a year, especially among older, part-time, minority, and women students; (3) formulation of procedures for assessment of institutional programs; (4) accomplishment of an in-depth community needs study simultaneously with the 1980 census; (5) acquisition of off-campus instructional centers; (6) expansion of non-traditional instructional techniques; (7) completion of the current capital development plan; (8) development of a cultural center; (9) increases in annual operating budgets somewhat larger than increases in enrollment; (10) stronger efforts to acquire funds for personnel, facilities, and services; and (11) movement to become a center for information exchange. Data tables are included throughout the report. (MB)

Descriptors—College Role, Community Characteristics, Community Colleges, *Educational Planning, Enrollment Projections, Financial Support, *Institutional Characteristics, *Junior Colleges,

Manpower Needs, *Master Plans, Personnel Needs, Program Planning, School Community Relationship, Student Characteristics

The 1978-1986 Educational Master Plan for Northern Virginia Community College is divided into four major sections. The first covers the mission, history, development, formal organization, and program, operational, and educational impact goals of the college. The second section examines the demography and economy of the district service area; student characteristics; educational and support services (e.g., occupational-technical education, college transfer, general education, and community services); the relationship among the college, the student body, and the service area in terms of employment, continuing education, and public service activities; and personnel, facilities, and fiscal resources. The third section considers future college requirements expressed in terms of enrollment projections (changes in demographics, trends in employment, and projected college growth), projected campus missions, new or expanded education and support systems (e.g., degree and certificate offerings, extended learning institute, cooperative education, and student development services), and immediate and long range resource needs for personnel, facilities, and budget. The final section explores significant issues facing the college relative to projected campus size, establishment of campus service areas, control of course distribution by campus, and implementation of new or expanded degrees and certificates. Sexual Characteristics of Preadolescent Children's Voices.

Pub Date—Nov 77

Note—6p.; Paper presented at the American Speech and Hearing Association Convention (Chicago, Illinois, November, 1977); Paper is based on a doctoral dissertation completed by Suzanne Bennett, Purdue University, 1977

Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Auditory Perception, *Children, *Nonverbal Communication, *Sex Differences, *Speech Communication

This paper reports an investigation of gender-indicating acoustic properties of the vocalizations of 73 six- and seven-year-old speakers. Tape recorded samples of these children's isolated vowel and sentence productions were presented in four listening sessions. One hundred and sixteen young adult (age 17-24) female listeners made gender judgments based on four utterance types: phonated and whispered/ae/vowels, and a normally-spoken and a monotonously-spoken nine-syllable sentence. Data were analyzed by means of a three-variable (utterance type, speaker sex, and listener trial) partially-repeated-measures analysis of variance. Among the findings, analysis indicated significant main effects for utterance type and speaker sex, and a significant interaction between these two variables. The presence of monotonicity increased the likelihood that a child would be assigned to the male category, but high listener accuracy in both sentence conditions suggests that intonation patterns did not provide primary cues to sexual identity. Delano, June S.

Effects of Storytelling on Language Development.

Pub Date—[77]

Note—17p.

Pub Type— Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Charts, Comparative Analysis, Early Childhood Education, *Grade 1, *Kindergarten Children, *Language Development, Language Programs, Pictorial Stimuli, Question Answer Interviews, *Research, *Story Telling, Videotape Recordings, *Vocabulary Development

The effects of storytelling on the language development of kindergarten and first grade children were examined through an informal study in an ESEA Title I Program which stressed storytelling and language development. Teacher aides trained in storytelling techniques read a story to small groups of children each day. The subjects, randomly selected from two schools in the Title I Program and one school not eligible for Title I, responded to questions about three pictures. The children's responses were taped in the fall and again in the spring. An interviewer met with the children individually away from the classroom, showed each child each picture, and asked questions pertaining specifically to each of the three pictures. A comparative analysis of the responses and increases in vocabulary of Title I and non-Title I children indicated that the average amount of gain for the Title I children was greater than the average amount of gain for the non-Title I children, even though overall, the non-Title I children had greater language fluency. These results indicated that telling stories had a beneficial effect on the Title I children and it was concluded that the program should be retained as an integral part of the language program. Identifiers—*Groups for Psychological Education

The Groups for Psychological Education program presented in this Leader's Guide was designed to encourage the development of effective interpersonal skills and self-understanding of fourth, fifth, and sixth grade children through the use of small group sessions. The first three chapters of the guide describe the program and present some of the preliminary organizational activities necessary for its introduction in the classroom. The next three chapters present the content of the three major sequential seminars on which the program is based. The content of Seminar I, Communication Training, is organized into 10 group meeting plans, each of which includes a description of goals, developmental objectives, performance objectives, materials and resources needed, procedures, adaptations, and evaluation techniques. The content of each group meeting plan is presented in detail. A similar organization is used for Seminar II, Understanding Behavior, and for Seminar III, Changing Behavior. The appendices to the guide describe the organizational framework of the program and present the goals and objectives of the seminars for each of three levels of mastery. The bibliography includes a list of references and a list of commercial materials used in the program. (BD)

This 20-page booklet contains very brief, anonymous and anecdotal stories about teachers' success with young children in the early childhood education programs in Dayton, Ohio. The teachers' stories focus on individual children and reveal the scope of classroom problems faced every year. Five anecdotes illustrate problems of children with anti-social or aggressive behavior and the children's development towards prosocial behavior. Sixteen stories tell of the problems of shy and uncommunicative children and how they became more interactive and outgoing. Success with children presenting various other learning or behavior problems is recounted in the final eight anecdotes. (RH)

This book is a collection of six theoretical and practice oriented papers on issues related to the problems of intervention in the social development of young children. Topics dealt with in the papers are: mother-child interaction in day care and home reared children; the history, function and sequelae of a form of reunion behavior following separation (avoidance of the mother) in home-reared children; the social and intellectual consequences of day care for high-risk infants; the implications, for educational intervention, of the processes which mediate between social events and intellectual competence; and the effects of peer interactions in facilitating the social development of preschool children. The final paper describes Project Aware, a program designed to facilitate social development in children in the kindergarten and elementary school years. (CM)

This booklet contains five papers focusing primarily on the potential of television for contributing to children's learning and prosocial behav-

ior and on the problems involved in realizing this potential. The first paper provides information relevant to child development and learning theory. The second paper discusses the potential power of television in shaping the attitudes, values and behavior of inner-city children. The third explores the potential of children's television programming (educational and commercial) as a vehicle for modeling pro-reading behaviors. The fourth paper describes a study investigating the role played by television commercials in reinforcing or promoting racist attitudes and behavior. The final paper calls for reassessment of television teaching potential and describes how television inquiries should lead to alternative theories of learning. (Author/MP)

Descriptors—*Age Differences, Elections, Information Sources, Mass Media, *Parent Influence, Peer Influence, *Political Socialization, *Preschool Children, Presidents, *Sex Differences, *Television

This study deals with three questions concerning the political socialization of young children: (1) at what age evidence of political socialization begins to emerge; (2) at what age media, principally television, begins to socialize children politically; and (3) how a Presidential election campaign and the media relate to other sources of political socialization such as schools, peers, and parents. Fifty-two 4- and 5-year-old preschool children were interviewed prior to the 1976 election campaign and on the day after the election in order to measure their awareness of candidates and others involved in the campaign. It was hypothesized that: (1) children's awareness of political candidates would increase significantly from pre- to post-campaign; (2) 5-year-olds would show significantly more learning than 4-year-olds; and (3) that parents would be the most frequently mentioned source of political information. Results showed that 5-year-olds learned more than 4-year-olds; and that television was a more important source of political information about Jimmy Carter than parents for 5-year-olds, while parents and television were equally important as sources of information about President Ford. Results also indicated that females learned more than males and that Ford was better known than Carter at the start of the campaign but that children were more aware of Carter than Ford by the time the campaign was over. Descriptors—*Anti Social Behavior, *Childhood Attitudes, Children, Elementary School Students, *Family Characteristics, Fathers, Junior High School Students, Mothers, *Prosocial Behavior, *Role Perception, *Television, *Television Research

Identifiers—*Media Influences, Symbolic Representation

This research study examines the types of social behaviors portrayed by families in various television series and explores children's impressions of the TV family members. Content analysis of nine family-oriented TV series was employed to describe the ranges of behaviors of fathers, mothers and children on television. Eleven shows from each series was taped. Behaviors portrayed were coded as being either pro-social or anti-social. Survey data were collected from 388 children in second, fifth and eighth grades. Each child interviewed was asked to "Describe a (character) so that someone would know what he was like and why he was like that" in order to elicit children's impressions of father, mother and child characters from two series. Results of the analyses indicated that depictions of families on television are fairly pro-social. Fathers' and children's behaviors were mixed, while mothers' behaviors were consistently pro-social. Children at all three ages fairly accurately perceived TV characters' behavior patterns. Both father and child characters were uniformly well liked by the children regardless of their behavior patterns, while mother characters were less well liked overall. It is suggested that future research should investigate how TV character portrayals might build children's expectations of how people should behave. (Author/RH)

ACER Checklists for School Beginners: Manual.

Australian Council for Educational Research, Hawthorn.

Pub Date—77

Note—44p.

Pub Type— Guides - Classroom - Teacher (052)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.

Descriptors—Checklists, *Early Childhood Education, Emotional Development, Foreign Countries, *Identification, *Individual Needs, *Informal Assessment, Kindergarten, Language Skills, Memory, Parent Role, Preschool Children, Psychomotor Skills, Social Development, *Student Testing

Identifiers—*ACER Checklists For School Beginners, *Australia

This assessment package consists of a checklist for teachers, a checklist for parents, a class record sheet, and a manual designed to be used by teachers to highlight the strengths and weaknesses of individual children soon after their entry into school or during their last term in preschool or kindergarten classes. The Checklist for Teachers provides a list of 62 simple behaviors which indicate an individual child's development and experiences in the areas of social development, emotional development, motor skills, memory and attention and language skills. The form provides space for two subsequent administrations of the items as a follow-up to the original assessment. The Checklist for Parents contains 38 items describing the child's preschool activities and experiences as well as the parent's expectations of the child's reactions to certain social situations. The Class Record Sheet is a form the teacher can use to summarize the individual child's performance, as well as the performance of the class as a whole on each of the 62 items. The manual provides information regarding the rationale and purpose of the checklists. It includes descriptions of the meaning of the individual items and instructions for the administration and scoring of the instrument. A discussion of the validity and reliability of the Checklist for Teachers is provided in the section reporting research findings. (Author/BD)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Childrens Television, Content Analysis, *Educational Television, Research, Sex Role, *Sex Stereotypes, Television Research

Identifiers—*Sesame Street

Sesame Street programs are perpetuating the subjugated role of females by presenting a picture of male-dominated society while portraying females in roles of following, cleaning, mothering and imitating, and as being of limited intelligence, subservient and passive. Analysis of a randomly chosen Sesame Street program (#189) shows how the series perpetuates the stereotyped, subjugated role of the female. In the program only males do enjoyable or important things. They appear more than twice as often as females and dominate the audio track of the program. Further analysis reveals that males are shown to be interested in and capable of intelligent, intellectual thinking, problem-solving, logical reasoning, and decision-making. Women are portrayed as lacking information, concerned simply with the mechanics of mundane activities (in the kitchen) and not with abstractions. Inspection of dialogue illuminates instances of male competency/dominance and female insufficiency/subordination. Most objectionably, in one scene the female is portrayed as physically more weak than the male to whom she must desperately cling. The male is portrayed as calm, strong and unconcerned with the difficulty of the female while something more important occupies his mind. Concepts such as these are harmful to teach children. Sesame Street success in the non-stereotyped portrayal of minorities must be extended to their portrayals of women. (Author/RH)

Identifiers—*North Carolina, *Stillborn

This report indicates relationships between the marital status of pregnant North Carolina women and mothers and the risk of fetal and infant death in the year 1974. No significant difference in the fetal mortality of the two legitimate groups (postmarital and premarital or pregnant brides) was found, although the illegitimate group had by far the greatest risk of fetal death of the three groups. The illegitimate fetal death rate at 23.0 was almost twice the combined legitimate rate of 12.5. The table on page 3 gives fetal and infant death rates by legitimacy group and race for various maternal characteristics and birthweight. Mortality differences for infants under the three marital conditions were statistically significant at the p .01 level. A statistical map depicts the percentage of all resident deliveries during 1974 which belong to either the premarital or illegitimate groups. The data indicate that hasty marriage is not a panacea for existing problems. Also, when the magnitude of out-of-wedlock conceptions is considered in concert with the growing number of abortions, it appears that vigorous efforts are needed to bring family planning opportunities within the reach of all citizens. Descriptors—*Behavior Development, Feedback, Infant Behavior, *Infants, *Interaction, *Interpersonal Competence, Interpersonal Relationship, *Mothers, Parent Child Relationship, Rapport, Social Behavior, Social Development, Social Relations
Identifiers—*Mediated Experience
This paper presents a study designed to determine if providing information to primiparous mothers about the behavioral characteristics of their infants would affect reciprocity in mother-infant interaction. Thirty married, Caucasian, middle class mothers of healthy, normally carried and delivered 48-hour-old first-born infants served as subjects. Mothers were randomly assigned to one of three treatment groups: (1) observation of infant behavior assessment and feedback on infant's responses, (2) feedback, but no observation, and (3) instruction on selection and purchase of infant furnishings, and no observation or feedback (as a control). Pre-treatment assessment of mother's reciprocity indicated no differences among the groups. Post-treatment assessment was conducted seven to 10 days following treatment. Analysis of variance across three treatment groups and two times of observation indicated that mother-infant interaction in all groups increased significantly over time. A treatment by time interaction effect was obtained on maternal and infant behavior assessment subscale scores. Results of additional analyses suggest that information alone (Group 2) or information plus demonstration (Group 1) are effective means of increasing infant behavior subscale scores. Data also suggest that information plus demonstration is more effective than information alone in increasing mother-child reciprocity scores. Informing mothers about the behavioral characteristics of their first-born infants is an effective way of enhancing mother-child interaction. (Author/RH)

This book contains papers presented at the Seventh Interdisciplinary Conference on Piagetian Theory and the Helping Professions. More than 40 papers are included. Areas explored in the papers include: the impact of Piagetian theory on educational policy and aspects of language acquisition and cognitive development in early childhood; theoretical perspectives on learning in mentally retarded children and adolescents and the teaching strategies employed; developmental instruments for the assessment of classification, seriation, conservation and representational space concepts in the school-age child; the relationship between the performance of gifted preschoolers and Piagetian levels of cognition; methodological perspectives on the study of the development of children's art, intellect, and physical growth; the relationships between different stages of Piagetian tasks and the cognitive abilities of college students; the impact of Piagetian theory on curriculum development; Piagetian-based theories of reading, language, and mathematics education; the comparative positions of Piaget and Guilford, and the use of Piagetian concepts to further humanistic education. References and citations for all papers in Volumes I and II, as well as order information for previous conference proceedings are included. (CM)

Identifiers—*CDA, Child Development Associate, *Project Head Start
This volume presents a number of articles on different aspects of the Head Start Strategy for Spanish-Speaking Children written by participants in that effort. The first section describes Bilingual-Bicultural Curriculum Development and Evaluation projects and includes descriptions of four curriculum development projects and an evaluation of the initial phase of the Head Start curriculum development project. The second section focuses on the Bilingual-Bicultural Child Development Associate (CDA) Training Program. This section begins with an overview of the CDA program and contains (1) descriptions of CDA staff training projects, (2) an outline of the CDA competency-based curriculum to assist in curriculum revision and evaluation and (3) tips about program implementation. The third section briefly reports the operation of a network of human and material resources for Head Start programs in six Western states. Section 4 presents some recent research on bilingual-bicultural preschool child development. Section 5 provides information about a graduate fellowship program initiated to promote research on the early childhood development of the Spanish-speaking child. In the final section, suggestions are made for disseminating the results of the Head Start programs. A summary of the opinions of the conference participants about how dissemination should proceed is included. (Author/BH)

The Effect of Labeling on the Memory of Children and Adults of Pictorial Paired-Associates.
Pub Date—[78]
Note—25p.
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Adults, Age Differences, Cognitive Development, Cognitive Processes, *Elementary School Students, Instruction, *Learning Processes, *Memorizing, *Paired Associate Learning, Pictorial Stimuli, *Recall (Psychological), Verbal Stimuli
Identifiers—*Labeling, *Redintegration
This study investigates the role of labeling in developmental increases in picture recall. In two experiments, the memory for pictorial paired-associates of first graders or second graders, fourth graders and adults was evaluated by means of a study-test cued recall procedure. In Experiment 1, the stimulus presentation duration (on-time) and the interstimulus interval (off-time) were varied to allow or preclude the spontaneous use of labeling. In Experiment 2, half the subjects in each grade received labeling instructions, and recall was cued by means of either a picture or a picture label. In both experiments, the elements of the paired-associates were related either acoustically, conceptually, or not at all (neutral). This was done in order to determine the locus of the labeling effect and to enable the detection of labeling activity. The results showed that labeling instructions facilitated the recall of only the younger children, but that there were developmental differences in recall that could not be attributed to labeling differences. In addition, increases in the use of labeling were accompanied by increases in recall for the conceptually related pairs, suggesting that an important effect of labeling is to aid the processing of the conceptual information in pictures. (Author/RH)

Descriptors—*Career Change, *Day Care Services, Early Childhood Education, Educational Research, *Engineers, Followup Studies, *Males, Personality, *Preschool Teachers, Teacher Attitudes, *Women Teachers
This paper reports results of a follow-up telephone survey of the job turnover rates of 20 male and 20 female day care teachers and 20 male engineers who had previously participated in a study of sex-role attitudes, behaviors and personality traits. (The teachers were initially matched for age, education and day care center, and the engineers were matched with the teachers for age and education.) The follow-up survey, conducted two years after initial contact had been made, revealed that only 30 percent of the male teachers had remained in the same setting and job status (compared to 50 percent of the women and 70 percent of the engineers). While 79 percent of the male teachers who had changed positions had relocated in human services roles, none of the engineers had left their field, and only 35% of the female teachers had left day care. The potential effects of male transiency on children in day care settings are discussed. The paper also reports the earlier study which compared the groups on sex role related personality traits, attitudes, and reinforcement behavior. (BH)

Descriptors—Art Activities, *Cognitive Processes, *Ecological Factors, *Play, *Preschool Children, Sex Differences, *Social Behavior, Social Development
Identifiers—*Canada, *Ontario
This study investigates the interaction of three cognitive (functional, constructive, dramatic) and three social (solitary, parallel, group) dimensions of free play activities and their stability over time among boys and girls in a preschool setting. Subjects were 18 children attending a university preschool in Southwestern Ontario. Data for each child were collected in 1-minute daily observations for two 3-week periods, three months apart. Analysis of variance indicated that four activities changed in duration over time but preferred activities remained nearly identical. Cognitive dimensions of play with vehicles and blocks differed over time. Males played more with vehicles and sand and water, and spent less time in painting and art construction than females. Findings for sex and types of play in a particular activity were stable over time. The degree of "freedom" in free play appears to be influenced by available materials. For instance, group and dramatic play may be inhibited by the availability of art activities, which appears to encourage non-social and constructive behaviors. Findings are seen to validate results of earlier studies on children's free play activities. Implications for educational programs and recommendations for further research are indicated. (Author/RH)

Changes in the Play Behaviors of Preschoolers: A Short-Term Longitudinal Investigation.
Spons Agency—Canada Council, Ottawa (Ontario).
Pub Date—Apr 79
Grant—S-75-0543
Note—14p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April 8-12, 1979)
Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Behavior Change, Behavior Patterns, *Child Development, Childrens Games, Dramatic Play, *Interaction Process Analysis, *Play, *Preschool Children, Social Relations
This longitudinal study of changes in play behavior in preschool children reports decreases in less mature forms of play and increases in more mature forms of play over time. The study was designed to test the assumption that the play of young children develops in a progressive manner. Ten 3-year-olds and ten 4-year-olds were observed during free play each day for four 3-week periods over 3 months. The coding of behavior was based on Parten's categories of social play (unoccupied, solitary, onlooker, parallel, group) and Smilanksy's categories of cognitive play (functional, constructive, dramatic, games with rules). Two additional categories included reading (or being read to) and active conversation. Children showed a decrease in the amount of time spent in unoccupied, onlooker, solitary-functional, and all functional play, and an increase in the amounts of time spent in reading, games, parallel-dramatic, all group, and all dramatic play. Only the games with rules category showed a differential age-by-time interaction. Alternative explanations of the data are discussed. Data on age and sex differences are also reported. Two tables summarizing results are included. (BH)

The Dynamics of Work and Play: An Historical Analysis and Future Implications.
Pub Date—Feb 79
Note—25p.
Pub Type— Historical Materials (060)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Changing Attitudes, *Classroom Environment, Classroom Techniques, *Early Childhood Education, *Elementary Secondary Education, Instructional Innovation, *Learning, Permissive Environment, *Play, Social Attitudes, *Social Values, Theories
This paper traces selected sociological, anthropological and psychological interpretations of work and play and their implications for classroom practice. Conflict theorists' views of the impact of industrialization on the family and the school and the increasing separation of the worlds of play and work are counterposed to functionalist models of schooling as social integration and socialization. Research which tests the theory of education as social reproduction of class differences is discussed. The emergent role of specialists in the helping professions and their reform of educational practice, core ideas of neo-Freudian perspectives, and anthropological theory and research on play and schooling are briefly reviewed. It is noted that while the dynamics of work and play in the classroom remain largely unexplored, the traditional dichotomy between work and play is unsound. An instructional sequence of play, work and more play, which begins in loosely structured, highly motivating messing around, moves to disciplined, directed and productive work and flows into playful, creative release, is advocated. (RH)

Descriptors—*Age Differences, *Elementary School Students, Instructional Design, Mediation Theory, *Memorizing, *Recall (Psychological), Sorting Procedures, Thought Processes
Identifiers—Concept Organization, Metamemory, *Task Performance Strategies, *Taxonomic Structures
The present study was designed to determine whether previous experience with categorically related items would facilitate third and sixth grade children's recall of subsequent unrelated materials. Subjects were 24 children at each grade level. An additional aim was to see if such experience with taxonomic material would influence both the manner in which these subjects instructed first graders as well as the recall of these younger children. Some third and sixth graders were given alternating sort-/recall trials with two sets of categorical items; other subjects received unrelated items. Following these trials, all children were given two sort/recall trials with unrelated materials. Each child then instructed a first grader concerning the memory task and the strategy he used. Examination of the third and sixth graders' data indicated that experience with taxonomic materials improved third graders' recall, facilitated their use of organization, and enhanced their strategy communication in teaching the first grader. For the sixth graders, the experience did not affect their recall, but did increase the probability of their giving strategy information to the first grader. Exposure to categorical materials may occur in the classroom and may contribute to the acquisition of organizational strategies in the child's natural environment. (Author/RH)

Mothers' Production of Hand Gestures While Communicating with their Preschool Children Under Various Task Conditions.
Spons Agency—Minnesota Univ., Minneapolis. Graduate School.
Pub Date—Apr 79
Grant—16-P-56810/5-17
Note—29p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April 8-12, 1979)
Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—*Adjustment (to Environment), Age Differences, Communication Skills, *Language Development, *Mothers, *Nonverbal Communication, *Preschool Children, Sex Differences
Identifiers—*Hand Gestures
This study investigates hand gesturing behavior produced by mothers communicating with their first born 2- to 3-year-old children and their 4- to 5-year-old children. Thirty-two mother-child pairs were assigned to groups balanced equally for age and sex. After it was confirmed that the older children produced longer utterances, the mother-child pairs were given four randomly ordered tasks designed to measure gesture production. The tasks included a description of a grocery shopping event, a storytelling task, an object description task, and a toy manipulation task. The first two minutes of each task were videotaped and analyzed for frequency and type of gestures produced. The results indicated that task and age significantly influenced the frequency of all gesture types produced. The object description task evoked the most gestures and the toy manipulation task evoked the least. Mothers of older children tended to produce more gestures and more complex types of gesture than mothers of younger children, indicating that they were making developmental adaptations in their gesture behavior while communicating with their children. Further investigations of the development of nonverbal forms of communication and of the relationship between verbal and nonverbal systems are necessary to provide a basis for detecting communication deviance and delay and developing programs to teach nonverbal skills to language impaired children. (Author/RH)

Eye Movements, Individual Differences, and Television-Viewing Patterns of Children.
Pub Date—Apr 79
Note—17p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April 8-12, 1979)
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Attention, Children, Cognitive Processes, *Elementary School Students, *Eye Movements, *Individual Differences, Reaction Time, Research, Response Mode, *Television Viewing, *Visual Perception
This study investigates the perceptual processing capabilities by analysis of eye movement of children from differing levels of field independence/dependence. Forty nine field independent (24 girls, 26 boys) and 36 field dependent (19 girls, 17 boys) children in third grade were analyzed as they viewed either seven dynamic or seven static segments from the Children's Television Workshop program. It was hypothesized that both good readers and field independents would exhibit more sophisticated scanning strategies and that the dynamic mode of presentation would result in significant eye movement differences from those exhibited in the static mode. Regression analyses revealed that eye movements were rather stimulus specific. Supplantation of mental operation by the stimuli was also an important consideration of this study. (Author/MP)

Memory and Memory Verification Capability of Young Children.
Pub Date—Mar 77
Note—19p.; An earlier version of this paper was presented at the Biennial Meeting of the Society for Research in Child Development (New Orleans, Louisiana, March 17-20, 1977)
Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Cognitive Processes, Learning Processes, *Memory, Models, *Preschool Children, *Recall (Psychological), *Recognition, *Research
The purpose of this study was to ascertain (1) whether young children are able to recognize a need to check response accuracy and memory verification and (2) what strategies they use. A model of the nursery room was used to assess 37 preschoolers' recognition, recall, and spatial memory for school objects. Children were asked to verify their memories in order to determine verification strategies, and, following an opportunity to re-examine the criterion, memory was reassessed and performance compared to initial memory relative to these strategies. The results indicated that few children at first knew an objective way to verify but that after prompting most seemed aware of its utility. Although memory and verification scores were generally unrelated, spatial memory after verification was positively and significantly correlated with measures of verification. The memory verification paradigm introduced appears useful for studying purposeful behavior in young children. (Author/MP)

Descriptors—*Child Care Centers, Child Development, *Day Care Services, Enrichment Experience, *Family Day Care, *Interviews, *Mother Attitudes, Parent Child Relationship, Parent Role
This paper investigates how parents are affected by various types of child care. Interviews were conducted with 109 mothers of children aged 2 to 3 1/2 years placed in one of three forms of substitute care arrangement (day care center, family day care and in-home care.) Most of the families were intact and middle class. The three groups of families did not differ in terms of socioeconomic status, family composition, parental or child age, reasons for day care, or maternal child-rearing values. The analysis of the interview responses revealed that parents are affected in different ways by the three care types. In general, utilizing center care appears to have the most positive effects on parents, using a babysitter in one's own home, the least. Mothers who use day care centers are most likely to report (as a result of the care experience): having become more knowledgeable as parents; feeling less harried; finding more enjoyment in parenting. They also tend to report more often that the parent-child relationship

had improved. On the other hand, users of family day care are happier with the discipline their child receives and are more likely to feel that their child-rearing values are shared by the caretaker. Further study of the impact of day care arrangements on parents, and the consequent impact on the development of the child, is suggested. (Author/RH)

Sex Typed Differences in the Spontaneous Play Behavior of Infants 9 1/2 to 15 1/2 Months of Age.
Pub Date—Mar 79
Note—12p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (San Francisco, California, March 15-18, 1979)
Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—Age Differences, Cognitive Development, *Infants, *Play, *Sex Differences, *Toys
Identifiers—*Gender Identity
This study provides evidence of sex-typed behavior in the spontaneous play of infants between 9 1/2 and 15 1/2 months. Eight boys and eight girls at 9 1/2, 11 1/2, 13 1/2, and 15 1/2 months were observed during 15 minutes of free play with a variety of realistic toys equally divided into male, female, and neutral categories. Stereotypical, relational, and functional play and number of different uses were defined a priori and recorded in 10-second blocks. Significant main effects for age were found for the four classes of play. While total active play remained stable, the four classes of play differed with age. Stereotypical play (85% at 9 1/2 months was replaced by relational play (39%) as the dominant behavior at 13 1/2 months. Functional play, rare at 9 1/2 months, increased to 52% at 15 1/2 months. The number of different appropriate uses increased linearly with age. Significant category x sex interactions were found for stereotypical and functional play. Boys played more with male than female toys. Girls played more with female than male toys. Significant differences in sex related stereotypical play, absent at 9 1/2 months appeared reliably at 11 1/2 months. Significant differences in sex related functional play, absent at 11 1/2 months, appeared reliably at 13 1/2 months. The results indicate that sex type behavior occurs between 9 1/2 and 15 1/2 months and suggest that this phenomenon emerges during this 6-month period. (Author/RH)

Identifiers—*Piagetian Tests
This 4-year longitudinal study of logical reasoning found complex interrelationships among different cognitive processes of children ages 6 to 15. Piaget's stage theory is discussed in the introduction, with a focus on the concrete operational stage in middle childhood. In the study, a representative array of logical concept tasks and short-term memory measures was administered to children at the kindergarten, third, and sixth grade levels. Of the initial sample of 134 subjects, 88 participated in all four years. The target domains included relations (e.g., seriation), classification (e.g., class inclusion), natural number (e.g., number conservation) and conservation (e.g., equivalence of weight), and the groupement structures into which they enter. The relative difficulty of the tasks, age-task and other interactions, and the connections among the abilities involved are described statistically. It is suggested that the data fit the sigmoid sequence (a series of ascending curves) of stage transitions proposed by Feldman and Toulmin, in which some skills develop in a lock-step fashion and others relatively independently of one another, better than the classical model of stepwise transitions. It is concluded that the primary research question concerns the modifications necessary in the Piagetian concrete operations stage designation to permit it to play a continued role as a potential explanatory construct in more complete accord with developmental reality. Data are presented in 39 tables (comprising nearly half of the report), and there are 14 figures representing grade or age by performance means for the different tasks. (Author/BH)

Identifiers—Interpretation (of Results), *Only Children
This paper reports survey results, from a sample of 76 women past child bearing age with varying numbers of offspring, which suggest that not only sibling absence but also distinctive characteristics of mothers would be considered in studies of the personal and social characteristics of only children. (Among the maternal characteristics mentioned were birth complications, mothers' affiliativeness and attitudes toward children.) The review of related literature points out questionable interpretations and conflicting results of prior studies and indicates weaknesses in the arguments that differences between only and other children are caused by the absence of a younger sibling. Particular attention is given to the interpretation of the fact that only children score lower than expected on IQ tests. (RH)

Identifiers—*Child Custody, Texas
A review of the literature on custody and visitation reveals many contradictory opinions, little empirical evidence and lack of a conceptual framework for assessing issues. An exploratory study is reported in which 99 custodial parents, 71 noncustodial parents and 70 children of divorce expressed their opinions on custody and visitation. The data revealed two clear needs of the children: a stable and supportive developmental context, and continuing attachment bonds with both parents and siblings. These needs seemed to have been met reasonably well for these subjects, most of whom were from single parent custody situations. The way in which they were met appears to be through continuing conflict between the parents, with custodial parents defending the first need and non-custodial parents fighting for the second. It is suggested that successful single parent custody follows a conflict model, that split custody might be a parallel model and joint custody a cooperation model. This framework appears fruitful for further empirical exploration of the nature of successful post-divorce family relationships. (Author/BH)

Identifiers—*Maryland
This study compares an open space elementary school and a traditional school in Harford County, Maryland, in terms of cognitive and non-cognitive student outcomes. In order to assess whether there were differences in instructional climate (open vs. traditional) between the two schools, the Walberg and Thomas Teacher Questionnaire was administered to 27 teachers in the open school and 20 teachers in the traditional (control) school as an index of the teachers' opinions and practices. The results supported anticipated differences in instructional climate between the open and control schools. The subjects of the study were 127 third grade students (65 open, 62 control) and 139 fifth grade students (81 open, 58 control). The subjects were tested on achievement (the Iowa Tests of Basic Skills) and abstracts or fluid intelligence (the Cognitive Abilities Test Nonverbal Battery). Two measures of students' attitudes were also employed: (1) the Intellectual Achievement Responsibility Scale, as an index of locus of control in the classroom, and (2) the School Sentiment Index, as a measure of attitudes toward the school environment. There was no unequivocal evidence for the superiority of open education in all areas of student achievement, although fifth grade open school students did significantly better than control students in the language arts. The results of the attitudinal measures were mixed and limited by sample size, but a significant sex by environment interaction emerged at grade five. In grade five, girls at the open school were more positive in their attitudes toward school than girls at the traditional school, whereas boys were more positive in the traditional school than in the open school. Three tables summarize the results. (Author/BH)

Identifiers—*Piaget (Jean)
This paper is a progress report on a series of experiments which have sought to probe the cognitive development of mildly mentally retarded and normal children, using conservation training as the principal research tool. Three- and 4-year-old children were given Verbal Rule instruction in a 2 x 2 x 2 design intended to probe the importance of identity, reversibility, and compensation explanations in the training of number and length concepts. The method replicated an earlier study of educationally subnormal children. Striking similarities were found in the responses of both groups of children. Identity was the primary factor in conservation acquisition; reversibility was important as well; compensation strategy proved to be of little value to either group. Justifications offered by both groups also were very similar. These varied according to the quantity being explained rather than the training received. Implications of the findings for use of conservation training as a diagnostic tool by which the truly retarded may be differentiated from other educationally subnormal children are briefly discussed.

Identifiers—*Developmental Evaluation Services For Children, Maryland

This manual describes in detail the Developmental Evaluation Services for Children program (DESC), a model interdisciplinary project funded to help others implement similar diagnostic and treatment services for young children with developmental difficulties. Section 1 gives an overview of the DESC project and describes the evaluation process in detail. Criteria for referral and acceptance complete this section. Section 2 describes the assessment process and the diagnostic nursery. In addition, two charts depict the assessment procedures: one summarizes the basic diagnostic questions addressed by each discipline; the other summarizes procedures used by each discipline. Sections 3 and 4 describe the administrative and professional responsibilities and functions in the DESC model. Section 5 suggests alternatives for staffing a DESC-type program which, while preserving the basic concept, requires less staff. (Author/MP)

Identifiers—*Caregiver Qualifications

This executive summary of the final report of the National Day Care Study (NDCS) of March 1979 summarizes findings and policy recommendations, gives the background to the study and presents findings on quality and costs of center-based day care. Recommendations for federal regulations for preschool children, infants and toddlers, center characteristics, regulatory language and monitoring guidelines are indicated. The major cost/effects study of center-based day care for preschool children was conducted between 1974 and 1978 in 67 day care centers in Atlanta, Detroit and Seattle. Data from the major study and two supporting studies, a smaller research effort focusing on center day care for infants and toddlers and a national telephone survey of 3100 randomly selected centers, were analyzed. The NDCS found that higher quality care is associated with two low-cost ingredients (smaller groups of children and caregivers with child-specific education/training). The number of classroom staff per group (caregiver/child ratio) was not an important contributor to quality within the policy-relevant range of 1:5 to 1:10. Ratio was strongly related to differences in cost. Regulatory language and rules used to monitor compliance were found to influence center practices as much as the content of the regulations. The study concluded that revision of current federal day care regulations could allow the government to buy better care at slightly lower cost. More children could be better served within current budgets. (Author/RH)

Identifiers—*Piagetian Tests, Stanford Achievement Tests

This study of Piagetian formal reasoning in seventh grade students reports the relationships between four aspects of the ability to control variables in an experiment and the relationships between those four aspects and other constructs. The four aspects of the ability to control variables identified are: (1) set up a controlled experiment, (2) assess an experiment done by another, (3) ignore the results of an uncontrolled experiment and recognize that it is uncontrolled, and (4) indicate what variables will affect the outcome of an experiment. The 124 subjects dealt with each of those questions on three different tasks. Measures of achievement (crystallized ability), field dependency (FDI), locus of control, divergent thinking, concept identification, and the Category Width Test were also employed. Results indicate that all true variance in the measures of formal thought is explained by these ability and personality measures. The interrelations among the factors studied are discussed, and brief comments about educational implications are made. Three tables present study results. (Author/BH)

This paper identifies limitations of previous investigations of the relation between televised violence and viewer aggression and suggests a framework for future research concerning the effects of media viewing on child development. It is suggested that typical research is short-term, cross-sectional, and laboratory-based. Factors which mediate the effects of televised violence, such as gender differences, habitual levels of aggression, motivational states, age, protrayal of motives, format of the program and parental approval/disapproval, remain relatively unexplored. While studies indicate that positive behaviors increase in children after these behaviors are viewed on television, processes involved in prosocial behavior effects are unclear. Effects of prosocial television on children should be investigated. A framework for redirecting research efforts comes from life-span and ecological perspectives of developmental psychology. Longitudinal design permits the identification of cohort and time of measurement variables which are especially important in the assessment of media effects. Cumulative effects of exposure to media violence can be identified. Cohorts of children, with siblings used as matched controls, can be studied naturalistically in the family setting. Although risky and expensive, collaborative use of both life-span and ecological perspectives should yield vital information about the impact of television on the lives of children. (Author/RH)

Descriptors—Child Rearing, Children, Environmental Influences, *Family Influence, Family Life, Family Relationship, *Interaction Process Analysis, *Interpersonal Competence, Parent Child Relationship, Parent Influence, *Peer Relationship, Primatology, Psychological Studies, Security (Psychology), Siblings, *Social Adjustment, Social Behavior, *Social Development, Social Environment, Socialization, Student School Relationship

This paper reviews the literature concerned with the effect of various social systems (e.g., the family and the school) on the growth of social competence in the individual child and makes suggestions for further research. The discussion employs the contemporary view of socialization which emphasizes reciprocal causality (i.e., the reciprocal consequences ensuing each time a child interacts with another individual). The first section deals with research on the major social worlds of the child–family, peers, and school–and stresses both how those worlds affect the child and vice versa. For example, the relations between a child's parents will influence the child's social development, but the child's actions also influence the parents' relationship. The second section discusses the interrelationship among the child's social worlds, with a focus on how family relations affect peer relations and vice versa. Considerable use is made of primate studies in arguing that secure family relations have important consequences for peer relations, although the nature of the social interaction differs greatly between the two systems. It is concluded that family relations provide the basis for the child's exploration of the social world which is necessary for social adaptation. Throughout the document, recommendations are made for more detailed empirical analysis of the child's interactions with others and their effects on social development. An extensive bibliography is appended. (Author/BH)

Descriptors—Adjustment (to Environment), Age Differences, *Attachment Behavior, *Children, Coping, *Emotional Adjustment, Family Status, Learning Difficulties, *One Parent Family, Peer Relationship, Sex Differences, Social Adjustment, *Social Behavior, Verbal Communication

Identifiers—Gaze Direction Behavior, Proxemic Behavior, Tactile Behavior, *Two Parent Families

This study compared the psychosocial adjustment and social behavior of children from divorced or separated single-parent families with that of children from two-parent families. The theory of attachment was adopted as the conceptual framework for the study because of similarities between the behavioral response of children to parental separation (as reported in the clinical literature) and that of young children to separation from an attachment figure. Observations were made of the gaze direction, proxemic, tactile and verbal behavior of 38 children (19 single-parent and 19 two-parent) between 8 and 12 years old in classroom settings. Psychosocial adjustment was rated by classroom teachers. Teachers rated single-parent children as being more "academically disabled" than two-parent children and results of univariate analysis of gaze direction behavior suggest that two-parent children may adapt more successfully to the shifting demands of the classroom than single-parent children. Multivariate analysis of the behavioral data found significant main effects for age and sex but not for

family status. A significant interaction effect on children's verbal behavior with male peers was found for family status and age during periods of social interaction. During non-academic time periods older single-parent children of both sexes contacted and spent more time in dyadic conversation with male peers than older two-parent children. Differences were also noted in the patterns of correlations between teacher ratings of academic disability and observations of the children's behavior. These findings are discussed in relation to attachment theory, peer relations and the academic performance of single-parent children. (Author/RH)

Descriptors—Age Differences, *Aggression, Altruism, *Child Development, Childhood, Elementary School Students, Emotional Development, *Empathy, Interaction Process Analysis, *Prosocial Behavior, Psychological Studies, *Reliability, Research Methodology, Sex Differences, Social Development, Television Viewing, *Violence

This paper argues that (1) as measures of emotional empathy in children are refined, there is increasingly strong support for the hypothesis that emotional empathy can serve both as an inhibitor of antisocial behavior and as a motivator of prosocial behavior, but that (2) since the relation between children's empathy and their behavior is confounded by a number of factors the measures require further refinement. Research is described which investigates the responses of children in grades one, three and five to violent and non-violent events shown in slides and on television. No sigificant evidence was found that children's assessed level of empathy was related to their aggressive or altruistic behavior toward peers. It is argued that the criterion measures of altruism and aggression are not responsible for this result, but that an aspect of the empathy measure, children's reports of their own affect, is not reliable. When a measure not dependent on children's self-reports was used, the relation between empathy and behavior appeared dependent upon (1) empathic responses to specific affects and the relevance of specific empathic emotions to the criterion behaviors, (2) situational factors in the empathy eliciting and criterion contexts, and (3) the age and sex of the children. It is suggested that both younger and older children are aroused by violent episodes, but that the latter are more likely also to empathize with the victim. A short description of the Feshbach and Roe measure of empathy and five tables of data are appended. (Author/RH)

Identifiers—*Texas (Austin)

A total of 1657 sixth grade pupils in 53 randomly integrated tri-ethnic classes, and their teachers, participated in a 1-year longitudinal study investigating the effects of peer-rated coping and teacher classroom structure on achievement. The subjects were given initial achievement and peer-rated general coping measures and a post achievement measure. The teachers were rated on Ryan's Classroom Observation Record, a measure of teacher classroom behaviors, from four to seven times during the year. Achievement gain for pupils was found to vary strongly with coping skill only for those initially high in achievement. Highly organized teachers could help low initial achievement, high coping students, and disorganized teachers could have a negative effect on low coping, high initial achievement pupils with respect to achievement gain. Descriptors—Academic Achievement, *Achievement, *Coping, Effective Teaching, *Elementary School Students, Failure Factors, Grade 6, *Intervention, Models, Psychoeducational Processes, Psychological Patterns, Self Concept, *Self Esteem, *Statistical Studies, Success Factors

The purpose of this paper is to clarify the relationship between self-esteem and achievement and to explain why changes in self-esteem have not resulted in changes in achievement. It is postulated that self-esteem affects achievement indirectly through the medium of coping skills. Data from a study of 1657 students in 53 sixth grade classrooms in Austin, Texas were analyzed. Random assignment assured that each class was an integrated, representative sample of the Anglo, Black and Chicano population. Self-esteem and achievement were measured at the beginning and end of the school year. A measure of coping skills was administered at the beginning of the year only. The dependent variable was achievement regressed change. The general analytic method used was a linear model in which the pretest was entered first as a covariate and the predictors were entered next. Hypothesis testing involved comparing restricted models to full models and testing the difference between them. Coping was found to significantly predict achievement change whether or not self-esteem was considered. Coping skills which have behavioral consequences for achievement provide a behavioral network through which intervention should be effective in changing achievement. A general conceptual framework for self-esteem, coping and achievement variables is provided. Directions for further research are suggested. (Author/RH)

The purpose of this analysis is to provide an estimate of the mean correlation of home environment measures with learning measures across studies and to indicate sample and study characteristics associated with different magnitudes of correlation. University of Chicago studies of behavioral processes and British investigations of parental experiences and attitudes and material conditions in the home were analyzed to determine if the studies differ in predictive validity. From a systematic search of educational, psychological, and sociological literature, 18 studies of 5,831 first through twelfth grade students in eight countries over a 19-year period were selected. Eight items of information were recorded for each correlation: the size, age, sex, and socioeconomic status of the sample; the home assessment and learning measures employed; Chicago or British research school; and type of correlation. It was found that correlations of intelligence, motivation, and achievement with indexes of parent stimulation of the student in the home are considerably higher than those with indexes of socioeconomic status (SES). Specifically, the median of 92 simple correlations of home environment and learning is .37 (with a range of .02 to .82) and the median of 62 multiple-regression-weighted composites is .44 (range .23 to .81). Jackknifed regression estimates indicate that the gender and SES of the sample condition the sizes of the correlations and suggest priorities for future primary investigations. (Author/RH)

This brief essay argues that the best way to improve student achievement is to increase parental teaching of children prior to school entry. The essay is accompanied by an annotated bibliography summarizing 14 empirical studies which document a significant positive relationship between parental teaching and student achievement. It is contended that it is well known that the skills children bring to school are far more important than anything that happens to them in school. The explanation for social class differences in achievement is that the experiences of children from high socioeconomic status (SES) homes are more like the educational experiences in the school than are those of low SES children. These achievement differences can be countered by changing the home experiences. The three most effective manipulable variables influencing achievement are (1) time on task, (2) student/teacher ratio and (3) motivation. Although there are limits on how much can be done about these variables in school, they can readily be maximized in the home, which again argues for parental instruction. Findings of the 14 studies cited suggest that the essential role of parents in the education of their children must be recognized and that steps must be taken to encourage parental teaching. More than one-half of the essay consists of an annotated bibliography of the 14 studies cited. (Author/BH)

Descriptors—Behavior Patterns, *Infant Behavior, Infants, Interaction, *Peer Relationship, *Play, Social Behavior, *Toys

In this study of early peer interaction, 32 first born infants (16 boys, 16 girls) were videotaped in pairs at 6, 9 and 12 months. Each 15 minute session consisted of Toys Present (TP) and Toys Absent(TA) conditions counterbalanced across dyads. Three questions were addressed: (1) Are infants as young as 6 months capable of interacting with a peer? (2) What type of social acts are used during these early

encounters? (3) Do toys facilitate the interactions? Successful attempts to interact occurred about 38% of the time. Interactions of the form "social behavior/social response" were the most common exchange even at 6 months, although less social contingencies were also common. Within the sequences, vocalizations, smiles and touches were the most frequent social acts used to initiate, maintain and terminate the interactions. Toys were found to have a significant effect on the interactions. More and longer sequences occurred in the absence of toys, and every social act with the exception of object related social acts was more frequent in the TA condition. There were indications, however, that the objects became more important towards the end of the first year. (Author/RH)

The Eyes Have It: Visual Help for Auditory Acuity.

Pub Date—Mar 79

Note—9p.; Filmed from best available copy; Paper presented at the Biennial Meeting of the Society for Research in Child Development (San Francisco, California, March 15-18, 1979)

Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Attention Control, Auditory Evaluation, *Auditory Tests, Elementary School Students, Preschool Children, Retarded Children, *Testing Problems, *Visual Stimuli

Identifiers—*Bekesy Audiometric Procedures

A non-aversive modification of Bekesy Audiometric Procedures (BAP) used in assessing hearing ability has been found to produce interpretable audiograms from children whose responses to the unmodified BAP were erratic and uninterpretable. In an experiment with six 8-year-old children, three subjects were assigned to a condition in which a light cue was provided that changed in brightness as the auditory stimulus changed in intensity. As a test session progressed, the light was systematically faded until a child had to rely entirely on the test tone. For the remaining three subjects the unmodified BAP were provided. Children receiving visual help learned to monitor and adjust the auditory test stimulus readily and their audiometric records were reliable. Further, when children who produced uninterpretable and erratic results under unmodified procedures were switched to the modified test procedure, their thresholds stabilized. A second experiment with six preschoolers and six third-graders investigated three sequences of stimulus presentation. All sequences produced equally reliable thresholds with the third-graders. Fading the test sound into the light presentation produced the most consistent threshold measurements for the preschoolers. The modification of the BAP offers an improved way to assess the hearing of difficult-to-test persons. Implications concerning auditory attention span are briefly indicated. (Author/RH)

Descriptors—Elementary Education, Ethnography, *Intervention, Interviews, Low Income Groups, Models, *Parent Education, *Parent Participation, Parent Student Relationship, Program Evaluation, *School Community Cooperation, School Community Relationship

Identifiers—Parent Education Follow Through Program, *Washington (Yakima)

This report represents a synthesis of data related to the impact of the Parent Education Follow Through (PEFT) Program in the Yakima (Washington) School District. It was compiled from reviews of written documents and interviews with both model sponsor staff and parents, teachers, community leaders and others within the Yakima School District. The program, in which paraprofessionals and parent educators worked with children in kindergarten and first grade classrooms and with their mothers in the homes, is briefly described. The political, economic and ethnic characteristics of the community and school staff are noted. The community's response to the program is said to be generally positive. It is concluded that the PEFT program is a dynamic force for institutional and social change within the Yakima community. Factors contributing to the apparent success of the program are discussed, along with some criticisms leveled at the program. (Author/BH)

Identifiers—Exploratory Behavior, *Parental Behavior, Parent Interaction

This paper argues that researchers should not investigate child development simply through studies of the child alone or mother-infant interactions, but rather through studies of the family as a system. Data is reported which seem to support this view. A review of recent literature indicates that an adequate account of child development requires an interdisciplinary effort involving family sociology and developmental psychology. A conceptual model is proposed in which there are reciprocal interrelations between the child's development, parental behaviors, and husband-wife interactions. Data drawn from a previously published study appear to support this model with respect to interrelations (1) between paternal (and maternal to a lesser degree) parental behaviors and husband-wife interactions, (2) between parental behavior and infant exploratory competence and (3) between infant competence and husband-wife interactions. Further research about these interrelations as they change over time is recommended. (BH)

Identifiers—*Parent Education Follow Through Program

This article presents 5-year longitudinal data on parent involvement in the Parent Education Follow Through Program in ten communities in nine states. The data are categorized in terms of the six major ways in which parents can become involved in the program: (1) teachers of their own children, (2) paid paraprofessionals, (3) decision makers and policy advisors, (4) adult learners of new skills, (5) audience or recipients of information and (6) volunteers in the classroom. Program procedures for promoting these roles are described. The chief measures of parental involvement employed were the percentages of parental time spent in the different roles and percentages of the population (parents) who participated. The percentages were found to rise to high levels over the 5-year (1973-1978) period. The data are presented in six tables. (BH)

Descriptors—Academic Achievement, *Achievement Gains, *Effective Teaching, Elementary School Students, *Intervention, Low Income Groups, *Parent Influence, *Parent Participation, Parent Role, Parent Student Relationship, Program Evaluation, Research, Student Improvement

Identifiers—Parent Education Follow Through Program, *Parent Teaching Behaviors

This evaluation study had two aims: (1) to compare the teaching behavior of parents who had been participating in the Parent Education Follow Through (PEFT) Program to that of parents who had not, and (2) to examine the relationship between child achievement and parents' use of the 10 desired teaching behaviors (DTBs) emphasized by the PEFT program. Subjects were 63 program families and 46 nonprogram families at two PEFT sites. All were low-income families. PEFT families were in the second year of program participation. Non-PEFT families had never been involved in a home visitation program. Two parent-child interaction situations were used to collect the data on videotape: a matching-faces activity and a book-reading activity. The Total Reading and Total Mathematics subtest scores on the Stanford Achievement Test Primary Level 1 Battery (1973) were used to assess achievement. It was found that in only one of the two communities were PEFT parents using significantly more DTBs than non-PEFT parents. In that community the number of DTBs used by PEFT parents was significantly related to both reading and mathematics achievement test scores of their children. Differences between communities may reflect different program emphases. Findings are interpreted as evidence that the way parents teach their children is related to the child's school performance. The DTBs of the PEFT program are seen to be important ones. (Author/RH)

Children's Behavior in Pre-School Settings: A Review of Research Concerning the Influence of the Physical Environment.

Pub Date—Apr 79

Note—56p.; Paper presented at the Annual Meeting of the American Educational Research Association (San Francisco, California, April 8-12. 1979)

Pub Type— Information Analysis (070) — Opinion Papers (120) — Speeches/Meeting Papers (150)

EDRS Price - MF01/PC03 Plus Postage.

Descriptors—*Behavior, *Classroom Materials, Early Childhood Education, Ecological Factors, Educational Principles, Educational Research, *Environmental Influences, Play, *Preschool Children, *School Space, Space Utilization

Identifiers—*Proxemics

This review provides an overview of research relating the physical environment of the early childhood educational setting to children's behavior. Findings on space in relation to fixed and semi-fixed features (partitions, playground equipment, furnishings); spatial density; the arrangement of equipment and the division of space; the amount, variety, type and display of materials; holding power, children's attention span and social value of materials; the variety and complexity of materials in relation to an overall index of space quality; ecological studies of

materials and other classroom variables; and the effect of activity settings are pointed out. Implications for practice are indicated. Main findings on the effects of materials provided to children in early childhood settings are summarized. The following principles have been extracted from the review: (1) space must be analyzed in terms of whether it provides for a full range of children's behavior; (2) systematic observation of children at play in the educational setting is crucial to an analysis of the environment; (3) there can be no one set of prescriptions for the optimal arrangement of space in early childhood settings; (4) in addition to space and materials, teacher behavior and program format constitute major variables in the early educational setting; (5) in preschool design, interrelationships among activity settings should be considered; and (6) planning to enhance child-environment involves a study of the ecology of the preschool. Effects of Empathy Instructions on First-Graders' Liking of Other People.

Spons Agency—Kansas Univ., Lawrence.

Pub Date—Mar 79

Note—28p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (San Francisco, California, March 15-18, 1979)

Pub Type— Reports - Research (143) — Speeches/-Meeting Papers (150)

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—Behavioral Science Research, *Elementary School Students, *Empathy, *Evaluative Thinking, *Instruction, *Interpersonal Attraction, Social Attitudes, Social Relations, Social Values

This paper reports two studies of the effects of empathic instruction on first graders' evaluations of other people. In Experiment I, 23 children received either empathic or non-empathic instructions, listened to a taped conversation in which the main character obtained either a positive or negative outcome, and then evaluated both the main character and the person who provided the outcome to the character. It was found that empathic instructions increased positive evaluation of the main character under negative outcome conditions only and produced a change in evaluative perspective in regard to both members of the interacting dyad. In Experiment II, 80 children received either empathic or neutral instructions, were informed that the main character was similar or dissimilar to themselves, and listened to a taped conversation in which the main character always obtained a mildly negative outcome. Female subjects evaluated the main character in the predicted sequence: empathy instructions and similarity information led to greatest liking, neutral instructions and dissimilarity information led to least liking, and the other two combinations led to intermediate levels of liking. Unexpectedly, male subjects responded to empathic instructions by evaluating the main character less favorably. Explanations for the males' evaluative behavior are discussed. Results are discussed in terms of whether empathic responses can be directly induced by instruction. (Author/RH)

Descriptors—*Administrator Responsibility, Agency Role, Centralization, *Child Welfare, Data Collection, *Exceptional Child Services, *National Surveys, Recordkeeping, Research, State Action, State Standards, *Youth

Identifiers—*Administrative Procedures

The purpose of this survey was to identify procedures and practices of child welfare and related agencies of each state in the United States regarding out-of-state placement of children and reception of non-resident children for therapeutic, educational, physical and psychiatric services. An overall view emphasizing functions and responsibilities of state governments rather than specific statistical data was sought. The survey instrument (a two-part questionnaire) was not intended to be an evaluative research instrument. Forty of the 50 states responded. Major findings are summarized. Twenty-eight of the states reported they do not have a central unit that makes evaluations of out-of-state facilities. Limited information indicated that "emotional disturbance" was the most frequent classification of children placed out-of-state with "socially maladjusted" the second most frequent classification. The major conclusion of the study is that very few states have centralized information about either their procedures for placing children out-of-state or the children placed out. The same is true for non-resident children received. Placement coordination, evaluating and monitoring, centralization of approved facility registries and improved record keeping are among the recommendations made. Questionnaire and results are appended. (Author/RH)

Descriptors—Early Childhood Education, *Energy, *Energy Conservation, Home Programs, Kindergarten Children, *Learning Activities, Parent Participation, Preschool Children

This preschool curriculum guide for energy education provides concepts and activities designed to develop an awareness of energy, an interest in understanding energy and a sense of ability and responsibility to use energy wisely. The guide provides language, science, math, social studies, art, physical education and music experiences appropriate for small or large groups of children. An ageless non-sexist MIZER sun-symbol (a puppet or bulletin board figure) is essential to the program as a means of personifying abstract concepts and integrating diverse activities. The guide has five major sections organized around the ideas of understanding basic energy transfer, using energy wisely and sources of energy. Letters from MIZER are included in the fifth section as a means of extending the school-based program to activities and games for the family at home. Field testing suggests that progress through the curriculum should be slow in order to give the children and their families time to acquire and respond to the energy education ideas and activities. Simple activities and basic materials proved better than more elaborate implementations for instructing young children. A Household Energy Management Checklist and a family survey letter are included in the guide. (Author/RH)

Descriptors—Academic Achievement, Age, Age Differences, *Birth Order, *Children, *Family Characteristics, Family Environment, Family Influence, *Intelligence, Models, *Psychological Studies, *Research Problems, *Siblings

Identifiers—*Sibling Spacing, Zajone (Robert B)

This paper criticizes Zajonc's confluence model of the relationship between sibling spacing and sibling intelligence. According to Zajonc, variations in the intellectual performance of individuals are accounted for in part by two features of the individual's family of orientation: (1) the number of children in that family, and (2) the spacing between those children in a family. This model is criticized for (1) inconsistencies in the relationship between child spacing and intelligence in the data reported in Zajonc's paper; (2) the failure to present previous child spacing-intelligence data which conflict with the confluence model and (3) the problem of using between-family data for making within-family inferences about intelligence. New within-family data are presented which indicate that there is essentially a zero relationship between child spacing and academic achievement. (Author/BH)

Descriptors—*Abstraction Levels, Adults, *Age Differences, *Classification, *Concept Formation, Elementary School Students, *Memory, Pictorial Stimuli, Reaction Time, Research

The purposes of this experiment were: (1) to examine the development of categorical representations by comparing the performance of children of various ages to adults, and (2) to compare the internal representations of basic level and superordinate categories. Subjects were 48 children (in second, fourth and sixth grades) and 16 adults. The stimulus pictures consisted of 80 line drawings of objects belonging to five categories. On each trial the experimenter orally presented a category name to the subject, then advanced a slide tray exhibiting an arrow which indicated the orientation of the test stimulus. When the subject felt prepared for the test picture, he or she pressed a foot pedal which stopped the timer (measuring preparation time). Approximately one second later the test stimulus was presented, and again the timer was activated and stopped by the response of the subject (measuring discriminative response latency to the test situation). The analysis of the preparation times indicated that superordinate representations are generated and rotated at the same rate as basic level representations. In contrast, the analysis of the response latencies to the test response stimuli revealed that the representations are different. For basic level trials, neither typicality nor response type interacted with the angle of rotation. For superordinate trials, there were significant effects of age level, typicality, and angle of rotation. (Author/MP)

A Naturalistic Study of Memory for Object Location in Very Young Children.

Spons Agency—National Inst. of Child Health and Human Development (NIH), Bethesda, Md.

Pub Date—Mar 79

Grant—NICHHD-HD-05951;

Note—14p.; Paper presented at the Biennial Meeting of the Society for Research in Child Development (San Francisco, California, March 15-18, 1979)

Pub Type— Speeches/Meeting Papers (150) — Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—Age Differences, Conservation (Concept), *Infants, *Memory, Psychological Studies, Research, *Research Design, Research Needs, Research Problems, *Time Factors (Learning), Toys

Identifiers—*Naturalistic Studies, *Object Location

Two naturalistic studies of young (18-30 month old) children's memory for object location are reported which indicate that young children's memories are better than non-naturalistic studies suggest and that they have confidence in their memories. In the first study, 17 children were observed attempting to find objects they had watched their mothers hide in their homes with delays of 1, 3, or 5 minutes between hiding and seeking. Despite the unusually long delay for children of this age, subjects went directly to the toy with no errors on 76 percent of the trials. When three toys were hidden at once (with 3- or 5-minute intervals), children found the specific toy requested on 67 percent of the trials. The second study involved 12 children over a period of three days. On the first two days, an adult hid the toys in four of eight trials and the children themselves hid the toys in the other four trials. Perfor-

mance was significantly better when children hid the toys themselves; when adults hid the toys, results of the first study were replicated. It is hypothesized that the difference between the results is due to differences in the level of processing. On the third day, there were two "surprise" trials per subject in which the objects were moved after hiding without the child's knowledge. Differences in children's responses observed between normal and surprise trials indicated that the children were confident of their memories. Age differences in responses to the surprise trials are discussed in an addendum. (BH)

Descriptors—*Adjustment (to Environment), Attachment Behavior, Coping, *Educational Coordination, Educational Diagnosis, Elementary School Students, Kindergarten Children, Parent Role, Preschool Children, Projective Tests, *Psychoeducational Processes, *Readiness, Research, *Student Adjustment, Teacher Role

Identifiers—*School Entrance, Separation Behavior

The purpose of this paper is to dispel some of the fantasies surrounding school readiness and to look at some of the realities presented to parents and schools by children. Section I provides developmental guidelines for assessing the school readiness of 3-year-old preschoolers, examines behavior patterns normally exhibited by children on entering school, describes coping styles used by children in attempts to master the new school situation, examines areas in which regression to earlier behavior patterns commonly occurs, and reviews the roles of parents and teachers in providing support and setting expectations for a smooth adjustment into school. Section II briefly explores reactions to separation among 4- and 5-year-old children. Section III lists nine observable diagnostic signposts of school readiness in 6-year-old students, suggests ways kindergarten children can be prepared for first grade, explores ways by which teachers can make the child's experience of the first grade setting more continuous with prior school experience, and concludes that there is currently a discontinuity between the young child's capacities and the school's expectations. Reactions to the paper are presented by two child psychoanalysts. The first discussion focuses on the mother's readiness for separation. The second briefly reviews observational and projective studies of factors related to children's adjustment to school. (Author/RH)

The objective of this document is to provide the school principal with some understanding of the concepts of adult learning and development and an awareness of some of the processes and techniques involved in a staff development program. Chapters present a paradigm for growth, cover the planning of the staff development program, provide perspectives on understanding adults and their development, characterize "the enabling person," outline approaches to organizing for staff development, discuss ways to present information and explore dimensions of small group interaction processes and their potential for effective staff development. Experiential activities for staff development programs are suggested and formative and summative approaches to program evaluation are explained. New competencies required of the school principal for facilitating organizational change to implement Public Law 94-152: the Education for All Handicapped Children Act (1975) are listed. Although the material can be used by anyone conducting staff development programs and sessions, it is advised that additional material and actual training may be necessary before competency is acquired. Identifiers—Child Custody, *Coparenting, Support Groups

This source book introduces perspectives and skills which can contribute to successful "co-parenting" (joint custody, joint parenting, co-custody or shared custody) of preadolescent children after parents are separated or divorced. Chapter One introduces the concept of co-parenting. Chapter Two advances an approach to developing flexible co-parenting schedules for the establishment of basic child care routines and provides tips for dealing with the ordinary but unanticipated demands of living with children. Chapter Three focuses on the problematic aspects of constructing a new kind of relationship with one's ex-spouse. In Chapter Four, the effects of situational instability and parental ambivalence on the child and the general issue of the child's adjustment are discussed. Professional perspectives related to co-parenting are assessed in Chapter Five. Difficulties of co-parenting, such as adjusting to the intermittent absence of the child, are indicated in Chapter Six. Chapter Seven describes a co-parent support group. In the final chapter, the author presents an interview with her ex-husband in which both explore their experience of co-parenting. (RH)

Document Not Available from EDRS.

Descriptors—Adolescents, Anti Social Behavior, Children, Childrens Television, *Cognitive Development, Commercial Television, Educational Television, Prosocial Behavior, *Social Behavior, *Socialization, *Television, Television Commercials, Television Research, *Television Viewing, Violence

This bibliography of selected television research lists 914 references to English, French and German publications (empirical studies, research reviews and summarizing literature) which deal with the use of television and its various functions for children and adolescents and particularly with the effects of television on children's personality and socialization. All of the studies were published from 1970 to about March 1978. Titles of each entry are in English. Contents in 12 sections cover a wide range of topics: bibliographies, mass communication research, general introductory works and literature reviews, studies on the uses and functions of television and other media (including comparisons of various age groups, developmental studies), studies on cognitive and emotional effects and studies on aspects of socialization (including socialization and interaction in the family context). Also cited are studies on the effects of TV violence on social behavior (including the research program of the Surgeon General's Scientific Advisory Committee on Television and Social Behavior), studies of the effects of prosocial content, formative and summative research on television series for children (Sesame Street, The Electric Company, Around the Bend, Carrascolendas, and other series), studies on the effects of news and information programs, studies on the effects of television advertising, and research agenda and recommendations. Entries are indexed by author and subject. (Author/RH)

Identifiers—*National Day Care Study

This volume presents a summary of the methods, findings and recommendations for federal policy of the National Day Care Study (NDCS), a 4-year study of the effects of regulatable day care center characteristics on the quality and cost of day care for preschoolers. Chapter I describes current day care services and the history of federal involvement to the present. Chapter II presents the major policy issues addressed by the NDCS and its conceptual framework and research design. Chapter III explains the sampling procedure of the NDCS. Chapter IV deals with those aspects of day care centers which are susceptible to federal regulation and hence most affected by federal policy decisions, and with alternative measures of policy variables. Chapter V discusses the conceptual and instrumental problems of defining "quality care" and gives the study's definition. Chapters VI and VII present the NDCS findings. In Chapter VI the relation between regulatable aspects of day care and quality of care, the generality of the findings, and the connection between research findings and policy decisions are explored. In Chapter VII the issue of cost versus quality is examined. Chapter VIII discusses current regulatory policy and recommends alternative regulatory policies. A "Commentary" is appended which presents the views of minority consultants on issues with crucial effects for minority children. Three appendices provide: (1) a summary of the findings of the NDCS Supply Study, (2) an overview of the Infant/Toddler Study, and (3) the names of all NDCS staff and consultants. (Author/BH)

Descriptors—Academic Achievement, Age, *Agricultural Laborers, Ethnic Groups, *Family (Sociological Unit), *Family Characteristics, Family Income, Females, Income, Males, Mexican Americans, *Migrant Housing, *Migrant Workers
Identifiers—*California
The Employment Development Department's Migrant Services Section provides temporary housing at reasonable cost for migrant farmworkers and their families by contracting with local government agencies to manage programs of housing construction, operation and maintenance. Since 1965 migrant housing projects have been constructed at 26 locations in 14 agricultural counties throughout California. This temporary housing, which is available for up to 180 days per year to migrant families while they are employed in agriculture, range in size from 50 to 125 units per center. In 1977 services were provided to 2,360 families whose members constituted a work force of 6,381; the average family size was 5.2 persons; the average annual family income was $5,140; 82.5% were Mexicans while 15.3% were Mexican Americans; 26.4% were from Texas while 24.4% were from within California; the average length of stay was 132 days; and 27.8% were between 22 and 44 years of age. Covering January through December 1977, this report presents tabular data on the characteristics of the migrant families occupying these housing centers. Given by center, the data pertain to: center occupancy; family size; age of family members; age of male and female family members; annual income by center and by family size; ethnic background; school years completed by persons 18 years and over; number of families by length of stay, total days and average stay; family home base; operation and peak occupancy dates. Indian Tribal Sovereignty and Treaty Rights.
La Confluencia, Albuquerque, N. Mex.
Pub Date—78
Note—41p.; Based on the transcript of proceedings of a forum sponsored by the Cultural Arts Board of the Associated Students of San Diego State University, the California Council for the Humanities in Public Policy, the National Endowment for the Humanities and the Department of American Indian Studies at SDSU (San Diego State University, April 12-14, 1978)
Pub Type — Opinion Papers (120) — Reports - Descriptive (141)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—*American Indians, Case Studies, Colonialism, *Ethics, *Federal Legislation, International Relations, Leadership, Policy, Political Attitudes, Politics, Reservations (Indian), *Treaties, *Tribes, United States History
Identifiers—American Indian Policy Review Commission, *Federal Indian Relationship, *Tribal Sovereignty
Legal, philosophical, legislative, historical, and international aspects of the issue of Indian tribal sovereignty and treaty rights are presented in six articles based on transcripted proceedings of a forum held at San Diego State University April 12-14, 1978. In the introduction, Sam Deloria examines various definitions of tribal sovereignty. In "Political Ethics and Indian Advocacy" Walter Koppelman notes that after 500 years of support for the principle of Indian self-government, little Indian self-government exists and that American liberty is at stake. "Sovereignty: Fact or Fiction" is a debate between Vine Deloria, Jr., and Congressman Lloyd Meeds about recommendations of the American Indian Policy Review Commission. Clara Sue Kidwell, in "Case Studies: How Sovereignty works in the U.S. Today", reports on tribal sovereignty as observed on and by the White Earth Chippewa Reservation (Minnesota), the Choctaw Reservation (Mississippi), and the Makah Reservation (Washington). Ed Castillo speaks on the preservation of Indian heritage. The topic of "Indian Sovereignty in the Americas and in the International Community" is examined by Roxanne Dunbar Ortiz and Tom Davies; they present an international perspective and examine political experiences of indigenous peoples in Latin America. The document concludes with a poem by Simon Ortiz. (SB)

Descriptors—*Academic Aspiration, *Adolescents, Birth Order, Black Achievement, Black Students, Caucasian Students, Discriminatory Attitudes (Social), Equal Education, Equal Opportunities (Jobs), *Expectation, *Family Influence, Females, Males, Motivation, Occupational Aspiration, *Occupational Choice, Racial Differences, Role Conflict, Secondary School Students, Sex Differences, *Socialization, Womens Education, Working Women
Identifiers—*Ambition, Louisiana
The primary objective of the largely exploratory study was an empirical examination of familial socialization practices and their influence on ambition (measured as education and occupational expectations) of black and white males and females. Existing generalizations about career expectations were extended by establishing comparisons on the basis of sex and race, and by adding indicators of family structure, parental socialization practices and sex-specific behavioral patterns. Twenty-nine hypotheses were tested to determine if parental socialization practices would vary by race and sex of respondents, as suggested by existing literature. The actual results differed markedly from those expected. Major findings were that social origin influenced the career plans of all males more than all females and that early marriage plans of black females were associated with high occupational expectations. There also appeared to be research implications for the development of a concept of sex roles. The data base, an unbiased subsample of a larger 1970 cross sectional youth study, consisted of questionnaire responses from 2170 black and white male and female seniors from Louisiana public and private high schools. Appendices include the questionnaire and a comparison of data sets. (SB)

Descriptors—*Attitudes, Beliefs, Community Attitudes, *Community Development, Community Leaders, Community Surveys, Demography, Housing, *Individual Characteristics, Interviews, *Needs Assessment, Recreational Facilities, *Rural Population, School Systems, *Socioeconomic Status
Identifiers—Rural Development Act 1972 Title V, *Tennessee
Attitudes toward selected rural development activities and basic socioeconomic characteristics of residents of five rural Tennessee counties were examined in 1974 in a study that included interviews with household heads as well as community leaders. Claiborne, Clay, Hancock, Overton, and Pickett counties constituted the pilot area; two surveys were conducted. The first involved personal interviews with some 100 randomly-selected household heads in each county to establish descriptive data (age, sex, education, etc.,) for each member of the household, previous migration of the household, psychic attachment to the area of residence, attitudes toward industrialization and community needs, job-related information, and distribution of household expenditures. In the second part of the study group meetings with community leaders determined their perceptions of local needs priorities; these responses were compared with attitudes expressed by the household heads. Results indicated that the median educational level of adults was less than the state median. Over 60 percent of the interviewees were born in the county of local residence. Attitudes toward increased local industrialization were favorable. Fire protection and improved roads were regarded as high priority community needs; needs related to individual benefits received low priority. Community leaders were shown to reflect local opinions relatively well. (DS)

Coyote and the Crane–A Legend of the Yakimas.
Note—26p.
Available from—Kamiakin Research Institute, P.O. Box 509, Toppenish, Washington 98948 ($2.50)
Pub Type— Guides - Classroom - Learner (051)
Document Not Available from EDRS.
Descriptors—Adult Education, *American Indians, *Childrens Literature, *Classroom Materials, Cultural Background, *Cultural Enrichment, Folk Culture, *Legends, Literature, Primary Education, Prose
Identifiers—American Indian Education, *American Indian Literature, *Oral Tradition, Yakima (Tribe)
Written in plain terms, printed in large type, and accompanied by illustrations, this legend of the Yakima Indians tells of how the crane came to be; it is the story of how Coyote turns a man into a crane because the man would not share his catch of fish. "In the old days people shared things. It was our way of life. If a person was hungry and had no food, others would share what they had... even if it was the last of what he had. It was told to us in the old stories of our people that the coyote man had something to do with this." This legend was reproduced to enhance young Yakima children's knowledge of their cultural heritage. It can be used at the Pre-school and Elementary levels and for Cultural Education information at the Secondary and Adult levels. (Author/DS)

The Self-Image of Rural Adolescent Girls.
Spons Agency—Michael Reese Hospital and Medical Center, Chicago, Ill.
Pub Date—Apr 78
Note—31p.; Best copy available
Pub Type— Reports - Research (143)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—*Adolescents, Attitudes, *Community Size, Demography, Economic Disadvantagement, Family (Sociological Unit), *Females, Males, Regional Characteristics, Rural Environment, Rural Family, *Rural Urban Differences, *Rural Youth, *Self Concept, Self Concept Tests, Suburban Youth, Urban Environment, Urban Youth
Identifiers—Offer Self Image Questionnaire
The 1978 study, which was the first to use the Offer Self-Image Questionnaire (OSIQ) with rural youth, compared the self-image of rural and urban adolescent girls and sustained the hypothesis that adolescents in larger communities think more highly of themselves than adolescents in rural communities. Most previous studies, ambiguous with regard to the effect of race and socio-economic status on self-image, found age and sex to be significant factors. The OSIQ was administered to 127 randomly selected high school seniors of both sexes in a white, middle class, midwestern rural community in an economically depressed area. The 3-way analysis of results revealed that adolescent girls had a significantly poorer self-image than boys; younger girls had a poorer self-image than older girls; adolescent rural girls of all ages had a poorer self-image than their urban and suburban counterparts; and rural adolescents in general thought more poorly of themselves than urban adolescents. The striking generality of the results across scales is possibly explained by socio-economic environment and family role. Rural family atmosphere, often devoid of hope, accomplishment, and pride, could easily cause low self-esteem. The findings apparently imply similarities between rural and inner city youth. (SB)

Descriptors—*Attitudes, Case Studies, Childhood, Cultural Background, Cultural Traits, Decision Making, Education, Family Life, Family Relationship, *Females, Feminism, Individual Development, *Mexican Americans, *Migrants, Mothers, *Role Perception, *Sex Role, Sex Stereotypes, Socioeconomic Influences, Values
Focusing on four Mexican American women from migrant farmworker backgrounds and one woman recently immigrated from Mexico, the study explored the attitudes and experiences of the Mexican American culture considered important by Mexican American migrant women themselves. Extensive open-ended interviews, conducted mostly in the women's homes, were used to gather data on such aspects of life as courtship, love, marriage, motherhood, women's rights, and education. Through these autobiographical case studies, data about key aspects of Mexican American womanhood were revealed with an effort to identify differences between ideals and reality and how the women dealt with cultural contradictions: (1) growing up–early adult responsibility conflicting with strong parent protection of "weak" female; (2) symbolic events, i.e., fifteenth birthday party and church wedding; (3) machismo and the double standard–women did not view themselves as helpless victims; (4) motherhood–basic to womanhood but belonging within viable family unit, mother as a change agent via education of children; (5) decision making and economic concerns; (6) women's roles and impression management; (7) ethnic identity and socioeconomic structures. Educational implications stressed nontraditional approaches, bilingual/bicultural education, and awareness of diversity within a culture. (RS)

Identifiers—*American Indian History, California, *Chemehuevi (Tribe), Cultural Contributions
The only local tribe to migrate into California during recorded history, the Chemehuevi Indians had one of the largest tribal areas in California, though their population probably never exceeded 800. Today most live on the Colorado River Reservation, where they share membership with the Colorado River tribes. First mentioned in a priest's report in 1776, the Chemehuevi had a loose tribal organization with small bands consisting of nuclear and extended families. Important officials were a chief (hereditary), war chiefs, and shamans. Dreams were an important aspect of culture and beliefs–a proper dream ensured success. Small farmers, the Indians were well adapted to their environment, and their houses ranged from little more than shelters against sun and wind in their arid lands to more substantial semi-subterranean, round houses along the Colorado and at Twentynine Palms. Chemehuevi trade routes later became trails for early pioneers and still later highways for modern commerce. With bows and arrows as weapons, they often wore down game by chasing them; snares and traps were used to catch small game. Dress was from animal hides and pelts, though women wore grass skirts in warm weather; tattoos ornamented both men and women, and bead pendants were worn in ear lobes and rings and plugs in the nose. Games were important, as was music. Most musical expression was vocal though some instruments were used. (RS)

Identifiers—*American Indian History, California, *Chumash (Tribe), Cultural Contributions
The Chumash Indians were one of the most populous, rich peoples of aboriginal California. Though their origins are mysterious, they were reported to be a flourishing people by Spanish explorers in the sixteenth century. Missionization by Spaniards and secularization in 1833 spelled destruction, so that today only a few isolated and impoverished Chumash remain. Having lived in modern Ventura, Santa Barbara, and San Luis Obispo counties in southern California, the Chumash over thousands of years thrived without agriculture, developed a far-flung trade network, and depended heavily on the sea. Drought, a hazard, was likely a factor in the relatively low population, estimated at up to 10,000 persons. A patrilineal society, the Chumash also belonged to moieties, and the basic unit of life was the village. Social classes and part-time specialists existed. Rains, health, food, and proper relationships with powerful and uncanny animals such as bears or swordfish were vital concerns–shamans were influential. Admired craftsmen, the Chumash, alone among Californian Indians, made plank boats, and their pictographs demonstrate their artistic skills. They lived in dome-shaped, thatch houses, ranging from small huts to huge communal houses. Clothing was simple, and weapons were ordinary Californian ones. Their games and songs are mostly forgotten today, but music, dancing, stories, and songs were evidently popular. (RS)

Identifiers—American Indian Education, *American Indian Studies, *Canada
Curriculum material citations relevant to the Native peoples of Alberta, Canada, were assembled into a bibliography that includes books, multi-media materials, periodicals, and other educational resources. The classroom teacher searching for Native Studies materials was kept especially in mind as the project progressed. Criteria for selection included availability, pertinence to Native groups in Alberta, and quality of the item according to format, intercultural sensitivity and avoidance of ethnocentricity. The master list of the bibliography is divided into sections on books, multi-media materials, periodicals, and additional resources. Other sections include a listing of titles only and a subject index of common culture area references. Both provide additional means of access to the master list. The book portion of the bibliography lists 508 titles alphabetically by author and is keyed to primary, junior and senior levels. Annotations describe content and sometimes comment on inherent values or shortcomings. The multi-media portion lists phonotapes, video tapes, films, study kits, filmstrips, slides, etc., and includes material that may be rented as well as purchased. The periodicals section lists 49 periodicals and newsletters, and the additional resources section reports on other information sources, programs, projects, tours, charts, posters, etc. The final portion of the document lists book publishers, film distributors, and distributors for each. Identifiers—*Childrens Time Study
Issues of daily life experience from a child's perspective were examined in the Spring 1976 as the Children's Time Study interviewed 764 preadolescents (aged 11-12) from Oakland, California and their mothers. The interviewers explored children's use of time outside the school by focusing on five domains of time use: (1) parent-child interactions; (2) television; (3) participation in organized activities; (4) household chores, responsibilities and obligations outside the home; and (5) children's activities outside the home. Representing 22 public schools, respondents were predominantly nonwhite (457 Blacks, 35 Mexican Americans, 70 Orientals) well distributed along the low, middle and high socioeconomic status stratums, and clearly resembled the public school population found in most big city schools today. To date, the data collection, editing, coding, cleaning of the basic data, and a followup verification study have been completed. In addition to citing past research and other background information concerning children's use of time, this document describes the research strategy and methodology utilized in the study, the analytical framework, the study setting, sample population characteristics, sample design and objectives, field work methods, and preliminary field results. Because the 1862 and 1890 Morrill Act Land Grant colleges feature predominantly white or predominantly black student enrollments, a study to assess similarities and differences of the respective student bodies was undertaken. A selected sample of students at all southern land grant institutions was asked in the spring of 1977 to respond to a questionnaire dealing with personal and family background, high school experience, work experience, college experience, goals and aspirations, and attitudes toward various issues and topics related to occupational roles in agriculture. Percentages of students growing up on a farm were about the same for both types of schools. The predominantly white 1862 schools had a greater percentage (27 percent) of women enrolled in their colleges of agriculture than did the 1890 schools (18.8 percent). Loans and grants enable 65.3 percent of the 1890 students to pay their way through college while 24.8 percent of

the 1862 students received funding from this source. When the desired educational levels were compared, the 1862 students were found to be geared towards obtaining a bachelor's degree with the 1890 students more oriented towards earning a graduate level degree. Of the students who chose to work in an agricultural setting, both groups chose veterinary medicine as the most frequently desired occupation with general farming or ranching as the second. Tabular data at the end of the document is used to summarize the study's findings. (DS)

Identifiers—*North Carolina (Anson County), Textile Industry, Topography
Since 1950 Anson County, North Carolina, has had major contributions to economic development, a source of great concern to residents of the almost entirely rural area. The increased capacity of the Blewitt Falls Dam power output and the county-wide water filtration system (one of only a few in the United States today) are attractive to industry. There has been a huge local effort to bring about economic development through formation of the Anson County Chamber of Commerce and Industrial Commissions and through the work of the Anson County Economic Development Task Force, which has six strategies: expansion of industry; development of community services and quality of life; commercial development; expansion of agricultural enterprises; development of human resources; and possible development of a solar energy research site. The shift in the economic base from farm to industry is evident in occupation and income source statistics as well as the county's leadership structure, which has an increasingly active business and industrial sector. Interviewed in 1977, 19 local leaders like Anson County because of: residents' attitudes towards others; climate and geography; quality of life; and economic aspects. Problem areas they note are economic expansion, improved availability of community services, improvement of education, and improved community relations. (SB)

Identifiers—*North Carolina (Ashe County), Topography
From 1950 to 1970, the shift from agriculture to industry dominated Ashe County, North Carolina, isolated on the Blue Ridge by rugged terrain and severe weather. Rural farm population declined by 2/3 but rural non-farm population tripled. Many new industries helped shift the bulk of the work force to industry. In 1950, 45% of the work force farmed full time and only 17% had industrial jobs. By 1970 just 9% farmed full time; 54% were employed by industries. The main agricultural products shifted to feeder steers, tobacco, and Christmas trees, so the typical farm family could seek additional employment. Median family income increased but per capita income remained low. Attracting and supporting industry became the focus of optimistic leaders who in 1977 listed as priorities for the county: economic diversification; improvement of educational facilities and opportunities; improved roads; and improved health, social, and public services. Recent developments, such as the Ashe County airport, a new hospital, a new county library, and plans for an industrial park, reflected this goal. The enthusiastic leadership, no longer fiercely controlled by a few local families but rather by a more progressive mixture of business and government people, liked the attitudes and relationships of residents, the climate, and the quality of life in Ashe County. Identifiers—*Arizona, Bureau of Indian Affairs
Correct as of June 30, 1978, the 18th annual Arizona Tribal Directory is loosely organized in 3 broad categories–reservations, services, and Indian organizations–and contains listings relative to the Arizona Indian reservations and federal, state, and other agencies, departments, and committees which provide services to them. Reservation population and acreage figures are included. The listings for the 19 reservations include office information; tribal officers, council members, managers, and directors; meeting schedules; and election data. Governmental agencies, departments, and committees are organized by the type of service provided: Bureau of Indian Affairs (BIA), education, employment, health, law and order, public relations (press contacts), welfare, and miscellaneous. BIA Area Officers, Directors, Agencies, and Assistant Area Directors are listed for the Phoenix and Navajo Areas. The other service agency listings note the chief Indian associations, their boards of directors or officers, members, purpose, and meeting schedule. (SB)

Identifiers—*Iowa
At a 20/1 pupil/teacher and pupil/room ratio, by 1984 Iowa public schools will need 8,100 fewer rooms and teachers than was necessary during the peak enrollment year of 1969. The most precipitous drop in enrollment could come in the six year period from 1977 to 1982 when 120,363 more students will graduate from the public school system than will enter it. The drop in Iowa enrollment can be partly explained by a significant out-migration since 1930, an out-migration which drains disproportionate numbers of the 20-29 age group, the future parents of school children. Population has also shifted within the state; both the largest cities and rural areas are losing population to the suburban fringe around major industrial centers. This study traces Iowa enrollments historically, explores the cause for cycles of change, projects enrollments to 1982 and 1987, and examines the impact of enrollment trends upon Iowa public education. Because enrollment projections can be no more reliable than the causative data which determine school enrollment trends, the document also traces such factors as (1) population growth, (2)out-migration from the state and between counties, (3) relative proportion of significant age groups in the population, (4) trends in fertility rates and births, (5) enrollment trends and projections, (6) geographical trends in enrollment and (7) enrollment trends by size of school. Tabular data includes 1969 and 1977-78 enrollments and projected enrollments (1982-83 and 1987-88) for each Iowa public school. (Author/DS)

Revitalizing Rural Education: A Legislator's Handbook.
National Conference of State Legislatures, Washington, D.C.; National Rural Center, Washington, D.C.
Spons Agency—National Inst. of Education (DHEW), Washington, D.C.
Pub Date—Sep 78
Note—48p.; Parts may be marginally legible due to small print
Pub Type— Reports - General (140)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—*Consolidated Schools, Delivery Systems, Educational Finance, Educational Legislation, *Educational Quality, *Legislators, Needs Assessment, Rural Areas, *Rural Schools, Rural Urban Differences, Rural Youth, School Community Relationship, *School District Autonomy, School District Spending, School Personnel, School Size, State Aid, State Legislation, *State School District Relationship, Teacher Education, Teacher Salaries
Rural education trends and issues confronting state legislatures are examined in this handbook of narrative as well as statistical tables. Designed to provide state legislators with information they need to better understand rural implications of statewide education reforms, the handbook presents a range of legislative alternatives in key areas. Chapters embody five basic guidelines for rural school reform: respect for primacy of local circumstance; expansion and strengthening of bonds between school and community; more equitable balance between outside regulation and local control; treatment of structural and substantive reforms as separate and distinct issues; capitalizing on strengths of rural schools as well as correcting deficiences. This report to state legislators contains the following chapter focuses: (1) overview of rural America and its schools in terms of demographic, economic, and educational factors; (2) school/school district organization in sparsely populated areas, with emphasis on the consolidation movement; (3) school finance issues with special relevance for U.S. rural areas: (4) background information on personnel issues in rural education (teacher salaries, training programs); (5) delivery of educational services and development of educational programs appropriate for rural communities. Specific legislative alternatives are presented in chapters two to five. (RS)

In 1972 the United Pueblo Agency produced a bibliography that lists the titles, authors, and sources of theses and published books on each of the 16 New Mexico Pueblos. A separate section is devoted to citations of works on Pueblo Indians in general. The number of listings for each Pueblo vary. Only one title each is listed for Isleta, Nambe, Picuris, San Felipe, Santa Clara and Tesuque Pueblos, and San Juan and Zia Pueblos have two titles each. Three references each are given for Cochiti, Jemez, Laguna, and Santo Domingo Pueblos, and four each for Acoma, San Ildefonso, and Taos Pueblos. Zuni Pueblo has seven titles listed. The general section on Pueblo Indians lists 50 theses and 292 published books, some of which date back to the late 1800's. Topics represented among the works include history, culture, archaeology, art, and education. (DS)

Athabascan Beading.
Pub Date—78
Note—24p.; Best copy available; Prepared by Fairbanks Native Association, Alaska
Pub Type— Guides - Classroom - Learner (051)
EDRS Price - MF01/PC01 Plus Postage.
Descriptors—*Alaska Natives, *American Indians, *Creative Art, Cultural Background, Design Crafts, *Handicrafts, Instructional Materials, Older Adults, *Teaching Procedures
Identifiers—*Athabascan (Tribe), *Beadwork, Cultural Contributions, Johnson OMalley Program, Woodland Indians (Anthropolgical Label)
For many years flowers and leaves formed the bulk of Alaskan Athabascan beadwork designs. Early Athabascan beadwork consisted primarily of simple geometric patterns, but after the advent of the French in Canada, elaborate floral designs popular in 18th and 19th century France were translated into Woodland Indian beadwork. In traditional procedure a sharp stick dipped into a flour and water paste traced the design onto a leather backing. Porcupine quills, seed beads, or beads from the local trader were sewn with moose sinew directly onto the backing. Two stitches, the lazy stitch and the overlay, could be used, and Alaskan Athabascans chose the overlay which employed two threads. One thread was used to string the beads; the other whipped the bead string onto the backing. The ancient procedures and designs are still in use today, although needles, white sewing thread, white felt or velvet, commercial beads and ink pens have replaced the more traditional materials. Drawing upon the expertise of two Athabascan artisans, this document relates their procedures for doing beadwork and gives beginning, intermediate and advanced beadwork designs. Photographs of finished work are also included. An excerpt from "Alaskan Athabascan Beadwork" by Kate Duncan discusses the craft and its history and describes beadwork styles characteristic of particular villages or areas. (DS)

Yesterday Still Lives...Our Native People Remember Alaska.
Pub Date—78
Note—39p.; Photographs and parts may not reproduce clearly due to colored background; Prepared by Fairbanks Native Association, Alaska
Pub Type— Guides - Classroom - Learner (051)
EDRS Price - MF01/PC02 Plus Postage.
Descriptors—*Alaska Natives, American Indians, Biographical Inventories, *Biographies, *Classroom Materials, Cultural Awareness, *Cultural Background, *Eskimos, History, *Older Adults, Quality of Life, Rural Areas, Senior Citizens
Identifiers—Alaska, *American Indian Literature, Cultural Journalism, Johnson OMalley Program
In the summer of 1978, seven teenagers and several staff members from the Fairbanks Native Association-Johnson O'Malley program set out to record some of Alaska's past by interviewing a number of older Alaska Natives and writing their biographical sketches. Some of the students spent a week along the Yukon River taping and photographing people; others travelled to Homer for the same purpose. This book is the result of that project. The sketches about nine native Alaskans present a picture of life as it was in the early years of this century. Oliver Amouak tells of the sled the caribou hunters used to transport meat; it was made from a curved tree trunk with the jawbones of the bowhead whale serving as sled runners. Kitty Harwood tells how she helped her mother during the fish runs by pulling her boat upstream to the family fish wheels. Lilly Pitka tells of the 1949 flood in Ft. Yukon when she sat on a neighbor's roof and watched her home float away. Some of the tales describe seal hunting, fishing, mining and trapping; others tell of coming of age ceremonies, of superstitions associated with that time, and of celebrations like the blanket toss and potlatches. Some folk medicines are mentioned, including stinkweed as a cure for stomach cancer. Concluding that although the times were hard, they were good, some of the old people regret the loss of the old ways, of respect for older people, and of the quiet times of the days gone by. (DS)

Descriptors—*Academic Achievement, Clothing, *Educational Finance, Elementary Secondary Education, Enrollment, *Federal Aid, Federal Legislation, Migrant Child Education, *Migrant Education, Migrant Health Services, Migrants, *Needs Assessment, Planning, *Project Applications, Resource Allocations, School District Spending, School Funds
Identifiers—*Elementary Secondary Education Act Title I Migrant, Texas (Austin)
Part of a comprehensive needs assessment for compensatory education programs for Austin, Texas schools, the report contains data specifically required for the Title I Migrant Program. A breakdown, by school and grade, of 1-year and 5-year migrant students in elementary and secondary grades is given. Migrant student achievement level data are presented in three sets of charts for prekindergarten, K-5, and 6-12. For K-5 and 6-12, the charts indicate migrant student performance levels, based on standardized test results, by school and grade, along with a district performance level for comparison. The number of migrant students actually served by Migrant teachers, Title I, or other supplemental programs through Nov. 20, 1978, and the projected estimates for 1970-1980 are reported in similar summaries which show the number of students by school and grade, and indicate the number served by each supplemental program or combination of supplemental programs. How Migrant nurses identified health problems, what those problems were, and their frequency are included in a report of migrant student health. The final series of charts indicates the number of migrant students receiving clothing by school and grade, and the monthly amount each school spent on clothing. (SB)

Identifiers—*American Indian Education, Bureau of Indian Affairs
The overall objective of the 1977 national project was to assist participating states in increasing the number and participation of Native American students, teachers, and teacher educators in vocational and technical education. Participants in the major training activity (a 3-day workshop) were 15 3-member state teams and about 30 tribal and Bureau of Indian Affairs representatives. The workshops addressed four specific needs of Native Americans with respect to vocational and technical education: student recruitment, needs assessment, personnel development, and teacher and student retention. State teams developed action plans (included in the appendices) to meet the overall project objectives. An important workshop product was a resource manual for use in recruiting and involving Native Americans in vocational and technical education. At a successful special conference held after the workshop, project staff informed influential state vocational educators of the problems and special needs of Native American students. Staff concluded that vocational and technical education needs assessment projects should continue; vocational educators should advertise job opportunities appropriately to recruit Native Americans; and special teacher certification programs should be expended to better prepare Native American teachers. It was further concluded that vocational and technical

education should be a priority at national, state, and tribal levels. (SB)

Descriptors—Comparative Analysis, Elementary Secondary Education, Enrollment, *Migrant Children, *Migrant Education, Migrants, *Migration Patterns, *Relocation, *Student Mobility

Identifiers—Arkansas

In 1978 the Arkansas Migrant Education Program provided educational, health, nutritional and social services to some 10,000 migrant students. Using the Migrant Student Record Transfer System, a study was conducted to determine the dimensions of the flow of migrant children to and from other states month by month, the principal movement patterns, and the extent of intrastate movement. In 1978, 5,189 migrant students entered Arkansas and 4,404 departed. Two Texas counties, Hidalgo and Cameron, accounted for more than half of all entries and departures, and the states of Texas, Michigan, Ohio, Florida and Indiana accounted for approximately 95% of the interstate movement. Almost 42% of all students entering were at the secondary level, a figure significantly larger than typically found in other states. Although migrant students moved 9,961 times within the state in 1978, the average number of movements was relatively low, with over half of the students moving only one time during the year and over 3,000 showing no movement. Over 90% of the intrastate moves were within the individual counties. Among the recommendations for improving the program was a review of secondary education to determine the reasons for its success and dissemination of that information to other states. This document uses many charts and maps to present study data on numbers, destinations, origins, grade levels, monthly breakdowns, and flow patterns of migrant students. (DS)

Identifiers—Information Analysis Products, Nonmetropolitan Areas

Facilities and staff, financing, administration, and social/behavioral problems are four areas of the educational systems of rural schools impacted by the rapid population growth resulting from the urban-to-rural migration begun in the 1970's and expected to last several decades. Overcrowding of facilities is a short-range problem for communities with economic and public support, but a long-range problem for those unable to initiate a satisfactory solution. Greater local revenues result from greater population, yet there may be rural resistance to the ideas of urban newcomers. Short-range administrative problems and paperwork overloads occur with increased school population. Social/behavioral problems, such as discipline and alcohol misuse, also increase. Educational systems will experience both positive and negative effects of the growth process, but substantial economic and social costs can be avoided with early long-range planning. The extent to which rural community leaders should and can anticipate and respond to population growth and its resultant changes is critical. Scenarios of two different rural communities–a "boomtown" and a town exemplifying "social amenities growth"–demonstrate that the impacts of rapid growth on rural education are significantly influenced by economic and social factors in the larger community arena. Fratoe, Frank A.

The Educational Level of Farm Residents and Workers. Rural Development Research Report No. 8.

Economics, Statistics, and Cooperatives Service (DOA), Washington, D.C.

Pub Date—Mar 79

Note—29p.

Pub Type— Reports - Research (143) — Numerical/Quantitative Data (110) ()

EDRS Price - MF01/PC02 Plus Postage.

Descriptors—*Academic Achievement, Adult Education, Agricultural Laborers, *Agricultural Personnel, *Comparative Analysis, Educational Disadvantagement, Educational Interest, Educational Needs, Farmers, Females, Functional Illiteracy, Illiteracy, Postsecondary Education, Racial Differences, Rural Development, *Rural Education, *Rural Farm Residents, *Rural Urban Differences, Sex Differences

Members of the farm related population generally lag behind their nonfarm related counterparts in the number of school years completed, number of persons completing high school and college, functional literacy rates, participants in adult education, and labor force status. In 1975 White farm males trailed metro and nonmetro nonfarm males by 1.2 and 0.8 years respectively in median school years completed. Black farm males and females trailed their metro counterparts by 5.7 years for men and 4.0 years for women. Functional illiteracy for Black farm males remained about the same (40 percent) while illiteracy among Black farm females rose from 23.1 to 31.9 percent. Farm-related youth are not seeking post-secondary schooling at a level approaching that for metro youth, and older farm-related people are less inclined to pursue adult education opportunities. Thus, many members of the farm related population lack the formal education needed to improve chances for success in complex modern farming as well as in professional career fields elsewhere. Census data from between 1968-1975 are used in this study on the educational characteristics of two farm related population components: nonmetro farm residents and farmers and farm laborers. The educational status of subpopulations (Blacks-Whites, males-females, younger-older persons) is particularly emphasized. (Author/DS)

Descriptors—*Academic Records, Communications, Coordination, *Early Childhood Education, Educational Objectives, Federal Legislation, Government Role, Interagency Cooperation, *Interstate Programs, Local Government, *Migrant Education, Migrant Health Services, *Parent Participation, Program Coordination, State Boards of Education, State Government

Identifiers—*Interstate Cooperation, *Interstate Migrant Education Task Force, Migrant Student Record Transfer System

In its second year the Task Force identified four areas for in-depth analysis, deliberation, and recommendations development: early childhood education, planning for intra- and interstate coordination of migrant education, academic information and credit exchange, and parent involvement. Because migrant families may need educational and other human services of several states in the course of a year, the need for effective intra- and interstate cooperation and communications is great. Preschool care and records transmittal for secondary students are also important. Federal and state legislatures should enact early childhood education legislation supported with adequate funding. All agencies receiving federal funds for migrant children should utilize the Migrant Student Record Transfer System (MSRTS), which should be expanded and updated to include health information, student individualized education plans, and student credit accrual. To further enhance chances for student success and graduation, and to increase interstate continuity in migrant education program planning, the U.S. Office of Education, governors, state legislatures, and boards of education should adopt policies that encourage cooperation at all levels and in all agencies. There are no recommendations regarding parent involvement due to lack of consensus. These recommendations combined with those of the First Interim Report provide the basis for continued Task Force efforts. (SB)

Identifiers—American Indian Task Force for ERIC CRESS, ERIC Clearinghouse on Rural Educ and Small Schools

A wide variety of educational materials regarding American Indians has been collected by the Educational Resources Information Center (ERIC) system; this guide was prepared to help anyone who is seeking that information to find it. It lists the addresses and telephone numbers of the 16 ERIC clearinghouses and the educational areas for which each is responsible. It describes ERIC's functions, what kinds of documents it uses, where the documents come from and who uses the system. Procedure is given for conducting both computer and

manual searches of the data base with detailed descriptions devoted to the use of descriptor and identifier retrieval terms under which all documents are indexed. A listing of the commonly used American Indian descriptors and identifiers is given. Use of the ERIC reference books, including the "Thesaurus", the monthly "Resources in Education" abstract journal, and the monthly "Current Index to Journals in Education" is also explored. Because documents may be viewed at any of the ERIC microfiche collectins, a directory of microfiche collections in all states with a significant Indian population is appended. Also included is information on how to order documents from the ERIC Document Reproduction Service. Names of American Indian organizations and publications as well as federally recognized Indian groups are also included in the appendix along with a glossary of ERIC terminology. (DS)

Descriptors—*American History, *American Indians, Anthropology, Art, *Canada Natives, Cultural Background, Environment, Eskimos, *Films, Foreign Language Films, Legends, Tribes

Identifiers—Canada, *Inuits, North America

This bilingual annotated bibliography of French and English films about the Indians and Inuit of North America contains entries for more than 1200 films made between 1965 and 1978. Although most of the films are in English, about 100 French films are included. Their titles are listed alphabetically in an Index of "Films in French". There are 4 main indices. The Index of Subjects lists in French the main subject areas of the films about North American Indians and, in a separate list, about the Inuit. The Subject Index lists the English title of all films pertaining to each subject area. There are separate subject indices for North American Indian and Inuit films. The Main Title Index lists Indian and Inuit films together and is organized alphabetically by film title. French films are listed alphabetically in both languages with the major entry for the film appearing under the English version of the title. Entries include the following information in English: country and year of production, length, color or black and white, producer, and distributor. Film descriptions are given in both French and English. About 175 film distributors and their addresses are included in the Distributors Index, organized alphabetically by company name. (SB)

Identifiers—*American Indian Education, *Federal Indian Relationship, State Indian Relationship

Five areas concern the Subcommittee on Indian Education for 1979. First, there is lack of coordination at the funding level and the operations level among the many federal agencies and programs involved in providing early childhood education services to Indians. The feasibility of establishing a National Center for Early Childhood Indian Education programs should be explored. Second, there is a backlog of about $900 million (a possibly inaccurate figure) in Indian school construction projects, but the 1979 Administration budget allocation is only $29.5 million. An analysis, with report and recommendations, of fiscal needs for such construction should be completed by December, 1978. Appropriate agencies should support resulting necessary budgets. Third, there is little coordination among federal programs sponsoring Indian education and training or attempting to provide jobs; a review of such programs is necessary. Fourth, to meet the education and training needs of the Indian community, there is a need for expanded research and development efforts with the dissemination of significant findings. The National Institute of Education should analyze all existing federal efforts, noting gaps in research and reviewing the organizational arrangements within concerned agencies. Fifth, efforts should begin immediately to clarify the responsibility of the state to Indian people, as well as certain federal and state jurisdictional ambiguities in funding and control. (SB)

Identifiers—Canada, Historical Materials, *Inuits, Inuktitut (Language)

In just 30 years the approximately 25,000 Canadian Inuit moved from traditional hunting and trapping to a multifacted, multimillion dollar economy based on tourism, arts and crafts, and renewable resource development. The rapidly changing Inuit world brought positive changes such as compulsory, better-quality education and improved health, as well as negative changes such as alcoholism and increased crime. Concentrated in the northern circumpolar regions of Quebec, Newfoundland, and the Northwest Territories, the Inuit were totally dependent on hunting for survival until the mid-18th century appearance of whalers and traders. The establishment of many trading posts between 1906 and 1936 drastically changed Inuit life as trapping became as important as hunting, and settlements grew up rapidly around the posts. After 1953 federal representatives moved north and improved education, aided the organization of effective local government, and began federal housing. Most provincial government activity in the area began after 1960. Native associations, resulting from a desire for self-government, became concerned with land claims (significant because the Inuit had never relinquished any land), and preservation of lifestyles and art forms. In particular, the Inuit Cultural Institute was developed to maintain and encourage interest and growth in Inuit culture. (SB)

Identifiers—Federal Indian Relationship, National Congress of American Indians, Public Law 280, Red Power, Termination, *Tribal Sovereignty

The cornerstones of the Indian perspective on their relationship to American government and society lie in the fact that the Indians are the aboriginal owners of the New World and that their formal association with the U.S. is based on formal treaties. Indian tribes consider themselves as separate and sovereign nations. In early American history, their status was so recognized. Through treaties, the embryonic U.S. offered fair treatment in recognition of Indian independence and equality of military potential. Later came the assaults on Indian autonomy. In 1831 the Supreme Court definition of Indians as "domestic, dependent nations" accelerated attacks by both Federal and state governments on Indian rights, many of which were cloaked in the guise of assisting Indian people to make a better adjustment to interaction with non-Indians. In ensuing years tribal governments were destroyed, lands lost, and cultures threatened. However, in 1924 Indians were granted citizenship and gained the right to vote. The Indian Reorganization Act of 1934 began steps toward self-determination. As Indians from all tribes joined together to form political groups, the growth of Pan-Indianism spread. "Red Power" emerged in the late 1960's as Indian people responded politically with organization of issue-oriented action groups, political mobilization, and militance. Today they are working together to define a political system where they can be free to pursue their dream of tribal self-determination. (DS)

Edington, Everett D. And Others

Rural Youth and Adults' Knowledge of Governmental Functions.

Pub Date—79

Note—13p.

Pub Type— Reports - Research (143)

EDRS Price - MF01/PC01 Plus Postage.

Descriptors—*Adults, Attitudes, *Comparative Analysis, Educational Needs, *Government Role, Grade 11, *High School Students, Interviews, Political Attitudes, Rural Population, *Rural Youth

Identifiers—*Political Knowledge, *Wisconsin (Dane County)

In 1976 Dane County, Wisconsin was the site of a survey to determine the knowledge of rural youth and adults as to how their government functioned. The area was chosen because its residents were thought to be more politically active than individuals in other parts of the state. Personal or telephone interviews were conducted with 112 adults and questionnaires were administered to 292 members of the junior class at a rural high school. The questions concerned which offices had the most authority at the federal, state and local levels of the executive, legislative and judicial branches of government. At both the state and national levels, political knowledge was much lower for youth than for the adults, and the lowest levels of political knowledge were of the executive and legislative branches of government. The youth did surpass adults in knowledge of the judicial branch. However, the knowledge of the authority structure of the different branches of government was alarmingly low, especially at the national and state levels. If the findings of this survey are indicative of the broader high school population, there is need for concern among educators; it is difficult to understand how youth can make the choices necessary to continue our representative system of government with such limited knowledge of how it functions. Identifiers—*United States (South)

Career and career related preference expressed by a number of rural Southern high school youth were found to moderately predict their early adult behaviors. Preferences for post high school education were the dominant influence and single best predictor of subsequent educational attainment. Moderate linkages were also found to exist between preferences for early marriage, residence, and military service with the corresponding early adult behavior. These findings resulted from a study of a broad population of rural Deep South youth over a six year period. Three sets of social surveys followed the same individuals from the high school sophomore year in 1966 into young adulthood, four years past high school. Responses were gathered on career preferences, educational aspiration, marriage plans, and fertility and residential expectations, with the final phase of the survey seeking data on actual educational and residential attainment, marital status, and fertility. Whether male or female, Black or White, an overwhelming number of the rural youth shared the American success dream of high educational attainment and career preference. Blacks, however, consistently were less likely to enact their preferences, due to such possible causes as differential opportunity, barriers, knowledge and racism. Black rural students were more likely at both the senior year and early adult period to hold residential preferences (in effect migration preferences) to urban residences. (DS)

Identifiers—Cultural Contributions, Latinos

In the last decade the phenomenal growth of bilingual/bicultural programs for Spanish-speaking people has been accompanied by a critical need for learning materials which provide current, historically accurate, nonracist and nonstereotypic information on the contributions, heritage and current status of the various Spanish-speaking groups. Prepared to assist the librarian, teacher and curriculum specialist seeking educational materials for Latino children, this guide includes both printed works and 16mm film titles, published or developed primarily since the mid-1960's. Part I of the guide presents four essays exploring the background of Latino life and literature in the United States, as well as library services to Latinos. The next three sections list 473 general, Mexican American, and Puerto Rican resources; each section is further divided into materials for elementary, secondary and professional use. Entries include complete bibliographic information, recommended grade level, and source from which the material may be ordered. Annotations accompanying each entry are intended to be critical as well as descriptive and include information ranging from notes on the authors to comparisons of related works. The last two sections include a glossary of pertinent terms and a directory of publishers and distributors of Latino materials. Subject and author/title indices are appended. (DS)

Descriptors—Academic Achievement, Adult Education, Age Groups, Demography, Income, Labor Force, Migration, *Migration Patterns, Occupations, Population Distribution, Population Trends, Rural Population, *Rural to Urban Migration, *Sex Differences, *Socioeconomic Status, Tables (Data), Urban Population, *Urban to Rural Migration, Urban to Suburban Migration
Identifiers—*Wisconsin

Population growth rates in the 1950-1975 period indicate that metropolitan and nonmetropolitan streams of migration are of virtually the same magnitude in Wisconsin; metropolitan residents are moving to nonmetropolitan places as frequently as their nonmetropolitan counterparts are migrating to metropolitan communities. When migration streams are decomposed by sex, age, rural-urban residence, employment status, education, occupation and income, other implications of shifts in population can be assessed. Sex ratios do not differ significantly, but young adults are more migratory than any other age group in the population. Migration to urban places peaks at ages 15 to 24 whereas migration to rural areas peaks later at ages 25-34. This pattern suggests that young migrants seeking jobs, education, and marriage partners prefer living in urban areas, while those older are more likely to choose a rural residence, perhaps because of perceived advantages in the rural life for raising children. Rural to urban migrants are closer to native urbanites in education, occupational skills, income and employability than to the rural residents they left. Using data from the U.S. census, this study examines the volume and composition of metropolitan and nonmetropolitan migration in Wisconsin. Tabular data is used to reflect study findings regarding the direction of the migration streams, interstate migrant status, and compositional characteristics of the migrant streams. (DS)

Based on all factors considered during an independently conducted six month long needs assessment and feasibility study in response to the Indian Health Care Improvement Act, Title VI, the Department of Health, Education, and Welfare reports on the need for an American Indian school of medicine (AISOM). A separate innovative educational institution providing a quality and relevant education leading to an M.D. degree should be developed to turn around the low percentage of Indians in the medical professions. An AISOM, which should meet the accreditation requirements of the AMA/AAMC Liaison Committee on Medical Education as well as specific needs of Indian peoples, is feasible because the current medical education system is inadequate to develop sufficient American Indian medical professionals and because the current status of American Indian health care is below that of the total population. The establishment of an AISOM in conjunction with scholarship and precollege/premedical programs would provide a comprehensive and effective strategy to significantly improve physician needs for all Indian peoples. Appendices include the complete report of the independent study group, sources of financing, and operating cost estimates for a medical school. (Author/SB)

Identifiers—*Austin Independent School District TX, *Elementary Secondary Education Act Title I Migrant

Evaluation of the Austin Independent School District Elementary and Secondary Education Act (ESEA) Title I Migrant Program involves collecting and disseminating information relevant to eleven decision questions addressing both the system and program levels. At the system level are questions of whether the district should have a migrant program and how coordination with other programs should be improved. Nine program level questions are concerned with such subjects as changes in academic areas and expansion or modification of ancillary services, recruitment procedures, parental involvement programs, and staff development. Three basic types of data are required: needs assessment, process, and outcome data. This document summarizes the information sources for each area covered by the evaluation. An overview of each decision question includes evaluative questions and objectives, information sources for the data needed, and the date the information is due. Another portion of the document summarizes information sources on migrant students, i.e., various tests, teacher reports, interviews and numerous forms and questionnaires. Also included are a timetable listing the data to be collected by various school personnel, a description of the program itself, and a table entitled "Evaluation Time Resources Allocation Summary." Austin Independent School District's Elementary

and Secondary Education Act Title VII Bilingual Program, begun July 1, 1974, serves 2,406 students in grades K-6 on 16 campuses. Both English and Spanish are used for portions of or all the curriculum with the amount of time and treatment accorded to each language commensurate with the pupils individual needs. Three basic staffing patterns include a bilingual aid working with (1) a bilingual and monolingual teacher; (2) two or more monolingual teachers in a self-contained classroom; and (3) a team of teachers of from two to six who may or may not be bilingual. Characteristics of the instructional model include beginning reading taught only in the child's dominant language, inclusion of the children's culture heritage in the curriculum, and small group instruction with grouping by language dominance and instructional level. Describing the project's status as of January 17, 1975, this interim report discusses the instruction, staff development, curriculum development, and parental involvement components of the program. The evaluation design for the project is presented in full with student outcomes objectives, process objectives, and input objectives specified for the student needs of Spanish and English communication skills, Spanish/English math skills, and self-concept enhancement. Identifiers—Chicanos, United States (Southwest)

The 4.7 million Chicanos in the Southwest in 1970 contributed significantly to the local labor supply; yet, they had substantially smaller incomes and greater unemployment than area Anglos. Although Chicanos have moved steadily from unskilled to skilled labor occupations and have entered white collar occupations, they continue to be employed in the traditional areas of domestic service, construction, food processing, railroad and farm work, which are characterized by squalid conditions, poverty, and limited chances for advancement. The process by which Chicanos come to hold inferior jobs can best be explained by the "queueing" theory of worker allocation in which they are at a distinct disadvantage due to general educational disadvantagement, the historical situation of Mexican immigrants, racial discrimination, and cultural differences. The employment and income differences between Chicanos and Anglos are reinforced by the elastic supply of minimum wage labor from Mexico. In addition, earning differences result when Chicanos hold lower paying jobs in broad occupational categories or the same job in different firms. Tight border policy, decline in discrimination, and better education would greatly help the Chicano labor force, as would research regarding cultural barriers to better employment. (SB)

Identifiers—AFDC Programs, Food Stamp Program, General Assistance Programs, Nonmetropolitan Areas, Supplemental Security Income Program

The study directs attention away from urban poverty to the nation's rural poor and how they are served by five public assistance programs: Aid to Families with Dependent Children (AFDC) and its Unemployed Fathers Component (AFDC-UF), Supplementary Security Income (SSI), Food Stamps (FS), and General Assistance. The 41% of the nation's poor who live in rural areas are older, more disabled, less educated, more likely to be employed and live in husband-wife households, and less likely to receive income from public assistance than their urban couterparts. Twenty-five states house 83% of the rural poor in or near small towns. In 20 of those states, most public assistance programs examined serve the rural poor less adequately and equitably than their urban counterparts. The public assistance programs in states which have more than 1/3 of their total population in rural areas tend to be characterized by low benefits, underparticipation, and limited coverage. Public assistance policy should be as much a rural as an urban issue. There should be a minimum floor for AFDC benefits and separate FS bonuses should be continued. The federal government should mandate AFDC-UF benefits for 2-parent families and design financial incentives to stimulate expansion of general assistance programs. (SB)

Identifiers—Illinois

The finding that turnover rates for school superintendents are highest in small districts has been reflected in a number of studies. To further examine the finding, a survey in Illinois used a stratified random sample of 100 school districts, 32 of which had 499 or less students. With 1974-75 as a base year, the average years served by superintendents of each district over a 17 year span was calculated. Small districts showed the greatest amount of turnover with the typical small district served by four superintendents who served about four years each. Seven districts had six or more superintendents. Seventy percent of the small district superintendents moved at least once in 12 years. The major factor prompting the changes was differences between the superintendents and school board and/or community over what schools should be doing. Career mobility for those changing positions was limited as they generally moved in a restricted geographical area among districts of the same size and type. Examples of vertical mobility to districts with higher salaries and greater numbers of students were rare. Study findings suggested several avenues for future exploration, including examination of educational consequences of turnovers and mobility, inspection of the psychological health of the superintendents, and analysis of victories for superintendents where the process of politics produced success for all concerned or where the moves were upward in job mobility. Identifiers—Missouri

Administrators, counselors, university faculty, and dropouts met initially to discuss the dropout problem and to design a questionnaire which was administered to 270 dropouts from secondary schools in 5 Missouri Ozark school districts and was designed primarily to determine the perceived need or desire for additional vocational or academic training and to indicate to the schools factors contributing to school dropout. As the project evolved, however, the purpose became that of discovering the life and labor situation of the dropout. Significant discrepancies noted between counselor and administrator preconceptions of dropouts and resulting data led to discussions of validity and the establishment of more effective programs, and raised the question of the appropriate application of research data. Followup meetings with dropouts began a process which led to the establishment of classes in preparation for the GED, the establishment of vocational outreach counselors, a survey of businesses and job opportunities in the area, and the establishment of Community Occupational and Training Counselors to combine school, community, and family resources to provide more effective career and vocational counseling programs for students of limited aspirations. It was tentatively concluded that field and evaluation research can be utilized to formulate plans, objectives, and programs intended to reduce school dropout rate and improve employability. (SB)

Identifiers—*United States (West)

Staffs of 32 small Western rural high schools with fewer than 200 students were the focus of a study designed to: generate attitudinal "profiles" of teachers and principals about rural teaching, teachers, and students; compare profiles of teachers with those of principals to determine possible sources of conflict; learn schools' strengths and weaknesses; indicate some directions to help alleviate rural education problems; and seek teacher opinion regarding preservice and inservice programs, teacher satisfaction and adjustment, and school problems. Rural teachers surveyed tended to have rural backgrounds, had taught an average of 6 to 10 years, and were basically content to remain in their current schools. Their initial adjustment difficulties resulted from inadequate rural facilities. Teachers felt rural schools offered more individual attention, better discipline, and closer teacher-student relationships, but weaker curricula and school-community relations. Teachers and principals agreed as to the seriousness of some student problems (alcoholism, and

lack of parental support, educational goals, and motivation), but differed as to the seriousness of student vandalism and drug use. Such polarization contributed to poor morale and lessened effectiveness on occasion. It was also concluded that preservice programs needed some changes, including greater emphasis on rural experiences, and that inservice programs were inadequate. (SB)

Identifiers—*Allocation Formulas, Australia, Community and Cultural Education Project, Community Development Project, Country Education Project, Lofoten Project, Minnesota (Staples), National Institute of Education, Norway, Office of Education, Scotland

Case studies of local development projects in Scotland, Norway, Australia, and the United States (Minnesota) indicate that federal education programs of a "generative" nature (those linking educational improvement to other improvement efforts, emphasizing process, and stimulating grass-roots participation) are most likely to promote education as an aid to rural community development. Analysis of NIE, USOE, and Assistant Secretary for Education programs reveals that while rural schools receive a fair share of federal monies under these programs, they may be at a disadvantage when allocation formulas are based on numbers rather than percentages. Localities may suffer from policies that address only individual or national needs. There is need for a careful analysis and restructuring of federal programs to emphasize a long-range view and to integrate programs and services in order to approach rural problems comprehensively. Specifically, programs with special potential for rural community development and education should be identified and their guidelines overhauled to accomodate the rural sector. Those federal programs for rural districts which could feasibly be combined should be bundled into "block grants". Appropriate parties should examine the "enabling" potential of all federal education programs and provide for it when it is absent. (SB)

Identifiers—*American Indian Education, Congress 95th, Federal Indian Relationship

Programs to supplement government efforts in Indian education were explored in three days of hearings held in September and October of 1977. The first two days of testimony involved bilingual and bicultural aspects of Indian education. Appearing first were officials from the Department of Health, Education and Welfare Office of Bilingual Education and the Bureau of Indian Affairs Office of Indian Education Programs. Both men explained their departments' past and current efforts in bilingual education. Witnesses from local and state level groups involved in Indian education plus other representatives of federal government and national organizations also testified. A dominant theme of much of the testimony was the need to expand bilingual education to include cultural preservation, especially the preservation of the Indian dialects and languages. Other needs cited included expansion of research and cultural studies, undergraduate programs for training Native American bilingual instructors, certification of native speakers, development of on-site curriculum materials, and additional centers for creating and disseminating bilingual materials. The third day of hearings was concerned with P.L. 92-318, the Indian Education Act. Witnesses lauded the spirit of the act and its accomplishments, but suggestions for improvement included: (1) federal funding to teach cultures; (2) research authority; (3) changes in entitlement formulas; and (4) technical assistance to parent committees. Identifiers—*Iowa

Alternatives in coping with the problems related to declining enrollment in rural school districts were explored in a study undertaken in 1976 by a special committee appointed by the Iowa Association of School Boards. Over a two year period the 18 member committee examined enrollment, finance, curriculum, facilities, faculty, mergers, and other appropriate matters. In four two-day meetings the group heard from a wide variety of witnesses, including state legislators, school administrators, university experts, school board members, and state officials. A number of strengths as well as hazards were identified. Small districts (below 800 enrollment) offered certain advantages, including more opportunity to participate in a variety of activities, more chance to develop leadership skills, stronger community involvement, a higher level of teacher satisfaction, test scores equal or better to students in larger districts, and more stability in graduates in terms of further education and employment. Merging of small districts may provide a "grace period" from the problems of declining enrollment but will not eliminate them. Problems will intensify for small districts and long range planning should be undertaken for every small district. The present headcount system of funding should be modified to compensate fixed costs which persist even as enrollment declines. This document summarizes the proceedings at each of the meetings, lists resource material and contents, and gives the conclusions and recommendations formulated by the committee. (DS)

In July, 1976, Alaska's 21 Regional Educational Attendance Areas (REAAs) came into being; these REAAs provide elementary and secondary education in a huge geographical area for approximately 11,000 pupils, 70% of whom are Native. Prior to 1976 education for these rural areas was controlled centrally by a distant state agency. Beginning in 1975, the REAAs had a one-year transition period in which to draw regional boundaries, elect and minimally train school boards, hire staffs, and locate offices. Substantive educational issues have emerged following the completion of the second year of REAA operation. Among these issues are: how local does local control need to be; has 100% state financing for REAAs provided sufficient resources; how can board members, administrators, and teachers acquire more training in their roles and an understanding of each other; how can curriculum and programs integrate education into the local community and its culture; and how can the amount and type of resources and technology available to both teachers and students be increased. Despite the significance of the vent of the REAAs, little official attention has been directed toward researching or systematically evaluating the phenomenon. Without adequately focused, implemented and disseminated research, development of quality education in rural Alaska seems unlikely. This study of the REAAs utilizes information from mail questionnaires to superintendents and board members, existing data, one case study, isolated individual studies, and an end-of-project seminar. A window into the customs, folklore, and cultural heritage of Appalachia is provided in this volume, the third in the series of "Foxfire" books. Compiled by high school students at Rabun Gap-Nacoochee school, it is based on personal interviews with longtime residents of Appalachian Georgia. In many cases the material is in the words of the resident. Both photographs and diagrams supplement the written material. A number of "how tos" are featured, including how to make banjos and dulcimers, butter churns, a smokehouse, cornshuck mops, dolls and hats, broomcorn brooms, drinking gourds, and gourd houses for purple martins. A recipe for moonshine whiskey is included in the reminiscences of an 82 year old moonshiner. Another chapter deals with harvesting ginseng and the uses for the precious root. A wide variety of summer and fall wild plant foods are discussed and recipes for preparing them are presented. Other chapters explore tanning hides, raising cattle, building a lumber kiln, caring for animals, and making apple butter and sorghum molasses. A few chapters focus on the people themselves and present a picture of past mountain ways. An introduction by Eliot Wigginton describes the growth, philosophy, and accomplishments of the Foxfire program, an experiential education project that takes students out of the classroom and into the community. A list in the appendix provides the names of the students and community contacts who produced this book as well as the names and addresses of other high school groups related to the Foxfire movement. Identifiers—*Appalachia, Cultural Journalism
Planting by the signs of the moon, well digging, hewing logs, wood carving, knife making, bird trapping, and horsetrading are but a few of the aspects of Appalachian culture explored in "Foxfire 4." Like its predecessors, the volume was compiled by high school students at Rabun Gap-Nacoochee School. Information on the cultural heritage of Appalachian Georgia was gathered with photographs and tape recorded interviews of long-time area residents. Much of the narrative is in the words of the natives themselves and folk humor and wisdom and the flavor of past years are captured in their reminiscences. Subjects discussed include directions for making berry buckets, cheese, sassafras tea, corn shuck chair bottoms, coffins, a still furnace, a dishrag from a gourd, and pine resin tar. A chapter on logging describes old time logging methods, training oxen, sawmills, logging camps, and modern logging. An introduction by Eliot Wigginton, the English teacher who initiated this cultural journalism program, tells of the progress of the Foxfire movement. An afterword by Richard M. Dorson provides references for other sources of folklore and folklife. Included in the appendix are a listing of the students and community contacts who produced this book as well as a list of periodicals and resource material about the Appalachian region. (DS)

Identifiers—*Marion County Youth Study, Nonmetropolitan Areas
Demographic, economic, and educational indicators, especially as shown in the Marion County Youth Study, suggest that strategies that deal with the problems of rural youth and which assume mobility to metropolitan areas may be outmoded and inadequate. Outmigration is, however, faced by many rural youth and its success is dependent upon formal credentials. There is need for a strategy which combines educational preparation, opportunities for enhancing successful outmigration, and innovative public employment. In particular, a new careers program in the human services area could provide untrained non-metropolitan workers with a variety of lower level positions (research assistants, teacher aides, nurses' aides) while providing on-the-job training. Such a program would offer non-metropolitan youth a means to develop both skills and status, achieve personal realization and dignity, and learn skills marketable in both metropolitan and non-metropolitan areas. It is a method through which non-metropolitan areas themselves would benefit. Because much training would be at existing agency structures, limited rural resources could be stretched. While removing persons from the group needing human services, the new careers program would provide additional staff members at lower cost and gradually improve the quality of the staff in non-metropolitan areas. Identifiers—Farm Size, Nonmetropolitan Areas
The papers in this volume are concerned with rural development, with emphasis on the problems of low-income groups. Stephen McDonald explores economic factors in farm outmigration. Virgil Christian, Jr. and Adamantios Pepelasis discuss the extent and importance of economies of size in agriculture. Thomas Till analyzes the nature and extent of nonmetropolitan industrialization, especially in the South. In his analysis of economic growth, poverty, and race in the nonmetropolitan Deep South, James Walker makes it clear that poverty in the U.S. is disproportionately a nonmetropolitan Southern phenomenon. Niles Hansen defines the growth center concept, evaluates the experiences of the Appalachian Regional Commission and the Economic Development Administration, and concludes with a defense of a human resource development and growth center strategy. Ray Marshall summarizes the issues and concludes that economic development depends heavily on the quality of human resource development; public policy should make it possible for those who elect to remain in rural areas to develop themselves to the point where they can at least earn enough to elevate themselves out of poverty. Marshall suggests that the kinds of activities likely to promote rural human resource development should include improvements in the quality and quantity of rural education (especially vocational-technical education) to prepare people for nonfarm as well as farm jobs. Identifiers—American Indian Education, Bureau of Indian Affairs, Federal Indian Relationship, *Indian Action Team Program, Indian Technical Assistance Center
Comments from program directors, Indian contractors, and tribal leaders are considered in the report of the Bureau of Indian Affairs' (B.I.A.) Indian Action Team Program, implemented in 1972 to provide Indian people living on reservations with job training through Indian Technical Assistance Center contracts with tribal groups. Funding was $66.2 million to 1977, when there were 63 contracts. The B.I.A., through its Indian Technical Assistance Center, needs to determine the effectiveness of the training program by establishing evaluation measurements and then modifying the Indian contracts to reflect the measurement criteria and reporting requirements. The Center should evaluate the contractors' performance to determine which programs should not continue to be funded. Proposed programs should be evaluated and the best ones funded when money becomes available. In addition, the B.I.A. should assist tribes in their training efforts by reviewing all Indian Action Team Program contracts with Indian contractors to determine the need for technical assistance and then providing it. Benefits to the tribes from the program include job training, substantial improvements to various Indian facilities, and increased pride. (SB)

Identifiers—*American Indian Education, *Bureau of Indian Affairs, Federal Indian Relationship
The Bureau of Indian Affairs (B.I.A.) estimates that as of January, 1978, about $300 million would be needed to renovate or construct school facilities for Indian children. The B.I.A. could save millions of Federal dollars by enforcing its policy of having Indian children attend nearby public schools when adequate facilities exist and by establishing and enforcing the policy of requiring attendance at nearby B.I.A. schools with available space, instead of renovating old schools or constructing new ones. Also, there exists no formal policy regarding the size of B.I.A. schools. Prior to construction, the B.I.A. should compare the cost (and cultural and academic benefits) of building more, smaller, scattered schools, as desired by the tribes and the B.I.A. Director of Education, against building fewer, more economically operated, centrally located larger schools. Finally, the 1979 B.I.A. school construction priority list is unreliable because it was developed without necessary planning data; B.I.A. did not verify data submitted on school construction applications, and policy concerning attendance boundaries is unclear. The B.I.A. should require comprehensive planning data, verify application data, and clarify attendance boundary policies before establishing a priority list of facilities needed to meet educational needs of Indian children. Identifiers—Bureau of Indian Affairs, Economic Development Edministration, *Federal Indian Relationship, *Indian Financing Act 1974
Profitable businesses are needed on Indian reservations to help Indians overcome cultural and economic barriers, become self-sufficient, and achieve a standard of living comparable to that enjoyed by non-Indians in neighboring communities; the 25 loan, grant, and technical assistance programs administered by 8 federal agencies, however, have not successfully promoted such necessary economic development. Congress should consolidate the programs into a single agency which would then be better able to identify those reservations with the best potential for business development, and to promote it aggressively in those locations while providing financial, technical, and managerial assistance when needed. For other reservations, the agency should determine whether long-term federal financial assistance is needed or alternative strategies

should be developed. The Bureau of Indian Affairs should also correct its administration of the Indian Financing Act of 1974, in part by reevaluation of its loan policy and by obtaining and evaluating required documentation prior to awarding loans or grants. Finally, Congress should determine whether the approximately 300,000 Indians excluded from obtaining guaranteed loans via the Indian Financing Act should be eligible for its benefits and if so, Congress should amend the Act accordingly. Identifiers—Bureau of Indian Affairs, Federal Indian Relationship, *Indian Financing Act 1974

The first full year of the Indian Financing Act of 1974 was fiscal 1976, after which $91 million had been appropriated for the Revolving Loan Fund, the Loan Guaranty and Insurance Fund, and the Indian Business Development Grant Program. The Revolving Loan Fund, consolidated from 4 previous funds, was underutilized. Only $13.3 million was loaned to tribes, credit associations, and individuals, as against $41 million appropriated. The Loan Fund cash balance decreased, loans receivable increased, allowance for losses was unchanged, and Indian organization funds used to finance economic development of tribes and their members increased to $197.6 million. The Insurance Fund was not utilized by any lenders but the Bureau of Indian Affairs entered into 54 new Loan Guaranty Agreements, mostly guaranteed at 90%, for a total of $14.8 million. The $28.1 loaned under the Revolving Loan Fund and the Loan Guaranty Program helped offset the need of an estimated $1 billion of Indian financing. The Indian Business Development Grant Program contributed to the financing of economic enterprises with 665 grants for $9 million, mostly to individual proprietorships and partnerships, to establish new businesses or acquire or expand established businesses. Identifiers—Bureau of Indian Affairs, Federal Indian Relationship, *Indian Financing Act 1974

The Indian Financing Act of 1974 was vital legislation to Indians, previously prevented from obtaining credit from non-Indian lenders who customarily categorized Indians as poor credit risks or set interest rates prohibitively high. Problems in preparation of the administrative regulations delayed initial implementation of the Act until December 1974, and the legislation was not fully effective until March 1975. In fiscal 1975, when approximately $1 billion was needed for Indian financing of housing, industrial development, group commerical enterprises, tribal land purchase, recreational development, civic facilities, and individual loans, $38 million was appropriated for the Revolving Loan Fund, $20 million for the Loan Guaranty and Insurance Fund, and $10 million for the Indian Business Development Grant Program. The cash balance of the Revolving Loan Fund increased to $35 million, loans receivable increased to $26.4 million, and allowance for losses increased to $4 million. Loans of tribal funds and Revolving Loan Funds to tribal members, associations, and enterprises totalled $211 million and brought to a total of $140 million the loans to 64,618 individuals. Outstanding and delinquent loans decreased. Grants totalling $9.7 million and averaging $16,300 were made to individual proprietorships and partnerships, tribes, and tribal organizations to expand, establish, or acquire businesses. (SB)

Identifiers—*Change

In 1974 the Rural Sociological Society commissioned a survey on changes that were occuring in different segments of rural society in the United States; information from that survey is presented in the volume of readings. Using an ecological perspective as the analytic framework, the readings focus on the adaption of humans to their environment a process carried out largely by means of culture. Parts One through Three present a general overview and discussion of the rural environment and population with chapters entitled "Contemporary Rural America: Persistence and Change," "The Rural Environment, Quality and Conflicts in Land Use," "People on the Land," and "The Changing Character of the Nonmetropolitan Population: 1950-75." Parts Four through Six discuss human cultural response to rural environments; Part Four deals with technological systems with a chapter titled "Rural Social Organization: Implications of Technology and Industry." Part Five discusses the values and beliefs of rural people, and Part Six describes aspects of social organization with five chapters treating rural community change, rural government and local public services, ethnic minorities and their adaptive response to inequality, new rules for rural women, and rural poverty. The final portion of the book focuses on the future with two articles on "Public Policy and Rural Social Change" and "Alternative Futures for Rural America: The Cloudy Crystal Ball." (DS)

Identifiers—Kentucky, Southern Regional Research Project S 114, *University of Western Kentucky

Background characteristics of agriculture students at Western Kentucky University (WKU), the factors affecting their choice of careers, their goals and expectations, and certain agriculture related attitudes were examined in 1978 in a survey of 150 randomly selected agriculture students at that university. Similarities and differences with their counterparts at the 1862 land grant universities in the South were also determined. In racial composition and citizenship, WKU students were very similar to students in land grant schools, but the proportion of female students and married students was slightly lower. Western Kentucky students were far more rural with 57 percent claiming country residence. Twenty-nine percent expected to earn a master's degree and 77 percent of these hoped to do graduate work in agriculture. Major sources of financial support by WKU students were their own savings, parents' savings, summer jobs, and part time work. Tabular data in this document summarize the responses of both groups to questions dealing with general background characteristics, high school and work experiences, people and factors deemed important in choice of agriculture as a major, financial support and educational aspirations and expectations. Tables also show occupational and income expectations, attitudes on women's rights and ecological issues, and perceptions about the field of agriculture and agriculture students. (DS)

In 1978, 150 randomly selected agriculture students at Murray State University were surveyed to determine their general background characteristics, high school characteristics, work experiences, people and factors influential in their choice of a college major, goals and expectations, and selected agriculture related attitudes. The agriculture students' similarities and differences with counterparts at the 1862 land grant universities in the South were also determined. Over 95 percent of Murray State agriculture students were white and one in five was female. Murray students were more rural with 58 percent claiming farm or open country residence, a proportion twice as great as that of land grant schools. Slightly more than 60 percent of students in both groups mentioned parental influence in their choice of career major. Eighty-seven percent of the Murray students cited preference for country life as a reason for choosing the agriculture major. A higher proportion of Murray students (84 percent) depended on scholarships and student loans and grants as a source for financial support. This study is a part of the Southern Regional Research Project S-114, which seeks to obtain a better understanding of the reasons why students select agriculture as their major, as well as the factors relating to their career choices. Tabular data summarize the percentage responses of both study groups. (DS)

Identifiers—Kentucky, *Murray State University KY, Southern Regional Research Project S 114, *Western Kentucky University

Southern Regional Research Project S-114 was initiated to obtain a better understanding of why students select agriculture as a college major and to study the factors related to their career choices; as a part of this study, in 1977 characteristics of agriculture students at two regional state universities in Kentucky were determined. The similarities and differences between students at Murray State University and Western Kentucky University with their counterparts attending the 1862 land grant universities in the South were also compiled. Agricultural students at the two regional schools were more rural, had greater numbers of parents working as full time farmers, and had more parents with lower incomes and educational attainment. Twice as many took agricultural courses in high school. Sixty-eight percent of the regional state university students expected to farm alone compared to 29 percent of the agriculture students in land grant universities. When asked to respond to statements on women's rights and ecological issues, the Kentucky students were more traditional in their views. Tabular data on all groups of respondents summarize background characteristics, high school and work experience, factors and people affecting career choices, college activities, financial support, educational aspirations and expectations, occupational and income expectations, attitudes, and perceptions on the field of agriculture and agriculture students. Identifiers—*Change

An understanding of twentieth century changes in the rural section of the United States is more easily gained if initial changes are first examined in the areas of agricultural technology, farm organization and occupational structure, transportation, communication, urban population distribution, and rural economics. This collection of readings is directed toward an understanding of the changes in these areas. Four chapters in Section One include 25 articles that focus on the nature and magnitude of changes in agricultural technology and review the consequences for the numbers and characteristics of farm people, rural neighborhoods and communities, the urban sector, and society as a whole. Ten articles in Section Two deal with the nature and size of changes in farm organizational, occupational, and class structure; eight more articles are concerned with the consequences for all sectors of society. Section Three addresses the question of what major causal forces brought about the changes in farm technology, size, and organizational structure. In Section Four, 23 articles give an historical overview of U.S. rural communities and describe the impact of changes in transportation and communications, urban population distribution, and rural economic base. The final section is directed toward alternatives for the future and includes solutions to problems created by changes in the six focal areas. (Author/DS)

Identifiers—Agency for International Development, *Ecuador, University of Massachusetts Nonformal Educ Project

Operating under the philosophy that people can learn from each other, the Nonformal Education Project trained 24 Ecuadorian campesinos in seven rural mestizo villages to instruct their peers in basic litaracy skills, negotiating techniques, and the development of self-esteem. Within a year of operation some of the original "facilitators" were setting up similar training programs for other villages. Some of the teaching methods were based on instructional games developed specifically for the project. Criteria for the games were that they be low cost and easily produced, require little training to play, and be interesting enough to be used over and over. "Hacienda," a Monopoly-like board game, was at times played by 6 to 40 participants; it explored a wide variety of community activities and situations. Other games were "Letter Rummy," "Addition Bingo," and "Math Roulette." The facilitators also instituted 26 community development projects, 13 of which were successfully completed. After a year of operation, a number of conclusions for the project could be reached: a felt need for literacy is a sufficient motivating force to bring a portion of people in a campesino community together for daily meetings, and local Facilitators can conduct meetings, are acceptable as teachers, and can design and run training programs. Results of the project imply that basic educational needs in rural areas of the third world could be satisfied by non-professional educators using materials which promote participation and dialogue; Jorge can do it. Long ago the traditional way for Yakima Indian children to learn was by listening for long hours to the grandparents or other story tellers. In keeping with this auditory tradition, this book teaches prereading skills through use of sequenced pictures and stories that children will retell after learning. It helps the teacher assist Indian children to cope with the change from auditory ways of learning to today's emphasis on visual learning. Although the book's ten tales are new, they use the traditional Yakima approach of using stories with animal characters to pass on information. One story tells of two large beavers fighting so mightily they dig the Yakima river bed. Another story tells of how Jackrabbit trapped the sun and wound up with the scorched brown patch on his back that he carries today. The illustrations of the book may be dittoed for each child to have his own copy or used on a flannel board. They provide opportunities for children to talk, recall, and sequence events. Geographical locations on the Yakima Reservation as well as a few Yakima language words are used in each story for cultural reinforcement. Other early childhood programs using the book might substitute names and terms relevant to their own localities. (Author/DS)

Rural Schools Prototype Analysis. Volume I: Design, Determinants and Options.

Construction Systems Management, Inc., Anchorage, Alaska.

Spons Agency—Alaska State Dept. of Transportation and Public Facilities, Anchorage.

Pub Date—1 Aug 78

Note—474p.

Pub Type— Guides - Non-Classroom (055)

EDRS Price - MF01/PC19 Plus Postage.

Descriptors—Architectural Programing, *Building Design, Educational Facilities, Educational Specifications, *Facility Guidelines, *Facility Planning, *Facility Requirements, Facility Utilization Research, Physical Design Needs, Rural Education, *Rural Schools, School Design, Secondary Schools, Site Analysis, *Small Schools, Space Utilization

Identifiers—*Alaska, Architectural Planning

This resource guide presents Design Determinants and Options to be used by designers, school district personnel, and State officials in the programing and design of small rural secondary schools in the Alaska bush. The vast and unconventional educational and space planning challenge is compounded by: the need to provide most or all of the utilities; inappropriate technology; difficult logistics for construction, maintenance, and operation; and a harsh natural environment. Three Design Determinants–major groups of critical factors that affect facility programing and design–are Building Program Determinants (facility use, for what purpose, by whom and how many, maintenance skills level, fire and life safety, etc.), Environmental Determinants (climate, geotechnical and hydrological factors, logistics), and Site Utilities Determinants (water, waste disposal, electricity). Design Options are systems, elements, and concepts selected by a designer and based on Design Determinant information gathered prior to programing. These options refer to building safety and health requirements; site utilities; siting of buildings; building envelope, structure, and utilities; and building programs for secondary schools, in which detailed options are given for facilities for 4 separate enrollment groups as defined by the Department of Education: 10 or fewer, 11 to 20, 21 to 32, and 33 to 46. Identifiers—*Alaska, Architectural Planning, Schematic Designs

Volume II of a 3-volume report demonstrates the use of Design Determinants and Options (presented in Volume I) in the planning and design of small rural Alaskan secondary schools. Section I, a checklist for gathering site-specific information to be used as a data base for facility design, is organized in the same format as Volume I, which can be used as a reference. Section 2 demonstrates the 3-phase design process for a school in a fictitious Alaskan village: (1) Design Determinant Identification indicates the format and type of information required to program the facility; (2) Design Option Selection demonstrates the process of selecting and justifying various alternative systems (such as for the roof or foundation), using the checklist information gathered in phase 1 as a data base; and (3) Schematic Design includes a written description of design retionale as well as schematic drawings of the

projected facility and site. The fictitious school used in the example has a construction budget of $1,-250,000 and would serve 17 students with a staff of 1 1/2 teachers; the building would be used a great deal after school hours by the community, which is located in a transitional climatic zone and experiences yearly flooding. Identifiers—*Adventure Education
Guidebook descriptions of the 3000 worldwide adventure trips open to public participation include highlights, itinerary, level of experience necessary, requirements, location, duration, dates, cost, and addresses and telephone numbers of the operating organizations. The guidebook is organized in four major sections and, within each section, into specific activities, each with an overview. The sections and activities are: Land Adventures (skiing, mountaineering, snowshoeing, dogsledding, trekking, wildlife safaris, nature trips, caravanning, horsepacking, cattle driving, caving, backpacking, archaeology/anthropology, overlanding, research expeditions, bicycle touring, wilderness survival); Air Adventures (ballooning, soaring, flying, hang gliding, parasailing/parachuting); Water Adventures (river rafting, canoeing, kayaking, sailing, windjamming, cruising, houseboating, research expeditions, nature trips); and Underwater Adventures (diving). Specific activities are organized geographically by continents and marine areas, then by countries, states, and provinces, where appropriate. There is a resource addendum for each activity which lists pertinent clubs, associations, rental agencies, and consultants. Indices organized by activity within geographical area and by trip operators provide for easy referencing. (SB)

A Select Bibliography of Environmental Education Materials.
Spons Agency—Upper Mississippi River ECO-Center, Thomson, Ill.
Pub Date—76
Note—45p.; Not available in hardcopy due to extensive use of colored paper in original document
Available from—Upper Mississippi River ECO-Center, Thompson, Illinois 61285 ($1.00)
Pub Type— Reference Materials - Bibliographies (131)
EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors—*Audiovisual Aids, *Books, Cooperatives, Educational Equipment, Educational Games, *Educational Resources, *Environmental Education, Experiential Learning, *Instructional Materials, Learning Modules, *Outdoor Education, Pamphlets
All materials in the Upper Mississippi River ECO-Center bibliography are classified by Dewey Decimal number, so the listings for each section are organized in ascending order by Dewey number, and within Dewey classification, are roughly alphabetical by author. The bibliography includes some 400 citations with sections on books, curriculum aids, audio-visual aids, kits, and games and other materials. Entries for most items include the title and author or publisher. Some entries have a level indicator, publication date, material type, and duration (for films). There is a list by Dewey number of the areas covered by the Center's pamphlet file. A classification index indicates which kind of educational material is available for each Dewey classification. Appendices include lists of sources of free loan film catalogs and environmental education curriculum materials; an annotated list of ECO-Center curriculum materials; an index of free and inexpensive curriculum materials; and a list of equipment for loan from the ECO-Center. Identifiers—*American Indian Education, Maliseet (Tribe), Micmac (Tribe), *University of New Brunswick (Canada)
In the fall of 1977 a four year project was initiated to assist a group of Micmac and Maliseet Indians to earn the Bachelor of Education degree and become eligible for teacher certification. The 41 participants were teacher's aides who wished to be upgraded to classroom teachers. To allow students to maintain their full time jobs, an on-campus, off-campus format was developed. During each of the two regular terms students attended two three week on-campus sessions, each of which was followed by a five week off-campus session. New material was introduced by course instructors during the on-campus sessions while the period away allowed time for special projects, group tutorial sessions, follow up work, etc. Roughly equivalent academic standards and course content were maintained; common assignments and tests were given whenever practical. During the six week summer session the Indian students were integrated with the general student population in arts/education courses. By September, 1978, nine students had withdrawn from the program, only one of which was forced to leave because of low academic standing. Even though less than half of the Indian students had completed high school, their mean cumulative grade point average was slightly higher than that of the regular education program. This progress report on the first year of the program's operation concludes with a number of recommendations for persons establishing similar programs. (Author/DS)

Identifiers—*Phase Diagrams
This document is a special National Bureau of Standards publication on a Workshop on Applications of Phase Diagrams in Metallurgy and Ceramics. The purposes of the Workshop were: (1) to assess the current national and international status of phase diagram determinations and evaluations for alloys, ceramics and semiconductors; (2) to determine the needs and priorities, especially technological, for phase diagram determinations and evaluations; and (3) to estimate the resources being used and potentially available for phase diagram evaluation. These proceedings reflect the detailed contents of the Workshop for both the tutorial and review sessions as well as four poster sessions and four panel sessions covering the following subjects: (1) critical phase diagram availability; (2) user needs of phase diagrams; (3) experimental methods of determination; (4) theoretical methods of calculation and prediction; (5) methods of phase diagram representations of calculation and prediction; (6) methods of phase diagram representations (especially multicomponent); and (7) distribution to the user. Three of the panels addressed the subject of phase diagram needs in industrial applications. (Author/GA)

Identifiers—*Distillation Columns
A digital computer program, STAGEF, designed for use with the distillation experiments in a typical undergraduate Chemical Engineering laboratory in Unit Operations is explained. The program enables the student to determine the rate of liquid overflow and vapor boil-up which leaves each tray within the distillation column. The student may also obtain the vapor compositions and then calculate stage efficiencies from these compositions. The program may be used with binary or multicomponent separations. STAGEF is written in subroutines, and three of these, which contain the computations unique to STAGEF, are described in detail. (Author/GA)

Nuclear Science.
Pennsylvania State Dept. of Education, Harrisburg. Bureau of Curriculum Services.
Pub Date—77
Note—125p.; Appendix marginally legible
Pub Type— Guides - General (050)
EDRS Price - MF01/PC05 Plus Postage.
Descriptors—Atomic Theory, Biology, Chemistry, *Curriculum, Experiments, Instructional Materials, *Laboratory Safety, *Nuclear Physics, *Physical Sciences, Physics, Science Education, *Secondary Education
This document is a report on a course in nuclear science for the high school curriculum. The course is designed to provide a basic but comprehensive understanding of the atom in the light of modern knowledge, and to show how people attempt to harness the tremendous energy liberated through fission and fusion reactions. The course crosses what are considered the normal disciplines of science, entering into the three basic fields (biology, chemistry, physics). The document includes sections on laboratory safety and health physics, sources of radioisotope licensing, textbooks and references, equipment, types of students taking the course, an outline of the course of study and its units, laboratory experiments and techniques, and a list of teaching aids. The Appendix contains the United States Nuclear Regulatory Commission Rules and Regulations. (GA)

EDRS Price - MF01 Plus Postage. PC Not Available from EDRS.
Descriptors—*Astronomy, *College Science, *Course Descriptions, *Curriculum Development, Evaluation, Higher Education, Instruction, *Liberal Arts Majors, *Physics, Science Education
This publication is the final report of the activities

performed in the development of an introductory astronomy course operated in a competency based mode. The objective was for the course to be completely opposite from one which emphasizes memorization of factual knowledge. Instead, the student was to be involved in activities where he or she would have to solve problems in a fashion analogous to that of a working scientist. The report discusses the structure of the new course, the bookkeeping system and procedure for evaluation. The report also includes results of evaluation of student populations, relative merits of the new course versus the old, student attitudes, and costs of operating the new course. (Author/GA)
